WESTERN FACTORY

DAYTON, OHIO

CIRCULAR

Your attention is respectfully invited to the accompanying CATALOGUE OF HARDWARE, which will be found to embrace an increased variety of very desirable kinds, comprising a larger assortment than can be found at any other manufacturing establishment in America.

To the quality of our goods we ask special attention, and invite a careful comparison with any other maker's goods of corresponding kind.

We are prepared to make any desirable style or kind of goods that may be demanded in our branch of business.

Our facilities and experience enable us, and we are determined, to furnish goods on the most favorable terms, and we invite the Trade to examine our goods and prices, which can be done at either of our Warehouses, or at our Factories.

In addition to goods of our own manufacture, we have such arrangements with other manufacturers as to enable us to supply a large variety of Hardware, suited to every branch of the Trade, upon the same terms which the manufacturers sell the same.

— 1853 —

PREFACE

In putting before the trade our Catalogue Volume IX. we would call attention to the following features : —

SCOPE.—This Catalogue is designed to give, within the limits of a single volume, all the goods manufactured or sold by us which were to be found hitherto in Catalogue Volume VIII. and its various supplements. In addition, there are given on pages 155 to 198 such designs of Ornamented House Trimmings as are in general demand.

ARRANGEMENT.—Long usage has familiarized our customers with the order of previous catalogues; and we have not ventured to depart in any marked degree from the arrangement followed in Catalogue Volume VIII. The only notable changes are the insertion of Lock Sets on pages 119 to 154D, and the Design Section, pages 155 to 198, already mentioned. The general employment of half-size cuts has enabled us to reduce the size of the book materially.

NUMBERING OF GOODS.—The large increase in our line of Ornamented House Trimmings has rendered our old system of numbers cumbersome; and in this Catalogue a new scheme has been adopted which applies to Knobs, Escutcheons, and most Miscellaneous Goods. For example, Knob No. 951 will invariably signify a $2\frac{1}{4}$ -inch knob, and the name will indicate the design to which it belongs. Orders should specify both number and name of design.

GENERAL.—Great care is exercised in the packing of all goods to assure their arrival in the hands of the consumer in as perfect a condition as when leaving the factory, and the quantities in a package are designed to meet the convenience of the retailer. In this connection we may point out that all Lock Sets are packed one in a box.

Labels are of bold and conspicuous style, making obvious the contents of boxes at a glance, and our system of using certain colors to designate goods of a particular metal or finish greatly facilitates the handling of goods and cannot fail to commend itself to those who deal in them.

In conclusion we would call attention to the reprint of our Circular of 1853, the terms of which apply as well to-day as they did nearly half a century ago.

INDEX

NOTE.—The articles covered by the various designs are not separately classified in this general index. For other knobs, escutcheons, and miscellaneous goods than those particularized below, reference should be made to pages 155 to 198.

BEVEL OF DOORS

In ordering Locks for Doors with Special Bevel, be particular to state THICKNESS of doors, as measured by one arm of a square, and the amount of bevel, as shown on the other arm.

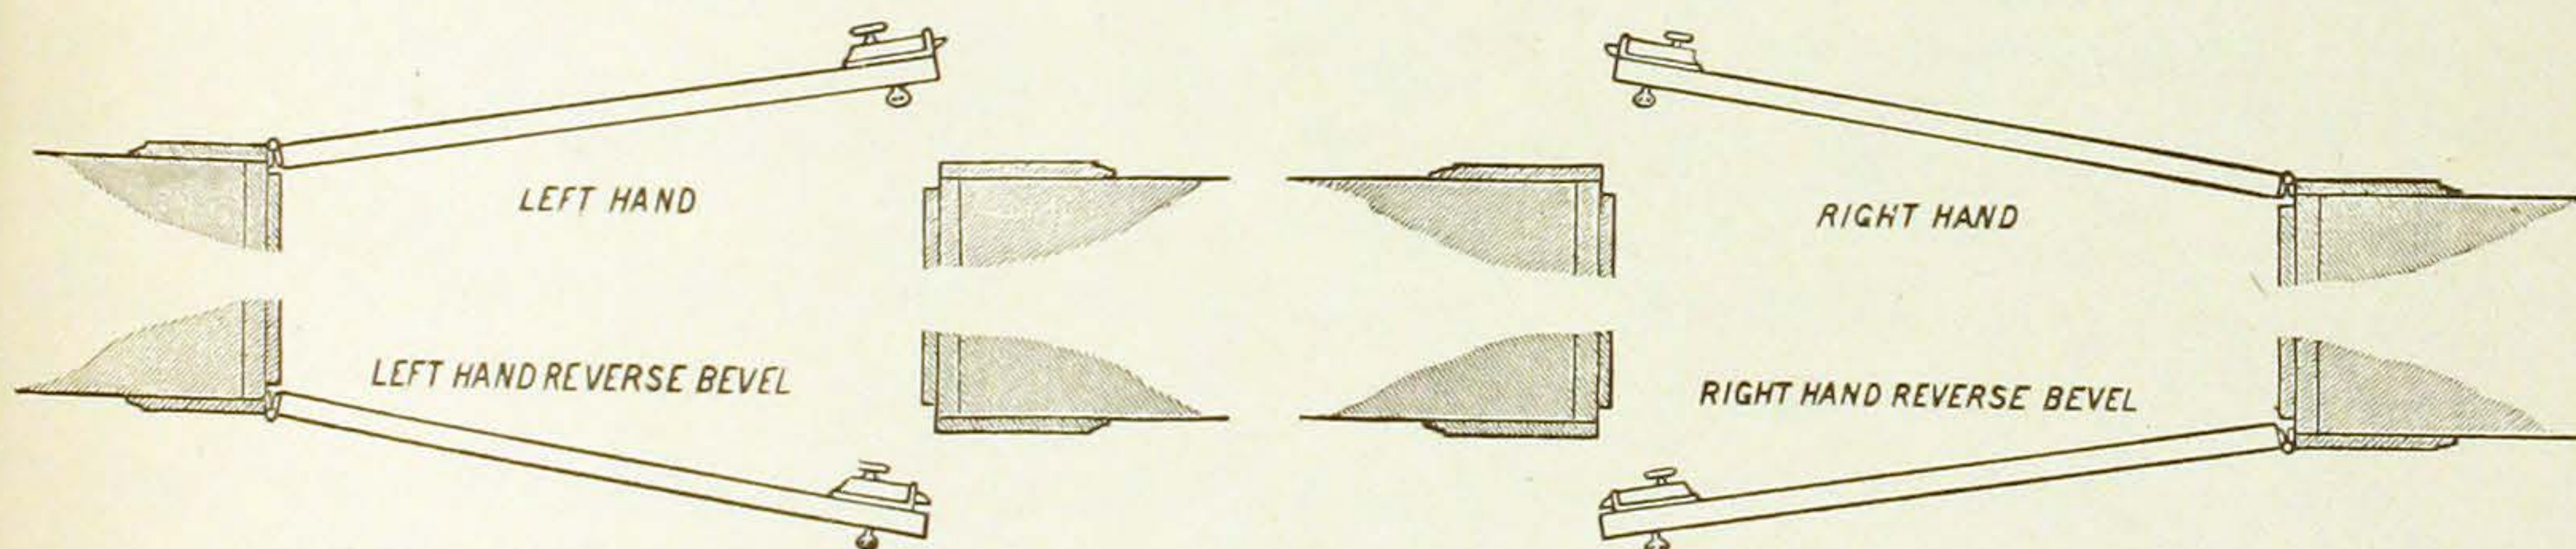

Illustration shows a bevel of $\frac{1}{4}$ on $2\frac{1}{4}$ inches.

Our regular bevel upon locks which are made with beveled fronts is $\frac{1}{8}$ on 3 inches.

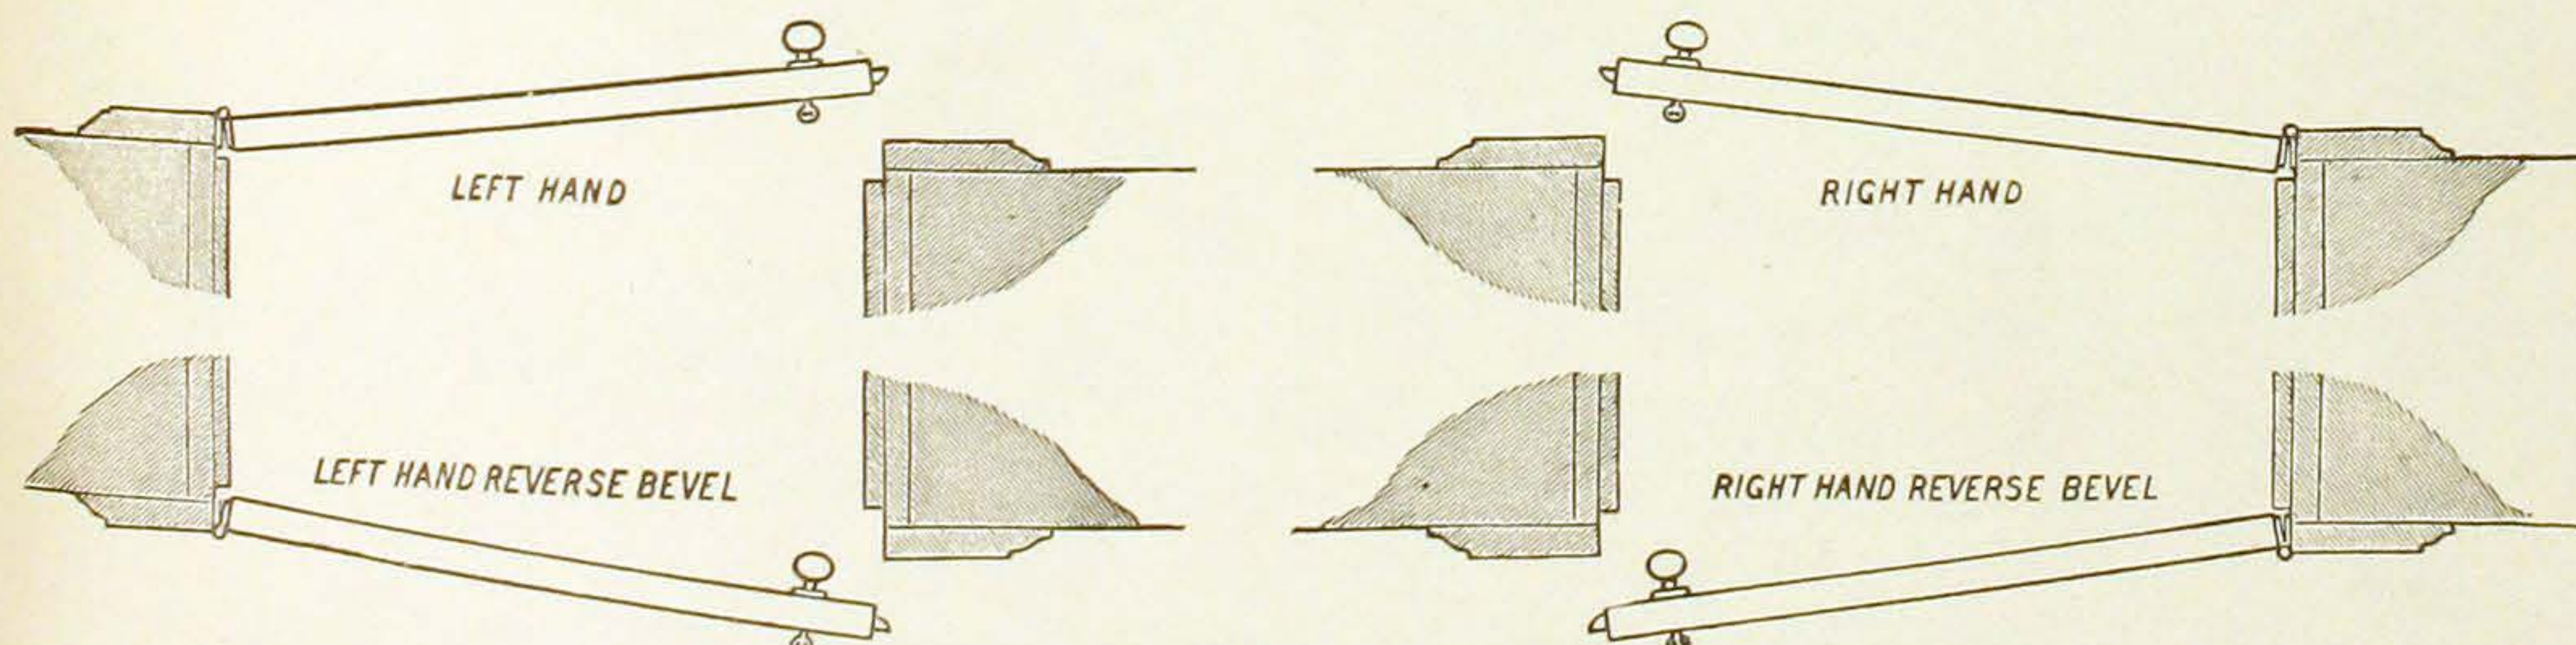

HAND OF LOCKS

RIM LOCKS

MORTISE LOCKS

Doors which require Right Hand REVERSE BEVEL Locks, need Left Hand Butts, and vice versa.

LIST OF FINISHES

IRON AND STEEL HARDWARE

Oroide Finish,	Gold Colored Plate.
Florentine “	Boston Finish, Dark Brown Color, Polished.
Kahala “	Dark Brown Color.
Finish No. 11,	Bronze-plated, Natural Bronze Color.
“ No. 3,	“ “ Black Background, Light Polished Bronze Relief.
“ No. 7,	“ “ Old Copper.
“ No. 7½,	“ “ Old Copper, Mottled.
“ No. 46,	Genuine Barff Finish, Rustless Iron.

BRONZE HARDWARE

No. 2,	Dark Bronze.

In this publication are illustrated and described all our finer grades of Cast Bronze Hardware. Styles are arranged in their chronological order as far as possible, and the classification by designs of all the various articles of one pattern admits of ready reference.

STORE DOOR HANDLES to match these designs will be found on pages 320 to 344, Catalogue, Vol. 9.

Orders should invariably specify BOTH NUMBER AND NAME OF DESIGN.

ELEUSIS—Greek.

ELEUSIS—Greek.

111

Eleusis, a coast town of Attica, opposite the Island of Salamis, in its early days rivalled Athens in the magnificence of its architecture; and the celebration of the Eleusinian Mysteries in honor of Demeter made it a place of great sanctity to all Greeks. Its chief temple was begun by Ictinus, architect of the Parthenon, and completed by Philo.

The Egg and Dart Ornament, the chief feature of the Eleusis Design, was almost universally employed in Greek architecture, and is familiar as a detail of Colonial buildings and furniture. Its affinity to this school makes the Eleusis appropriate for use upon Colonial houses.

Cast Metal, Real Bronze.

Store Door Handles: For Store Door Handles of Eleusis Design, see pages 322 to 324, Catalogue, Vol. 9.

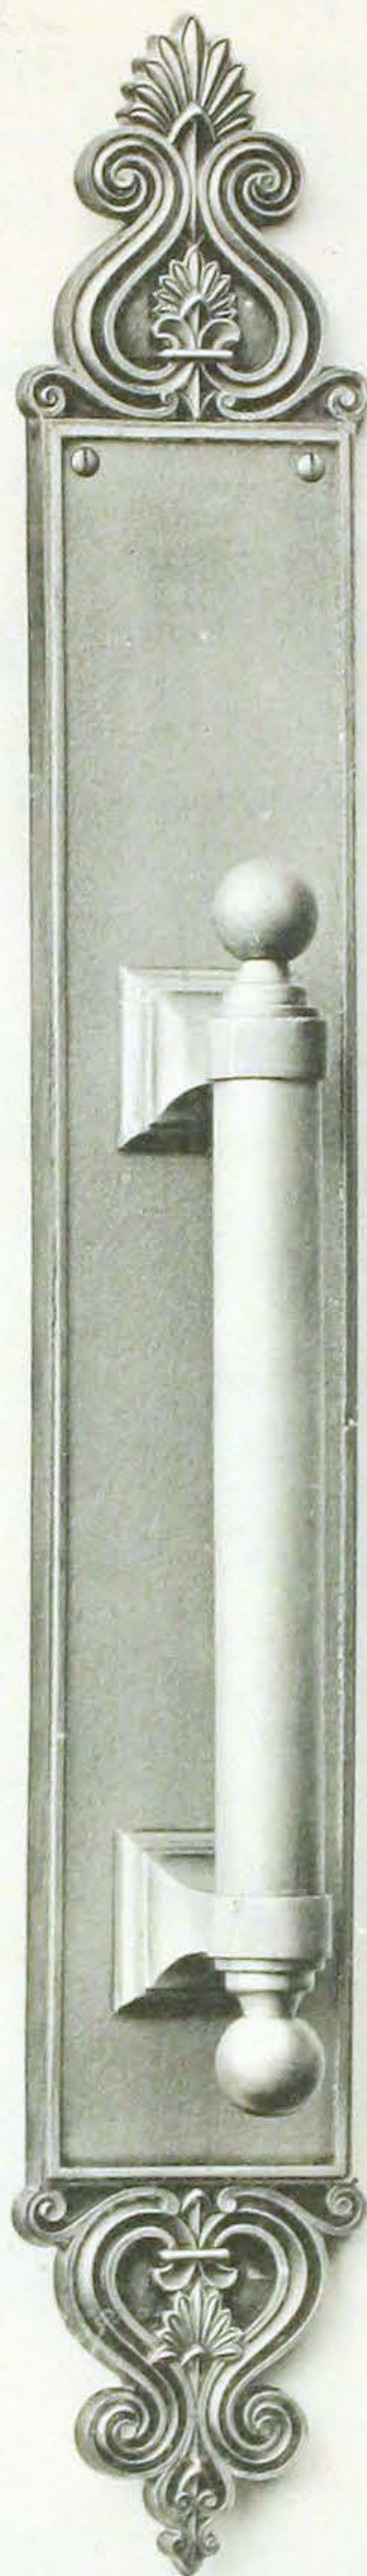

Regular Finish: Finish No. 27. Other Brass, Bronze, and Copper Sand Finishes, at the same price. Supplied in Sand Finishes only.

Appropriate Finishes: Finishes Nos. 02, 27, 28 Polished Lines, 36.

Barff: These goods can be furnished in Barff, Finish No. 46.

When ordering, give both number and name of Design, and specify Finish wanted.

AEGINA—Greek.

AEGINA—Greek.

V

The Antefix of the Temple of Athene at Aegina supplied the motive for this design. The boldness and severity of its style makes it especially suitable for buildings that rely upon mass and outline for their effect rather than upon ornament. Since the Colonial style borrowed much from the Greek, this design may properly be used upon buildings of the former school.

When ordering, give both number and name of Design, and specify Finish wanted.

WALSINGHAM—Romanesque.

WALSINGHAM—Romanesque.

VII

The earliest form in which Romanesque architecture entered England appears to have been the Norman, a modification of the Romanesque employed by the conquerors of the Saxons. Heavy masses, coarse and inelegant mouldings, distinguish the beginnings of the Romanesque school, and although it gained grace with growth, its lasting features were weight and strength. In its treatment of surfaces, interlaced ornament was characteristic, a form of ornament shown on the opposite plate. The Romanesque never attained in England to the perfection it reached in France. William de Walsingham employed it, however, in the building of Norwich Cathedral, and that building is distinctively Norman in its plan to this day.

Barff: These goods can be furnished in Barff, Finish No. 46.

When ordering, give both number and name of Design, and specify Finish wanted.

DIJON—Gothic.

Originally applied as a term of contempt by the adherents of the classical school to denote what they considered its barbarity and grotesqueness, Gothic is no longer a word of reproach, but stands for a style as honorable as the Greek. Its genius was of the North, and unlike those styles which had their origin in the East and South, its inspiration does not come from Greece. Its wide employment throughout Europe in the construction of Cathedrals, Churches, and Abbeys, has given it an ecclesiastical character; and no style is more in accord with the dignity and mystery of Catholic ritual. France produced some of the most exquisite examples of Gothic architecture, and the Cathedral of Dijon may be accounted one of them.

When ordering, give both number and name of Design, and specify Finish wanted.

VEROCCHIO—Italian Renaissance.

VEROCCHIO—Italian Renaissance.

XIII

One of the most fruitful effects of the Crusades was the awakening of interest in Greek art and literature throughout Europe. This closer acquaintance with the best work of the Hellenic mind checked the ascendancy of the Gothic school and induced the growth of a new style—the Renaissance—based upon classic models. It had its inception in Italy; and many of its noblest works are to be found in that country.

Among its triumphs in sculpture is the tomb of Giovanni and Piero de Medici, by Verocchio, in the Church of San Lorenzo, at Florence.

The broad treatment of the acanthus leaf is a striking feature of this work; and the same motive has been employed as the basis of the Verocchio design.

PISANO—Italian Renaissance.

PISANO—Italian Renaissance.

X V

Although the Renaissance had its beginnings in the 15th Century, nevertheless, its coming was foreshadowed in the work of Nicola Pisano in the 13th Century; his pulpits at Sienna and Pisa reveal a direct recourse to antique models for inspiration and suggestion.

The earlier period of the Renaissance was marked by grace and spontaneity in decoration, based upon classic prototypes, and executed with freedom and originality. Its decline saw the introduction of florid decoration and alien ornament, although classic details were still manifest. The borders of the Pisano design show the persistence of classic forms, while the ends are significant of the decline.

BRAMANTE—Italian Renaissance.

BRAMANTE—Italian Renaissance.

XVII

The intellectual tendency which gave rise to the Renaissance school emanated chiefly from Florence, and only when the first poetic enthusiasms had passed did it spread to Rome. Bramante originated the first school of the Roman Renaissance, showing in his earlier work an imagination and grace which are in contrast to the insipidity of his later creations, based upon the servile study of early Roman models.

The decorative elements of Renaissance style are leaves, flowers, and fruits fantastically blended with men and animals, chimeras, masks, vessels, and similar objects.

The cornucopias and dolphins upon the plate opposite indicate the character of Renaissance ornament.

CELLINI—French Renaissance.

CELLINI—French Renaissance.

X X I

The campaigns of Charles VIII and of Louis XII had familiarized France with Italian art; but not until after the expedition of Francis I did the French Renaissance spring into vigorous growth. Returning from Italy, Francis brought with him Leonardo da Vinci; and later invited a number of artists—among them the famous Benvenuto Cellini—to assist in the erection of his Château of Fontainebleau.

The influence of Italian masters could not fail to leave a distinctively Italian stamp upon the French Renaissance, an impress evident in the details of the ornament shown in the Cellini plate.

TURENNE—French Renaissance.

TURENNE—French Renaissance.

XXIII

The Period of the Valois was marked by an immense accession to the power of the Kings of France, through the consolidation of the empire. With increased power came increased wealth, luxury, and extravagance. This change in the condition of the Court finds reflection in the art of the period. Increased pomp and sumptuousness of ornament marks the evolution of French Renaissance from the Transition to the advanced Renaissance, the luxurious style of which is well shown in Turenne.

HARRINGTON—English Renaissance.

HARRINGTON—English Renaissance.

X X V

Under Elizabeth, Dutch and Italian artists introduced Renaissance forms in English architecture, which finally prevailed over the degenerate Gothic known as the Tudor style. Some notable buildings of the time of the Stuarts were the result of Renaissance influence, among them, St. Paul's Cathedral and other works of Wren and of Inigo Jones. But England can hardly be said to have produced an individual school of Renaissance in the sense that Italy and France did.

Architectural details from Harrington Gardens, Modern English Renaissance, gave the motive for this design.

VENDÔME—Francis I.

The School of Francis I is but a period of the French Renaissance when Gothic and Classical influences were in nice balance and when none of the incongruities which marred the style of Henry IV were as yet manifest. In it are harmoniously blended the picturesqueness of Gothic forms with the simplicity of Classical ornament.

From the study of two famous examples of this style, the Châteaux of Chambord and of Blois, Vendôme derives its motive; and a dukedom of France which contains some of the best work of this era gives it its name.

When ordering, give both number and name of Design, and specify Finish wanted.

LEYDEN—Flemish.

The Dutch have never manifested exceptional artistic ability except in the domain of realistic painting. It is no surprise, therefore, to find that the Renaissance, as they developed it, is more quaint and picturesque than imposing; it is impressed with the phlegmatic nature of the people, betrayed in the soberness and solidity of its forms. Our own Colonial style is not unaffected by Dutch influences; and the Flemish is near enough akin to English and German Renaissance to admit of its harmonious use with either of these styles.

PEMBERTON—Colonial.

PEMBERTON—Colonial.

XXXI

To the Colonial School have been assigned several designs which possess the distinctive features of no particular style, but which are in harmony with Colonial work. Pemberton is one of these: entirely simple and unadorned, it nevertheless does not lack character and vigor; and the absence of ornament makes it suitable for use upon buildings of almost any style.

LEXINGTON—Colonial.

LEXINGTON—Colonial.

A prominent mark of the Colonial style as applied to interior decoration and to furniture was its repudiation of florid ornament as an element of beauty. For the most part, effect was sought in grace of outline, and ornament, when employed, was of classic simplicity. Lexington exhibits this tendency in the simple volutes which form the ends of escutcheons and the diverging rays which give character to the knobs.

ENDICOTT—Colonial.

ENDICOTT—Colonial.

The Colonial period in America was the time of Wren, Inigo Jones and Gibbs; and we see in the architecture of the colonies a reflection of the Renaissance or Classical Revival in the mother country. The New England meeting-house and the Virginia manor-house testify, in their Greek porches, to the English taste of that time.

The Egg and Dart, simple beading and rope-like devices such as form the border of the Endicott design, are types of the decoration which appears upon Colonial work.

REVERE—Colonial.

REVERE—Colonial.

Although English influences determined the formation of Colonial style, the sojourn of the Puritans in Holland was not without its effect upon the type of furniture common in New England. It is of interest to note that the cabinet hardware of this time was largely Dutch or formed upon Dutch models: drop handles and escutcheons of thin cast brass, their surfaces crudely stamped with dies.

There is no hint of crudeness in the execution of Revere, but its chasteness and simple dignity make it thoroughly in accord with the spirit of Colonial times.

CALVERT—Colonial.

CALVERT—Colonial.

The popular conception of Colonial seems to identify it chiefly with New England; and yet the fine examples of old manor-houses in Maryland and Virginia should not be overlooked. The southern Colonial is less picturesque than that of New England, but excels it in stateliness and elegance.

The name of Calvert is thoroughly identified with the beginnings of the South, being the family name of the Lords Baltimore, under whose patronage the Colony of Maryland was founded.

MAYFLOWER—Colonial.

MAYFLOWER—Colonial.

Just as Calvert is linked with Maryland, so Mayflower at once recalls the Colony of Massachusetts Bay and brings to mind the long and arduous struggle which the Puritans won against hostile natives and rigorous and ungenerous surroundings.

With the subjugation of nature and increase of wealth came an appreciation of art, alien as its influence was to the spirit of the early Puritans. The work of Sheraton and Chippendale fostered this appreciation and moulded, in great measure, the form of Colonial style, at least so far as touched interior decoration.

As inspiration was sought in classic models, the acanthus leaf has been legitimately used as the chief decoration of the Mayflower design.

PRISCILLA—Colonial.

PRISCILLA—Colonial.

One of the most familiar devices in Colonial work, the urn, has been wrought into the Priscilla design with skillful effect. The other decorative elements—beads and foliations—are also purely Colonial. This is a design so feminine in its refinement and delicacy as almost to suggest its own name.

GRAVELOT—Louis XV.

GRAVELOT—Louis XV.

The reign of Louis XV marked the decline of the French Renaissance. It was a time of struggle between license and the severest classicism. While exterior designs were bare and uninteresting, interior decorations exhibited a wild extravagance of scrolls, shells, and palm leaves, to the almost complete obliteration of straight lines and the suppression of all marks of construction.

In Gravelot appear the shells and scrolls which are so prominent in decoration of the period of Louis XV.

MOREAU—Louis XV.

MOREAU—Louis XV.

The Renaissance had practically run its course in France before the end of the reign of Louis XV; and even in his time popular taste had revolted against the excesses of the Rococo style and sought a return to classic models. This revolt did not become effective, however, until after the end of this reign; and Louis XV is a synonym for the highly ornamented style of which Moreau stands as an illustration.

VERGENNES—Louis XVI

VERGENNES—Louis XVI.

The Roman Revival, which had its beginning in the latter part of the reign of Louis XV, expressed itself in a literal copying of Roman arcades and porticoes; not, as in the Renaissance, in the production of a new school.

In the time of Louis XVI, came a reaction against this artificial and grandiose style which expressed itself mainly in more delicate and graceful interior decoration, but without repudiation of classic influence.

Vergennes, in the manner of Delafosse, exhibits, especially in the knob, characteristic details of the style of Louis XVI.

ANTOINETTE—Louis XVI.

ANTOINETTE—Louis XVI.

The central figure of pathetic interest about which the tragedy of the French Revolution moves is the unfortunate wife of Louis XVI, Marie Antoinette. Her name, too, is connected with the art of this time, through the association of furniture and apartments fashioned for her use.

In strict conformity with the decorations of one of her apartments is the design which bears her name. All the delicacy of detail which distinguished its decoration is faithfully reproduced.

FRANKFORT—Rococo.

FRANKFORT—Rococo.

German Renaissance followed the same course of growth and decline as the French, although it was at no time distinguished by the lightness and gayety of the latter style. A dry, heavy treatment marked it in all but its earliest stage. Picturesqueness it possessed in eminent degree, and a tendency toward the quaint and fantastic gave it its distinctive national quality.

Frankfort illustrates the contempt of construction, which marks also the style of Louis XV. Its outline is a series of the scrolls that enter so largely into all Rococo work. The knobs exemplify its delicacy and grace.

Store Door Handles: For Store Door Handles of Frankfort Design, see pages 334 to 336, Catalogue, Vol. 9.

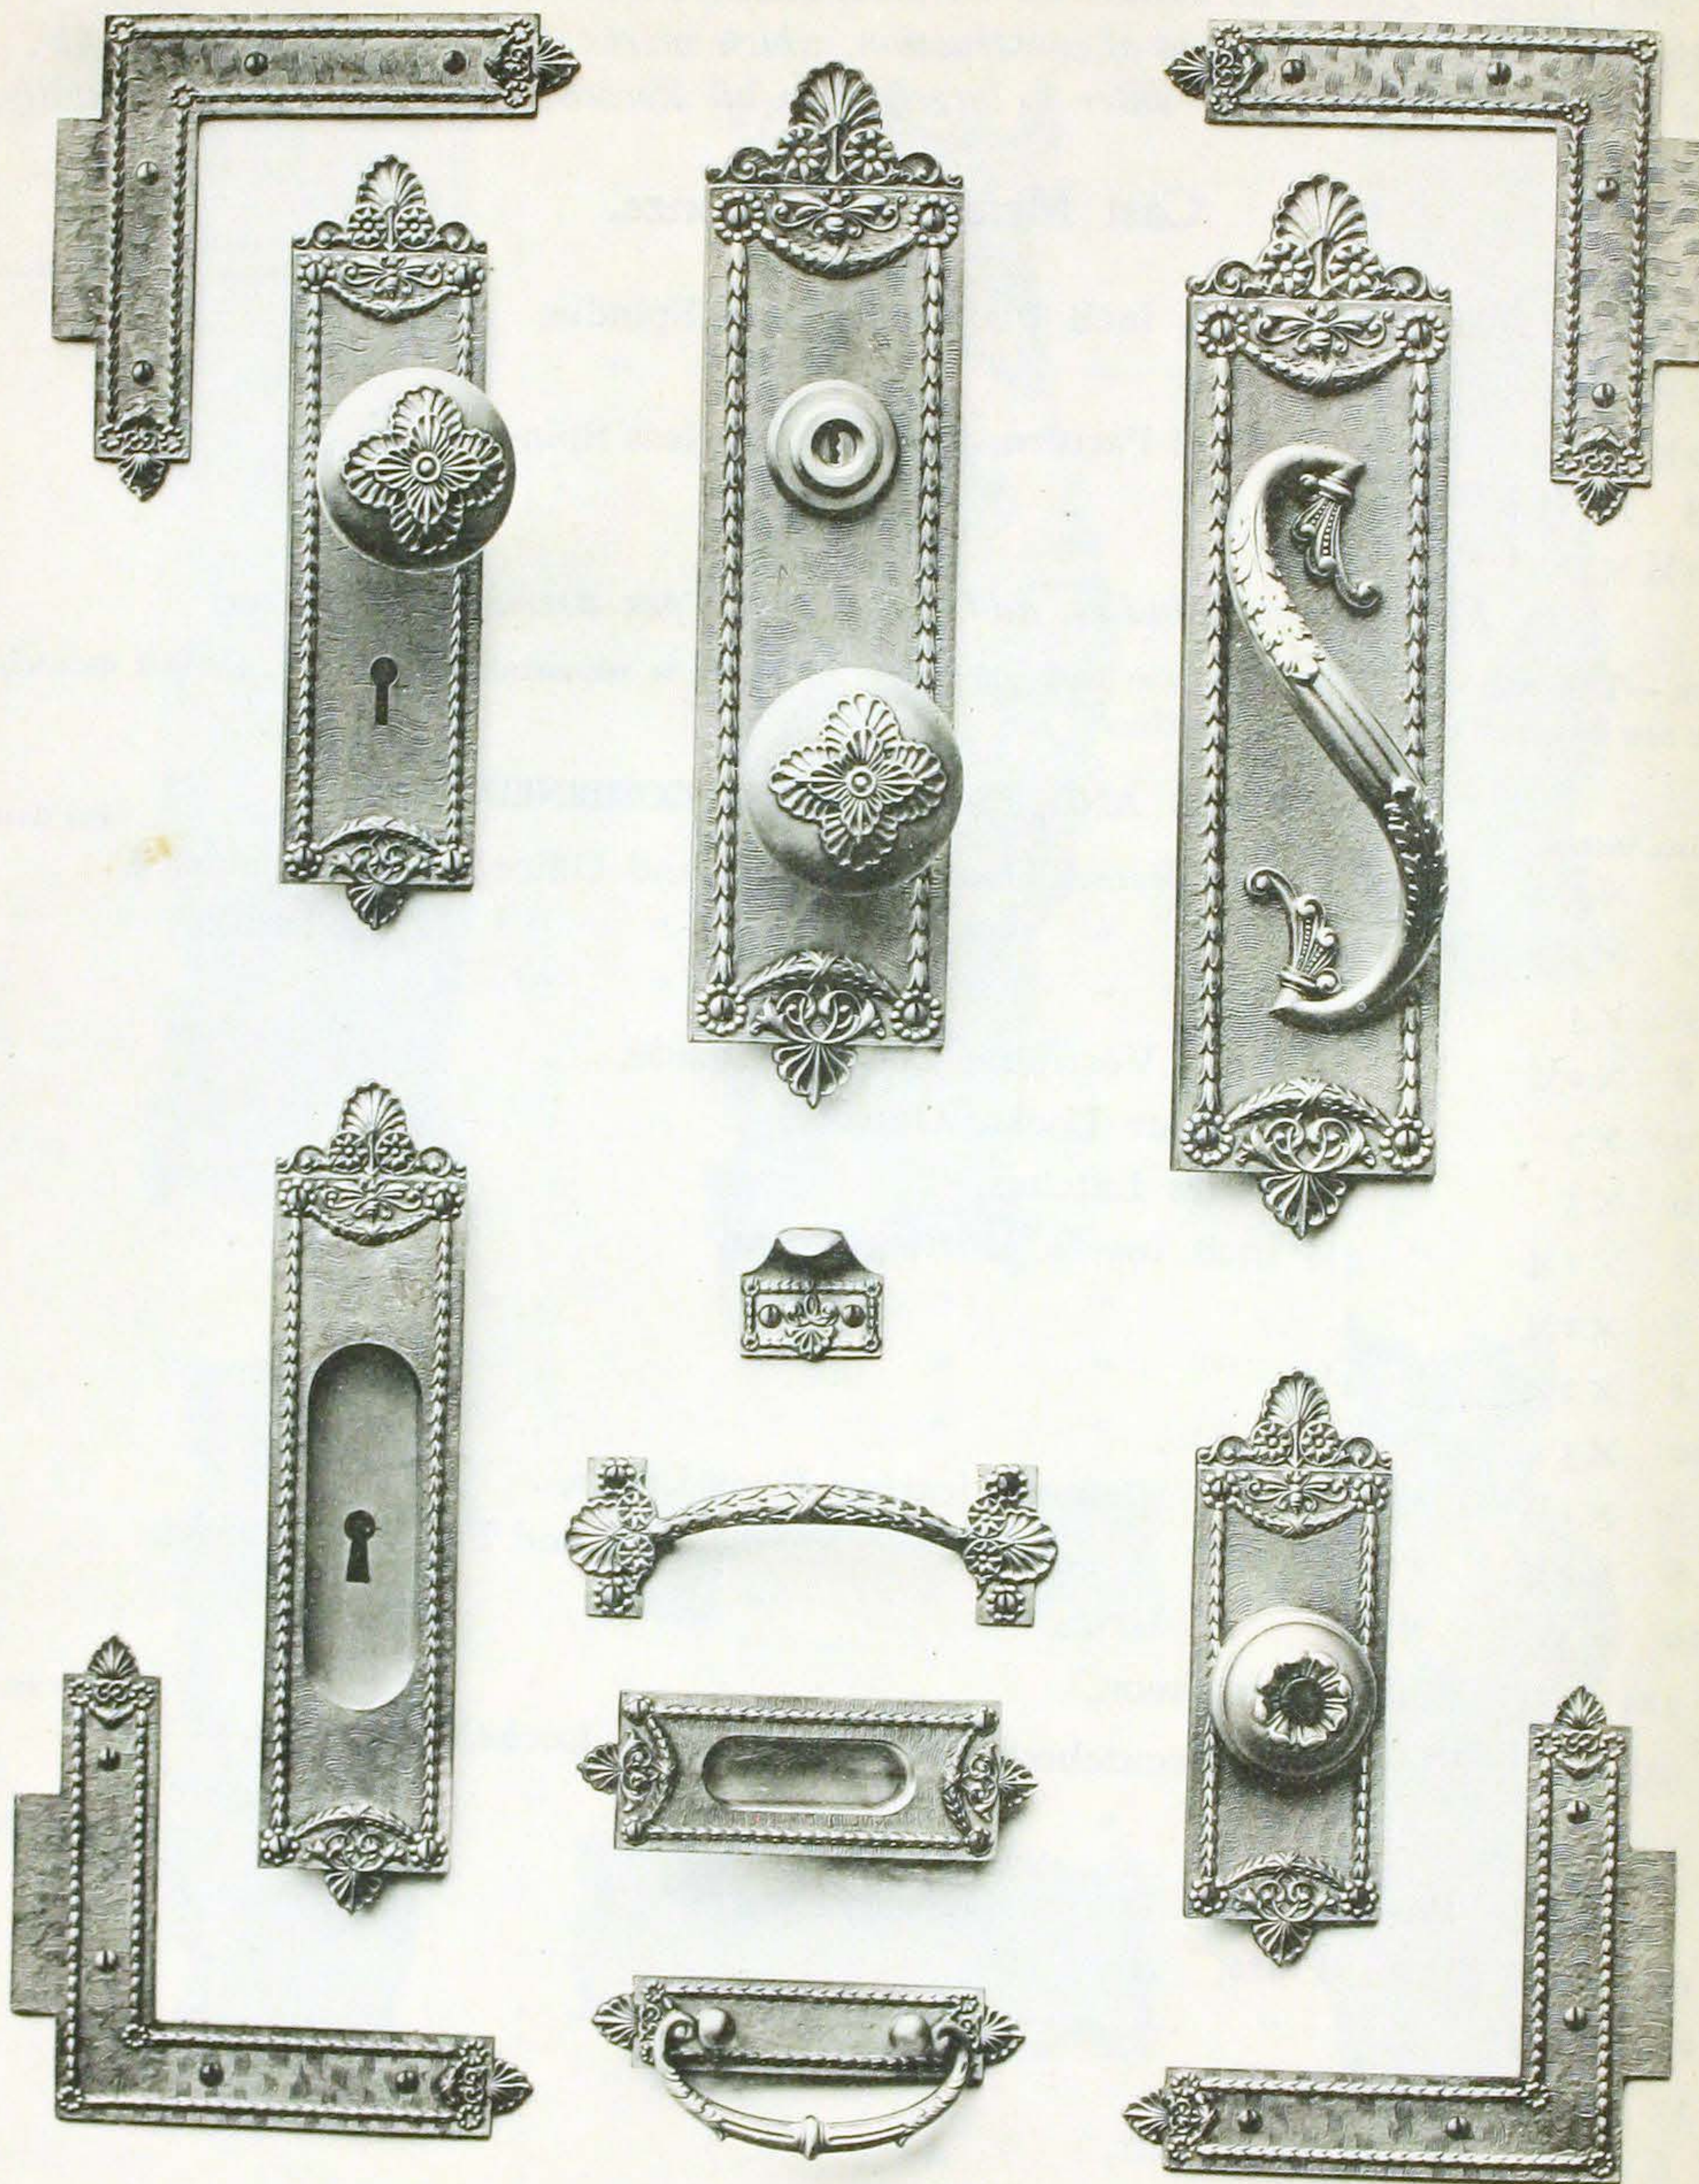

Regular Finish: Finish No. 27. Other Brass, Bronze, and Copper Finishes, at the same price. Supplied in any desired Finish, except Barff, No. 46.

Appropriate Finishes: Finishes Nos. 11, 27, 29.

Barff: These goods cannot be supplied in Barff, Finish No. 46.

When ordering, give both number and name of Design, and specify Finish wanted.

PRUDHON—Empire.

PRUDHON—Empire.

LIX

The Roman Revival, which met with a temporary check in the reign of Louis XVI, received the seal of official approval from the Empire, and under the patronage of Napoleon produced many of the finest structures of modern Paris.

So completely did the influence of the Court direct the taste of the time that the style of the Empire impressed itself not only upon art and architecture, but even upon costume. The simple and graceful lines of classic drapery were reproduced in the dress of ladies of the Court, and articles of personal adornment followed antique forms.

Prudhon shows in festoons and honeysuckle typical Empire details. The bee was the cognizance of Napoleon.

When ordering, give both number and name of Design, and specify Finish wanted.

LA SALLE—Empire.

CHRISTESEN—Naturalistic.

This design shows a graceful and unconventional treatment of natural objects—birds, leaves and flowers—and is especially pleasing in its arrangement of foliage. No other design illustrates so fully the art and skill with which our bronze castings are executed.

It bears the name of the designer, who is particularly skillful in this style of ornamentation.

GLASS DOOR KNOBS.

GLASS DOOR KNOBS.

The renewed interest in Colonial architecture and interior decoration and its increasing use in fine residences has created a demand for Glass Knobs, as being more in harmony with Colonial traditions than knobs of metal. Upon the opposite page are illustrated the goods of this character which we are prepared to furnish; some as simple in style as actual work of the Colonial period; others, of more elaborate design.

These knobs have an extension of three-quarters of an inch; but orders should give the thickness of the doors for which they are required, and also specify the finish wanted upon the shank and rose.

$\frac{5}{16}$ inch Plain Screwless Spindle.

ESCUTCHEONS FOR GLASS KNOBS.

ESCUTCHEONS FOR GLASS KNOBS.

The regular trim for Glass Knobs is a rose and plate or drop escutcheon upon each side of the door. Examples of such escutcheons are shown upon the opposite page. These Knobs may fitly be used with combined roses and escutcheons, especially with those of Colonial design. The central figure in this plate illustrates Knob No. 3102 combined with an escutcheon of the Revere design.

COLUMBIA CYLINDER LOCKS

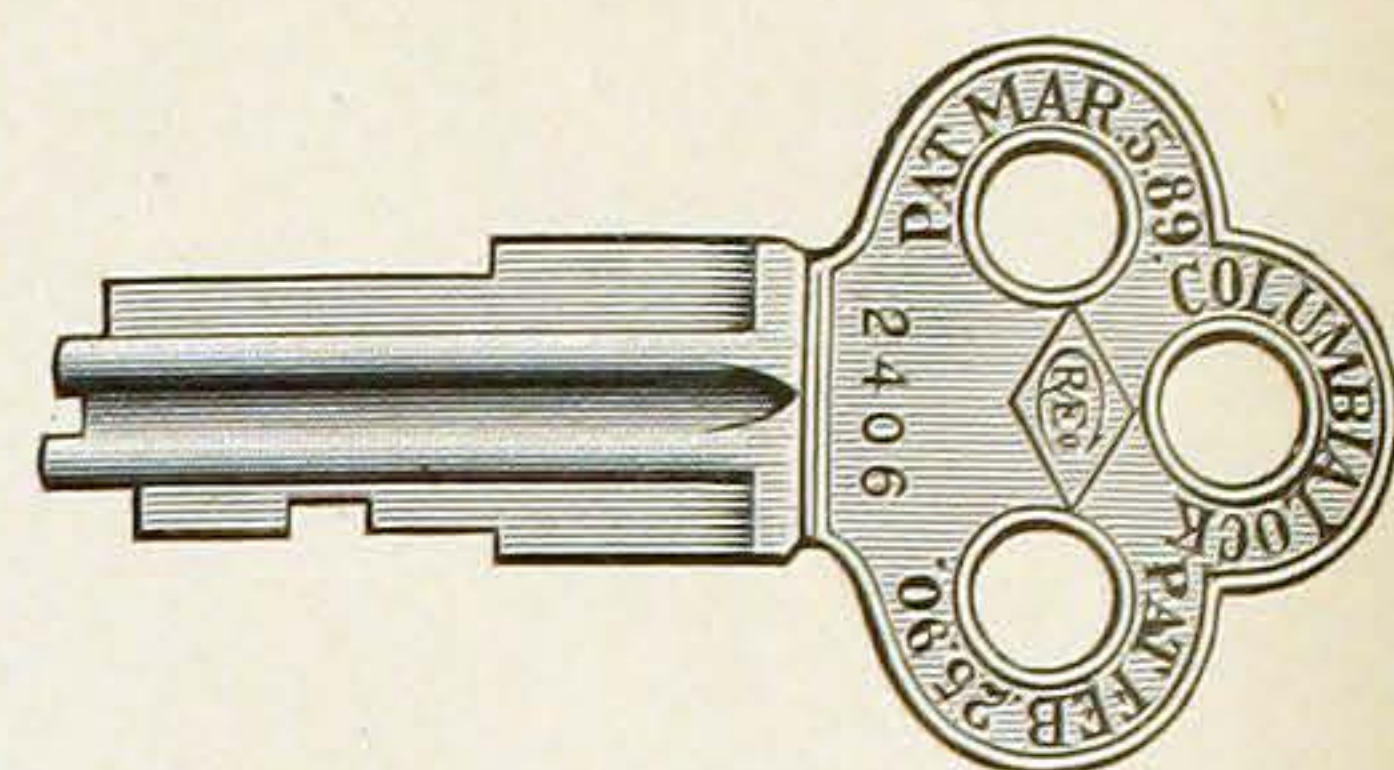

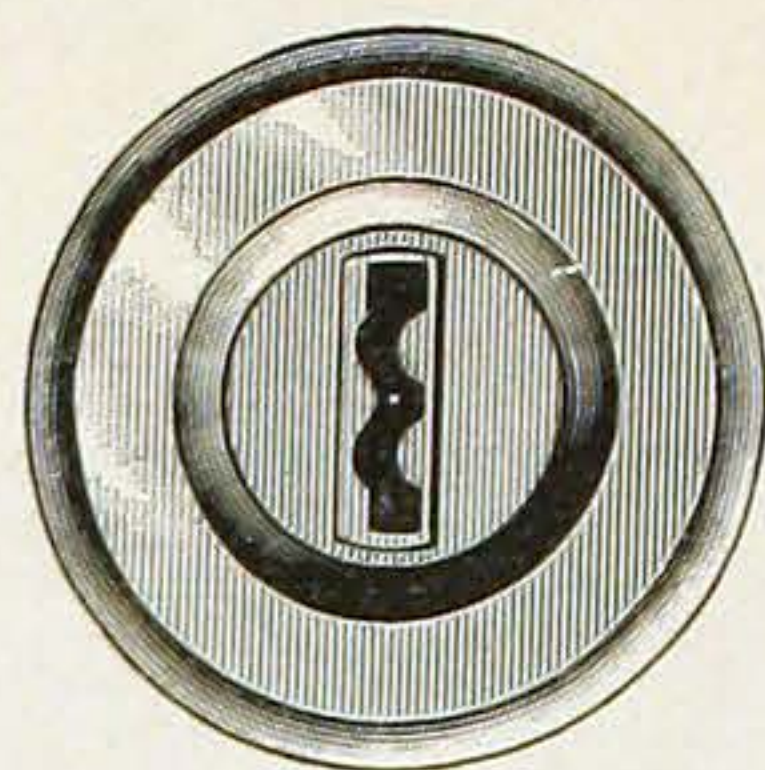

HORIZONTAL CROSS SECTION

VERTICAL CROSS SECTION

ILLUSTRATIONS, HALF-SIZE

ILLUSTRATIONS, FULL-SIZE

Our new Columbia cylinder, of which we are the sole manufacturers, is used with the Columbia locks and latches described in this catalogue. We call attention to these features:

CONSTRUCTION OF CYLINDER

The cylinder is provided at its inner end with a heavy dog for throwing or retiring the bolt. This dog is integral with the cylinder itself, and therefore cannot loosen or get out of order.

APPLICATION OF CYLINDER TO LOCK-CASE

The case is constructed with a round hole, tapering from the inside, and the cylinder-shell has a corresponding undercut shoulder. By inserting the cylinder through the hole in the lock-case, and turning the set screw in the front of the lock, cylinder and case are interlocked and the cylinder effectually fastened.

SECURITY

Security is attained by the use of five brass tumblers, contained within the cylinder, which are slotted upon one edge. When the key is inserted, these tumbler-slots are brought into alignment, allowing movement to an eccentrically-moving fence at the rear of the cylinder and permitting the rotation of the cylinder-plug. The grooved key-channel furnishes another element of safety, preventing the use of other means than the regular key for operating the lock. Actual experiments have demonstrated the fact that the Columbia cylinder affords greater security than any of the pin-tumbler cylinders.

ADJUSTABILITY

Cylinders are adjustable as specified under the various locks.

KEYS

The keys are end-bitted and their tumbler-cells are brought into instant contact with the tumblers. This insures an easy insertion of the key and reduces friction and wear. Duplicate keys may be obtained by giving the number of the key wanted.

CHANGES

Any desired number of key-changes can be obtained with Columbia locks.

MASTER-KEYS

Master-keyed locks can be furnished in any desired number, and in as many sets as may be wanted. Columbia locks are master-keyed without the use of a supplemental cylinder; regular key and master-key fit the same cylinder. This feature permits the use of a common master-key to pass all the locks, of whatsoever kind, upon any building, and makes them especially valuable for offices and public buildings.

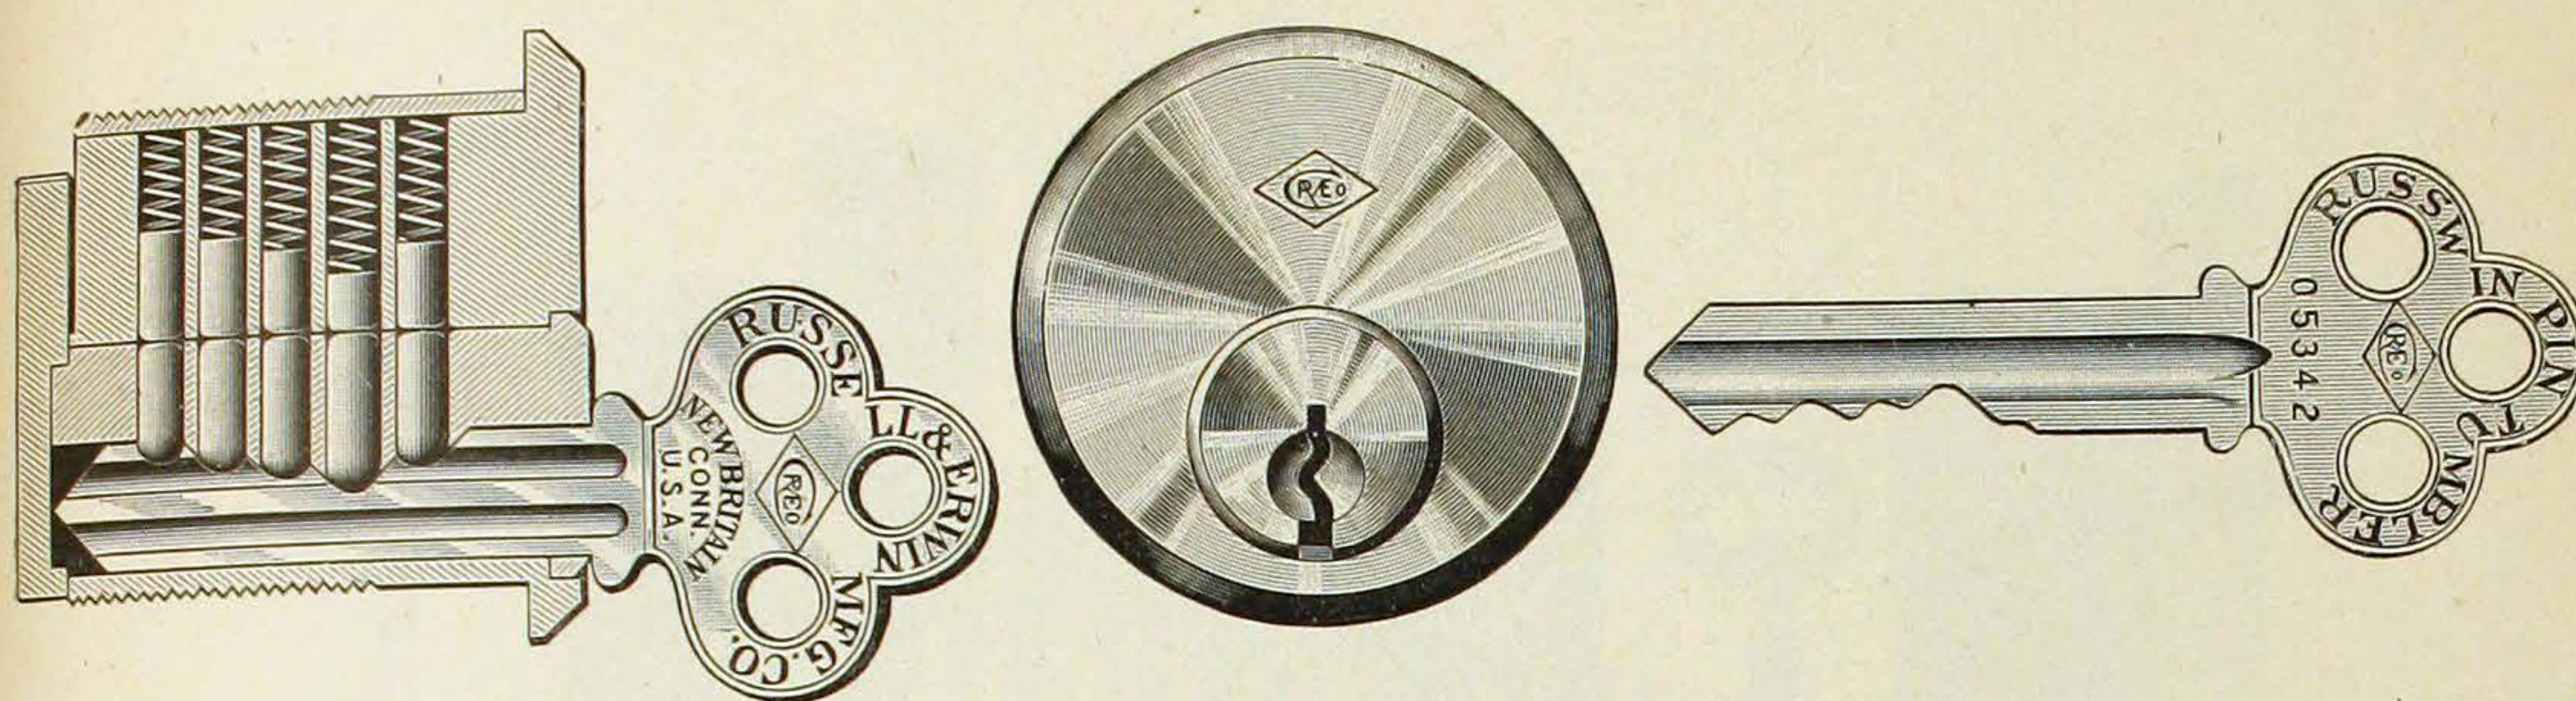

GRAND MASTER-KEYS

Columbia locks can be furnished in grand master-keyed sets, composed of a number of master-keyed sets, subordinated to one grand master-key, which passes all the locks in the series.

RUSSWIN PIN-TUMBLER CYLINDER LOCKS

ILLUSTRATIONS, FULL-SIZE

The Russwin pin-tumbler cylinder, illustrated above, is used with the Russwin locks and latches described in this catalogue.

CONSTRUCTION OF CYLINDER

The cut in cross section shows the construction of this cylinder. It is composed of two parts: cylinder-plug and cylinder shell, both of which carry pin-tumblers. By the insertion of the key, these pins part at the line of division between the cylinder-plug and the cylinder-shell, and permit the plug to rotate. A cam at the end of the plug actuates the bolt mechanism of the lock. The cut shows the key fully inserted; the plug, free to rotate and to throw the bolt.

APPLICATION OF CYLINDER TO LOCK-CASE

The case is constructed with a round hole, tapped to receive a corresponding thread upon the cylinder. The cylinder is screwed in the required distance, and fastened by the set screw in the front of the lock.

SECURITY

Security is attained by the use of pin-tumblers, the operation of which is described above. An additional safeguard is provided in the grooved key and key-channel, preventing the use of other means than the proper key for lifting the pins and effecting the rotation of the cylinder.

ADJUSTABILITY

Cylinders are adjustable as specified under the various locks.

KEYS

Keys are of German-silver, finely finished and gold-plated. They are strong and substantial, the thickness of the back being three thirty-seconds of an inch, in conformity with a common requirement of architects' specifications. Duplicate keys may be obtained by giving the number of the key wanted.

CHANGES

Any desired number of key-changes may be obtained with Russwin locks.

MASTER-KEYS

Master-keyed locks can be furnished in any desired number and in as many sets as may be wanted. Russwin locks are master-keyed without the use of a supplemental cylinder; regular key and master-key fit the same cylinder.

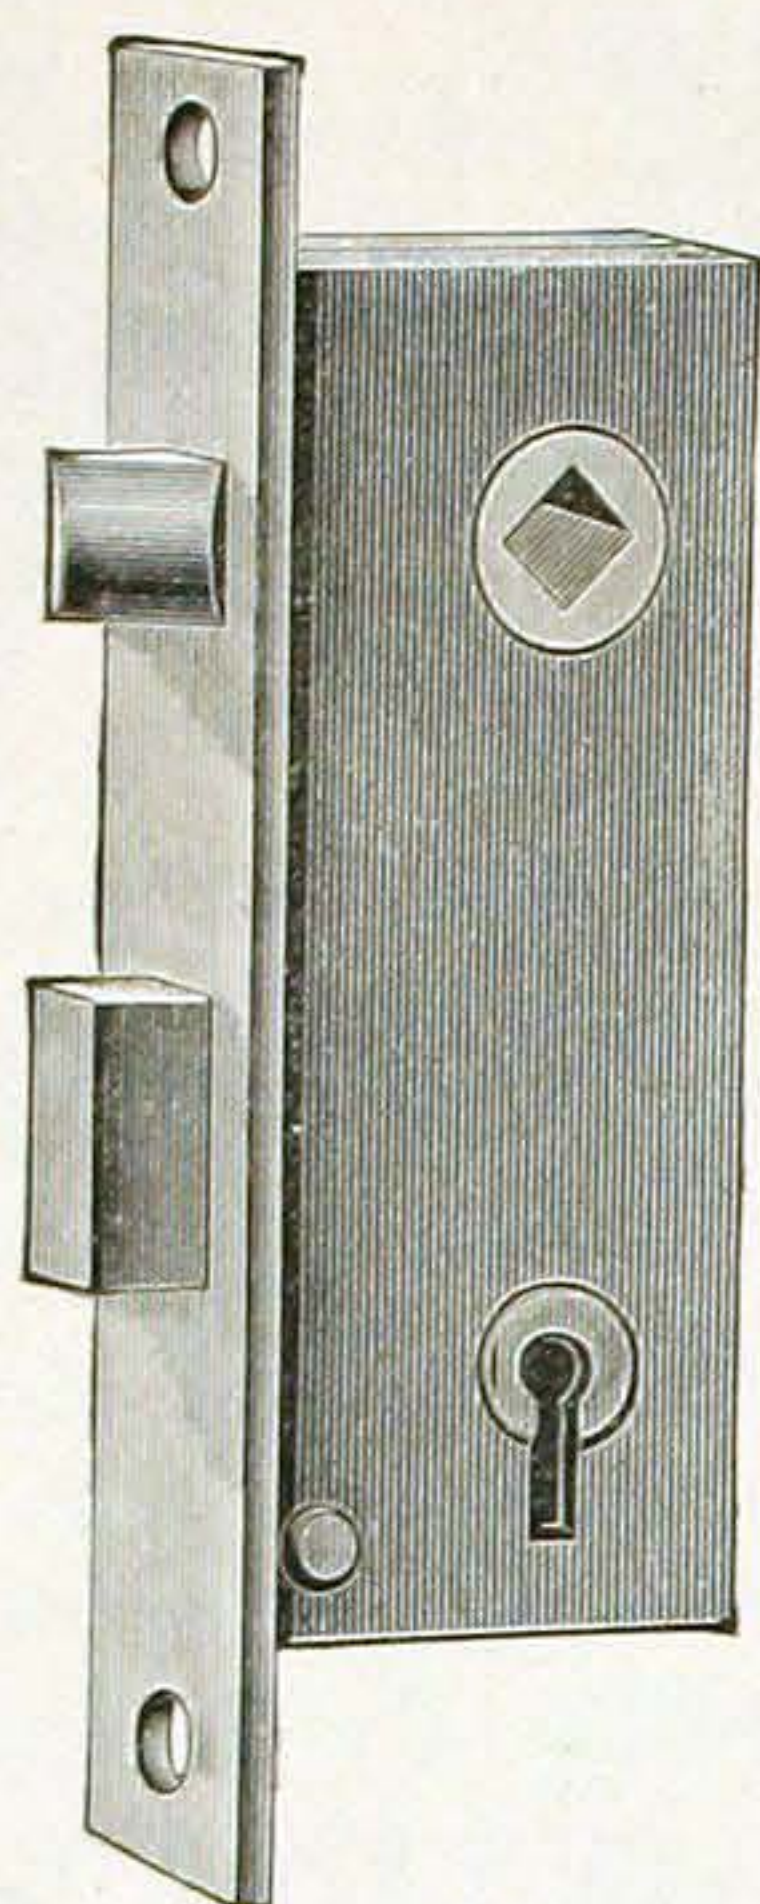

GRAND MASTER-KEYS

Russwin locks can be furnished in grand master-keyed sets, composed of a number of master-keyed sets, subordinated to one grand master-key, which passes all the locks in the series.

When ordering, be particular to specify Finish wanted.

A detailed illustration of a door handle and lock mechanism. The handle is a large, circular knob with concentric rings, mounted on a vertical rectangular plate. The plate features two keyholes and two small circular holes, one above and one below the keyholes.

A detailed illustration of a vertical metal door plate, likely made of brass or steel, featuring a fine vertical ribbed texture. The plate is rectangular with a slightly raised border. It has four circular mounting holes, one in each corner. A large, circular, flared handle is attached to the right side of the plate. Below the handle, there are two keyholes, one above the other, both with a simple, elongated keyhole shape. The illustration is rendered in a classic, engraved style with fine lines and shading to indicate depth and texture.

A close-up photograph of a rectangular metal door handle. The handle has a brushed metal finish and a raised, rectangular border. In the center is a large, vertical keyhole. Above and below the keyhole are two smaller, circular buttons or knobs. The handle is mounted on a light-colored wall.

DOOR KNOBS

We invite attention to our Knobs described as with Patent Rose, as an article of superior merit. The Side Screw in the Knob Shank is effectually prevented from working loose by being covered with the Rose.

When putting on, the shank of the Knob should first be fastened to the Spindle with the Side Screw; the Rose then turned so as to cover it, and fastened to the door.

Our Mineral and Porcelain Knob Tops are fastened to the Shanks with METAL.

All Mineral and Porcelain Rim Knobs with Patent Roses are spindled to extend three-quarters of an inch, thus: $1\frac{1}{2}$ to $2\frac{1}{4}$, $1\frac{3}{4}$ to $2\frac{1}{2}$, etc. Regular extension, $1\frac{1}{2}$ to $2\frac{1}{4}$.

All Mineral and Porcelain Mortise Knobs with Patent Roses are spindled to extend one inch, thus: 1 to 2, $1\frac{1}{4}$ to $2\frac{1}{4}$, etc. Regular extension, 1 to 2.

Knobs Nos. 400, 300, 200, 203, etc., Rim, are spindled to extend three-quarters an inch, thus: $1\frac{1}{2}$ to $2\frac{1}{4}$, $1\frac{3}{4}$ to $2\frac{1}{2}$, etc. Regular extension, $1\frac{1}{2}$ to $2\frac{1}{4}$.

Knobs Nos. 400, 300, 200, 203, etc., Mortise, are spindled to extend three-quarters of an inch, thus: 1 to $1\frac{3}{4}$, $1\frac{1}{4}$ to 2, etc. Regular extension, 1 to $1\frac{3}{4}$.

Brass, Plated, and Bronze Knobs extend 1 inch, and are spindled $1\frac{1}{4}$ to $2\frac{1}{4}$, etc.

Mineral and Porcelain Knobs on swivel spindles, extend Mortise 1 inch; Rim, $\frac{1}{2}$ inch.

Brass, Plated, and Bronze Knobs on swivel spindles, extend Mortise 2 inch.

Mortise and Rim Crank Handles extend half an inch, thus: 1 to $1\frac{1}{2}$, $1\frac{1}{4}$ to $1\frac{3}{4}$, etc.

For Rim Locks, the thickness of the Lock must be added to the thickness of the door, to get the length of spindles required.

For Mortise Locks, the length of the spindle is the thickness of the door. When fitting the door with a Mortise Lock adapted to swivel spindles, care should be taken to place the Lock as near the center as possible. The proper adjustment of the swivel spindle requires care and attention so that the working of the Knobs will be perfect. It must be so placed that the swivel operates exactly in the center of the Lock. The Lock having a double hub, the outer Knob can be shut off or stopped by the lever in the face of the Lock, effectually locking the door, preventing entrance without the aid of a Pass or Night Key, while the inside Knob yet works to open the door from the inside.

Many complaints have been made of Locks that were perfect in themselves, but, not being properly adjusted, were unjustly condemned.

SCREWLESS DOOR KNOBS

ILLUSTRATION, HALF-SIZE

EXTENSION, 1 1/2 INCHES

FOR DOORS FROM 1 3/4 TO 3 1/4 INCHES THICK

Our screwless door knobs and spindles have now been in use for some years, and during that time have thoroughly commended themselves to the trade on account of their simplicity and permanency. They are superior to any similar device now upon the market.

The adjustment to the door is made upon the inside knob, the outside knob being fastened to the spindle with a headed pin which is held in place and concealed by the rose when in use. In the case of exceptionally thick doors, an added extension of one half inch may be gained by changing the position of this pin in the spindle. For ordinary doors, the extension obtainable at the inner knob will suffice.

The method of fastening the knobs, when once adjustment is made, is not dependent upon friction for its successful operation. The pins upon the inner sleeve engage with slots in the knob shank, preventing any rotary motion upon the spindle; the outer sleeve and knob shank are tightly screwed together and it is impossible for the knobs to work loose or to come apart. The adjustment is so perfect that these knobs may be accurately fitted without the use of washers.

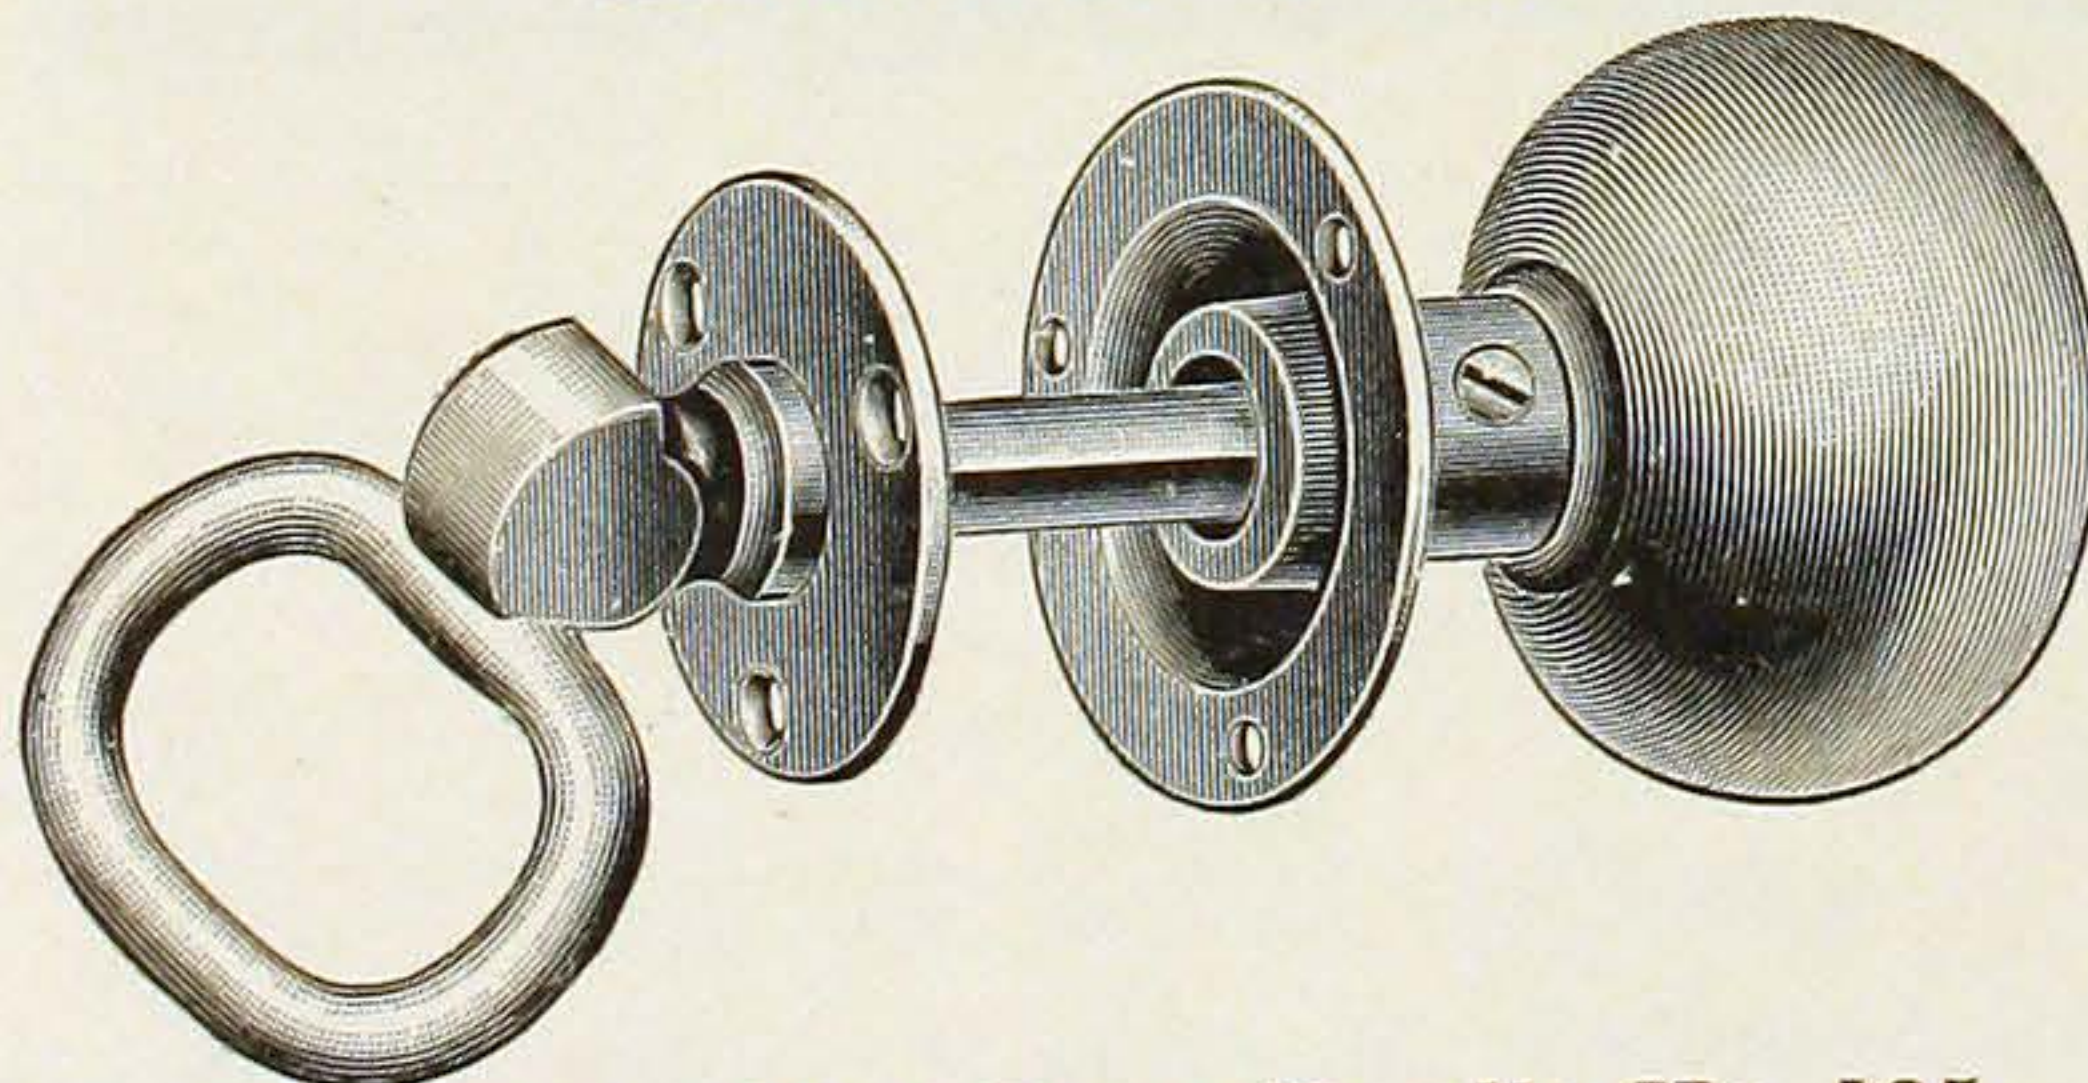

Any of our fine Cast Bronze Knobs will be made up with Screwless Attachment, if so ordered, at an extra price.

Packed with wrenches, and full directions for applying.

Per dozen.

\$

The construction of this Spindle is shown in the above illustration. The increased diameter of one end of the Spindle permits the Swivel to be made as strong as the threaded portion of a $\frac{3}{8}$ inch Spindle, and the difference of diameter between the two parts of the Spindle (and the corresponding difference of size in the two parts of the Lock-hub) greatly facilitates and simplifies the adjustment of Knobs and Spindle to the Lock.

This Spindle is used with all numbers of Columbia and Russwin Locks which require a Swivel Spindle.

PROTECTED AND BOX STRIKES

ILLUSTRATIONS, HALF-SIZE

Protected Strike

Box Strike

The PROTECTED STRIKE is an outgrowth of the general use of office latches and is designed to afford security against attempts to force back the bolts of such latches. As shown in the illustration, the main feature of its construction is the flange, which prevents the insertion of any instrument through the slot of the door jamb with intent to press back the bolt, thus giving to a latch the added security of a dead bolt. These strikes may be applied to any latch bolt, but are made to order only, at additional price. When ordering, be particular to specify exact thickness of doors.

Attention is called to Office Latches Nos. C1456M and P1456M (pages 67 and 68), as possessing features which allow the use of protected strikes to be dispensed with, and at the same time give greater security than can be had through their means.

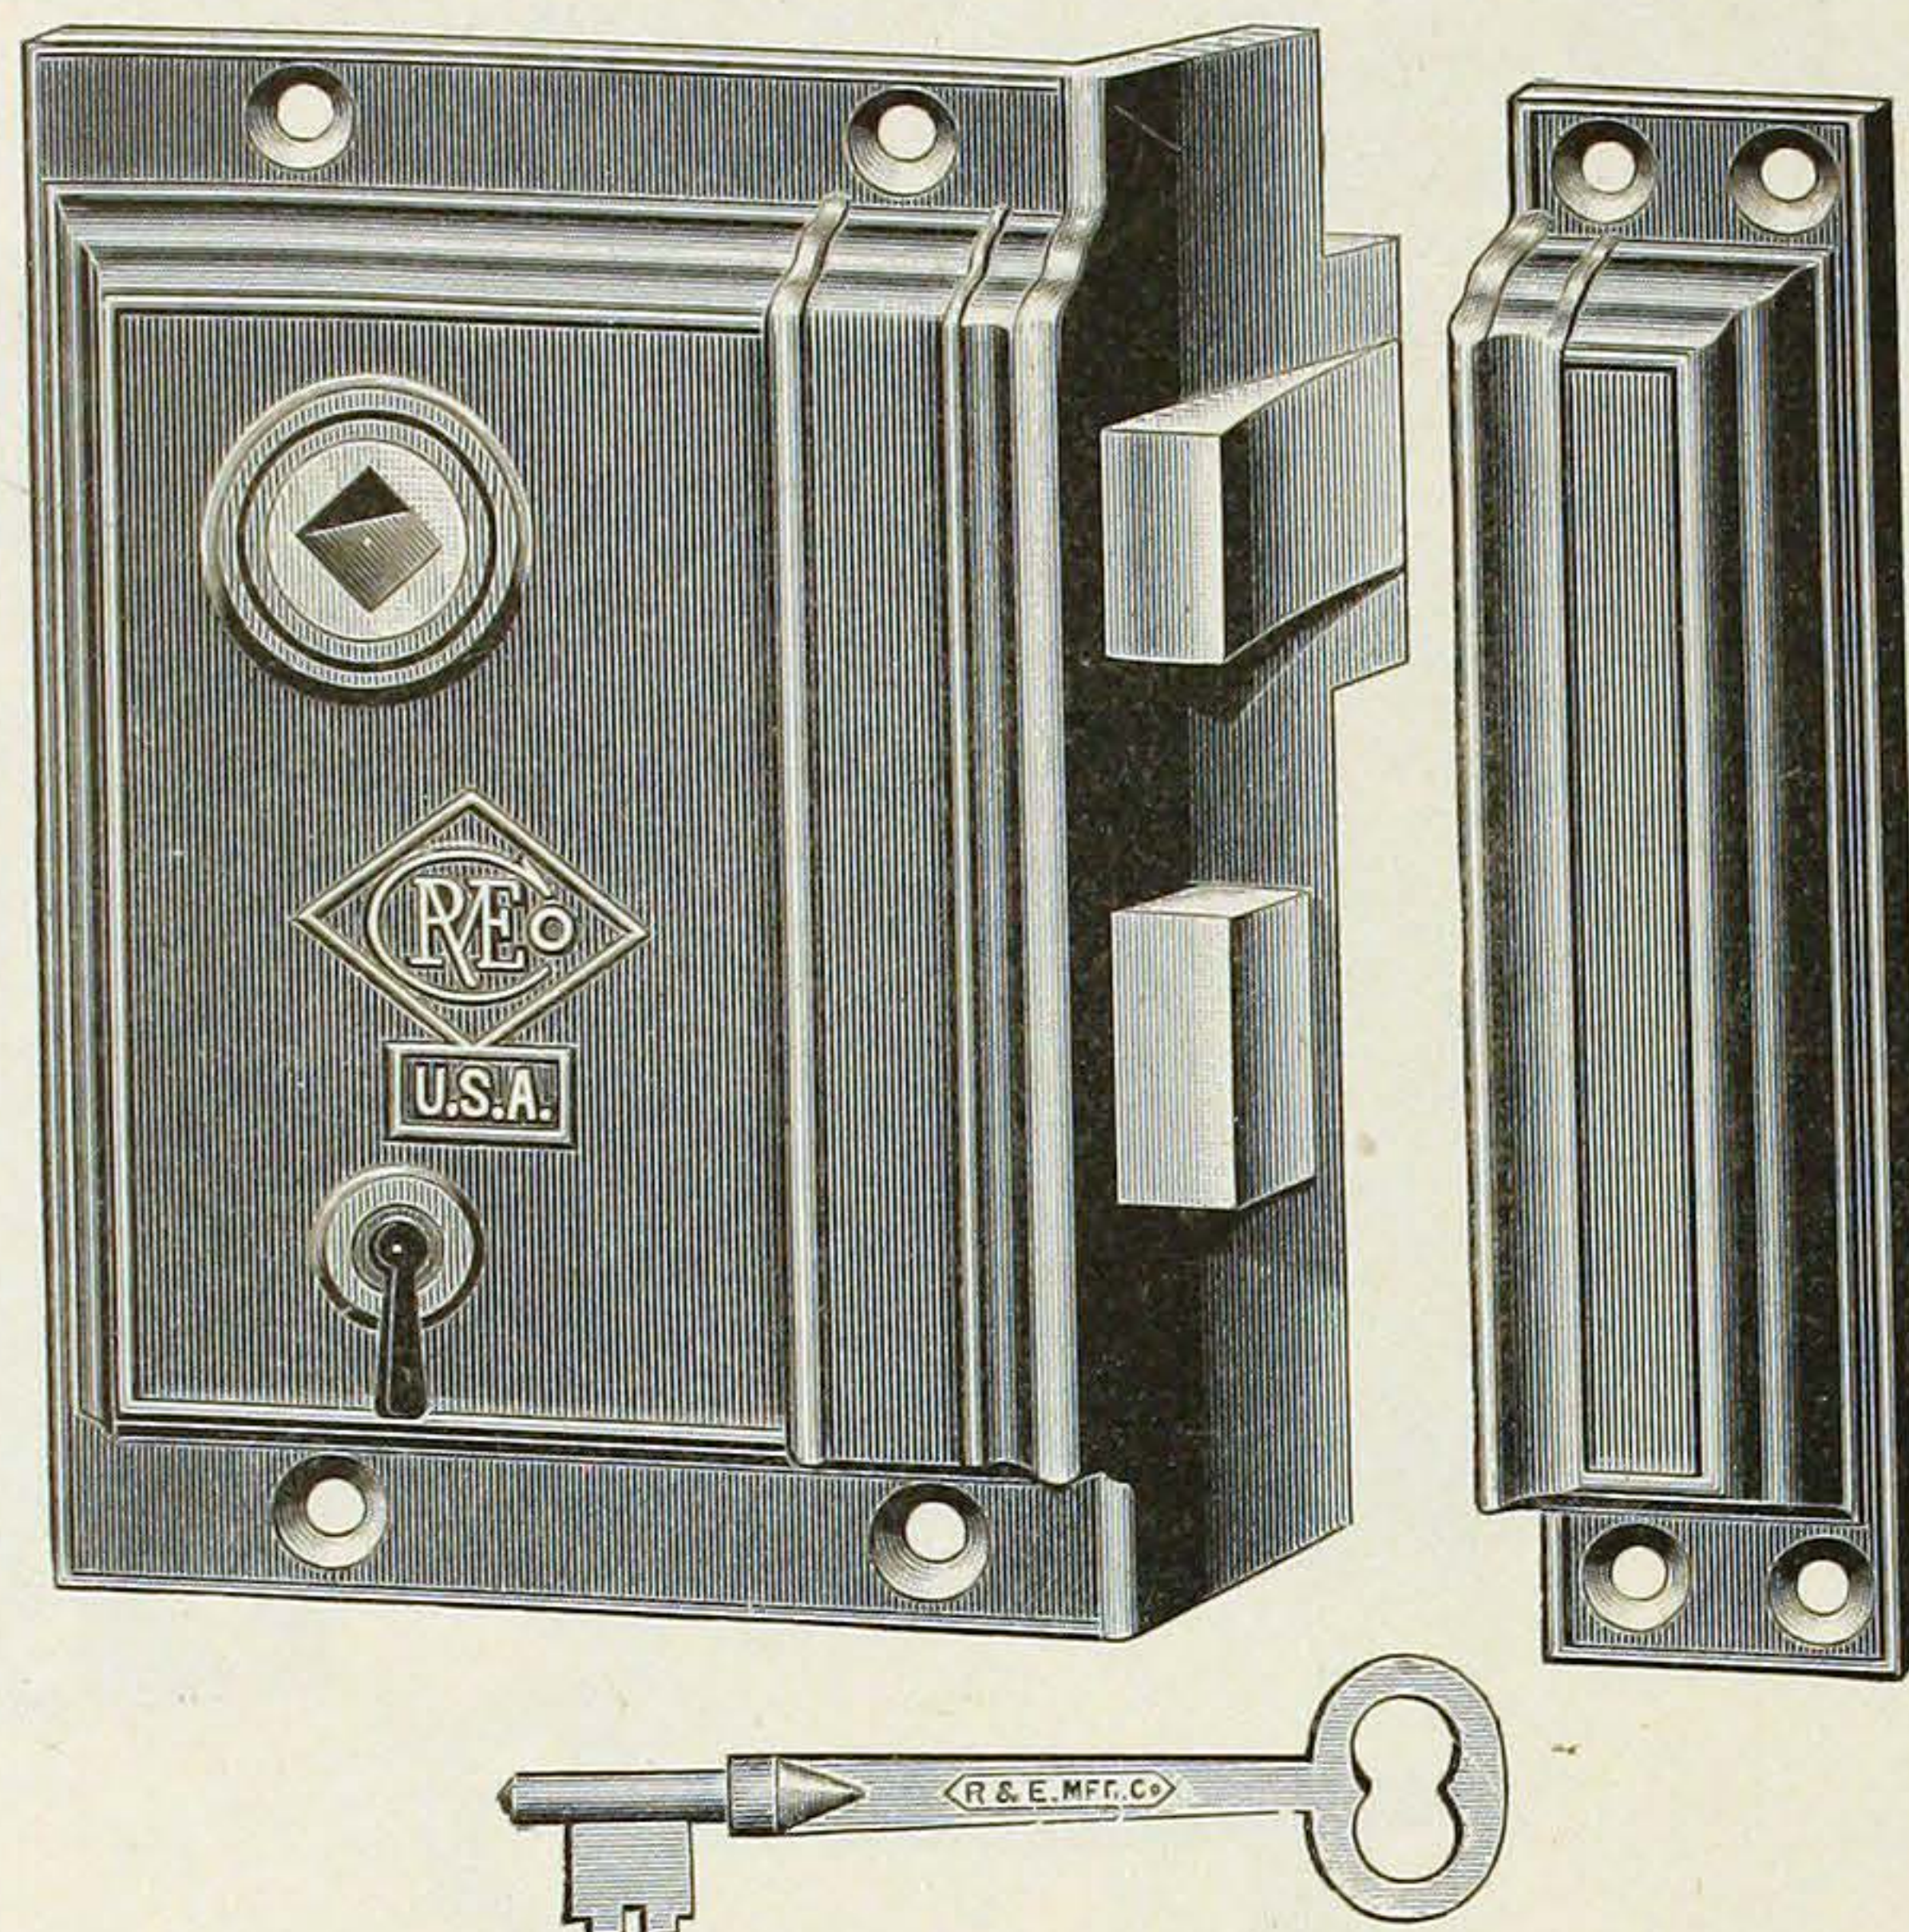

BOX STRIKES: The essential feature of this strike is the metal "box" to receive the bolt, by which means all raw wood is covered and the best possible finish imparted to the door jamb. Furnished for any of our Columbia and Russwin Mortise locks and latches, but to order only, at additional price.

PROTECTED BOX STRIKES: These are protected strikes, provided with the metal "box" described under box strikes. Like Protected and Box strikes they are furnished to order only, and orders should specify the thickness of the doors for which they are required.

Applied to Hinged Transoms

SPECIFICATIONS FOR SPECIAL TRANSOM LIFTERS

NOTE: Whenever possible, it is desirable that, with orders for Transom Lifters in special positions, drawings or tracings should be sent, showing a cross-section of the Transom and Door Casing. When this is impracticable, carefully considered answers to the following will generally be sufficient:

FIRST: Is transom hung from top, from center, or from bottom?

SECOND: What is the distance from the bottom of the transom to the floor?

THIRD: What is the height of the transom only?

FOURTH: What is the "recess"? (Distance inward from face of door casing to face of transom.)

FIFTH: What is the "reach"? (Distance from center of rod, in position, to nearest edge of transom.)

SIXTH: Do any mouldings or projections stand in the path of the transom lifter? If so, send rough sketch, showing their position, dimensions, etc.

BOARD MEASURE

These are the lines on the long arm of the square on the side opposite the numbered side, and are intended to give number of square feet in a board, plank, or scantling. Thus, if a board is 10 feet long and 7 inches wide, find the figure 10 under the 12 inch mark on outer edge, then run back on that line to the left until you strike the figures under the 7 inch mark—you will see 5, 10, which denotes the number of square feet in the board (5 feet, 10 inches). Thus, by having the length and width of the board, you can at once tell the number of feet and inches.

For boards wider than 12 inches, go to the right; less than 12 inches, to the left.

For 2 inch thick timber, double the result.

For 3 inch thick timber, treble the result.

The BRACE RULE is on the tongue of the square on same side as the Board Measure. It is to give the length of a diagonal of

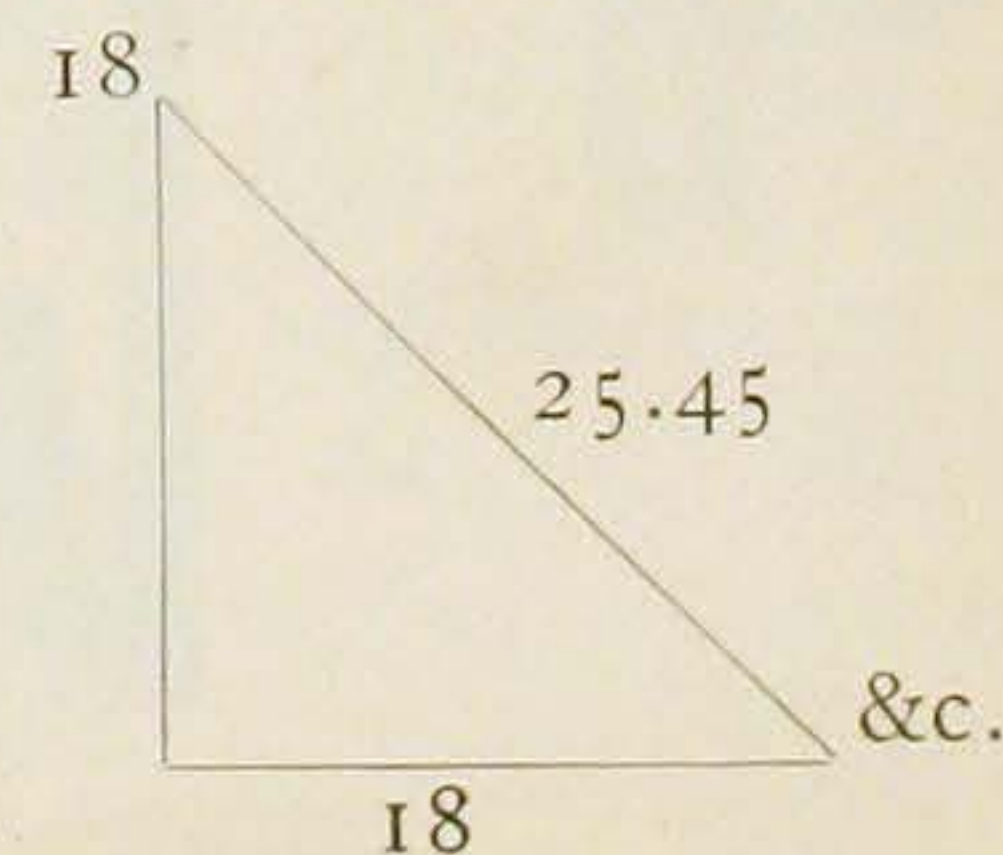

brace where the two sides are known; thus,

MISCELLANEOUS SCREWS

FROM NICKEL-PLATED IRON LIST

Bronze-plated, Imitation Bronze Metal, Flat, Round, and Oval Head.

Iron Screws, in various Electro and Sand Copper Finishes, Flat, Round, and Oval Head.

PATENT DIAMOND-POINT STEEL SCREWS

Flat Head

Round Head

Oval Head

PATENTED FEBRUARY 2, 1886

The characteristic features of these screws are the pyramidal point, the ratchet thread, and the longitudinal and transverse corrugations on the body of the screw under the head; the first two greatly facilitate the penetration of the wood without breaking down its fibre when driven by a hammer; the thread is the best shape to engage with the wood while resisting a pulling strain; and the corrugations under the head raise this portion of the screw to practically the same diameter as that of the threaded portion. The length measurement is from under head to point, and gauge on thread. In all cases they may be withdrawn with a screw-driver, whether they have been hammered or screwed into the wood.

The diamond-point steel screws are made with oval, flat, and round head. The flat and round heads have sawed slots.

PATENT REVERSE HELICOID TIRE BOLTS

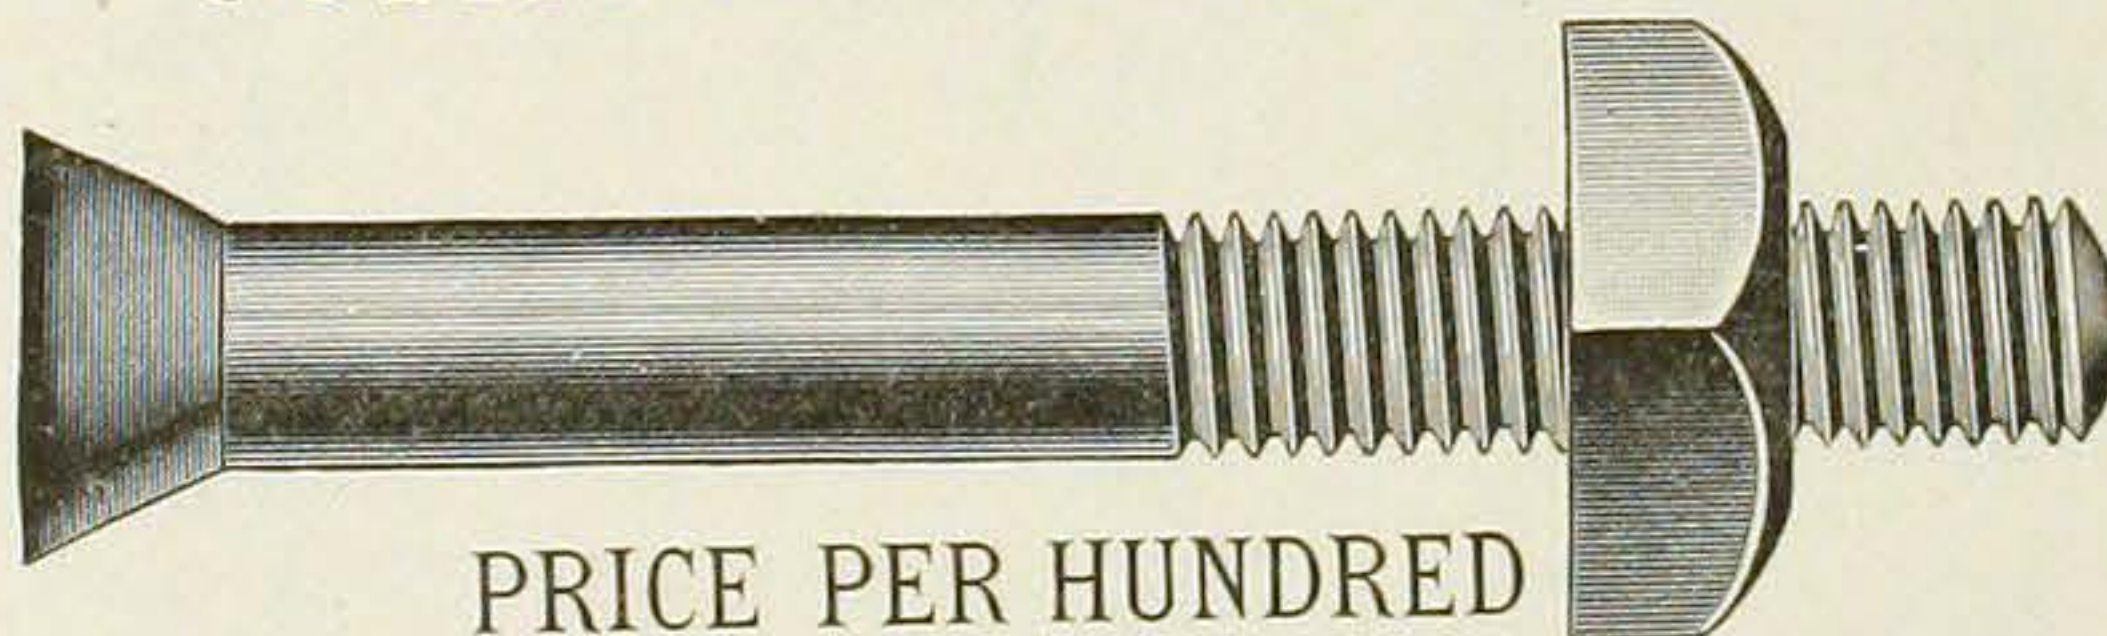

- Attention is called to the following features of our Patent Reverse Helicoid Tire Bolts:—
1. Their absolute resistance to torsion after they are driven into the felloe, permitting the nut to be turned up perfectly tight, the hole having been bored to the exact diameter of the threaded part of the bolt.
 2. The increased strength due to the helicoid ribs on the shank.
 3. The superior finish and symmetrical appearance of the goods.

PATENT REVERSE HELICOID SLEIGH-SHOE AND SHAFT BOLTS

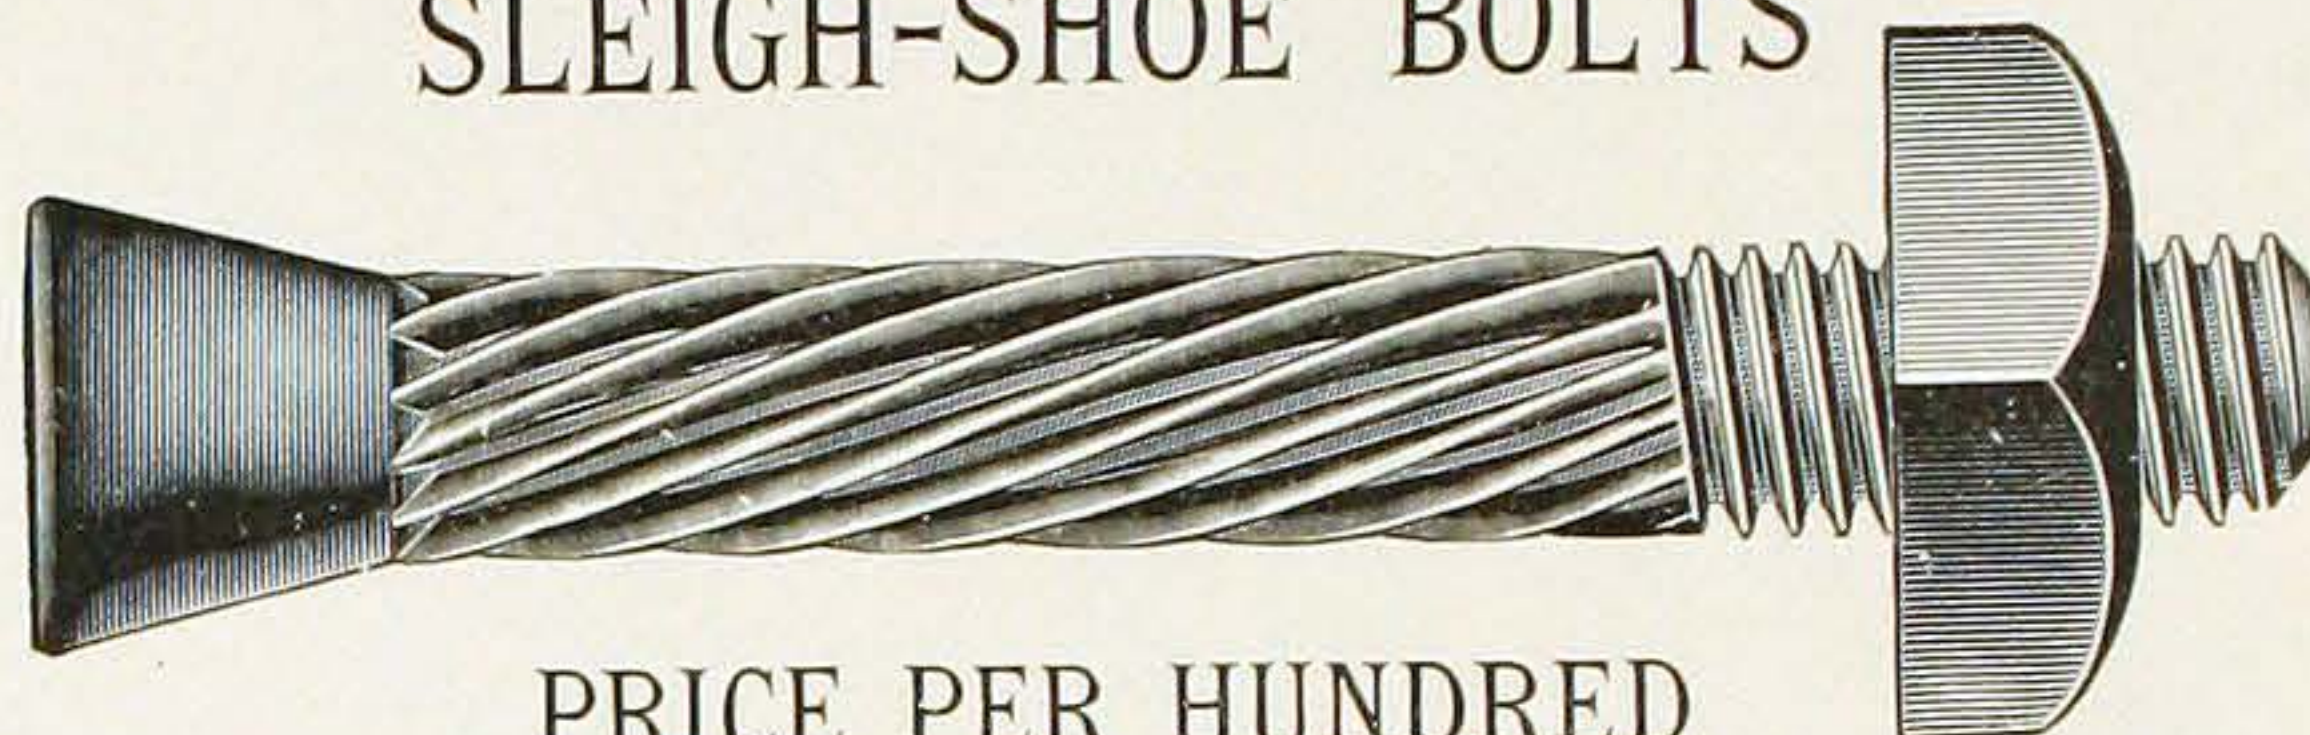

Attention is called to the following features of our Patent Reverse Helicoid Sleigh-Shoe, Shaft, and Agricultural Bolts:—

1. Their absolute resistance to torsion after they are driven or drawn into the wood, the hole having been bored to the exact diameter of the threaded part of the bolt, avoids the necessity of mortising a square hole in the better grades of work or heating the bolt to burn out the hole, as done in ordinary practice.

2. The increased strength due to the helicoid ribs on the shank.

3. The superior finish and symmetrical appearance of the goods.

6102	$2\frac{1}{2}$	" " 3 " "	$\frac{7}{8}$	8.50
6103	$2\frac{1}{2}$	" " 3 " "	1	9.00
6104	$2\frac{1}{2}$	" " 3 " "	$1\frac{1}{4}$	9.75
6105	$2\frac{1}{2}$	" " 3 " "	$1\frac{1}{2}$	10.50
The following locks are similar in style to Nos. 6017, etc., and so constructed that with a small screw-driver any person can adjust the locks to an endless variety of keys, or make them all alike to fit one key, without opening the lock or affecting its security.				
6217	$2\frac{1}{4}$	Iron, 3 Secure Levers	$\frac{7}{8}$	\$7.00
6218	$2\frac{1}{4}$	Brass, 3 " "	$\frac{7}{8}$	7.50
6201	$2\frac{1}{4}$	All Brass, 3 " "	$\frac{7}{8}$	8.00
6202	$2\frac{1}{2}$	" " 3 " "	$\frac{7}{8}$	9.00
6203	$2\frac{1}{2}$	" " 3 " "	1	9.50
6204	$2\frac{1}{2}$	" " 3 " "	$1\frac{1}{4}$	10.25
6205	$2\frac{1}{2}$	" " 3 " "	$1\frac{1}{2}$	11.00

All the above locks can be made so the key can be removed only when locked.
For prices of these locks, with more than 12 changes of keys, also with master-key, see pages 569, 570.
One dozen in a box.

SPRING HINGES AND STRIKES OF BRONZE OR BRASS METAL FOR WATER CLOSET DOORS

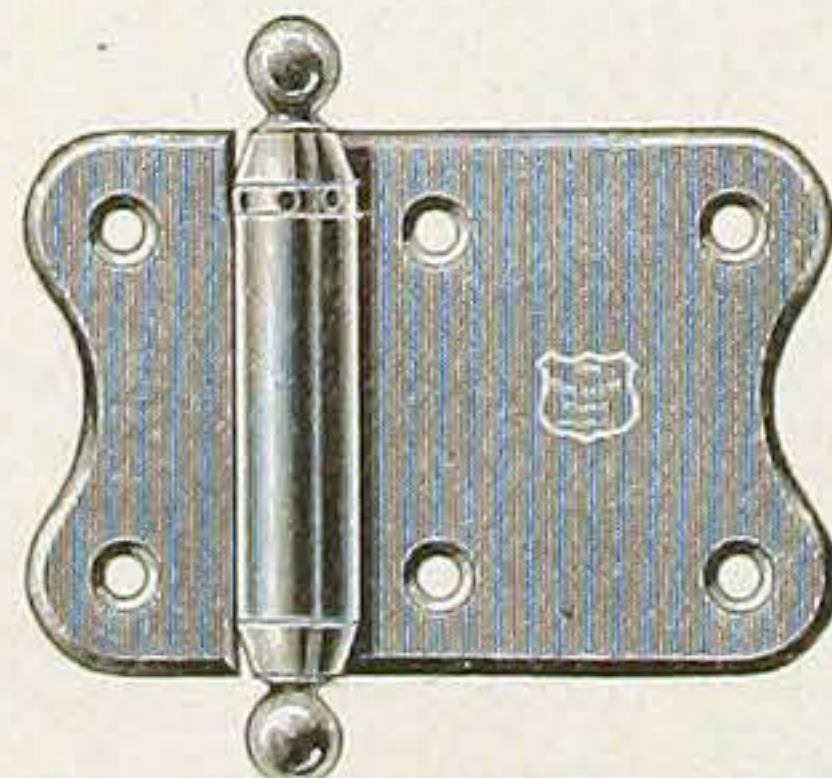

These hinges and strikes are particularly designed to bolt on marble for water closet doors in Hotels, Office or Public Buildings, or Saloons. The single acting hinges are made to close the door, unless otherwise ordered, but can be furnished reverse action to throw the door open if so desired, without extra charge.

The exact thickness of both Marble and Door must be stated when ordering Surface or Box Flanged Hinges.

SURFACE SPRING HINGES.

Style A

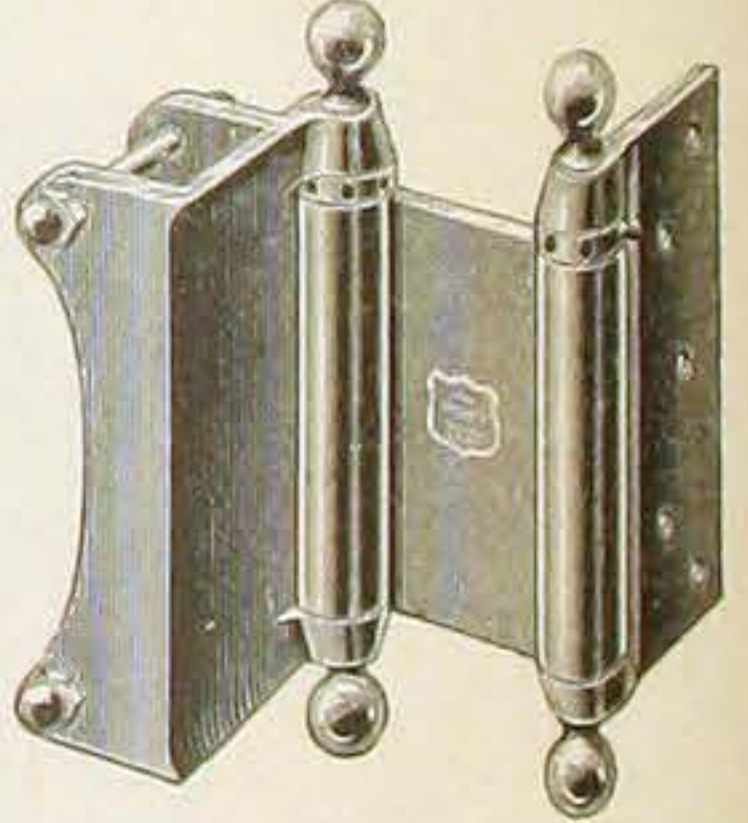

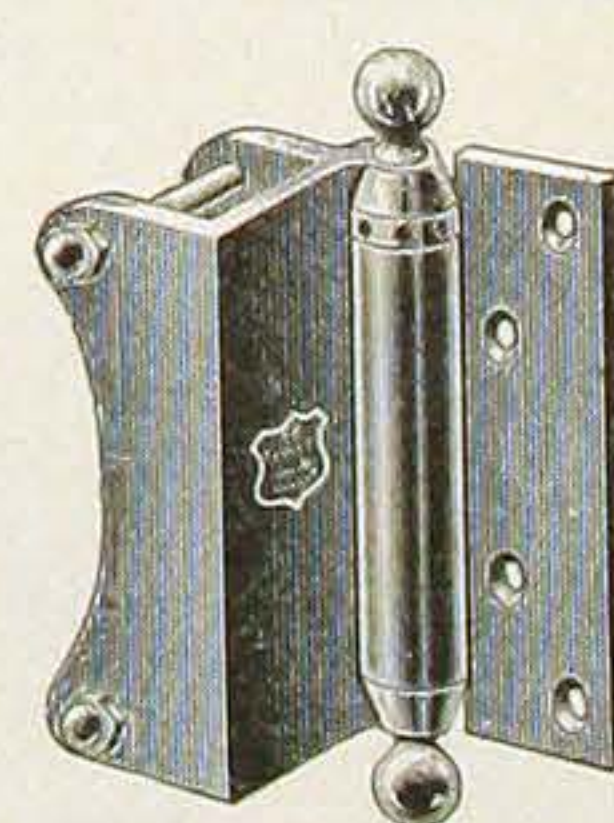

Style B

PER PAIR INCLUDING BOLTS AND SCREWS

Length of Flange, inches.	Style A. No.	Style B. No.	Either Style.
3	500	0500	\$6.00
4	501	0501	7.00

For Nickel, Antique Copper, or Dull Brass Finish on Surface or Box Flanged Hinges, add 10 per cent.
All above one pair in a box, complete with screws.

BOX FLANGED SPRING HINGES

PER PAIR INCLUDING BOLTS AND SCREWS

Length of Flange, inches.	Single Action. No.	Double Action. No.
3	600 \$8.00	629 \$10.00
4	601 10.00	630 14.00

For strikes for same, see next page.

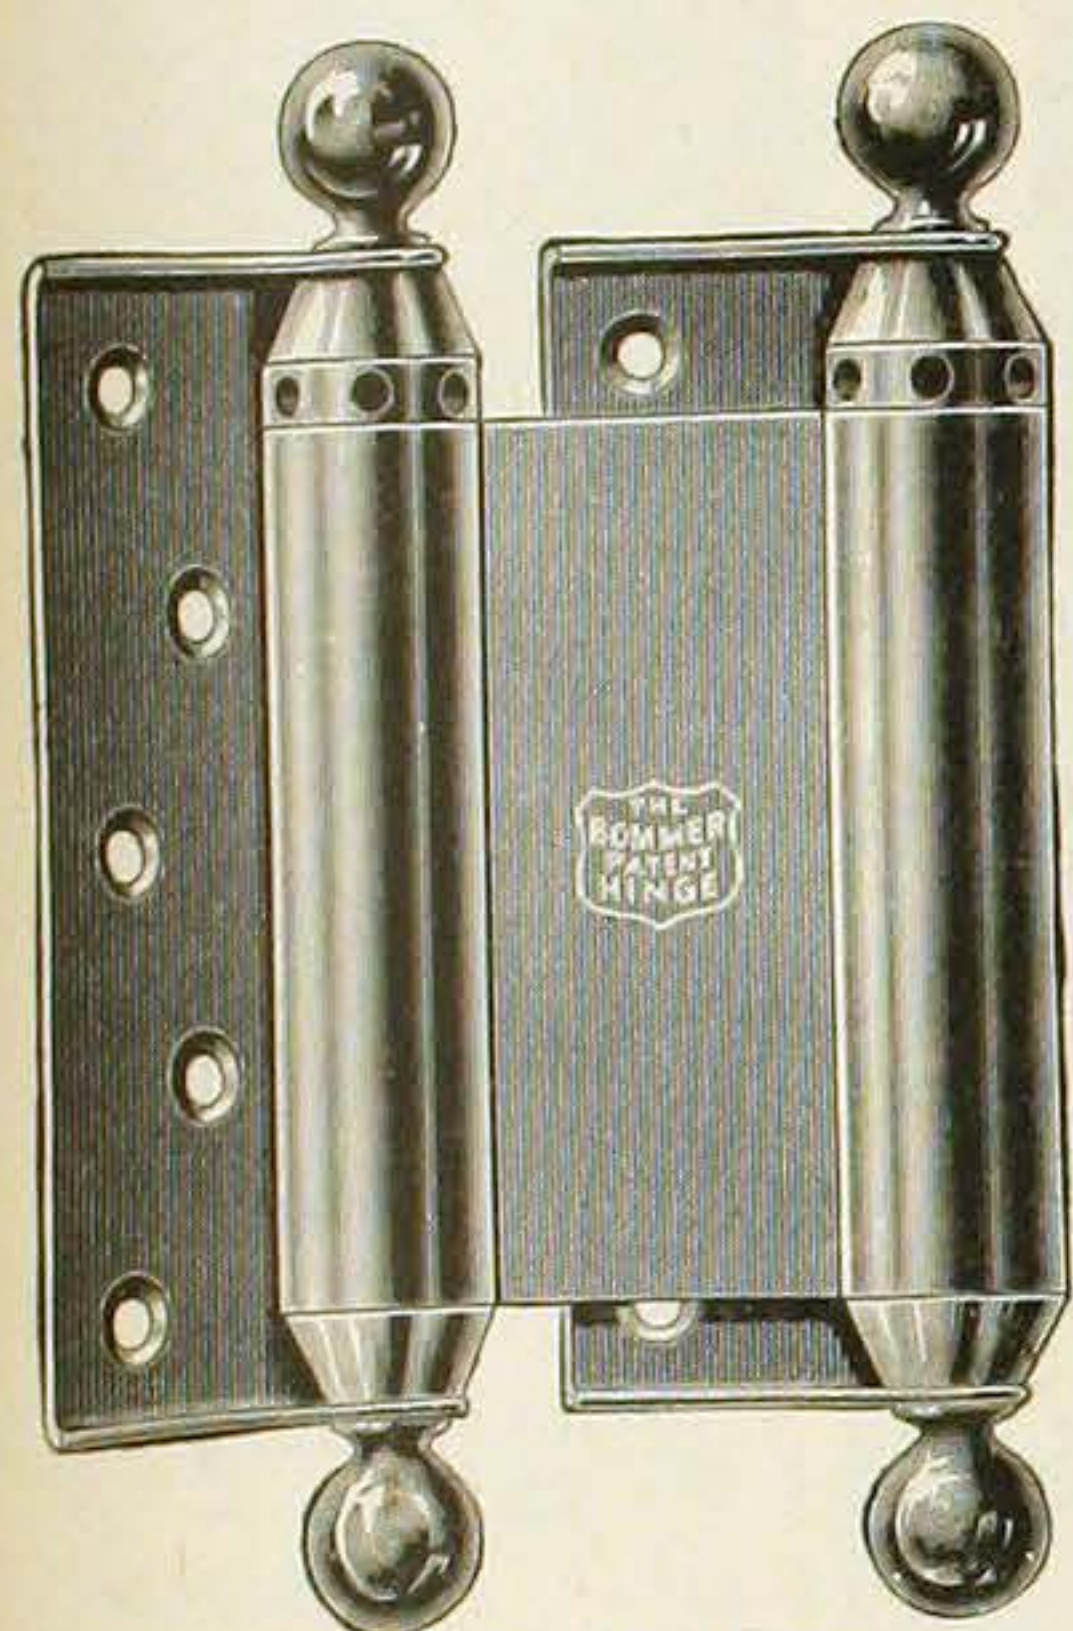

BOMMER SPRING HINGES

MADE FROM WROUGHT STEEL, BRONZE, AND BRASS

The raised shoulders on upper and lower edges of the flanges save half the time in fitting.

To avoid errors, order by number and state which Finish is wanted.

Always use the largest size hinge which the thickness of the door will permit.

Double Acting

OXFORD BLANKS

FOR OXFORD SPRING HINGES, EITHER SINGLE OR DOUBLE ACTING

Double Acting

Where Blanks are desired suffix the letter B to the number of Spring Hinge.

Thus: Wanting a blank to go with Hinge 143, order 143B.

For lists on same, half the price of Spring Hinges.

All of the above, one pair in a box, with screws.

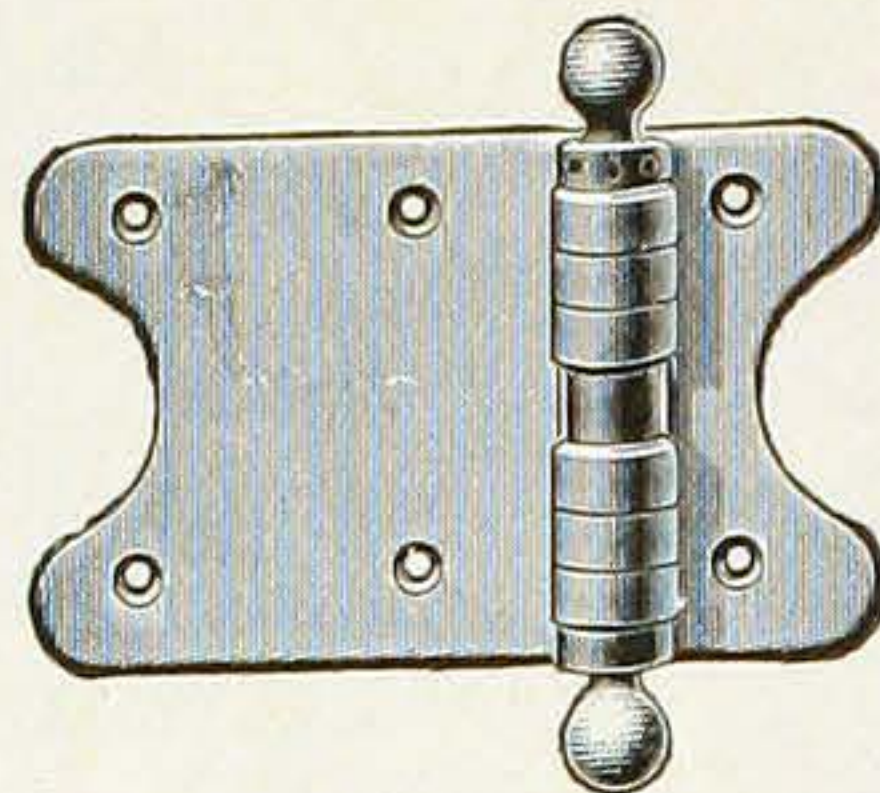

Unless Finish is mentioned, the first one in column of number given will be furnished.

SPRING HINGES FOR MARBLE

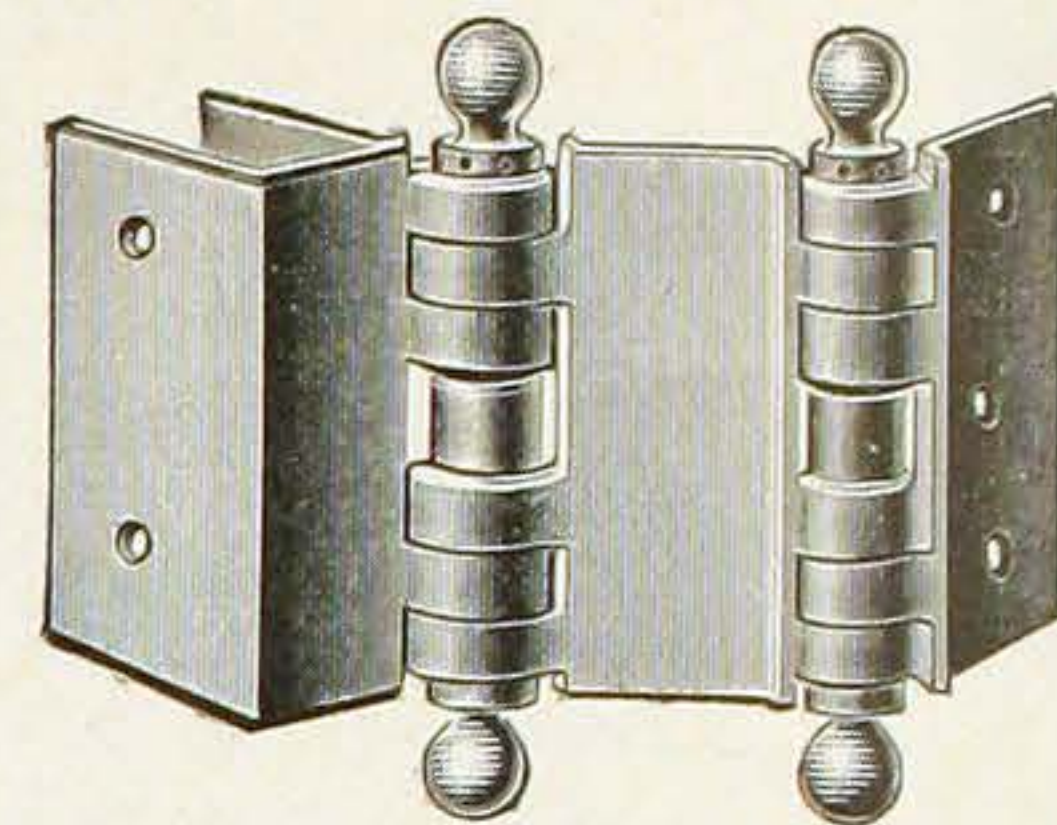

These Hinges are especially designed to bolt on marble for water closet doors of Hotels, Office, and Public Buildings, but the Single Acting, Surface, can be used to advantage on other screen doors. The Single Acting Hinges can be made to throw a door open instead of closing it.

Are made entirely of Bronze, therefore no iron about them to rust.

Orders should always designate the length of Blocks required, and state whether Rope Strapped or Iron Strapped are wanted; also, whether they should be Iron Bushed or Roller Bushed. All Single Blocks have a becket at the lower end, as shown in cut. Double and Triple Blocks are made with becket if so ordered, at an advance in price. Also, state whether wanted with Iron or Lignum-vitæ Sheaves.

THE HARTZ STEEL TACKLE BLOCKS

THE SHELLS ARE WROUGHT STEEL: The Straps run on inside of Shell and through to the Becket in all sizes larger than 6 inch, and in smaller sizes below the Pin. There are Middle Straps in all Double and Triple Blocks. There are no outside Nuts or Bolt Heads to disfigure Shell or entangle in rope. All Pins are Steel, and securely fastened with Spring Cotter. The Edges of Shells are all upset to strengthen them, and rounded out so as to effectually prevent chafing of rope.

The HARTZ Safety Link Hooks are made of special quality Rivet Iron, and are same sizes as the common hooks used by other manufacturers in corresponding sizes of Blocks. It combines the convenience of a Hook with the strength of a Shackle, doing away with all lashing of Hooks, Match Hooks, Shackles, Rings, etc. The Link will positively not unlock when in use, and when not in use does not interfere in any way. All these Blocks, 9 inch and larger, have the same "score" as Wide Mortise Blocks, and take the same size of rope.

With Safety Link Hooks. Common Loose Hooks will be furnished at same price, when specified. Plain, Roller-Bushed, and Graphite Bronze Self-Lubricating Sheaves fit into the same Shell and are interchangeable.

	24	4	75.00	110.00	140.00				85.00	130.00	170.00

NOTE: Not made with Roller Bushing. 12, 14 and 16 inch, with either Safety Link Hooks, Loose Common Hooks, Rings or Shackles; 17 to 24 inch, with Heavy Outside Straps and Shackles.

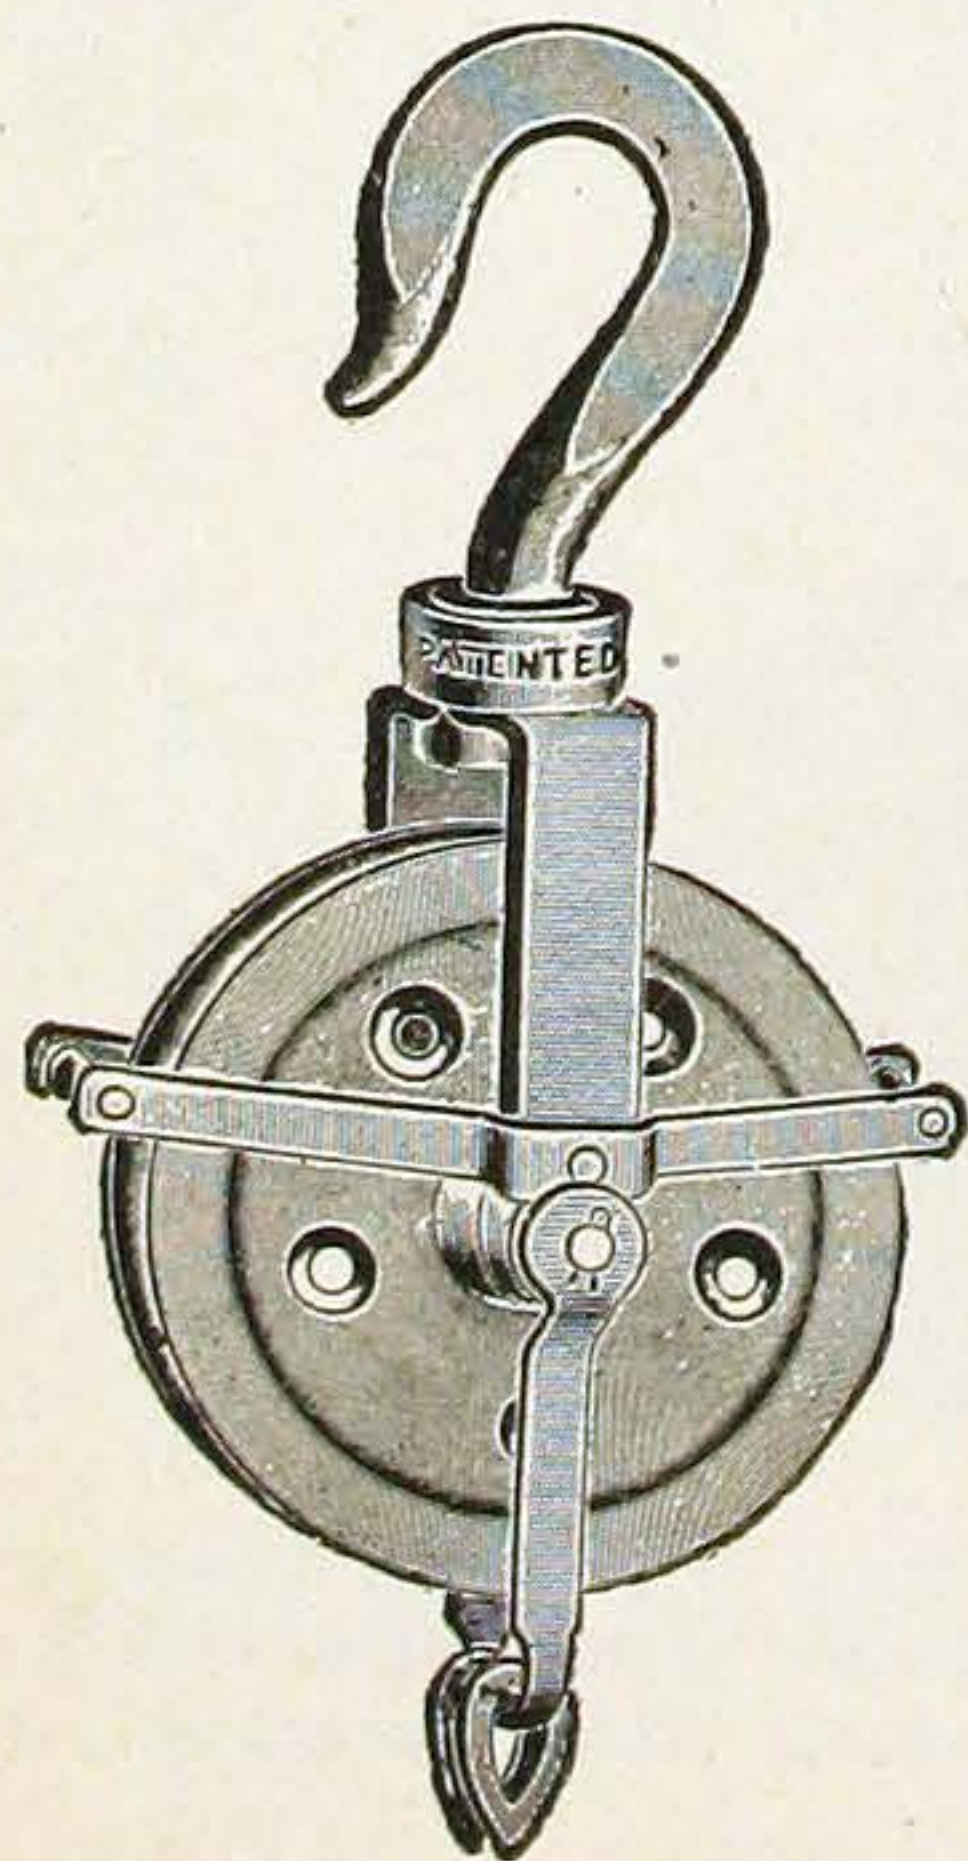

N. B.—All the above Blocks can be furnished Galvanized at an advance in price. When wanted, submit Specifications for prices.

Galvanized Blocks larger than 8 inches are subject to Factory Shipment.

THE HARTZ STEEL WIRE ROPE GIN BLOCKS

NOTE: Wire Rope Gin Blocks with Loose Safety Link Hooks are sold at same list prices as Stiff Swivel Hook Wire Rope Gin Blocks.

With Roller Guards to protect the Rope, Wrought Iron Skeleton, and Stiff Swivel Hooks. With or without Beckets.

							20	1 1/8	52.00
							22	1 1/4	60.00

N. B.—The edges are all neatly rounded to protect the rope from chafing.

The Hartz Snatch Blocks have the only positive Safety-Locking device made.

NOTE.—Blocks for Wire Rope are fitted with a Patent Guard, to prevent any possibility of the Rope leaving the Sheave. This Guard may be applied or removed at pleasure, and can be carried in the vest pocket.

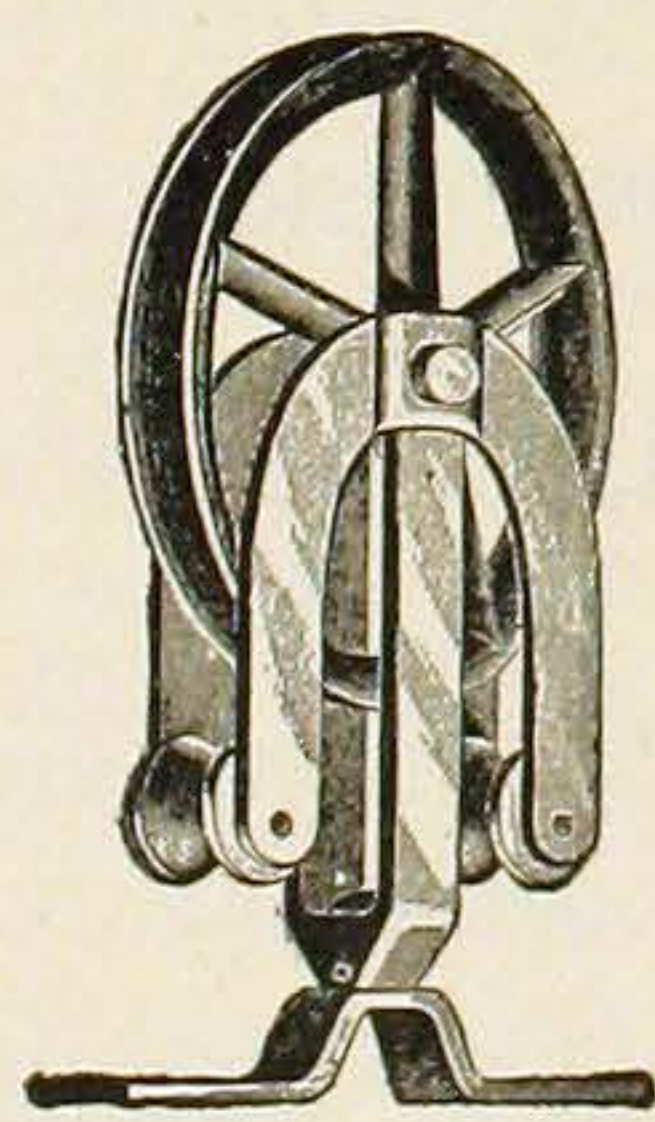

Strap goes entirely around Shell.

The Hartz Wire Rope Blocks with inclosed and new style Sheaves are the best and cheapest made.

HARTZ ICE BLOCKS

Upper Ice Block With Swivel Hook

Lower Ice Block With Swivel Plates

Both the upper and lower Blocks are made with roller guards. The sheaves have Self-Lubricating Bronze Bushings, allowing them to be run at high speed without the use of any oil.

Patent Swivel, with Friction Rollers

STATIONARY CASTERS

Nos.	11	12	13	14
Inches,	3	4 heavy	4 1/2	4 1/2 heavy
Each,	\$0.25	.35	.41	.55

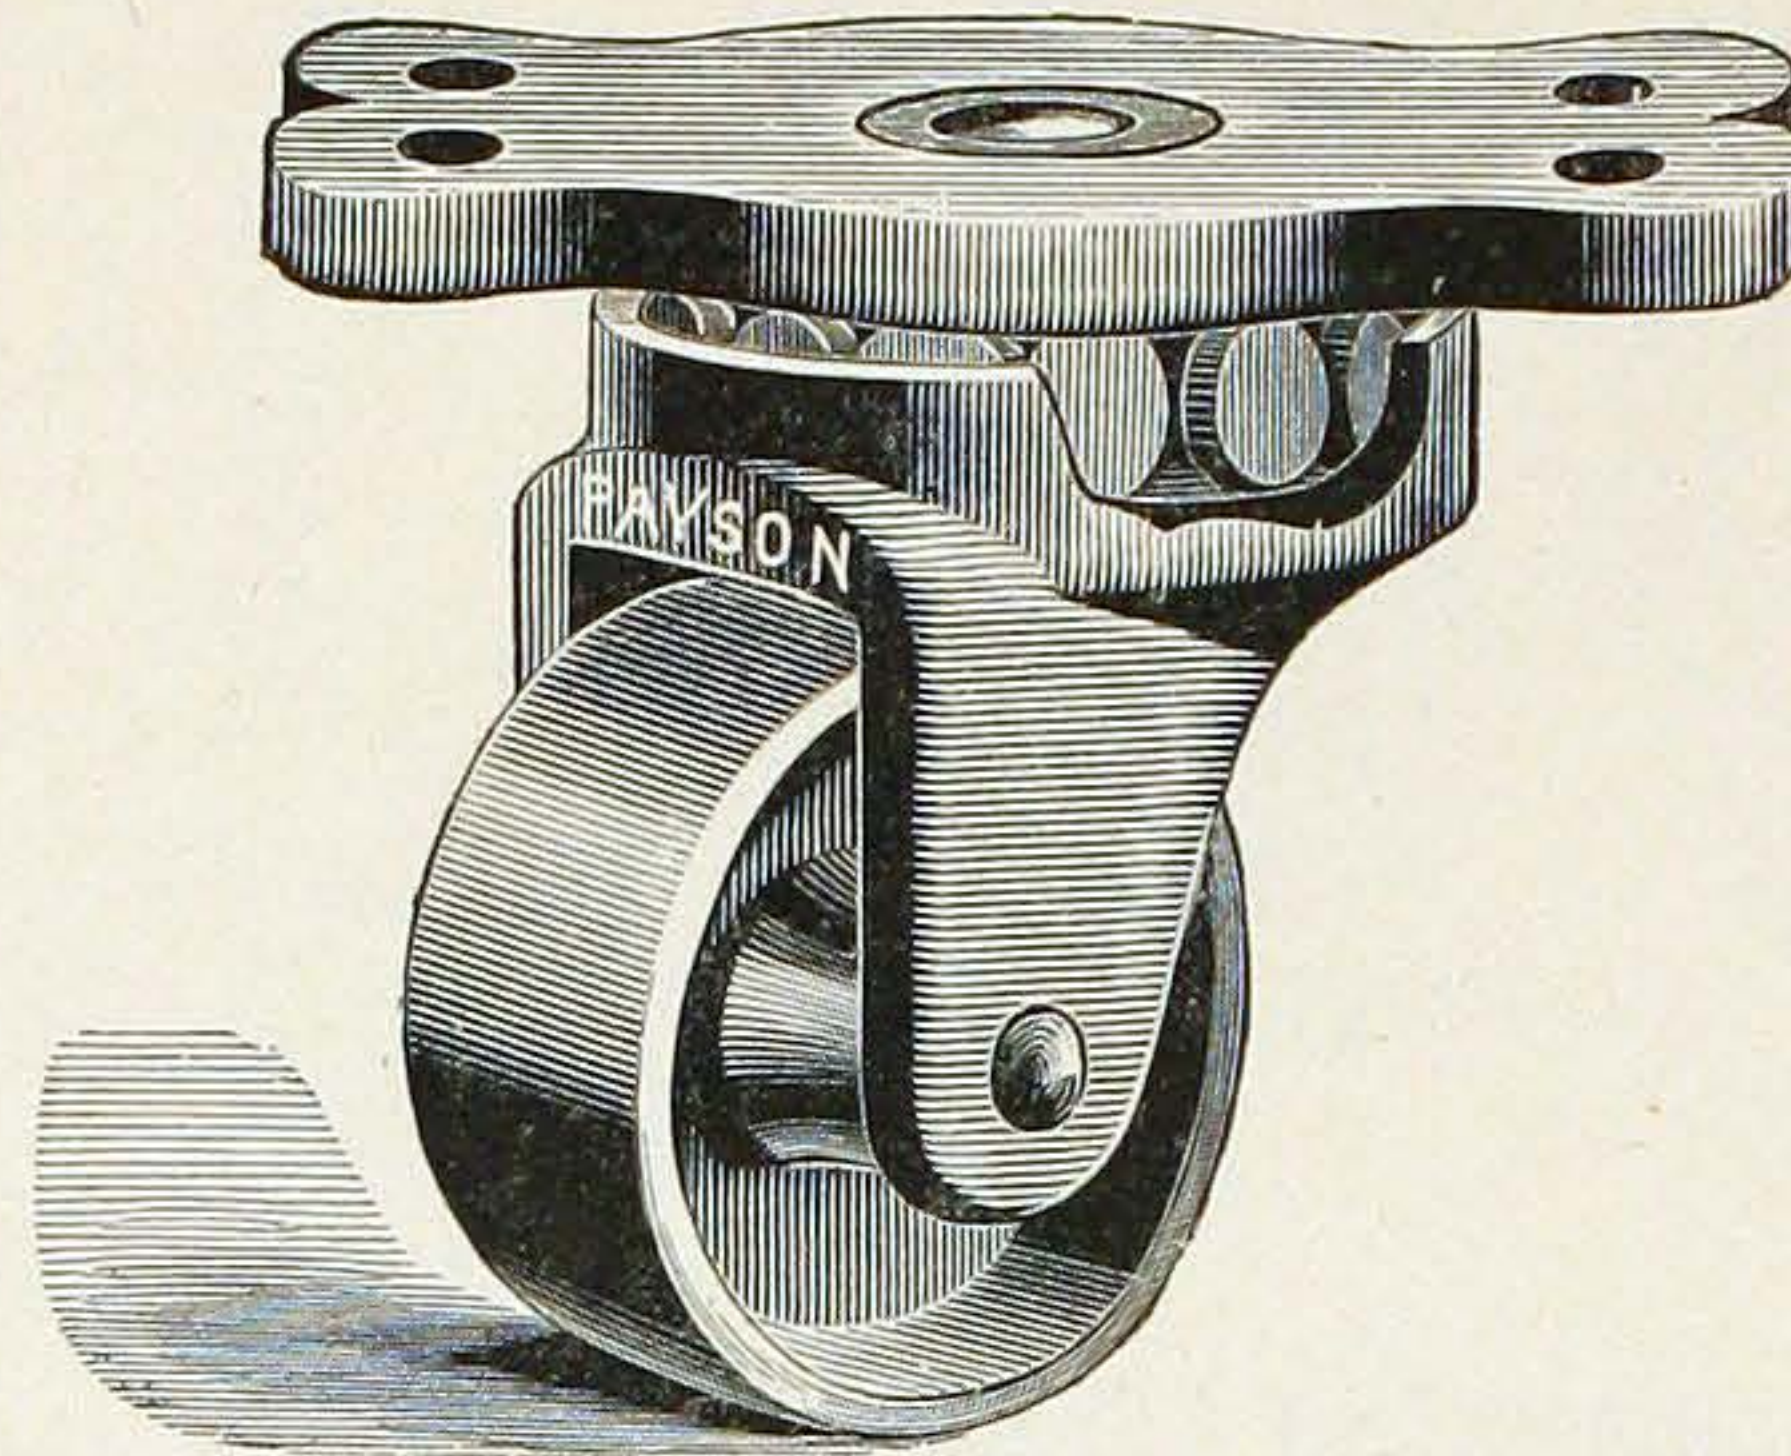

SWIVEL CASTERS

Nos.	1	2	4
Inches,	3	4 heavy	4 1/2 heavy
Each,	\$0.33	.58	.62

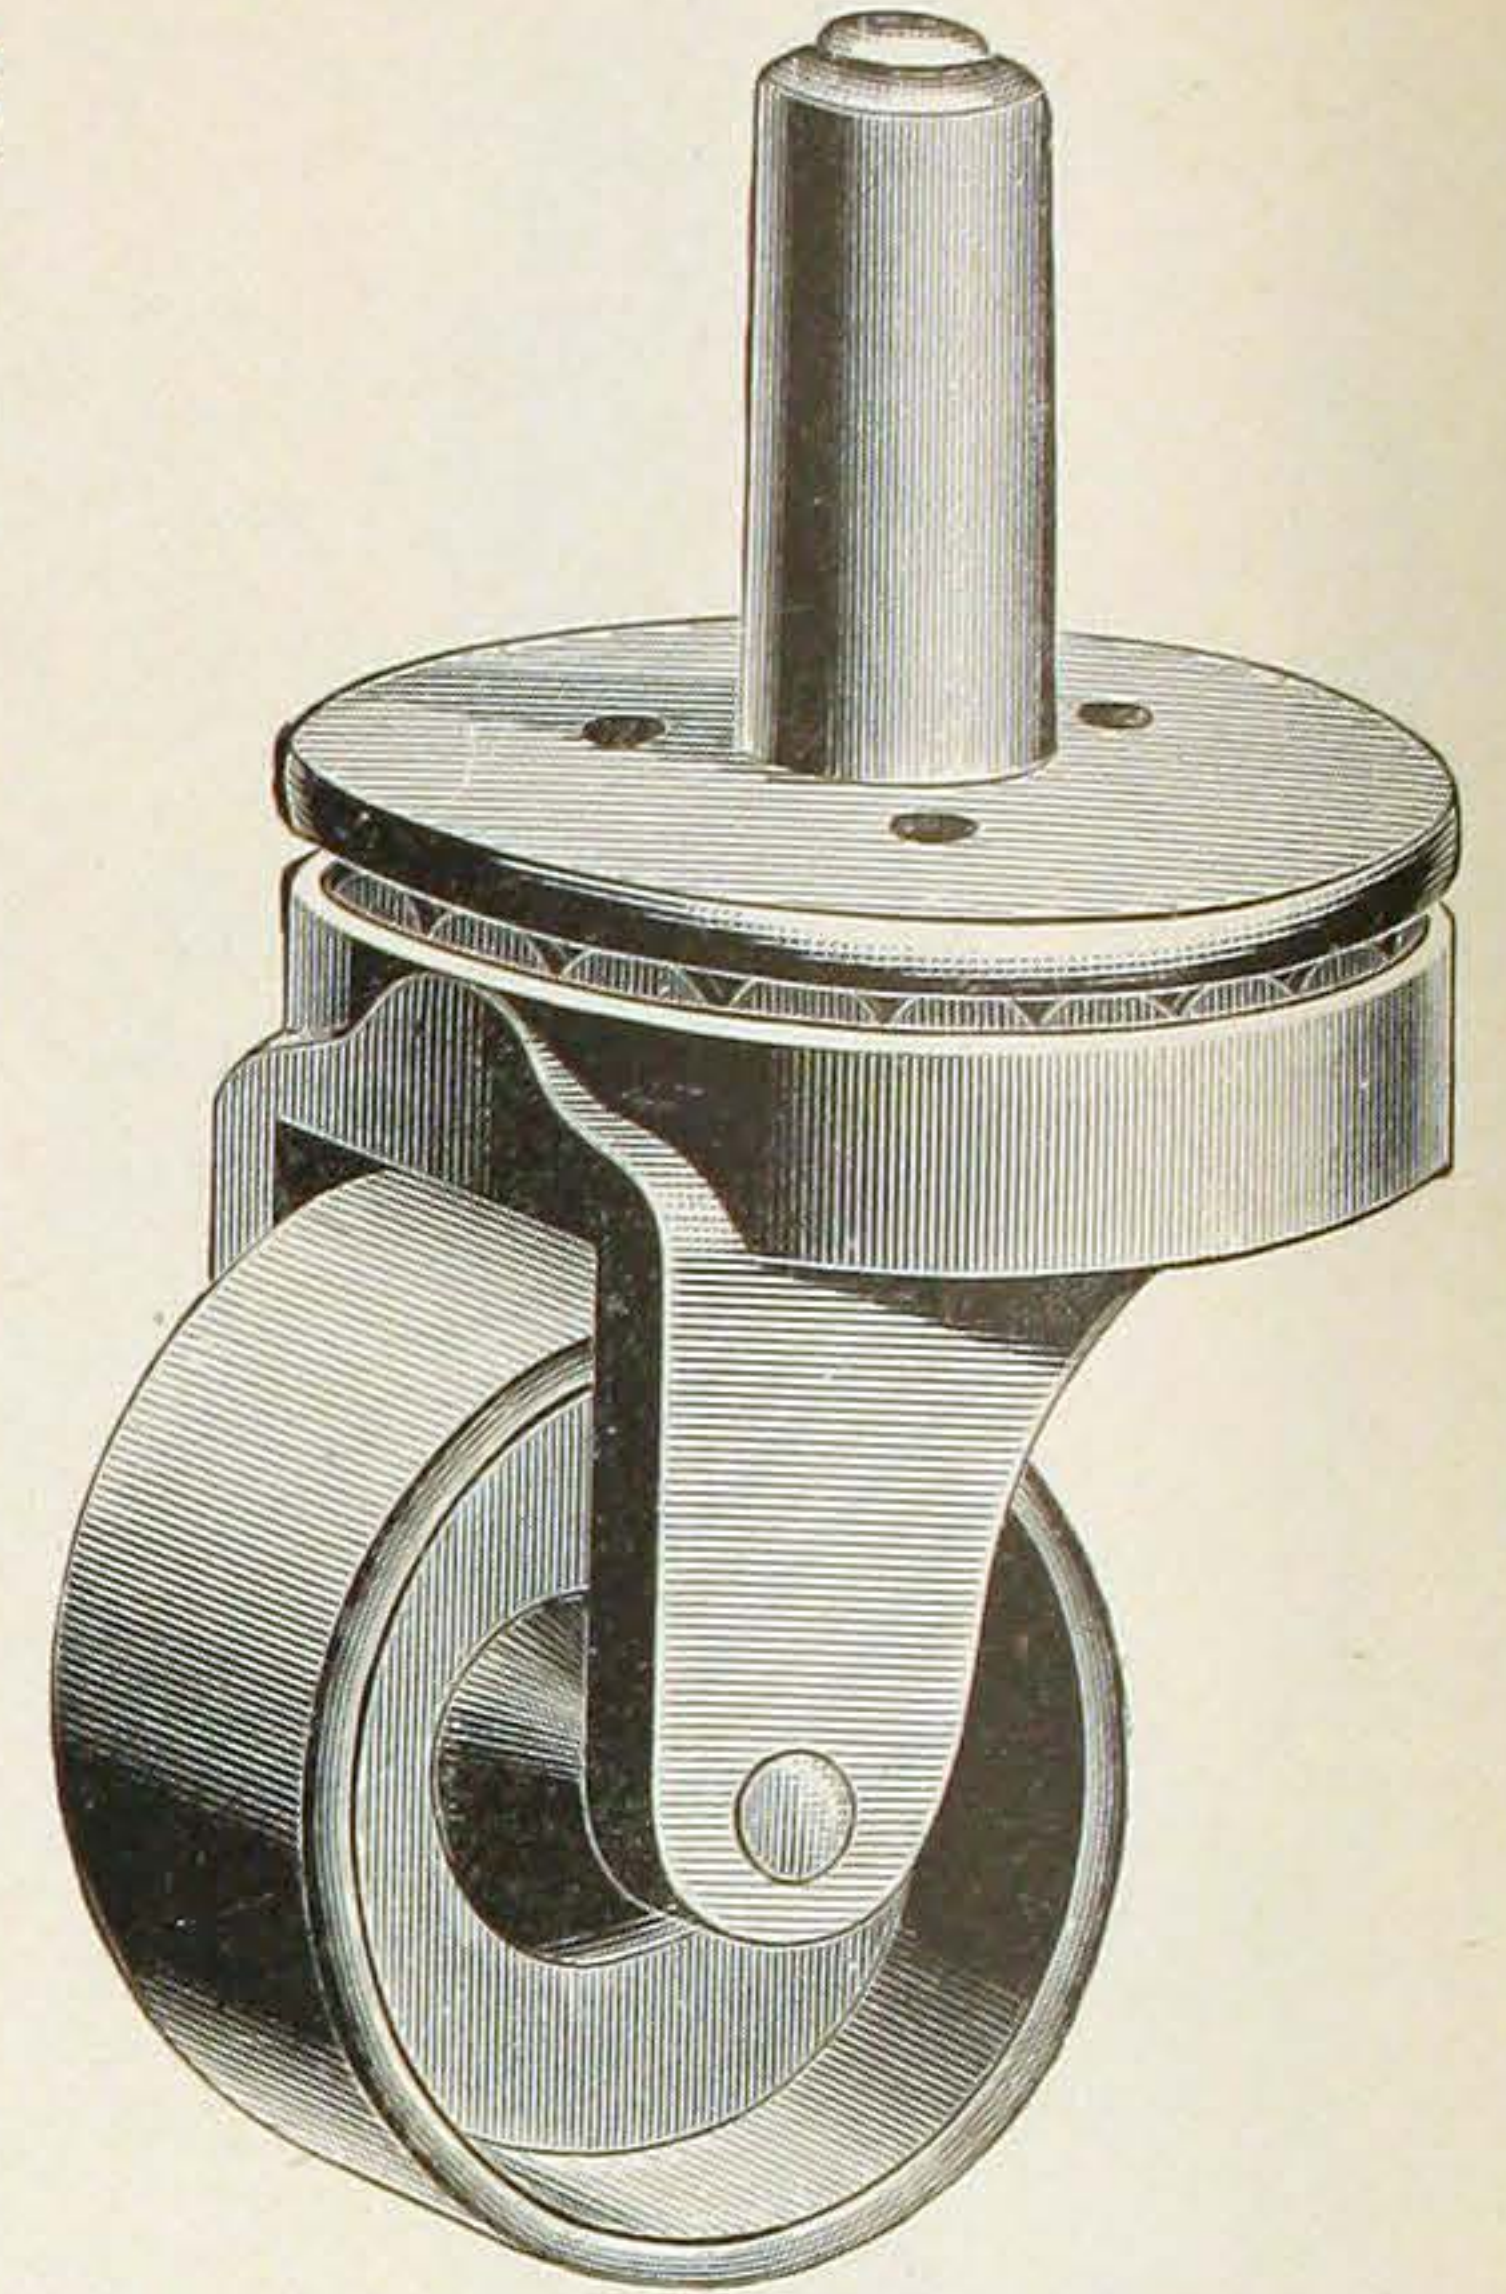

The Swivel Caster, with Friction Rollers, is the best Caster ever made for use on Trucks.
The weight comes on the rollers between the horn and the plate, and there is no danger of breakage as in the ordinary Caster made with a pivot plate.

Fastenings for Cable Chains, per Window, 25 cts.

These Cable Chains, being jointed, afford a steady movement of the heaviest window sash absolutely noiseless, and are especially desirable for first-class work or where great durability is desired.

Some of this class of chains in use the past twenty-two years.

Use only Square Groove Pulley.

One dozen in a box.

Handled Auger Bits in separate sizes, same List as Extra Bits.

BITS, ASSORTED IN WOODEN BOXES

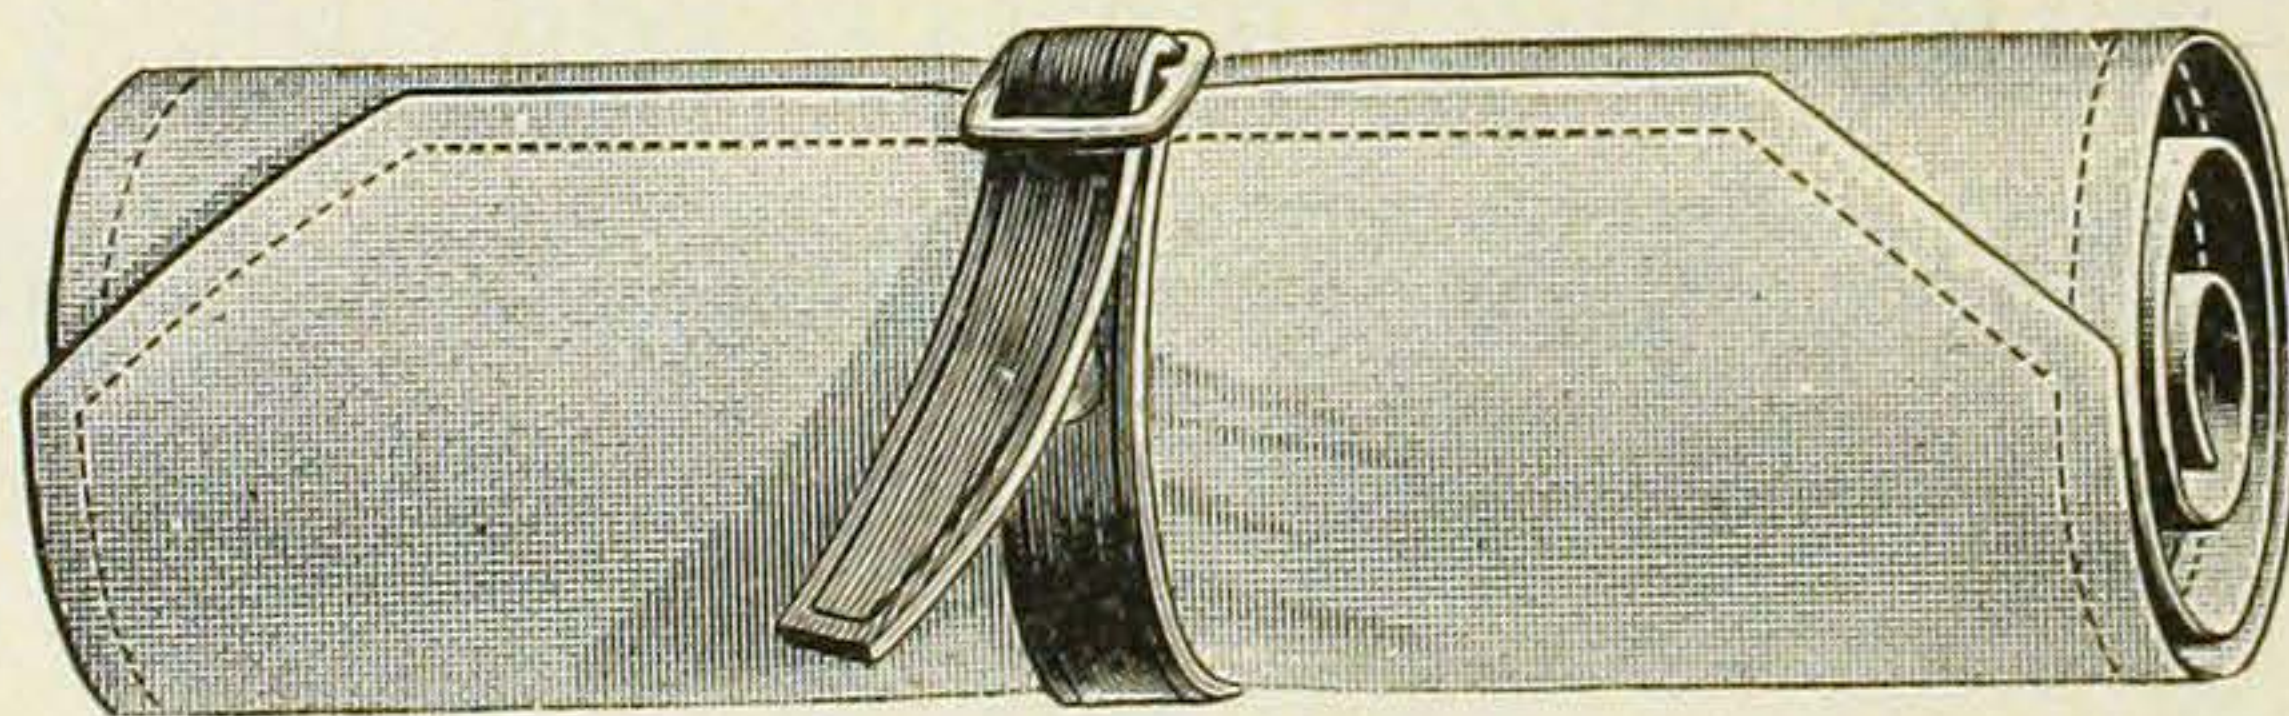

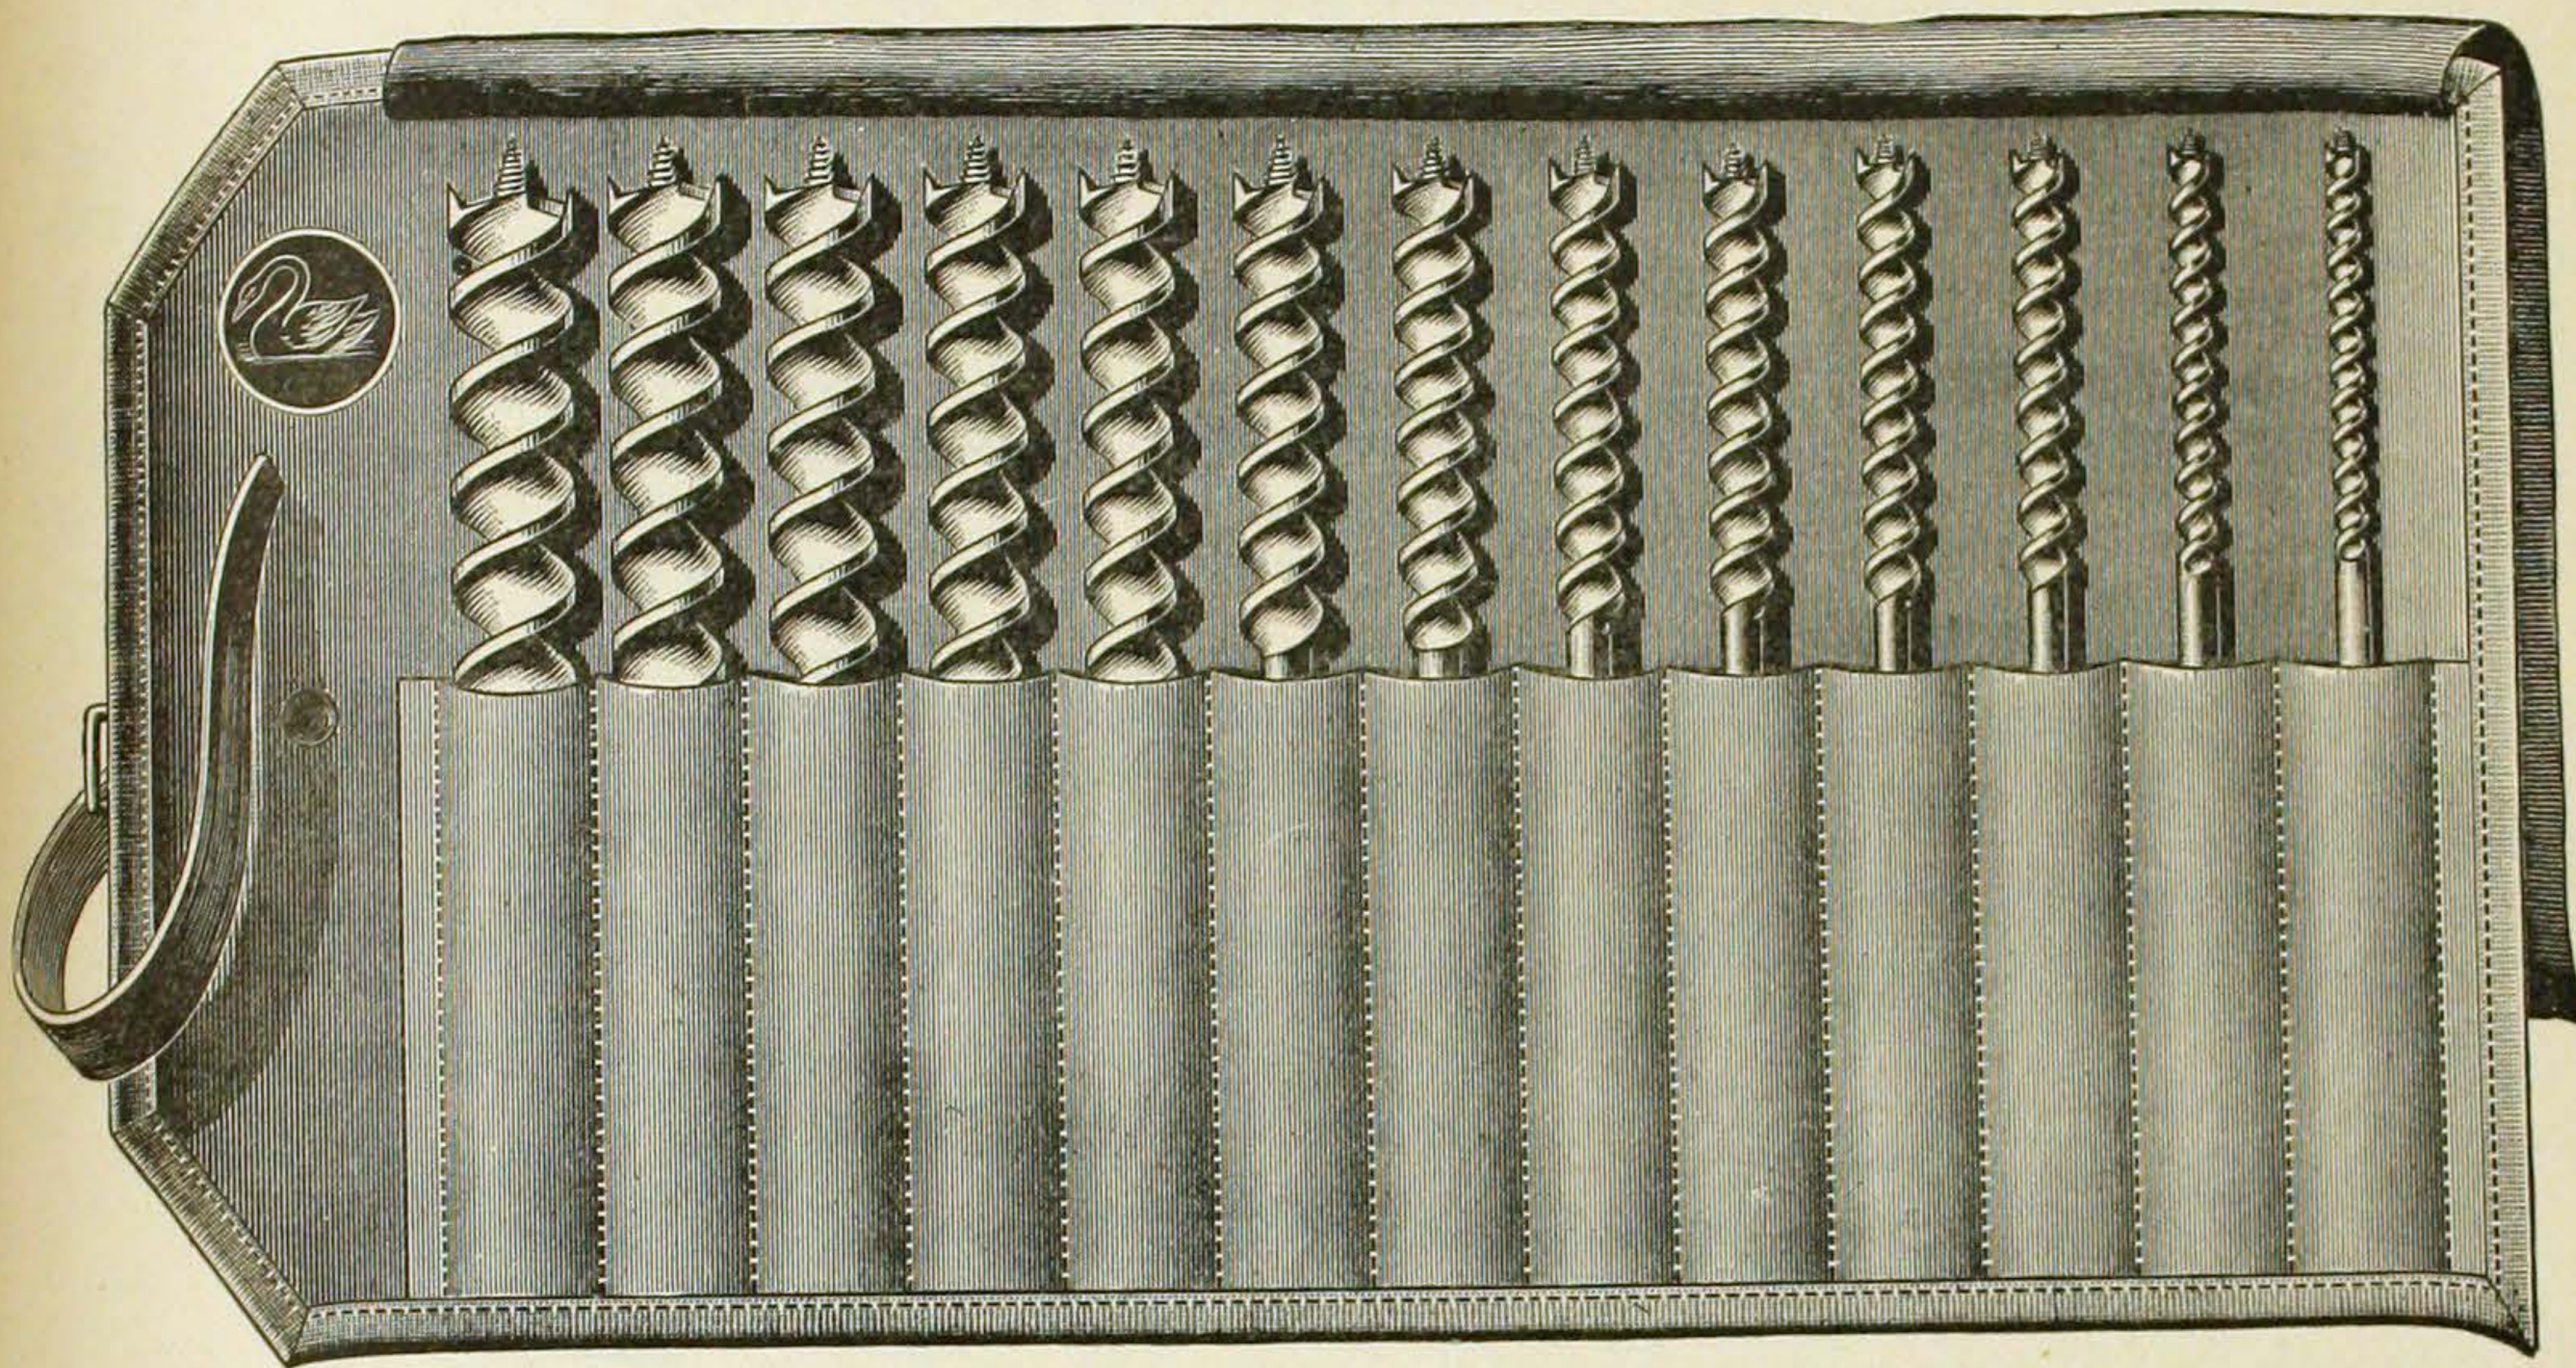

For the convenience of Mechanics and Wood-workers we are now packing our Auger Bits in boxes as above illustrated. These boxes are made of hard wood, with patented spring racks that hold the Bits securely in their places. The holding springs may be made tighter or looser, as desired.

All of our Auger Bits packed in this manner are carefully selected, and are fully warranted.

ACME TOOL CHESTS

SWAN'S PATENT CHISEL HANDLES

PATENTED NOV. 19, 1890

These handles are made with an iron ferrule inserted in the end, and as nothing withstands blows better than end wood confined, they are, by means of the ferrule, prevented from splitting and made practically indestructible, while the shape of the handle is not interfered with when used by hand.

SWAN'S PATENT SCREW-DRIVERS

WITH STRONG MALLEABLE IRON FERRULES

PATENTED MAY 22, 1894. DESIGN PATENT ON HANDLES FEBRUARY 1, 1898.

All Superior Quality and Fully Warranted.

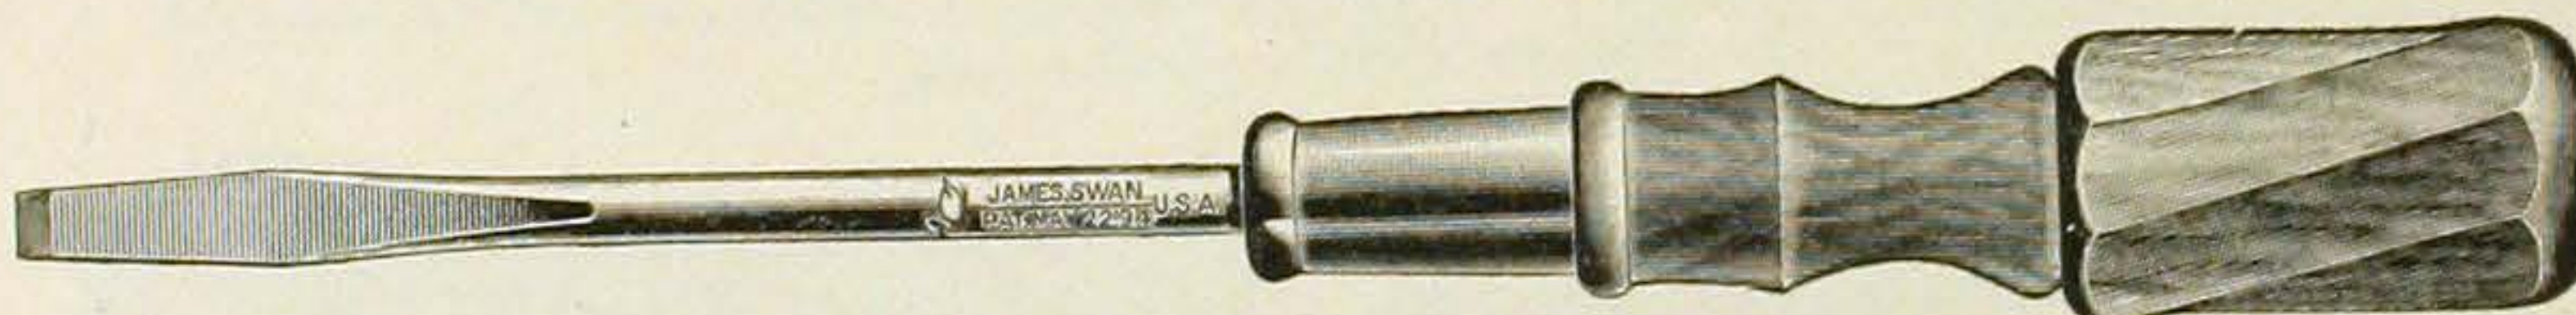

No. 65

No. 065

No. 67

No. 68

Above all the same lists.

Size, inches,	2 1/2	3	4	5	6	7	8	9	10	12
Per dozen,	\$3.00	3.50	4.25	5.00	6.00	7.00	8.00	9.00	10.00	12.00

Cabinet No. 66

ALL BLADES $\frac{7}{32}$ INCH DIAMETER

Size, inches,	2 1/2	3 1/2	4 1/2	5 1/2	6 1/2	8 1/2	10 1/2	12 1/2
Per dozen,	\$3.00	3.50	4.50	5.50	6.00	8.00	9.50	11.00

We call special attention to the design patent on these Handles. The construction is such that they are easier on the hand when in use than any other handle, especially the No. 67.

The inside of the ferrule is so constructed that when the blade is driven home it is practically impossible to turn or come off. The end of the ferrule is bored tapering and the blade made to correspond, so that, being a tapered fit in both ferrule and handle, either blade or handle can be easily replaced in case of accident.

All above, half dozen in a wooden box.

SOLID CAST STEEL SCREW-DRIVERS

MADE FROM BEST CRUCIBLE CAST STEEL

MILLER'S FALLS AUTOMATIC SCREW-DRIVERS

Patent revolving sleeve which the left hand grasps when the tool is working. While this sleeve is a great advantage in driving screws, it also enables the tool to be used as an automatic drill. There is also a locking device which prevents the screw-driver from falling out of engagement when held perpendicular. All the metal parts are highly polished and heavily nickel-plated. The handle is of cocobolo. Full length, extended, 17 inches. The three screw-driver bits which go with each tool are 4 inches long.

- No. 11 Without Drill Points, but with 3 Screw-driver Bits,
 " 12 With 8 " " and 3 Screw-driver Bits,

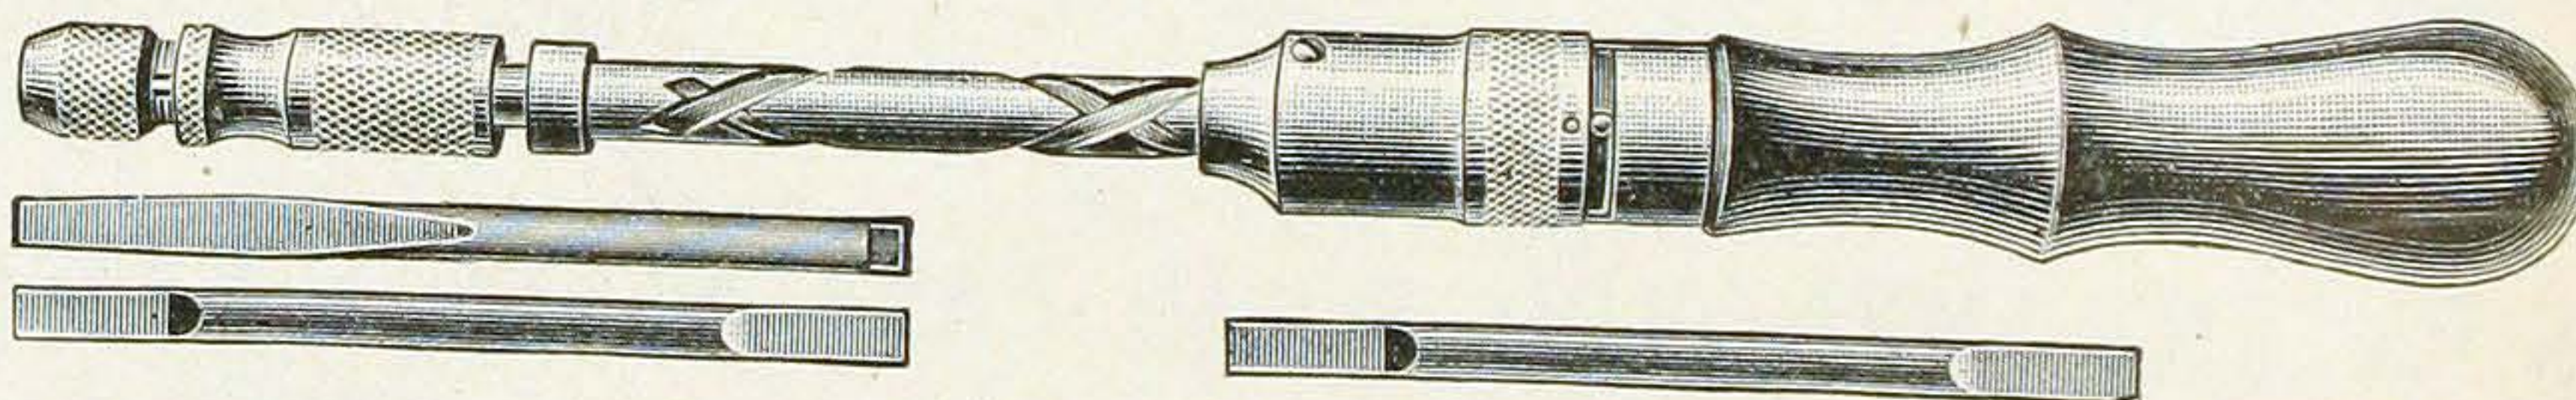

per dozen, \$15.00
 " " 21.00

WITH CAST INTERCHANGEABLE METAL NUT

- No. 20 With 3 Screw-driver Bits, 9 inches long, 13 inches extended,
 " 21 " 3 " " 10 " " 15 " "

per dozen, \$12.00
 " " 14.00

This Screw-driver has one groove cut deeper than the other, thus preserving the individuality of each and preventing wear at point of intersection. They are packed with three bits each, two of them double pointed, thus making five points in all.

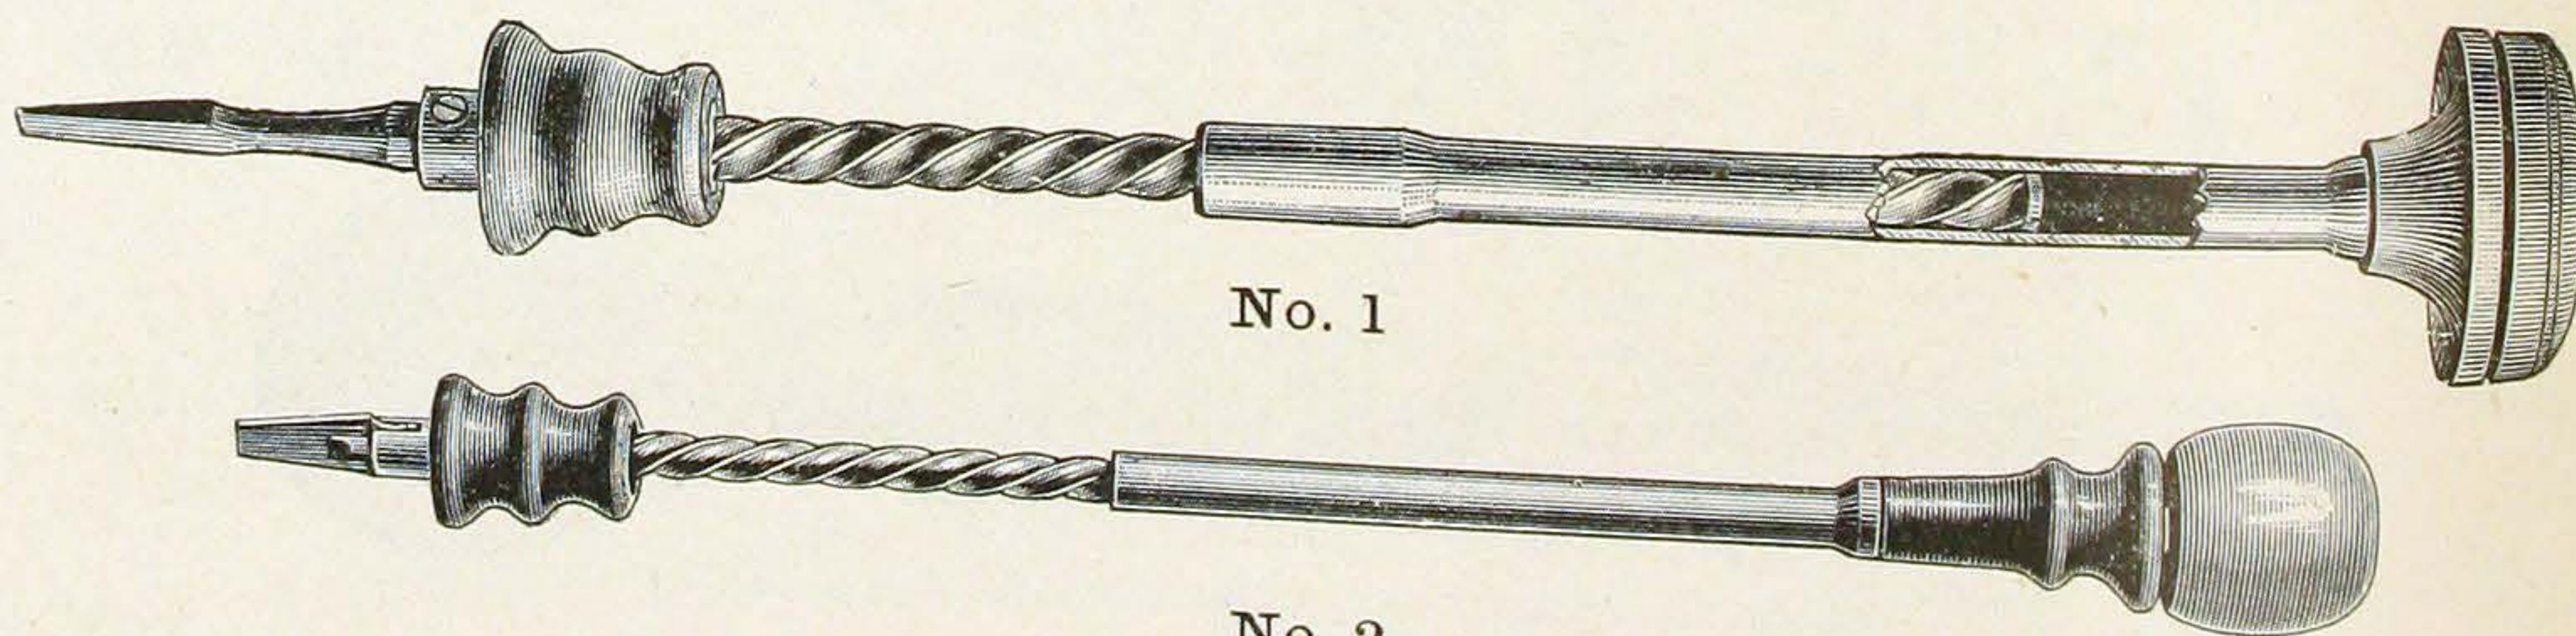

- No. 41 Reversible,

Above, one in a box.

per dozen, \$18.00

JONES' REVERSIBLE SPIRAL SCREW-DRIVERS

707

These Screw-drivers are made to drive or draw screws.

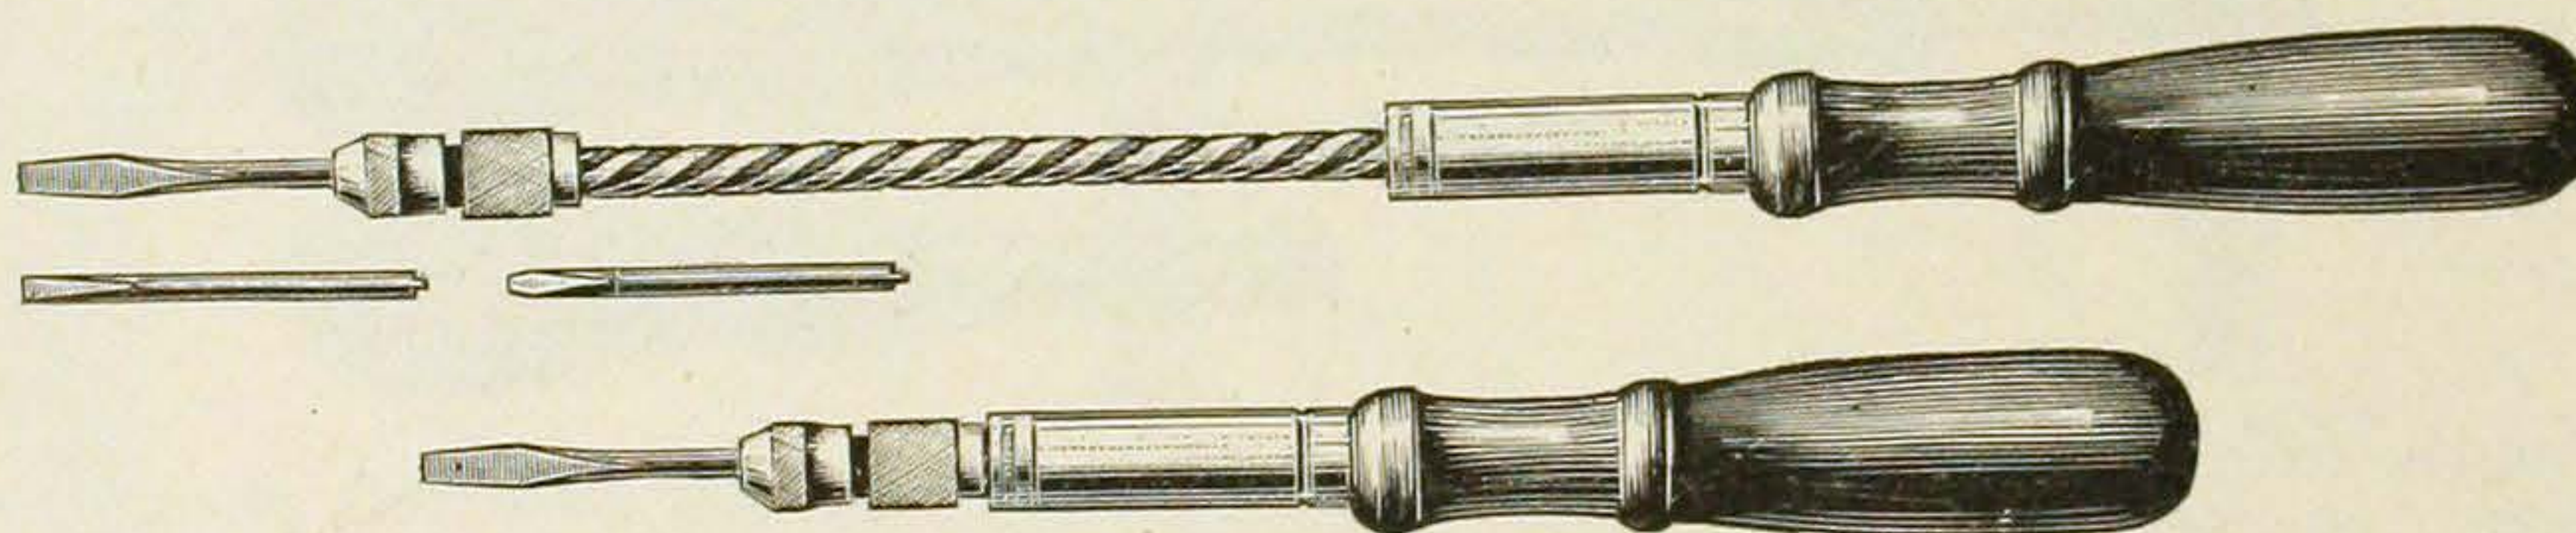

DIRECTIONS: Grasp swelled brass sleeve with left hand, and with right hand turn handle the direction you wish to drive the screw. When spiral is pushed in, it can be used as an ordinary Screw-driver.

The tube is of seamless brass, highly polished, and handles are of hard wood.

SPOFFORD'S PATENT BRACES

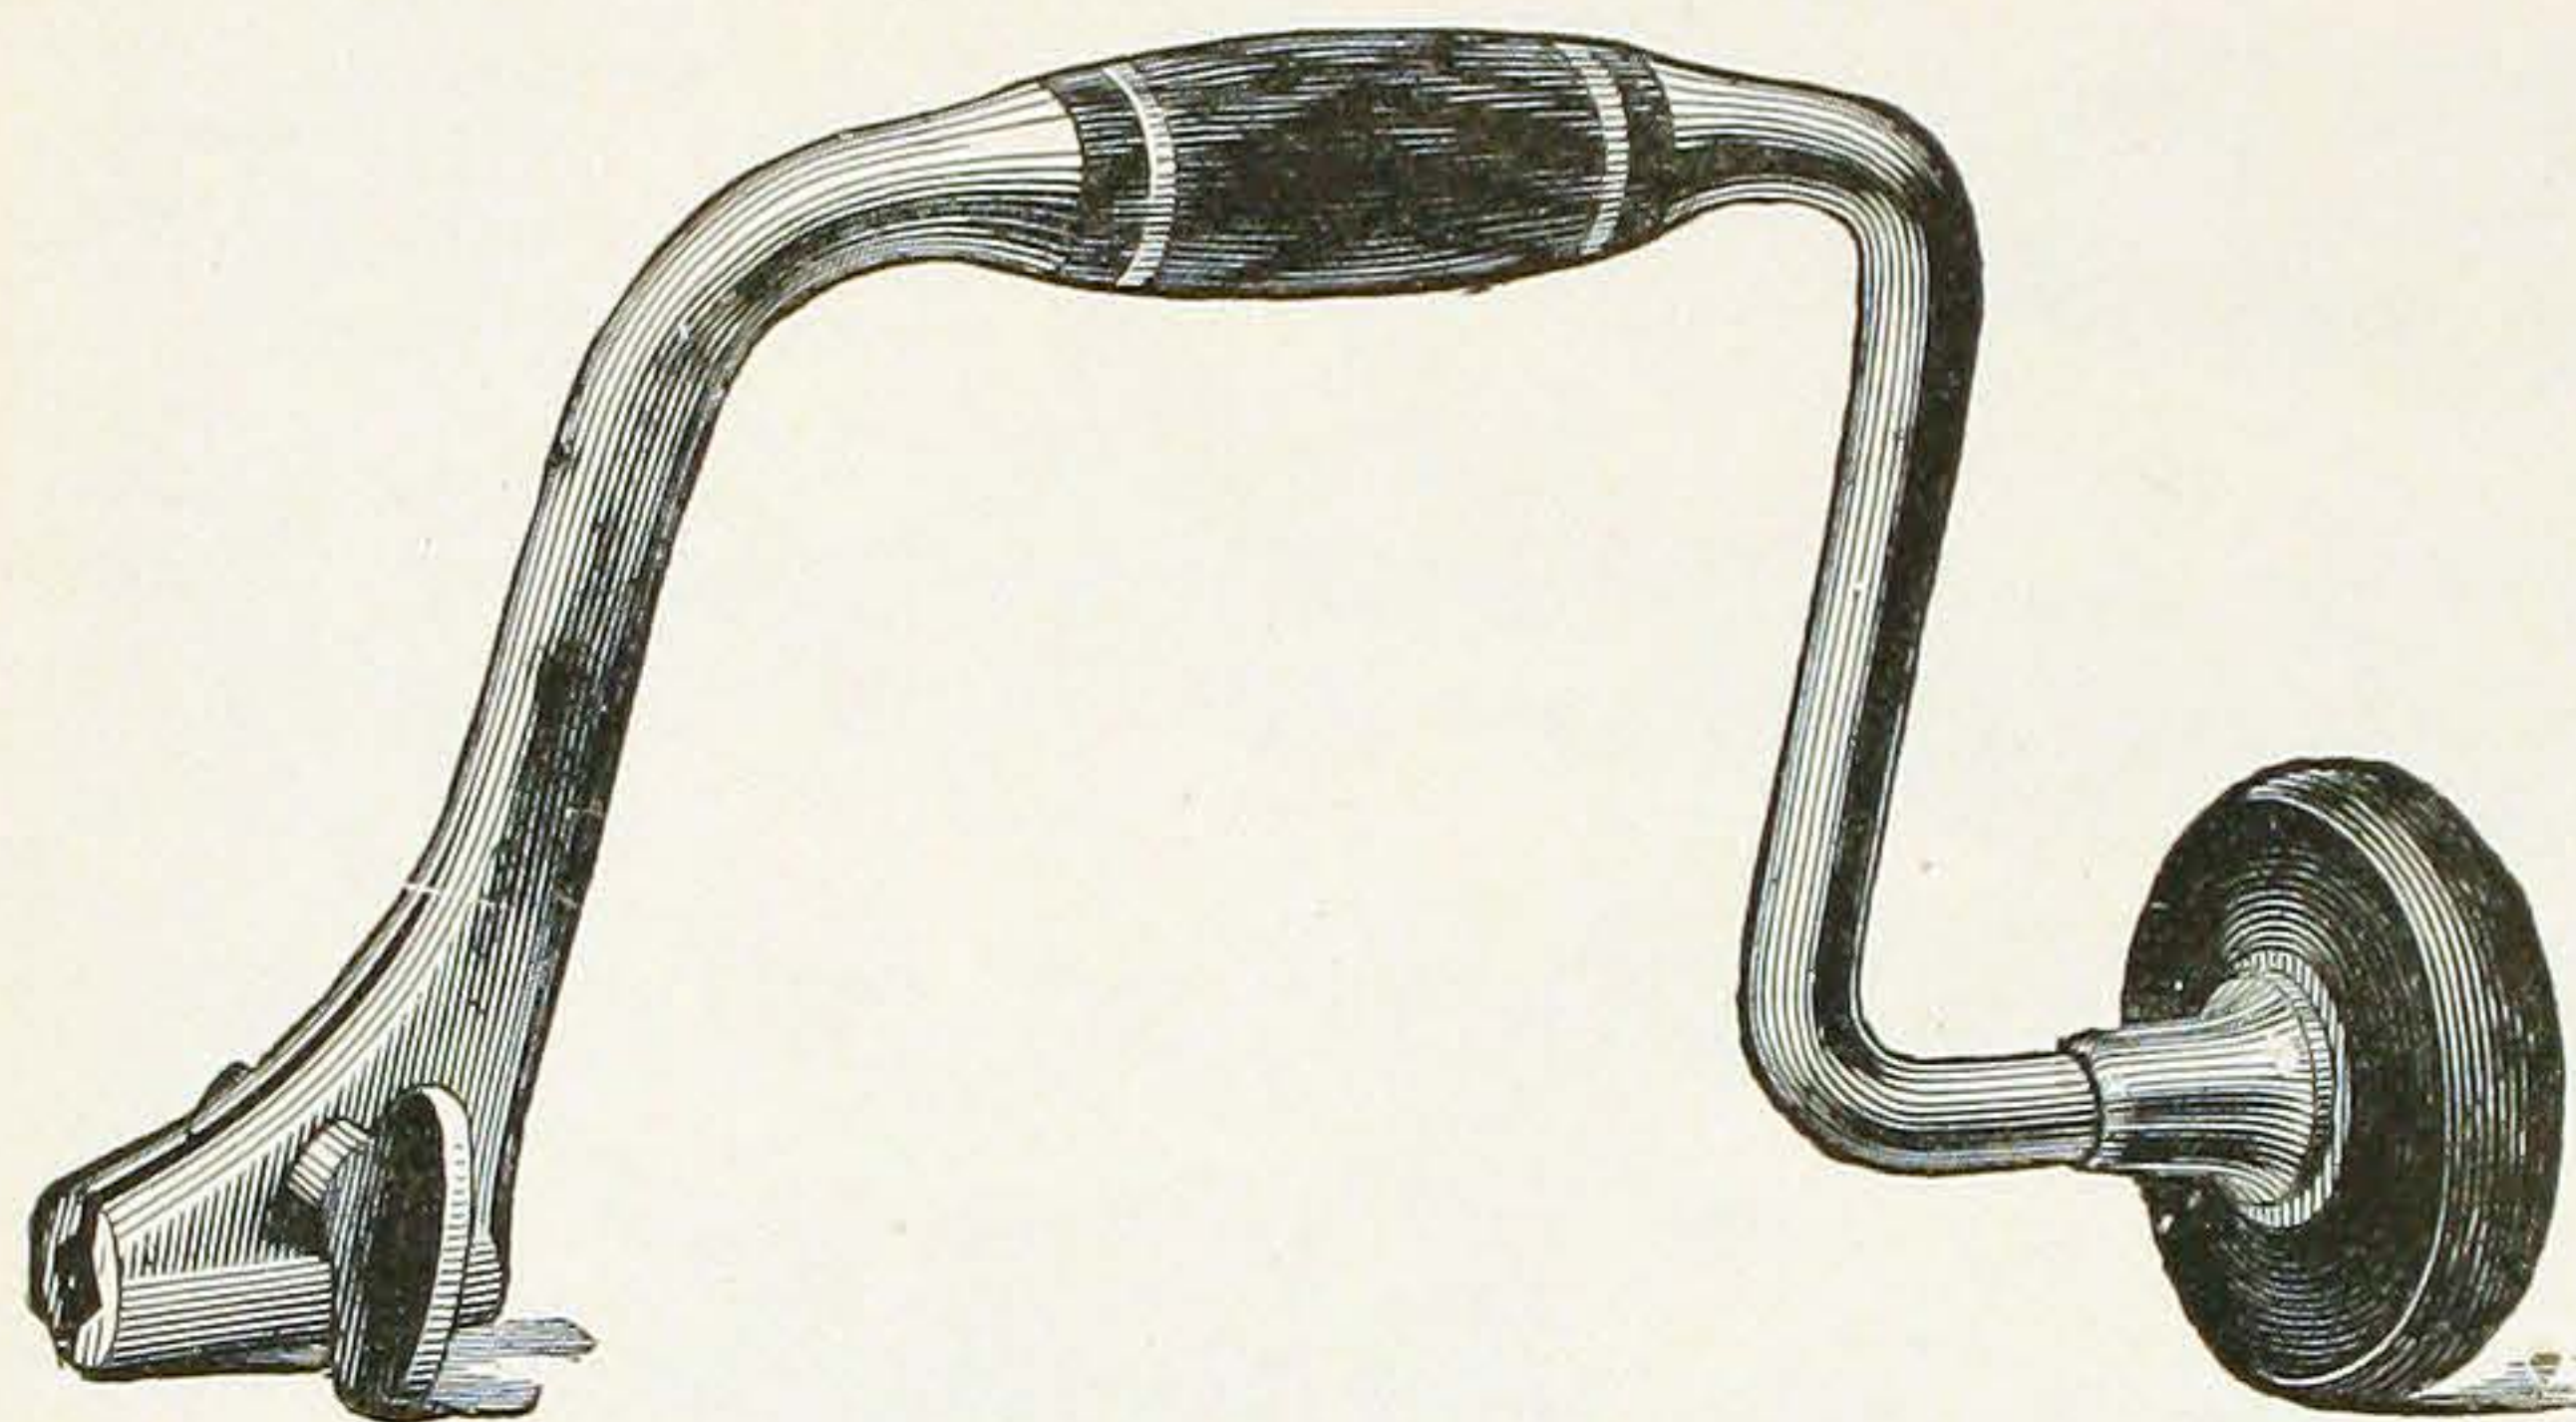

The merits of these Braces are now so well known that they need no recommendation.

They take Bits of all sizes just as they come, the jaws or sockets readily adjusting themselves to the taper of the Bit-shank, holding it firm and true. The smallest size, No. 7, is provided with an additional recess in the jaws of the socket, by which it holds small Twist Drills, etc., having only the round wire of the drill or reamer for a shank.

Thumb Screws made from the best Bessemer Steel Rods.

Half dozen in a box.

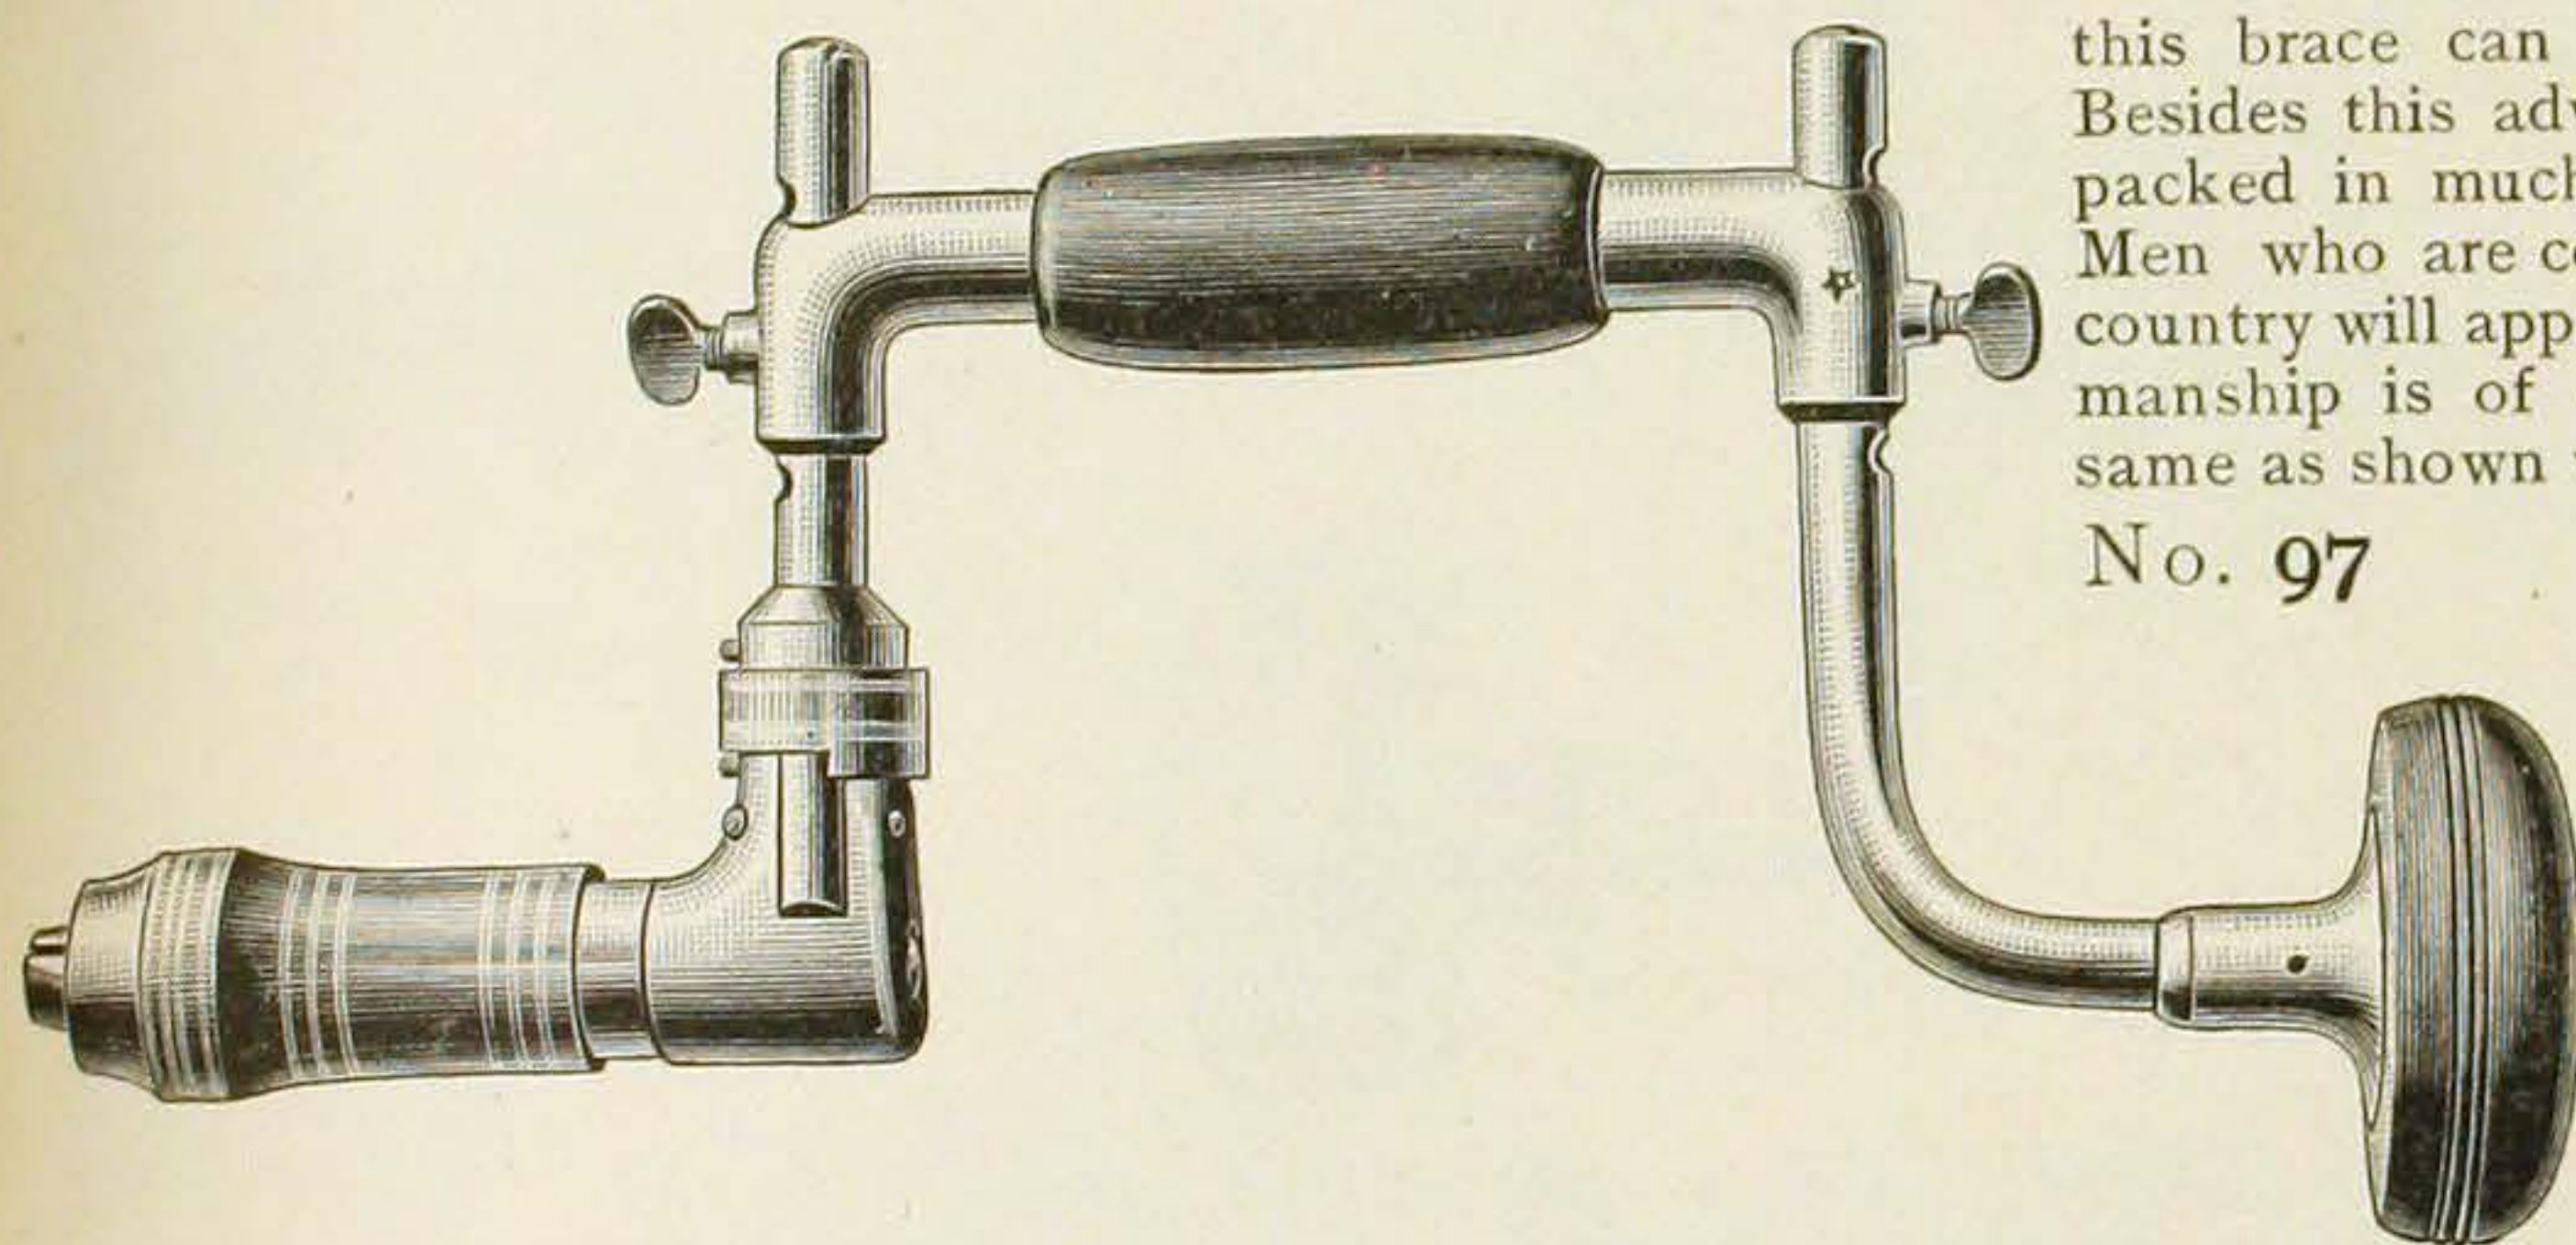

BARBER'S RATCHET BRACE, WITH ADJUSTABLE SWEEP

The cut shows the manner in which the sweep to this brace can be adjusted to either 8, 10, or 12 inch. Besides this advantage, it can also be taken apart and packed in much smaller space than the ordinary brace. Men who are compelled to carry such a tool about the country will appreciate this feature. The stock and workmanship is of our very highest order. The jaws are same as shown with Braces No. 10.

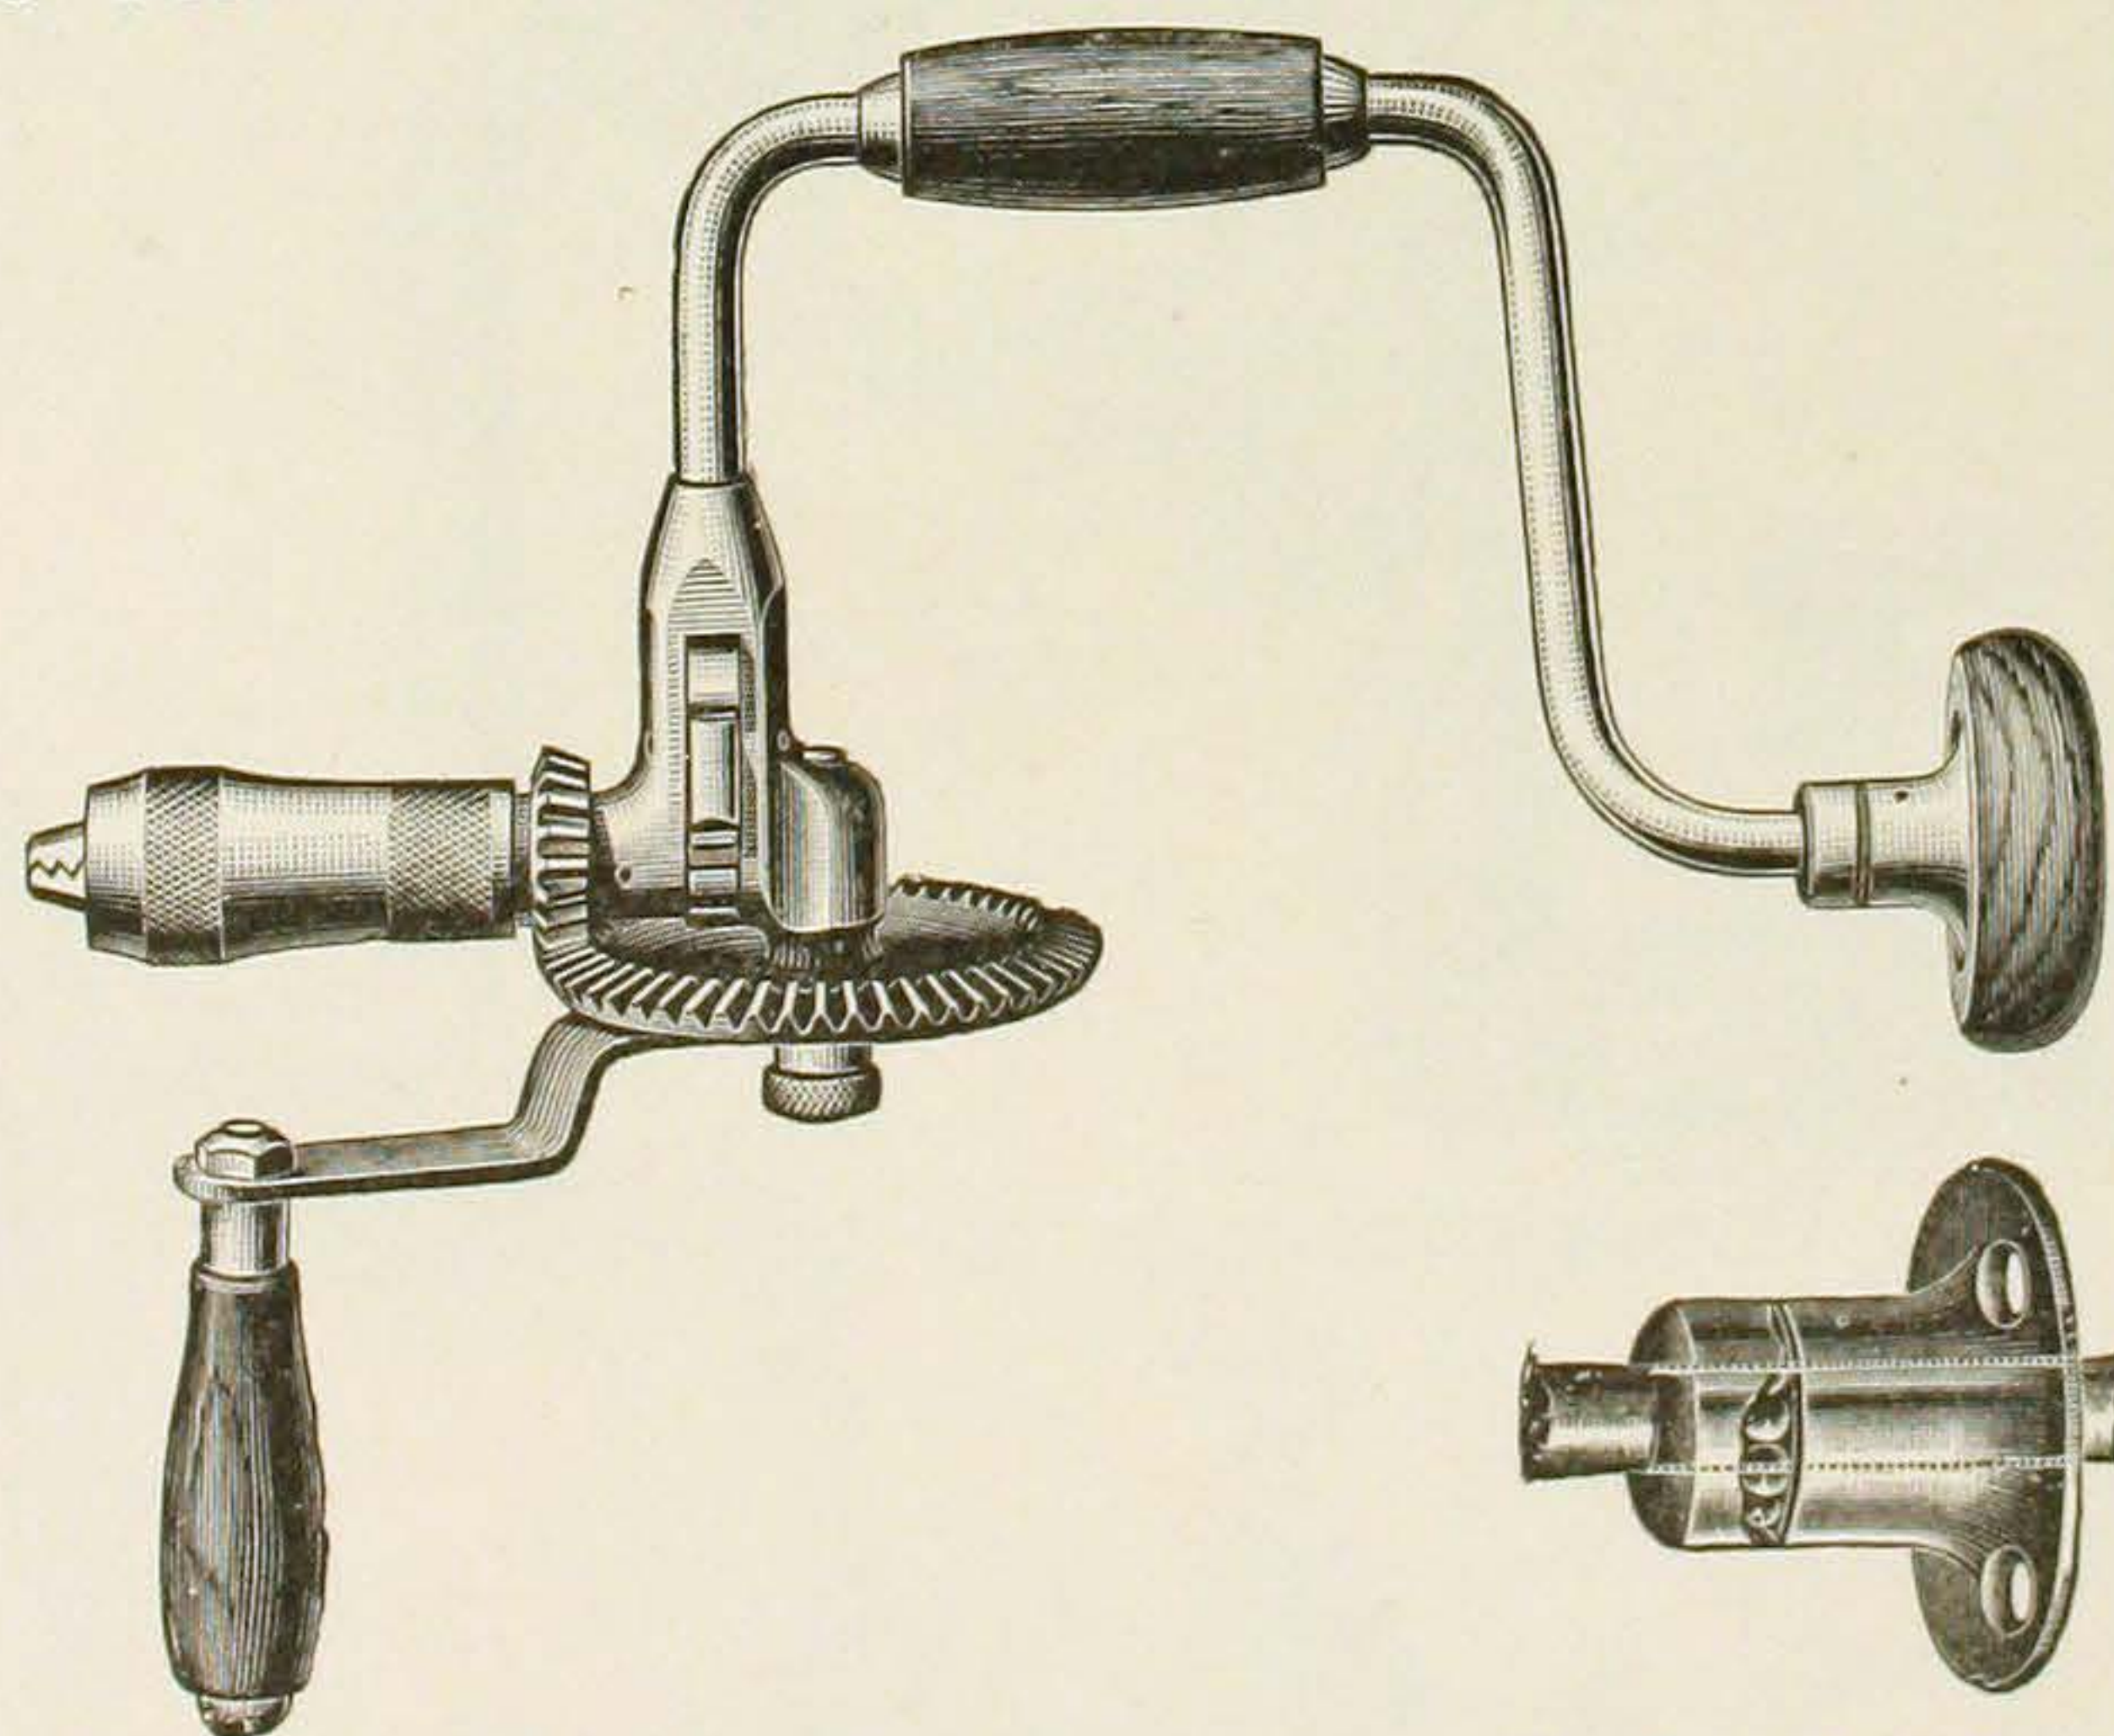

No. 97

per dozen, \$43.00

Half dozen in a box.

MILLER'S FALLS DRILL BRACE, WITH BALL BEARINGS

To be used as an ordinary ratchet Bit Brace, or as a Breast Drill. The Brace is 10-inch sweep, and of same quality and finish as Braces No. 10.

The Drill can be attached or detached in a moment's time.

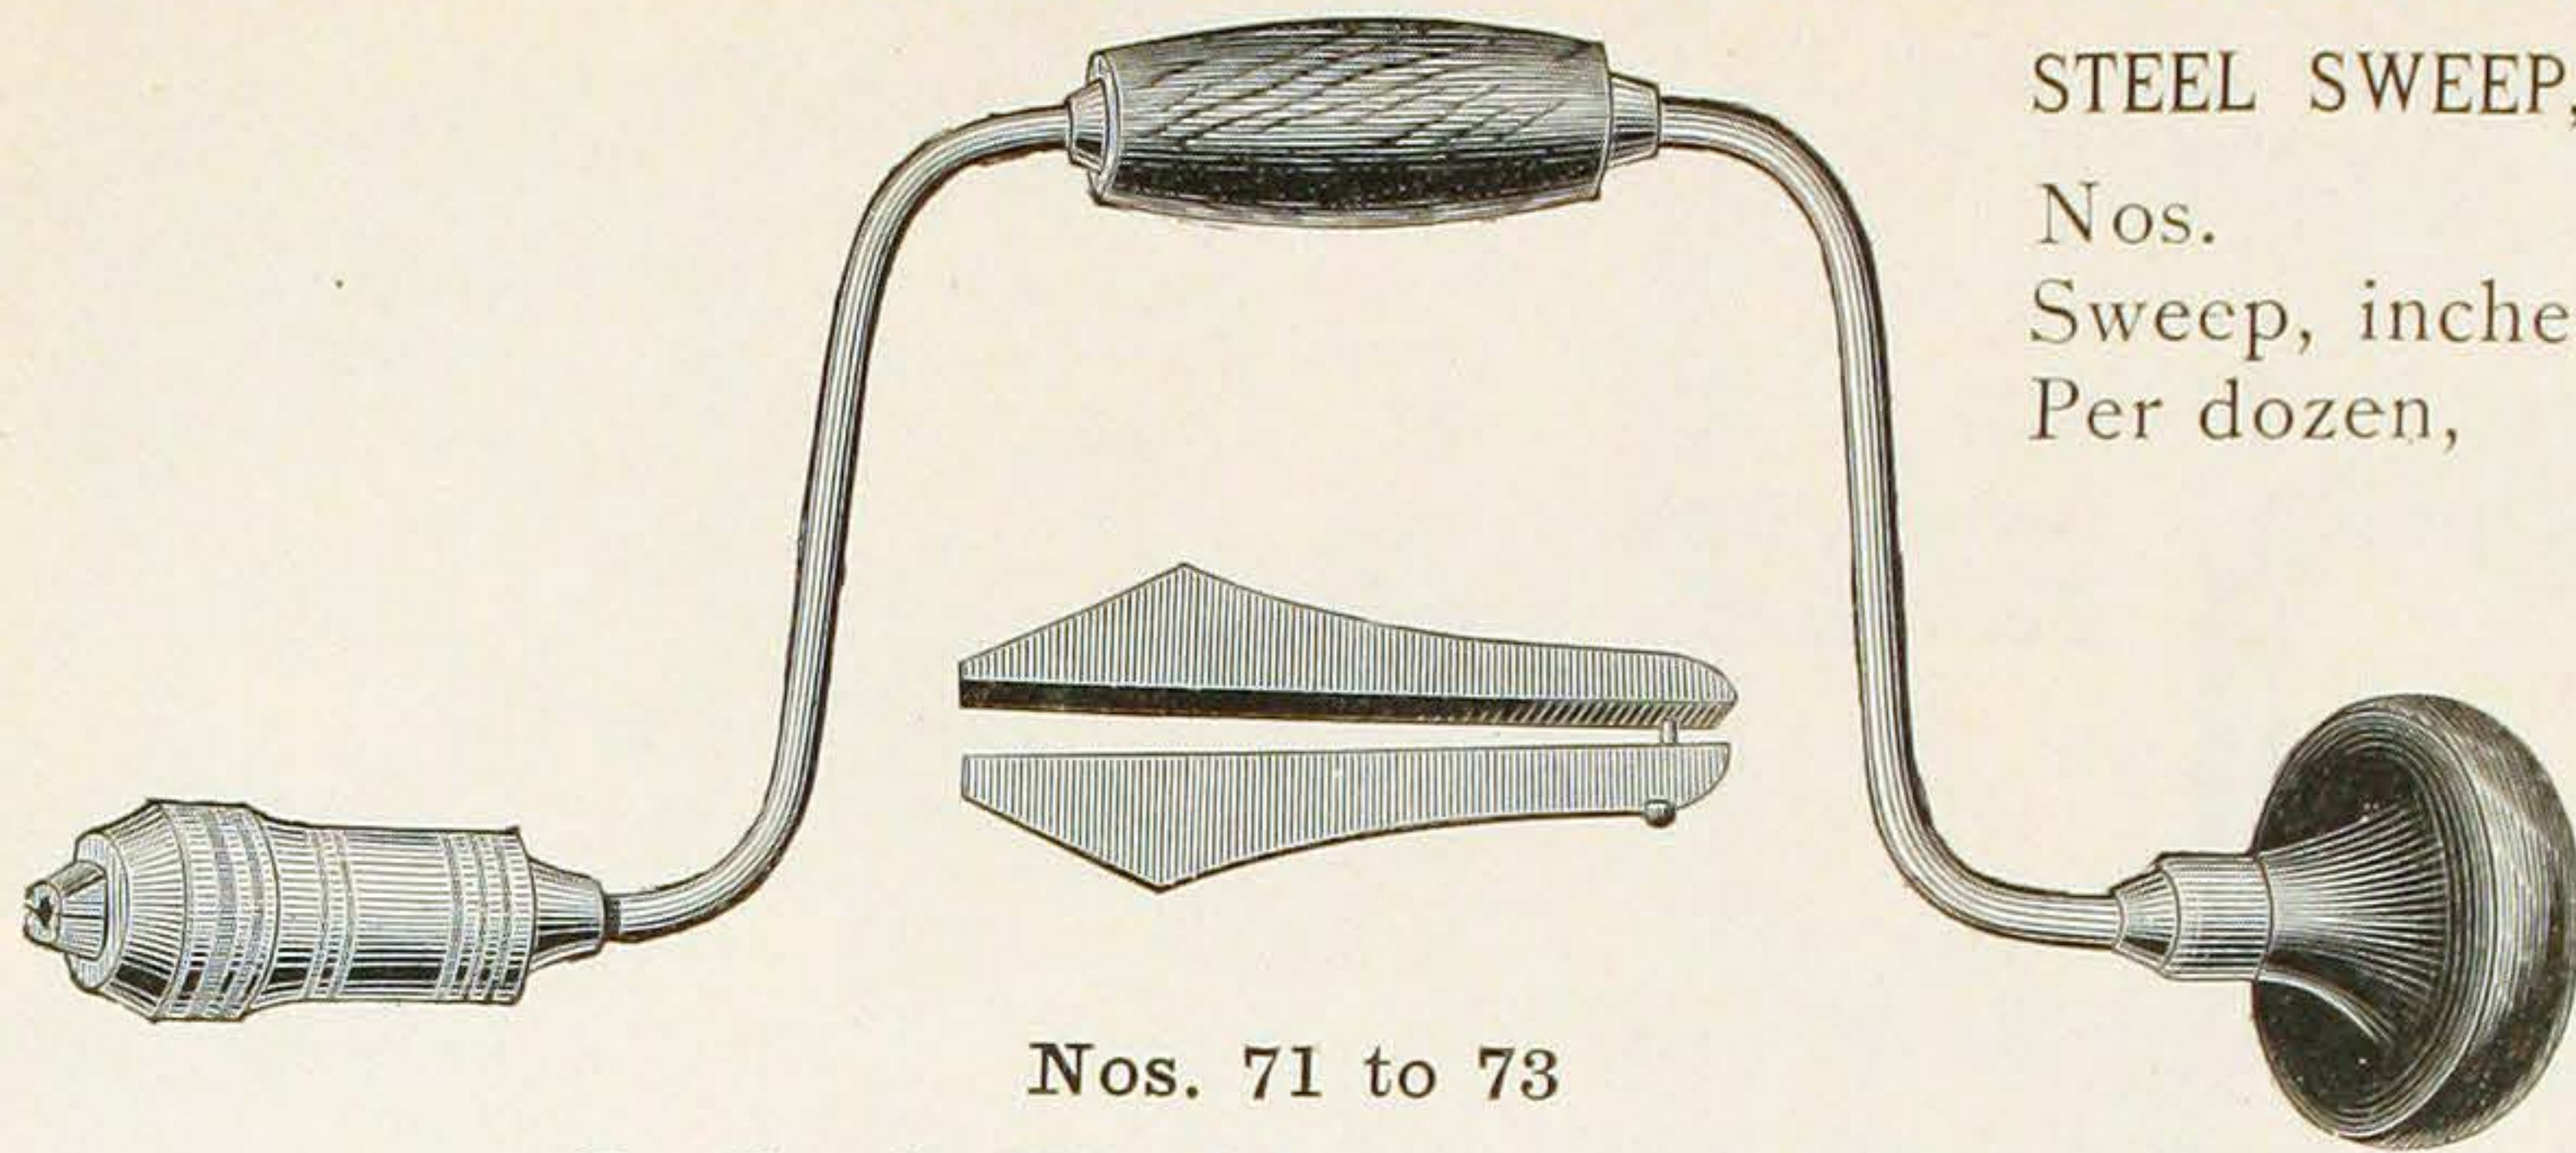

Complete,

One in a box.

Same as No. 10, Chuck holds only round shank drills, from $\frac{1}{32}$ to $\frac{1}{4}$ inch.

No. 13 Per dozen, \$48.00

Double-Geared Drive-Wheel 6 inches in diameter, giving a speed of $4\frac{1}{2}$ to 1. Cut Gears, Steel Stock, Rosewood Handles, Steel Jawed Chuck, which will hold square and round tool shanks. Nickel-Plated.

No. 12 Per dozen, \$30.00

Ball Bearing, Malleable Iron Stock, Japanned, Rosewood Handles, Polished and Plated Chuck, changeable Gears, one even and the other 3 to 1. Improved Chuck, holds perfectly tools of all shapes.

No. 15 Per dozen, \$30.00

Same as No. 12 with exception that it has a D handle instead of breastplate.

All above one in a box.

GOODELL'S BREAST DRILLS

No. 6 Per dozen, \$48.00

(3-Jawed Chuck for Round Shank Drills) capacity from 0 to $\frac{1}{2}$ inch.

No. 7 Per dozen, \$42.00

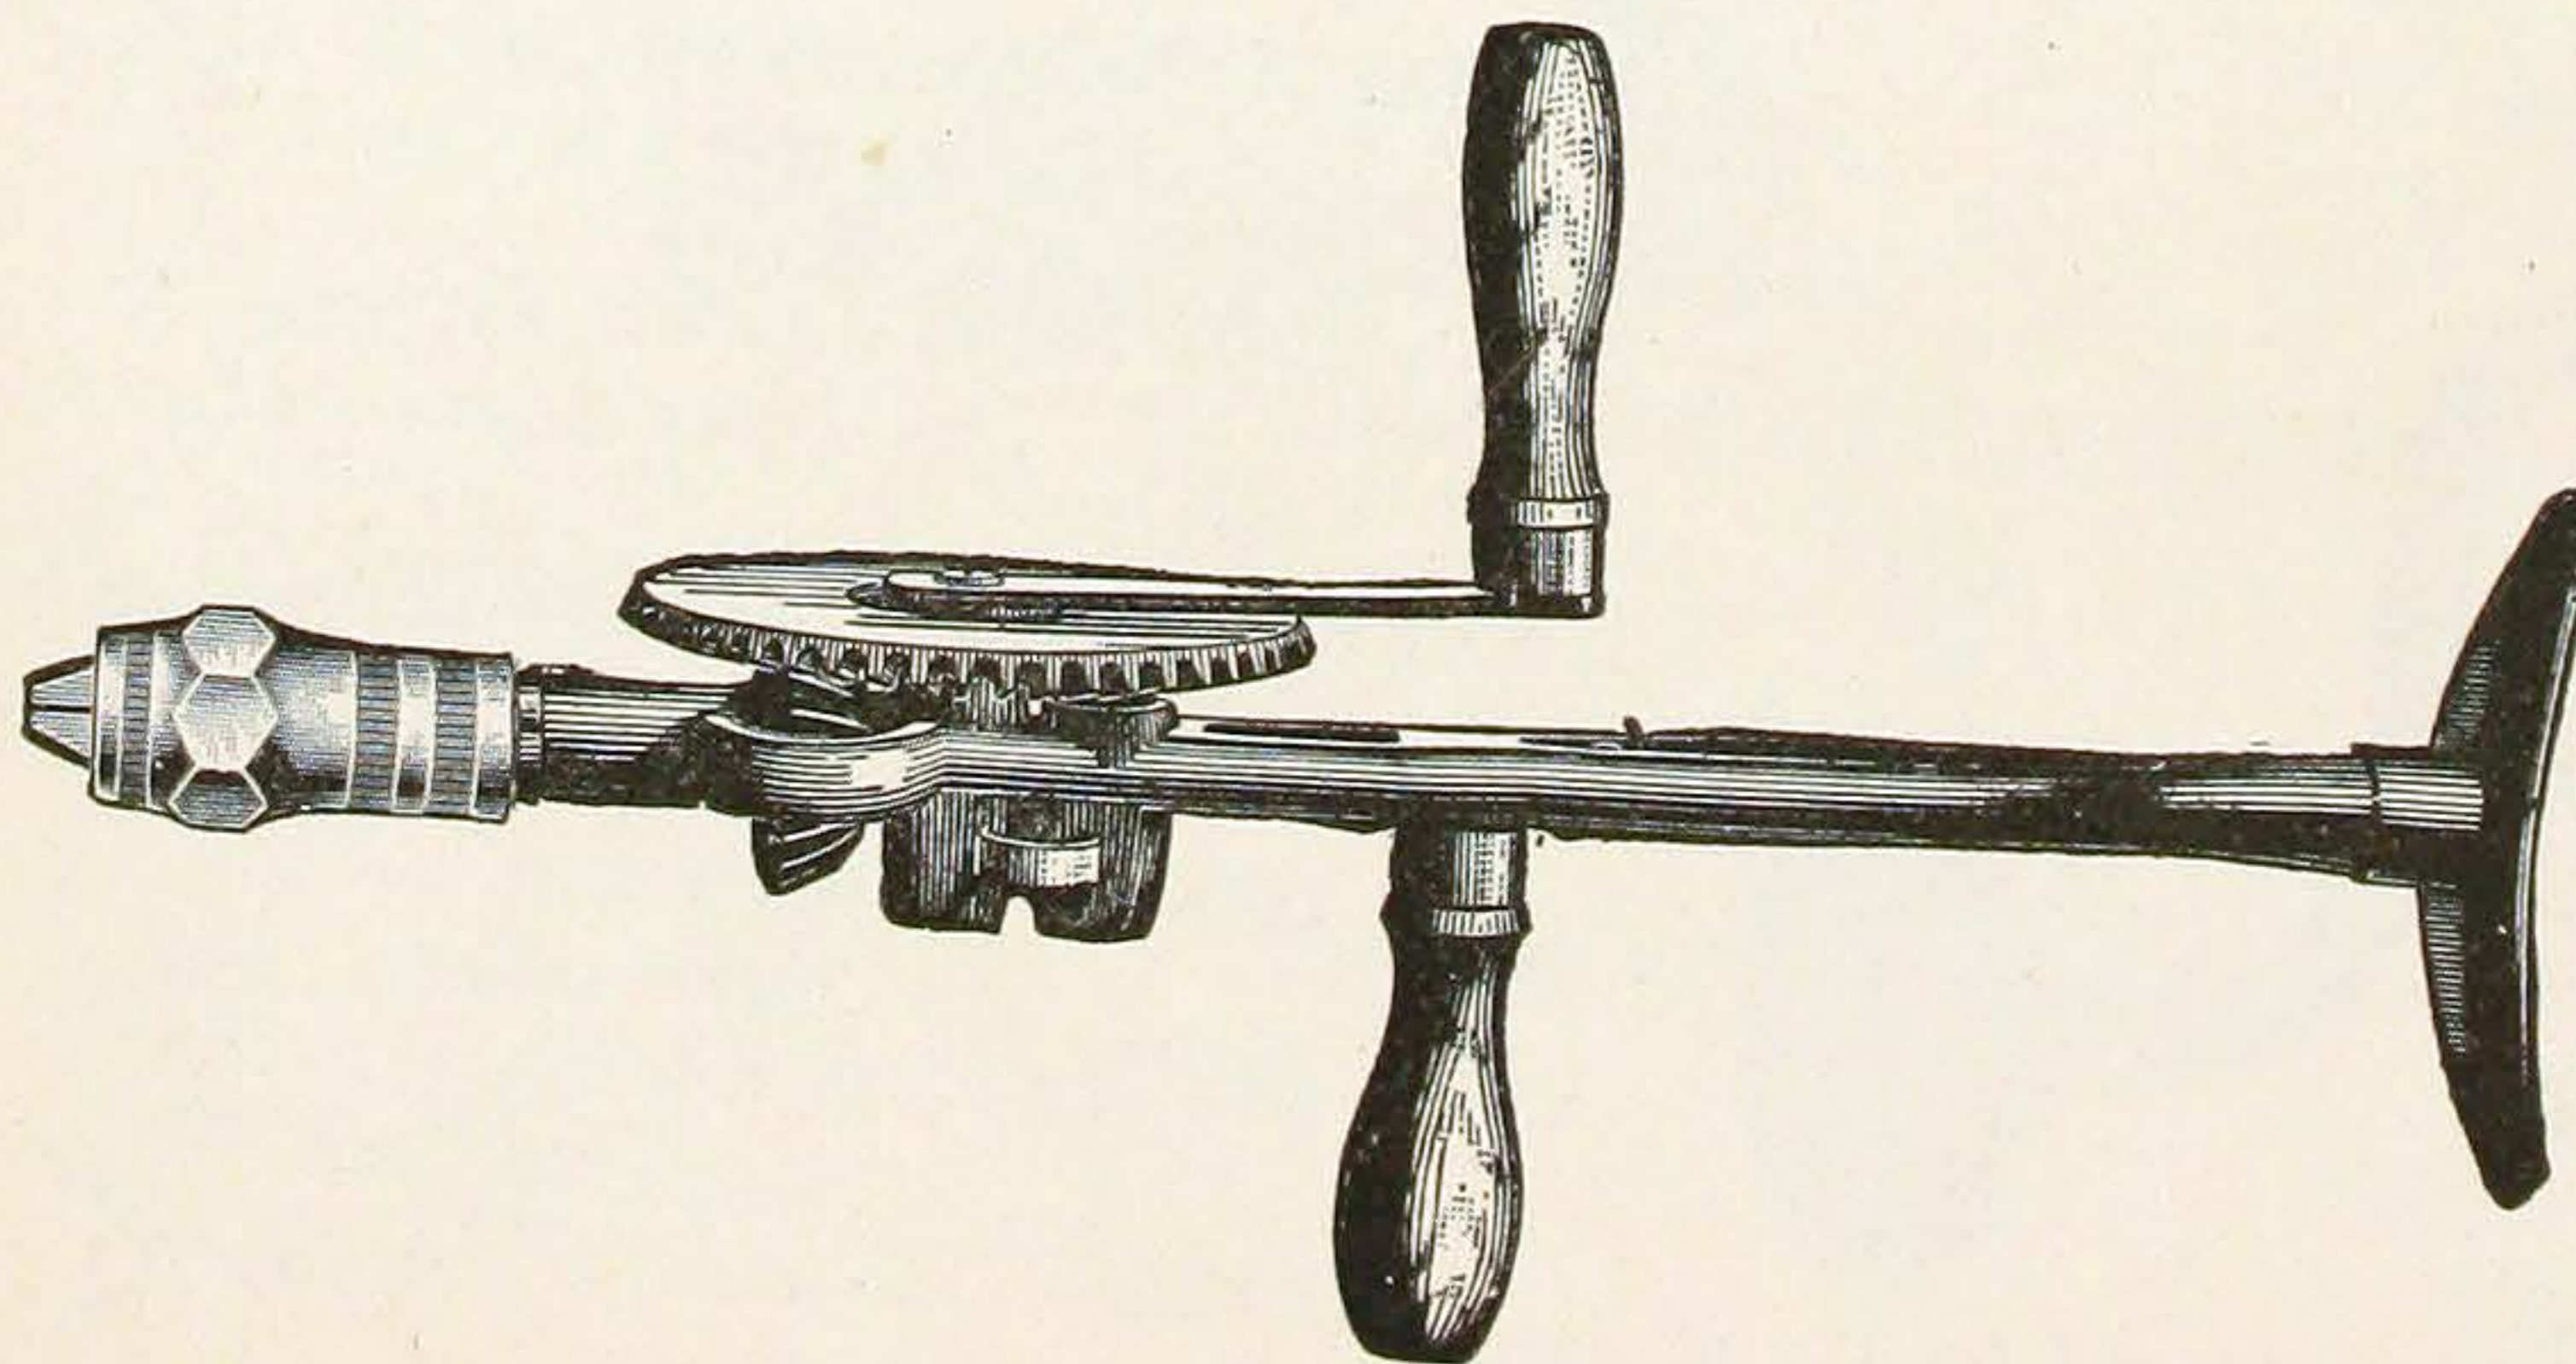

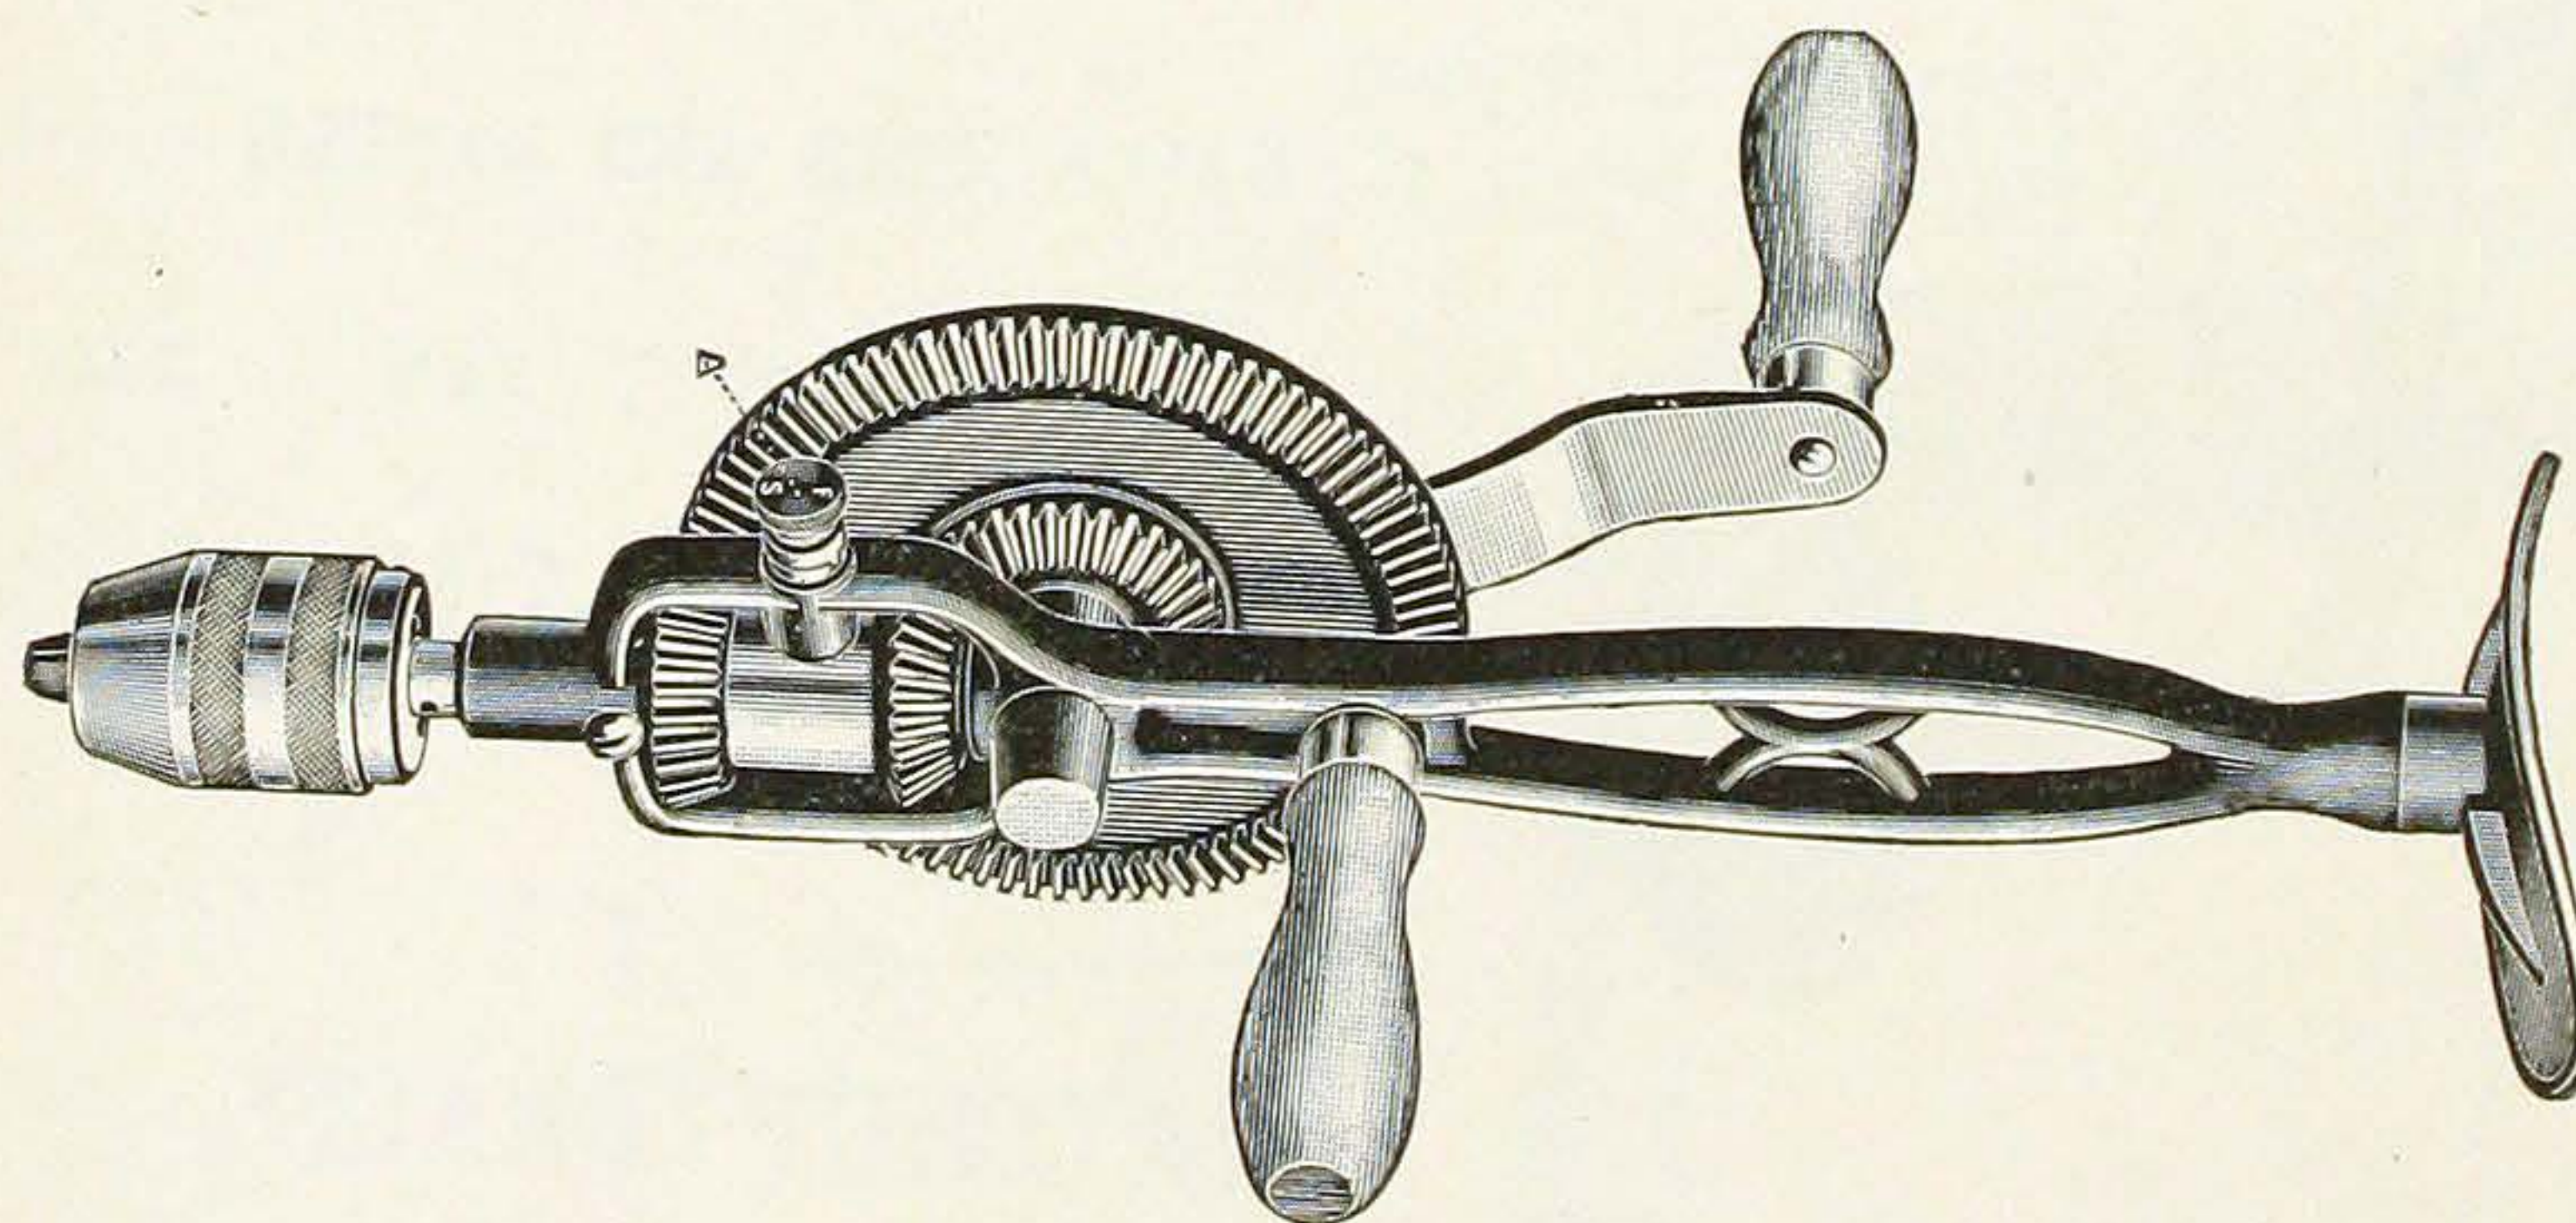

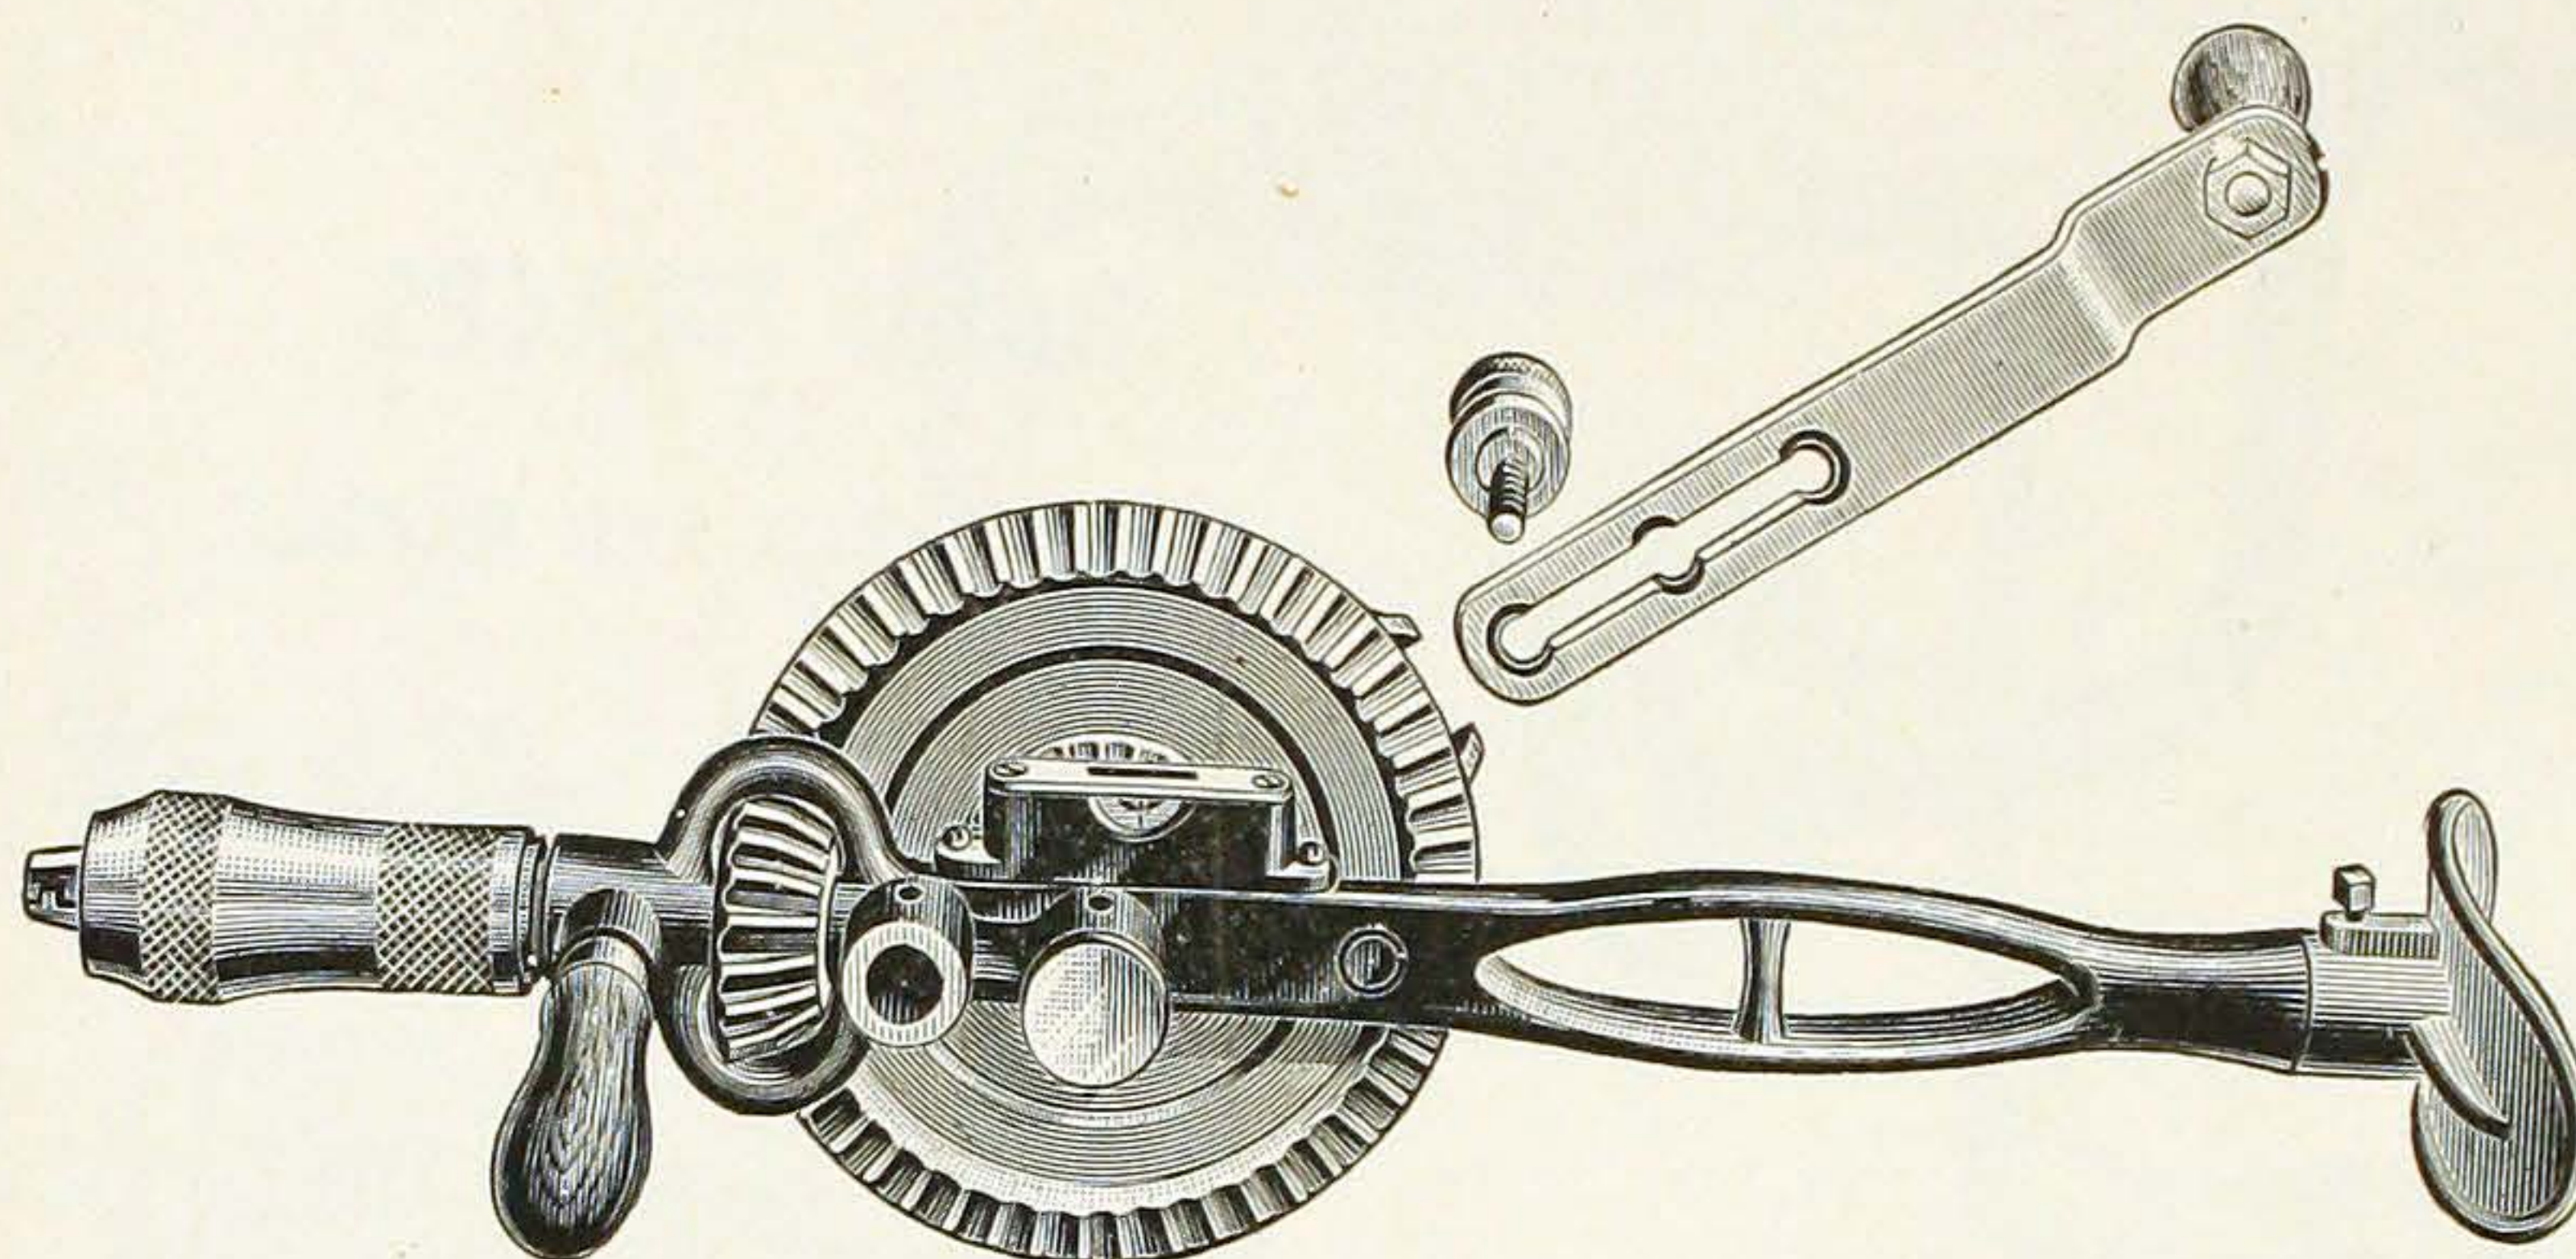

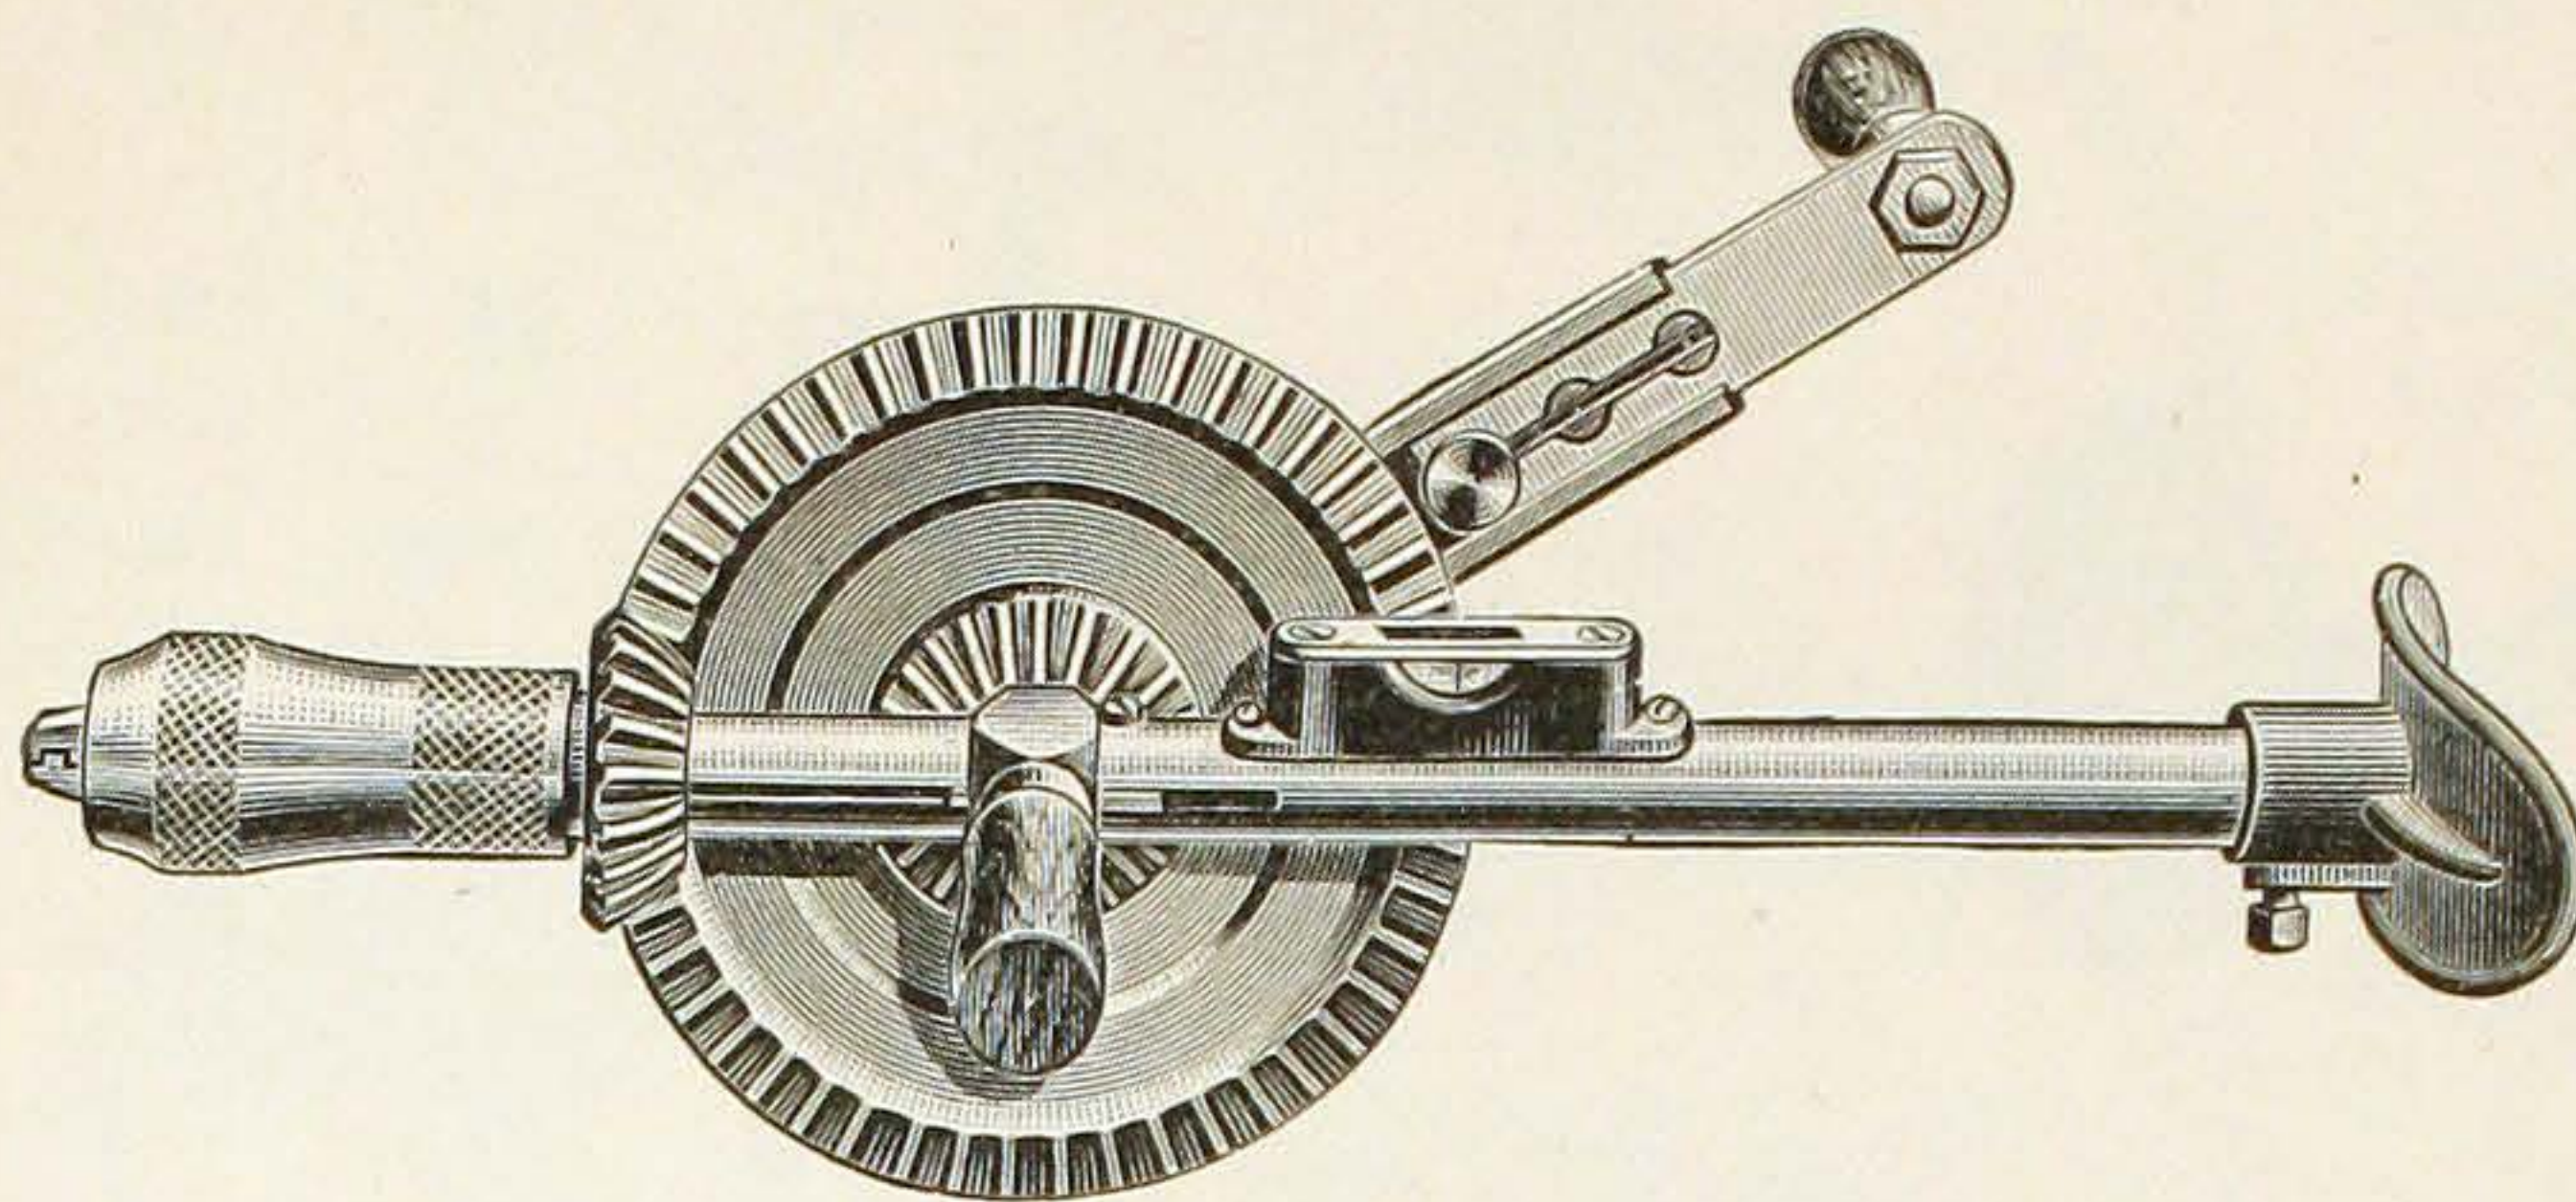

Same as No. 6, but with Chuck for Square Shank Drills with extra set of jaws.

They are Double Geared, one Gear remaining "idle" and acting as an anti-friction bearing when the other is at work. All gears have cut teeth. It has two speeds and can be changed from fast to slow by turning the thumb-screw at "A" until the letter representing desired speed is nearest the chuck. The breastplate is adjustable and its position can be changed, if desired.

Above, one in a wooden box.

BARTHOLOMEW'S BREAST DRILLS

With Adjustable Chuck,
without Drills, each, \$2.50

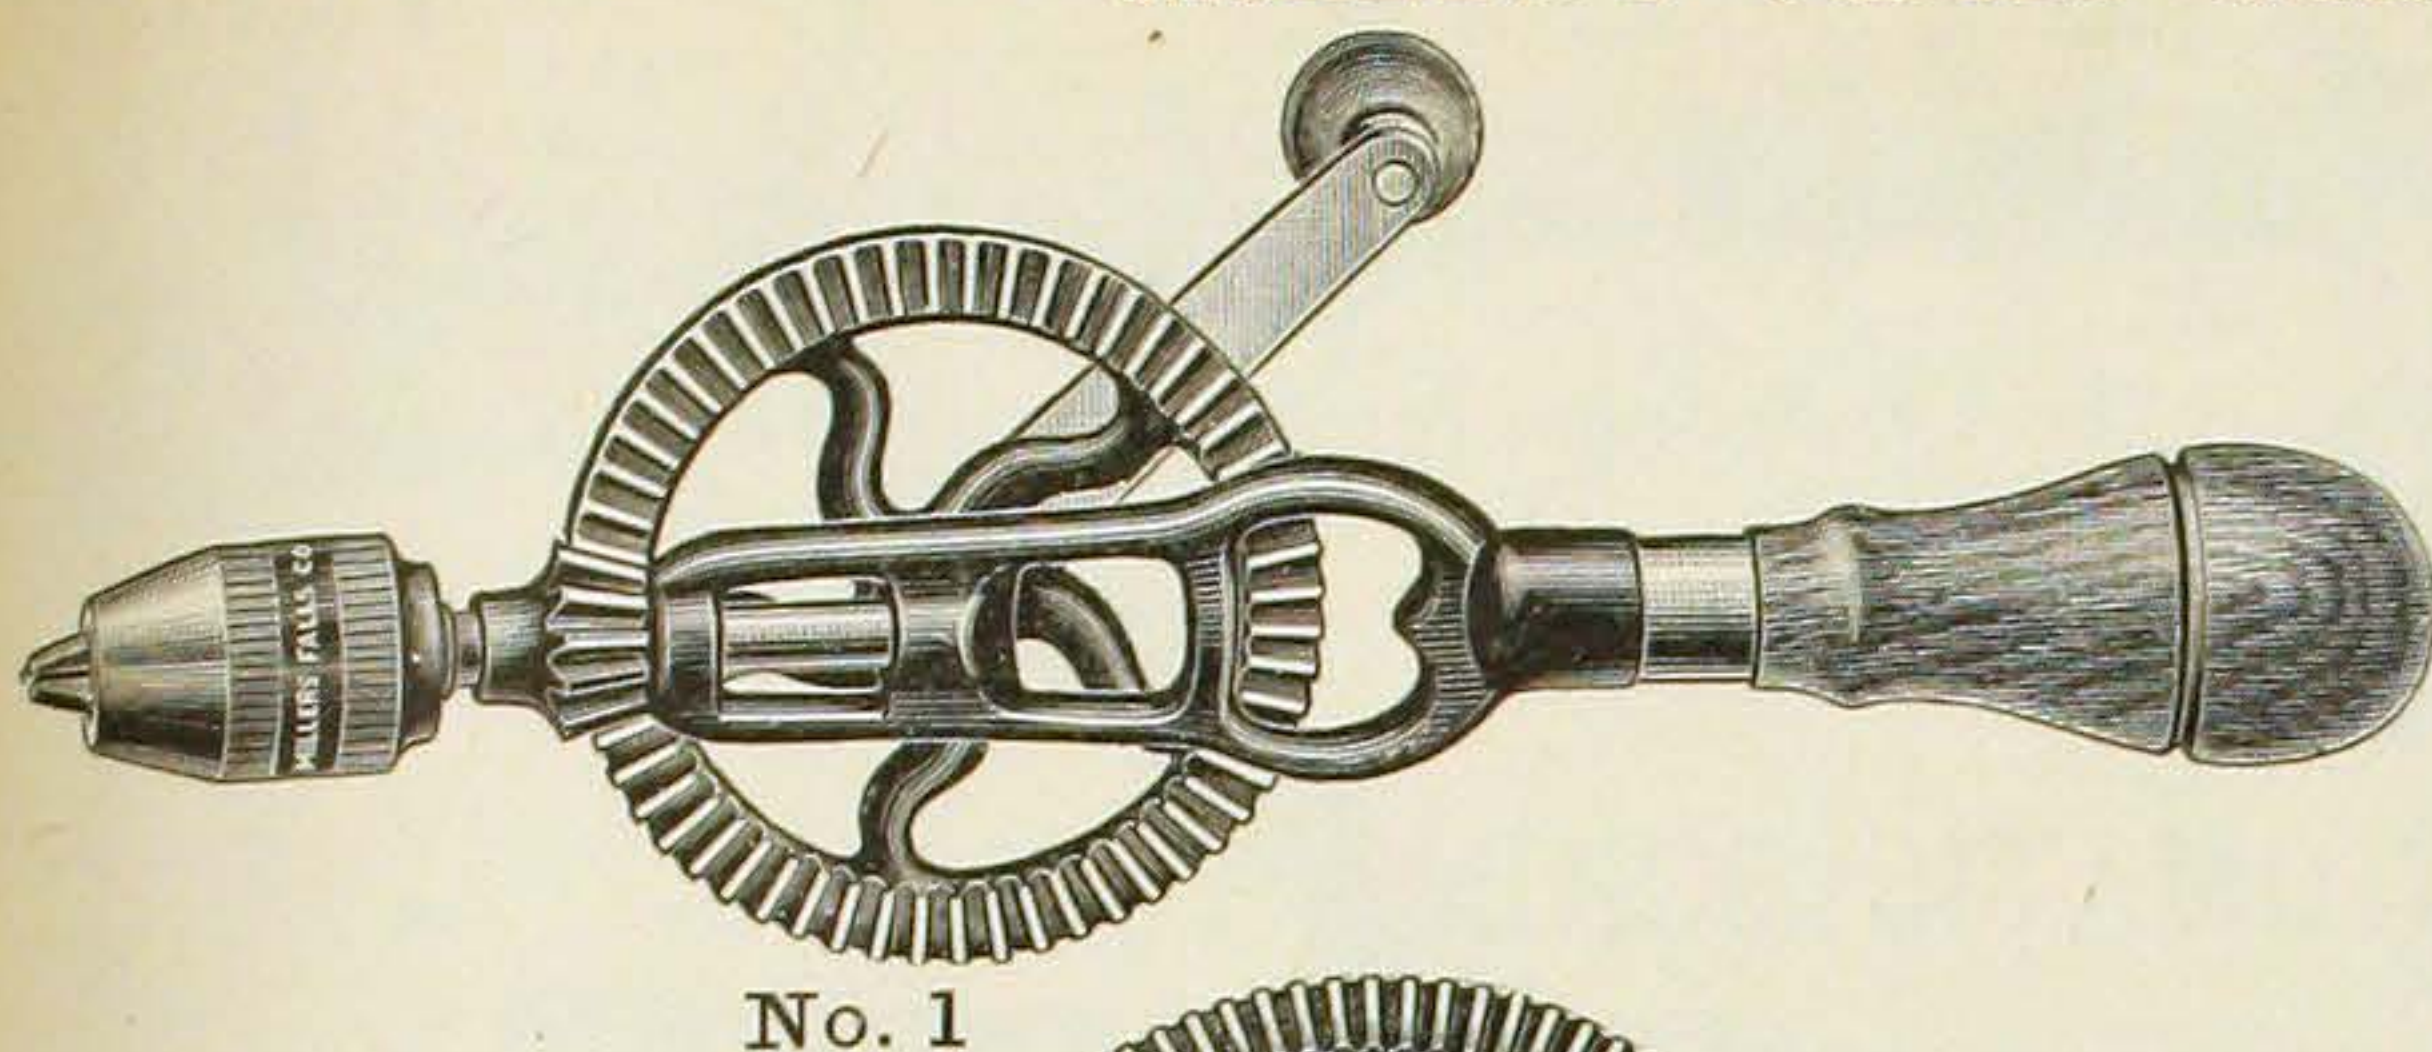

MILLER'S FALLS HAND DRILLS

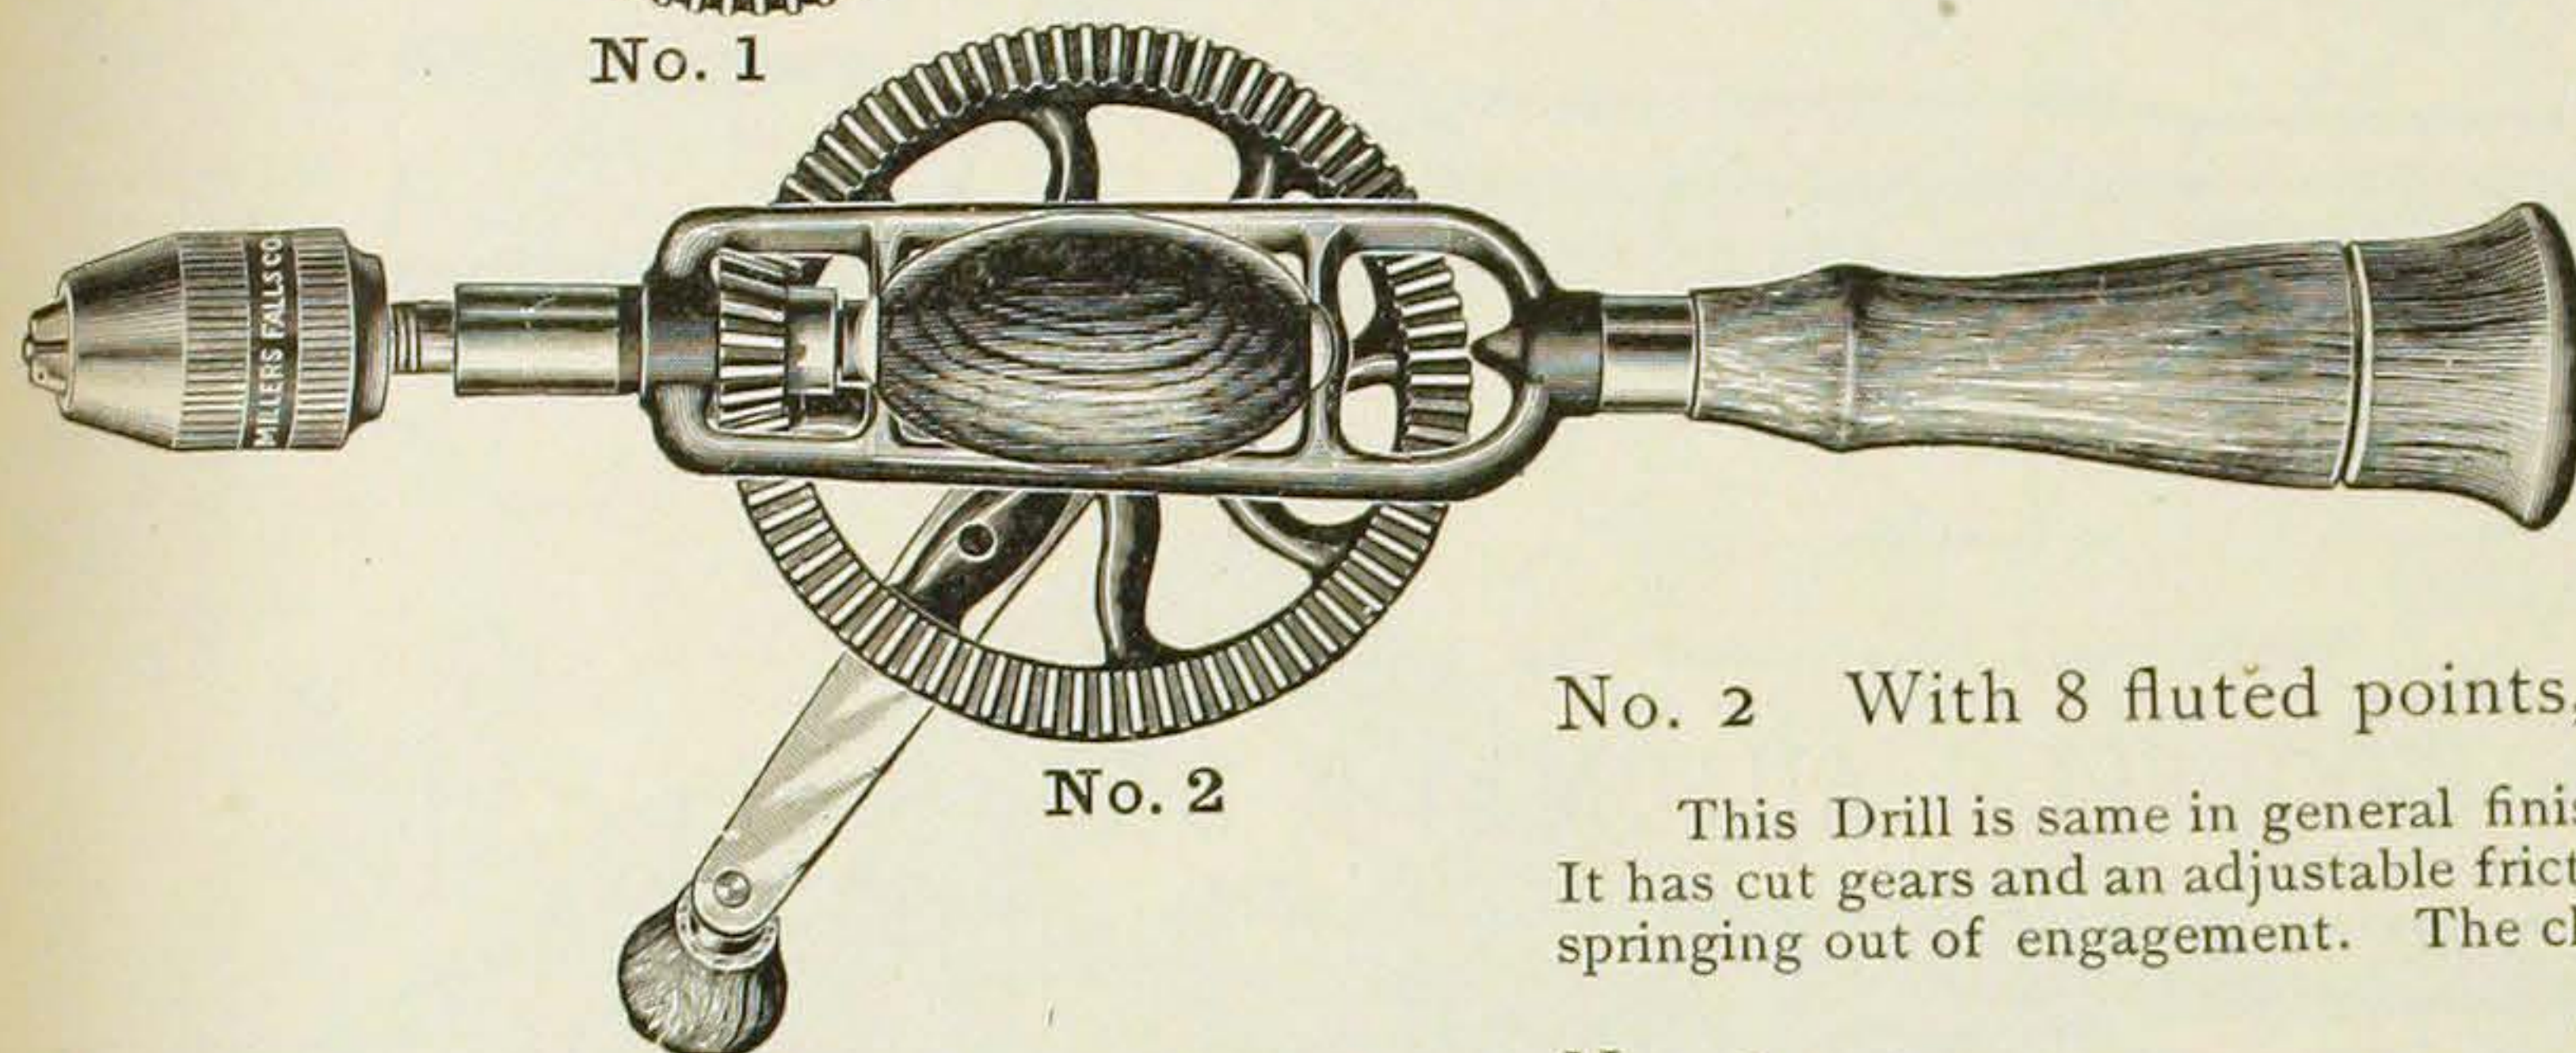

No. 1 Including 8 fluted points
in hollow handle, per doz., \$15.00

These Drills are now made with three jaws, resting in solid sockets, and there are no springs to get out of place or out of order. The chucks are nicked and the handles cocobolo. They hold drills from 0 to 3 16ths.

An extra handle is furnished with this drill.

No. 1

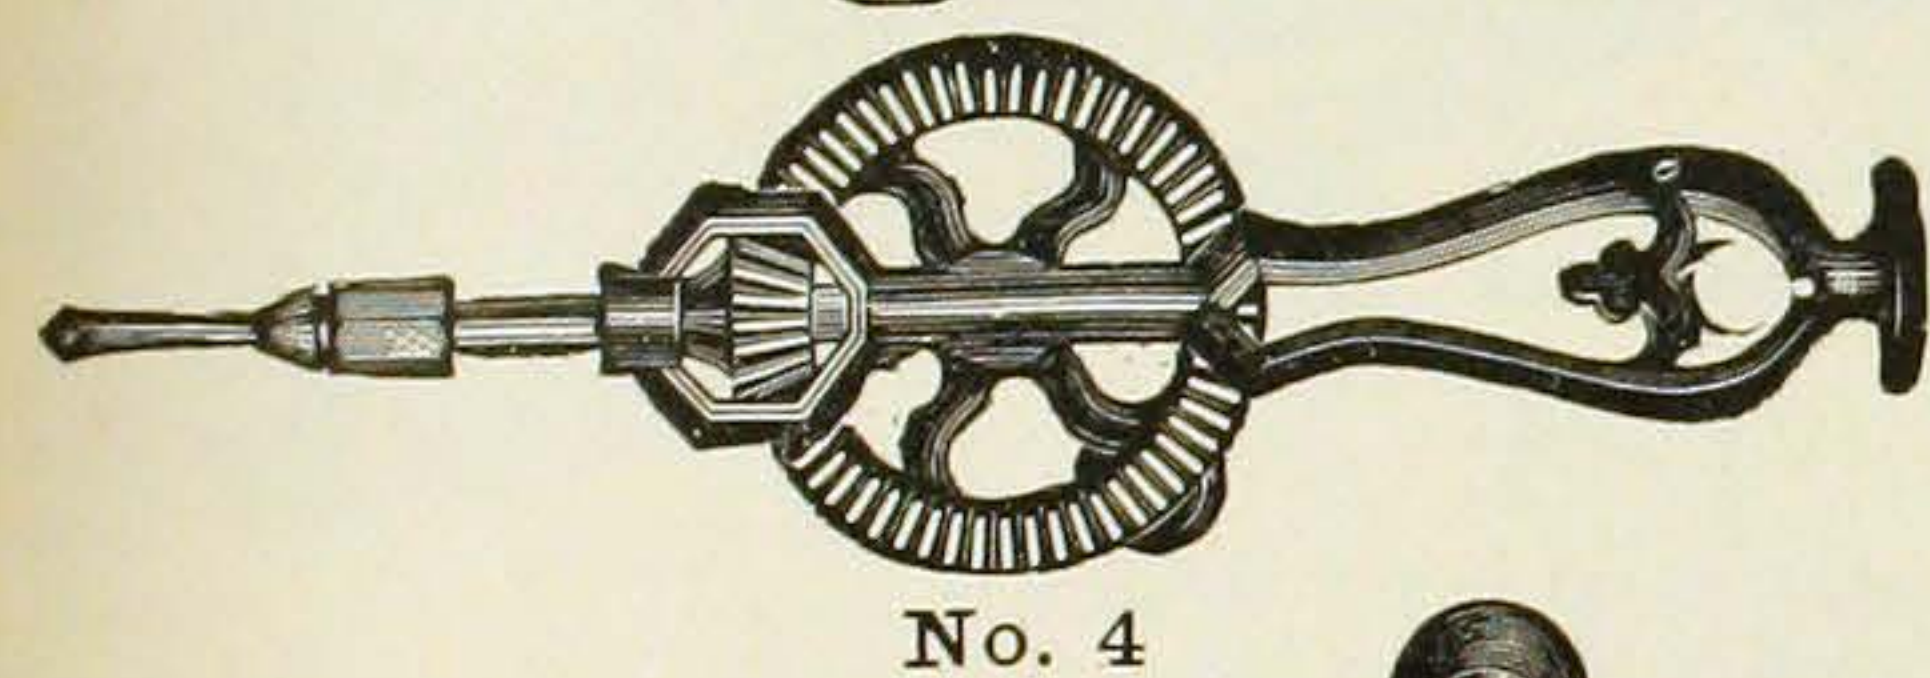

No. 2

BALL BEARING

No. 2 With 8 fluted points, per dozen, \$30.00

This Drill is same in general finish as No. 1, described above. It has cut gears and an adjustable friction roll to prevent gears from springing out of engagement. The chuck holds from 0 to 17 64ths.

No. 4

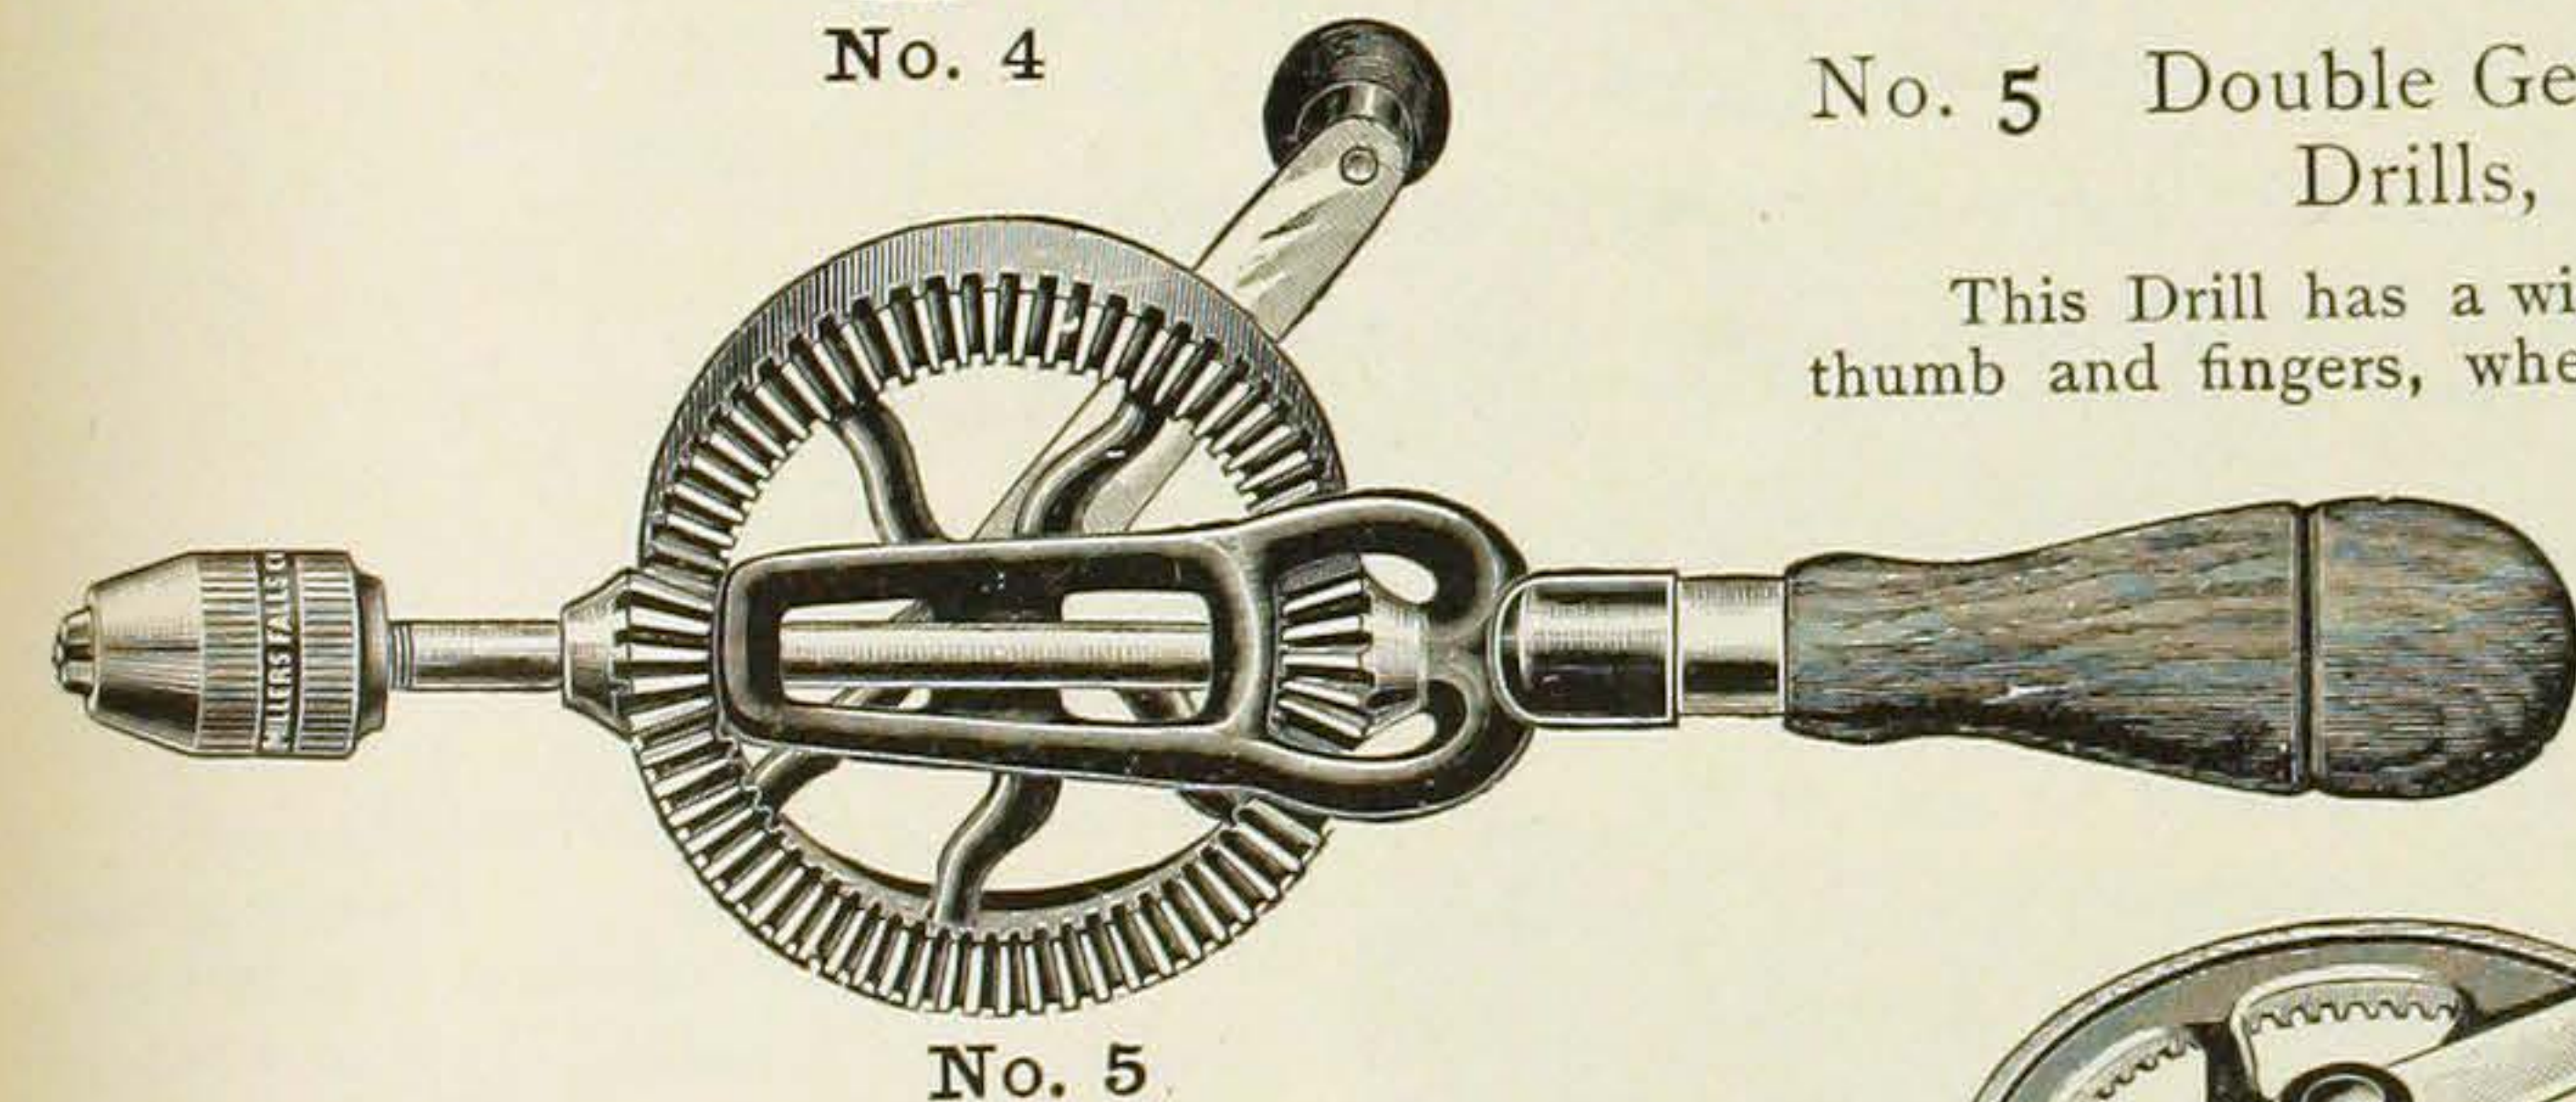

No. 4, per dozen, \$6.00

This Drill Stock is eight inches in length and weighs eight ounces. It is made of iron with Rosewood Handle, and Brass Chuck for holding the Drill Points. This Chuck is made on a new plan, and it centers and holds the drill perfectly. With each Drill Stock is sent a box containing six superior Drill Points, of various sizes.

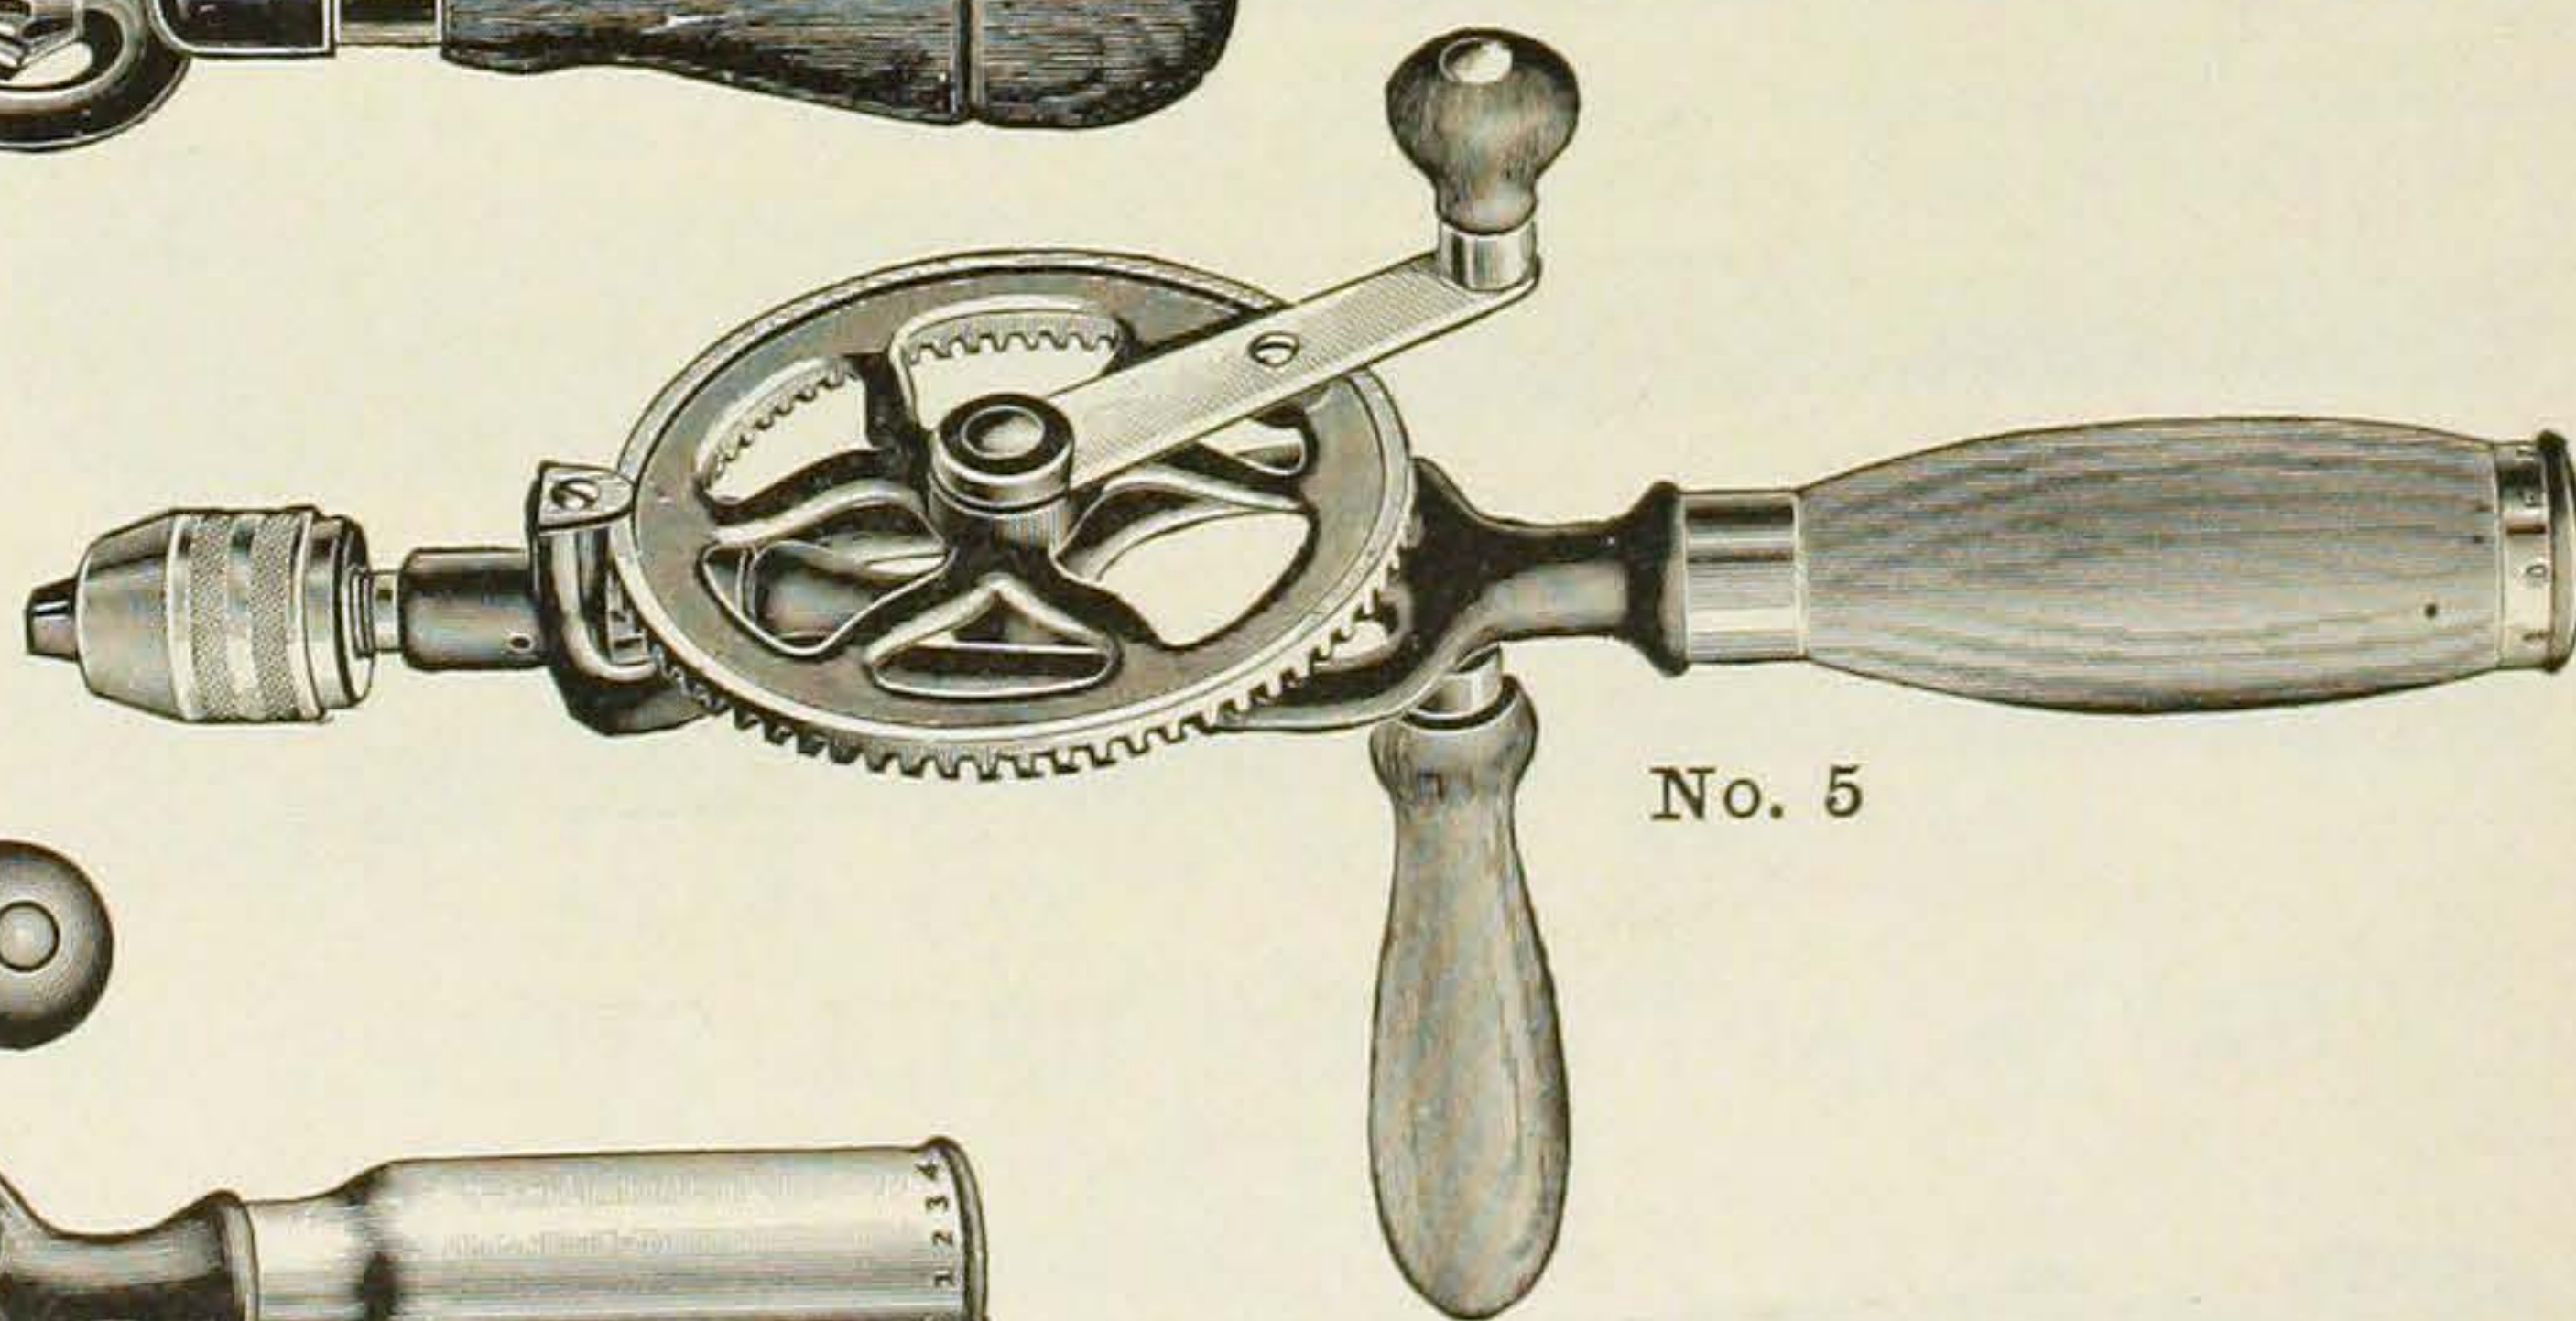

No. 5 Double Geared, 11 1/2 inches, with 8 Drills, per dozen, \$18.00

This Drill has a wide rimmed gear; to be grasped between thumb and fingers, when used for delicate work.

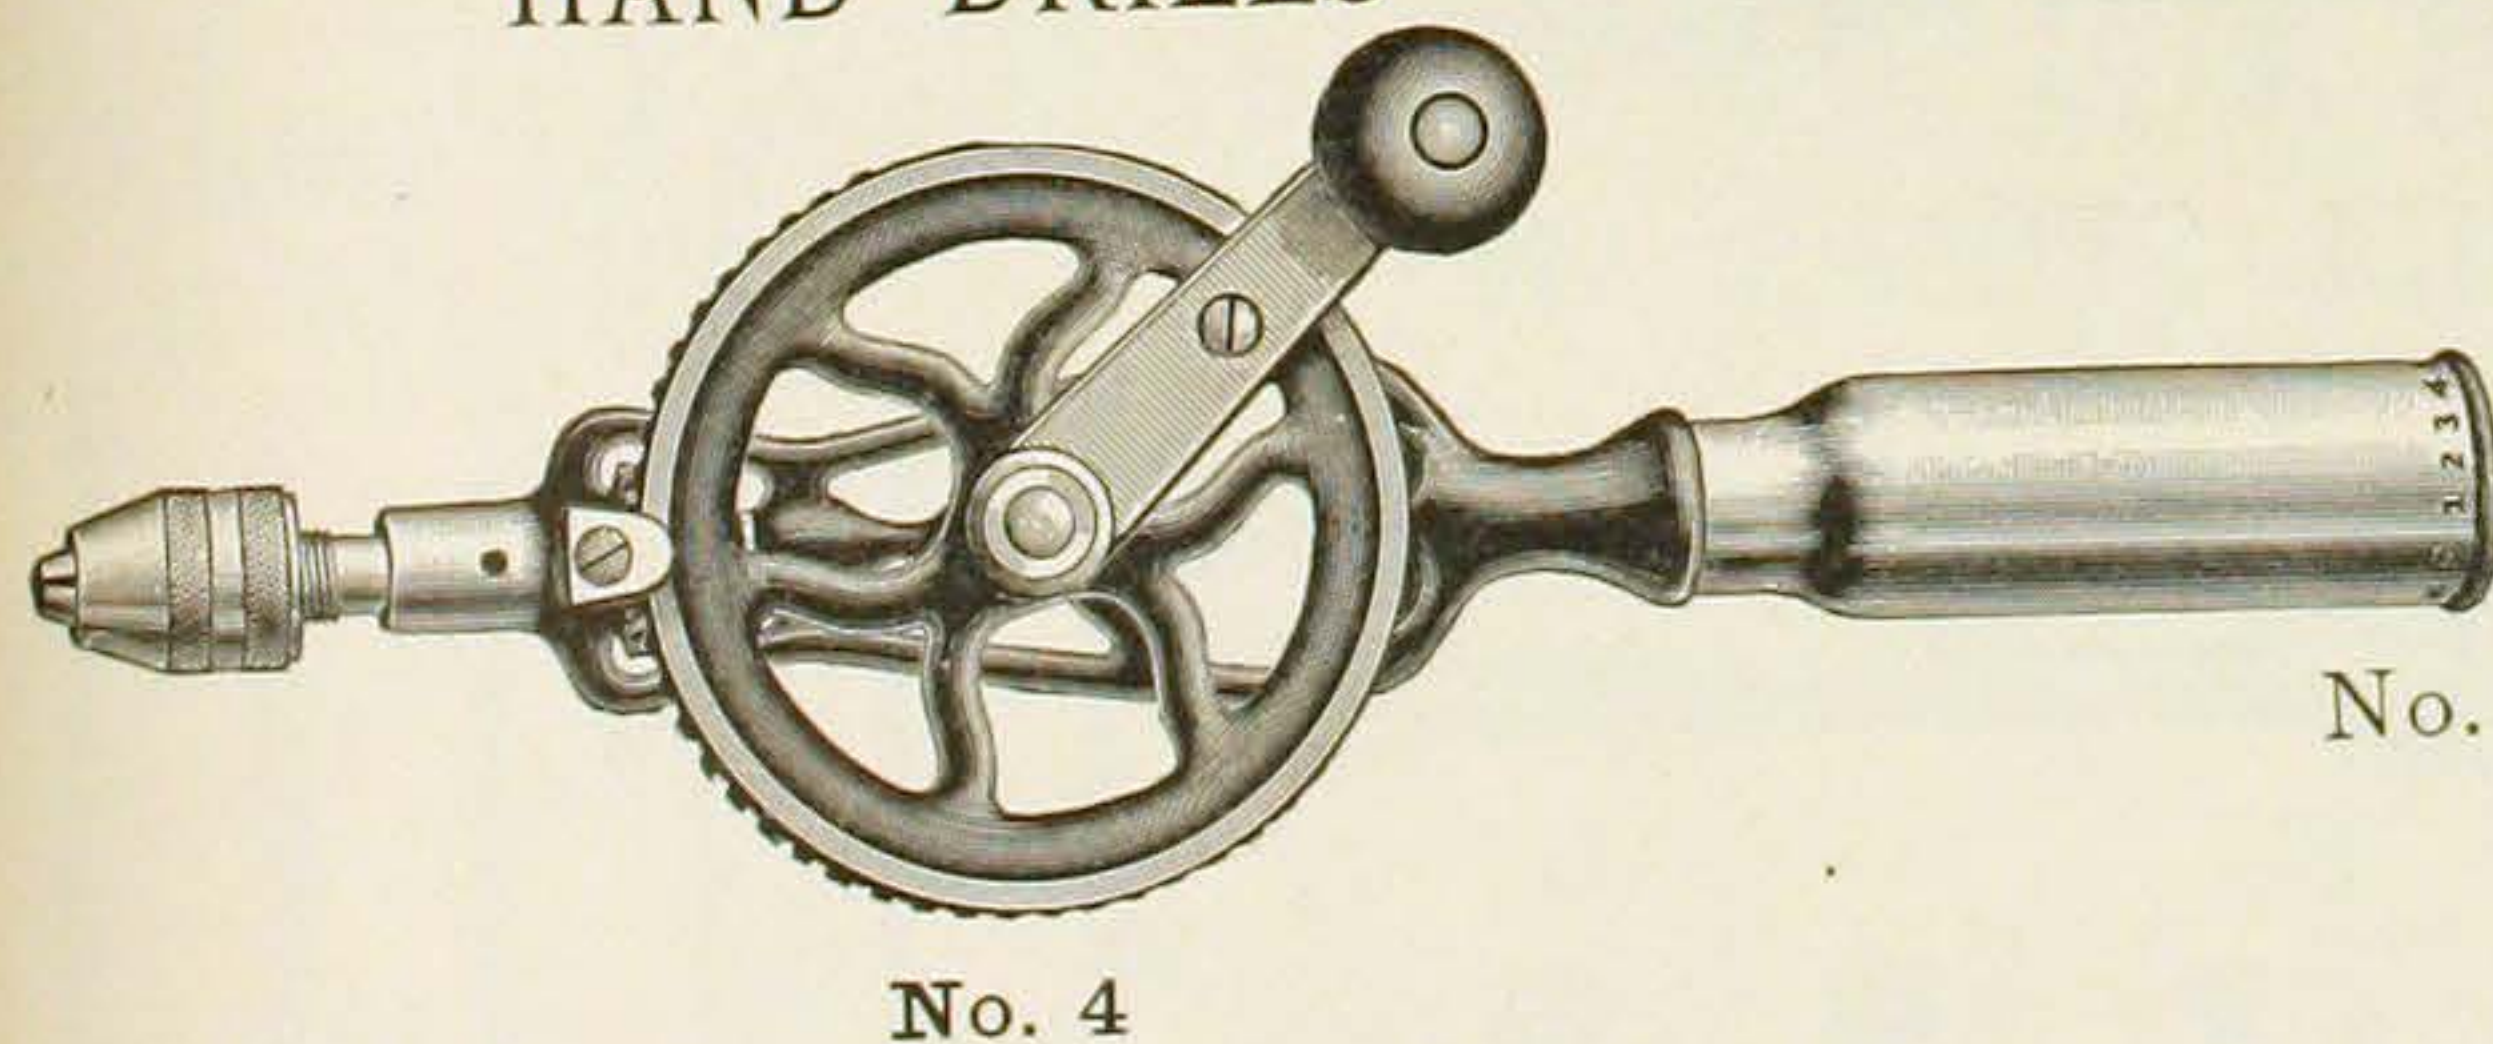

One in a box.

No. 5

GOODELL'S
HAND DRILLS

No. 5

No. 4

No. 4 Nickel-plated Handle, containing 8 Drills, will hold Twist Drills from 5/32 inch down to No. 80, per dozen, \$26.00

No. 5 Polished Hard Wood Handle, containing 8 Drills, will hold Twist Drills from 1/4 inch down to No. 80, per dozen, \$36.00

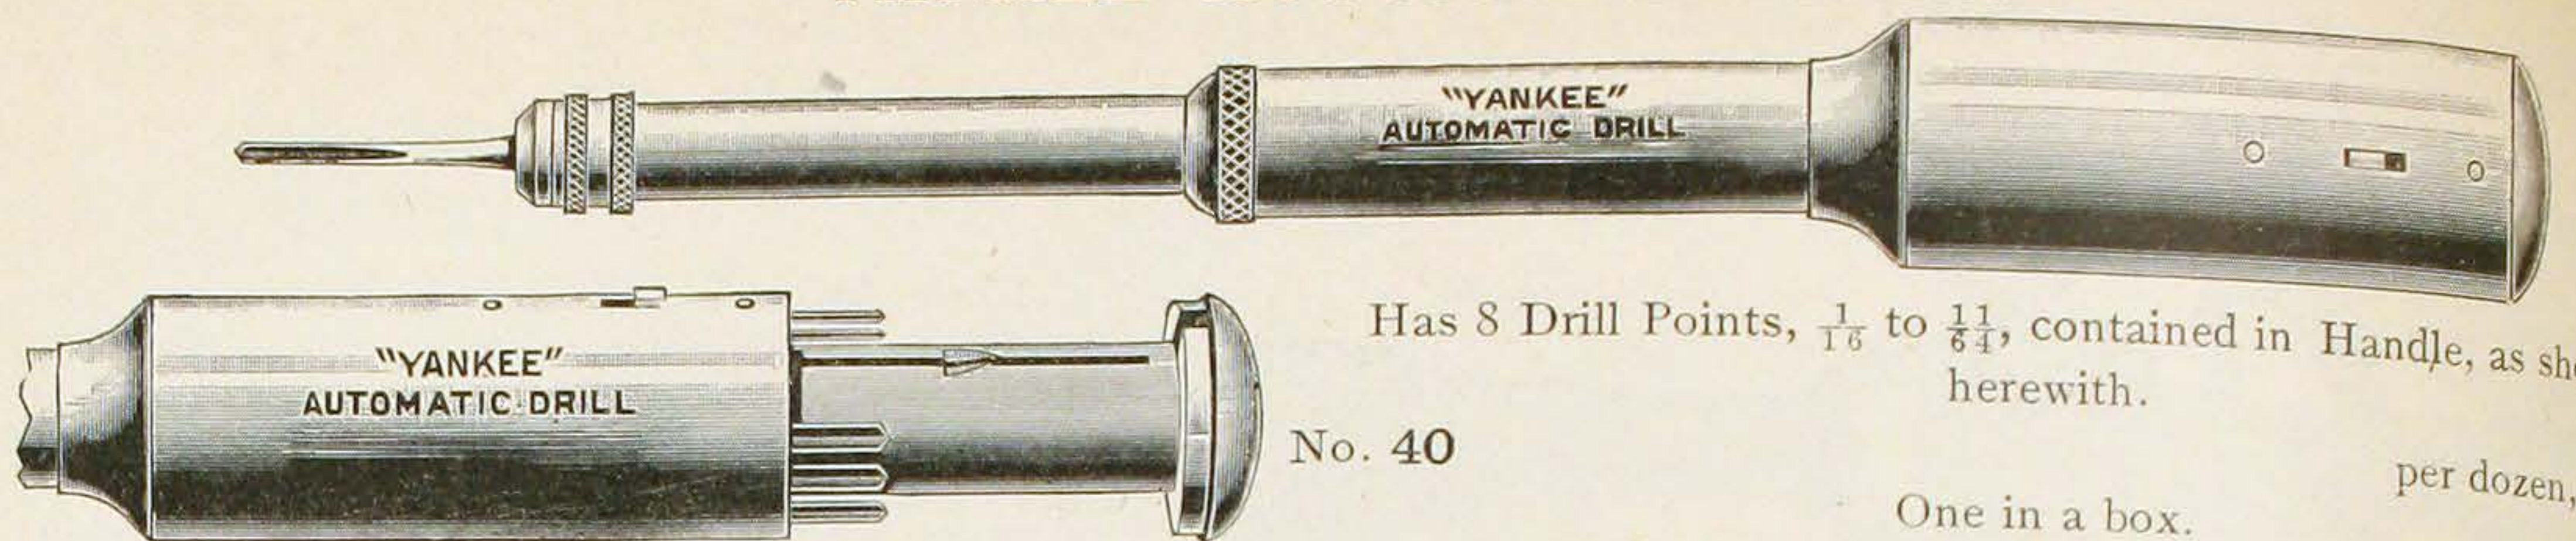

The Frames of these Drills are made of malleable iron, all gears have cut teeth, and the teeth are well nicked to prevent rusting.

The Steel Chuck is nickel-plated and has knurled nut and 3 hardened Steel Jaws.

One in a box.

YANKEE AUTOMATIC DRILLS

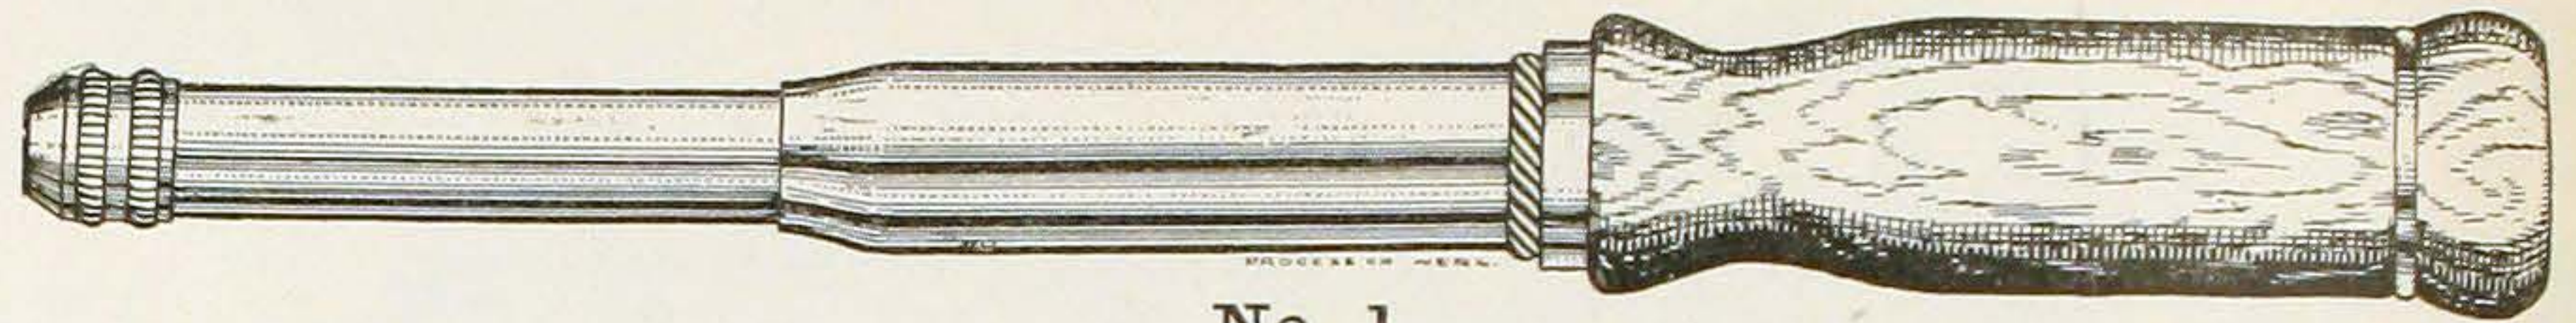

Has 8 Drill Points, $\frac{1}{8}$ to $\frac{11}{16}$, contained in Handle, as shown herewith.

No. 40

(Exact Sizes.)

Per set of 6 Drills,

\$0.25

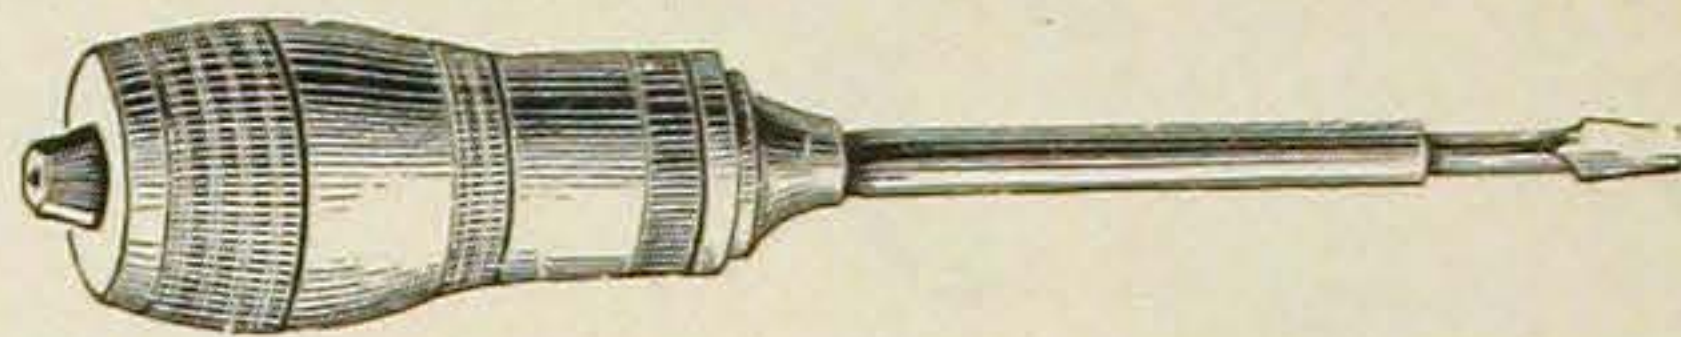

PATENT UNIVERSAL ANGULAR BIT STOCKS

This Bit Stock is used in connection with a Brace and a Bit for boring holes in places where the Brace and Bit alone could not be used. The ability to vary the angles, either at the commencement or during the operation of boring a hole, is an important feature.

Per dozen, \$24.00
One in a box.

BARBER'S EXTENSION BIT HOLDERS

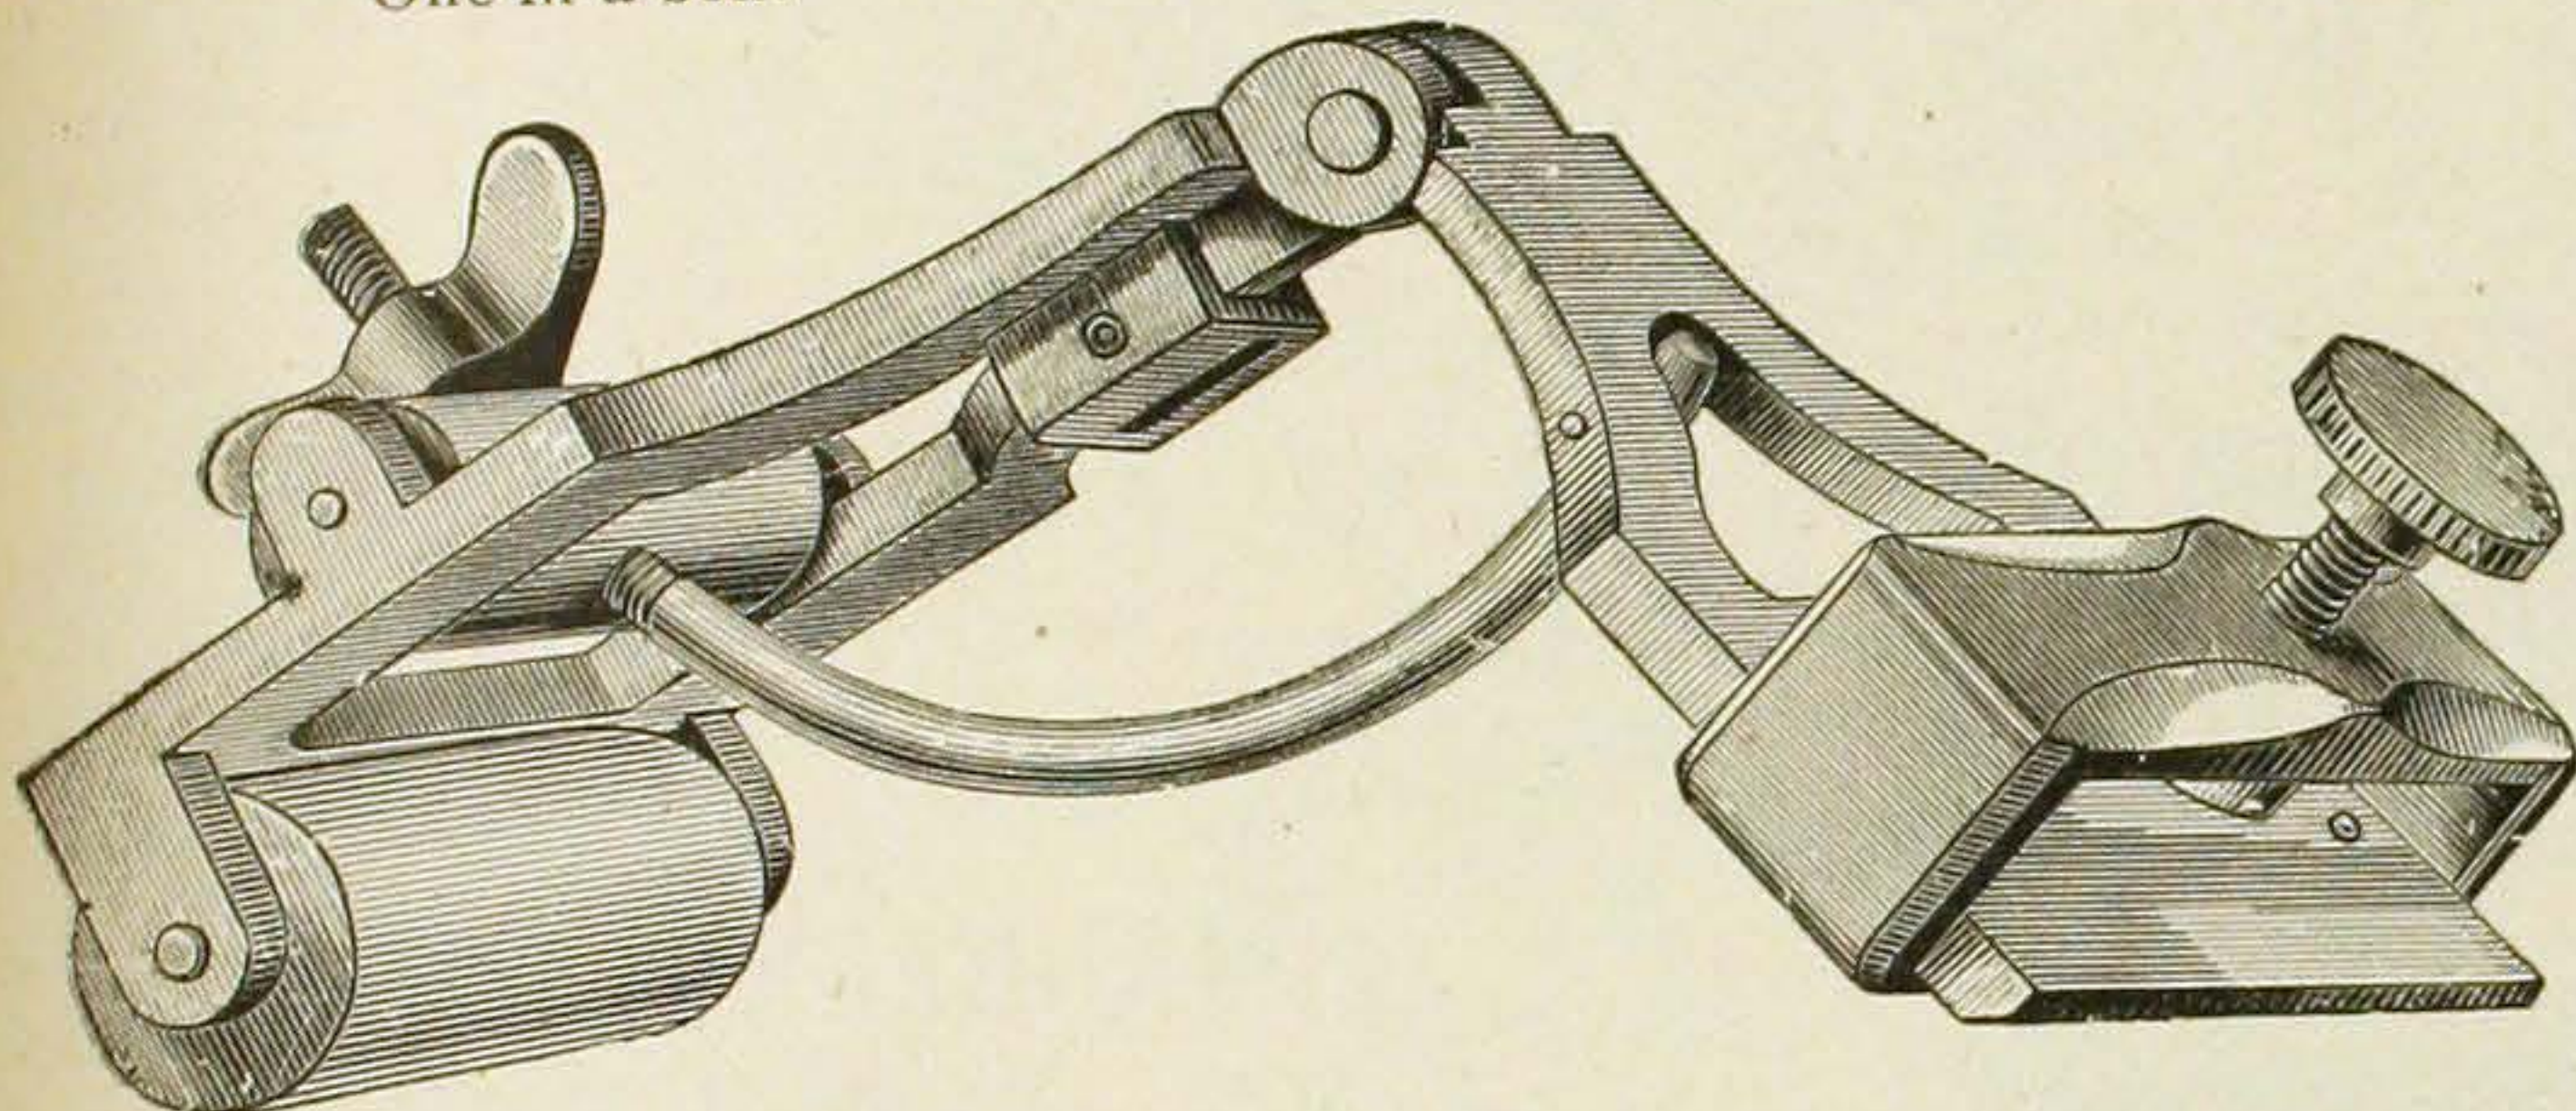

12, 15, 18, 21 and 24 inches.

No. 1 All lengths, per dozen, \$15.00

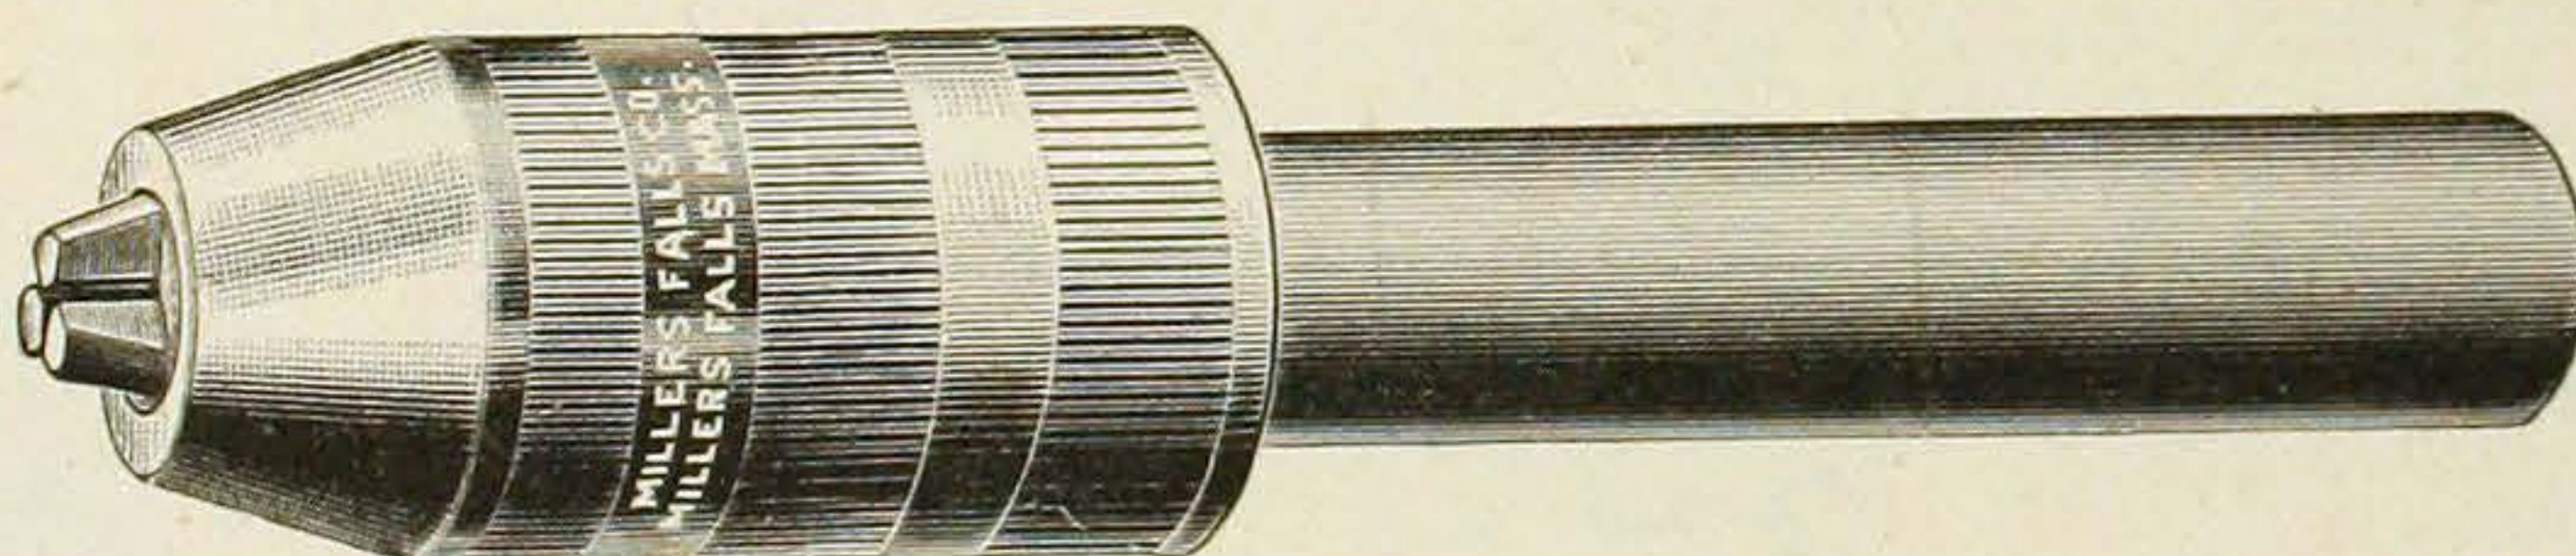

CHISEL GRINDERS

This is a new invention for holding Chisels, Plane Irons, etc., while grinding them. When put in the holder and brought to the right bevel with the adjusting screw, nothing is left to do but to bear it on the stone, and it will grind all right without further care.

Per dozen, \$9.00
One in a box.

IMPROVED STAR CHUCKS

Arranged with three jaws set in solid sockets. There are no springs to get out of order or out of place. The latest improvement in connection with these chucks is a device to hold the jaws firmly in place, and move them forward and backward by the motion of the screw.

No. 1	holds from 0 to $\frac{3}{16}$ inch,	has shank $1\frac{1}{2} \times \frac{1}{2}$,	each, \$1.00
No. 2	" " 0 " $\frac{1}{4}$ " " "	$3\frac{3}{8} \times \frac{5}{8}$,	" 1.50
No. 3	" " 0 " $\frac{1}{2}$ " " "	$4\frac{1}{2} \times \frac{7}{8}$,	" 3.00

One in a box.

VAUGHAN'S HOLLOW TUBE POST-HOLE AUGERS

Large Sizes for Telegraph Poles.

Size, inches,	4	5	6	7	8	9	10	11	12
Per dozen,	\$24.00	24.00	24.00	24.00	24.00	24.00	each, \$7.00	7.50	8.00

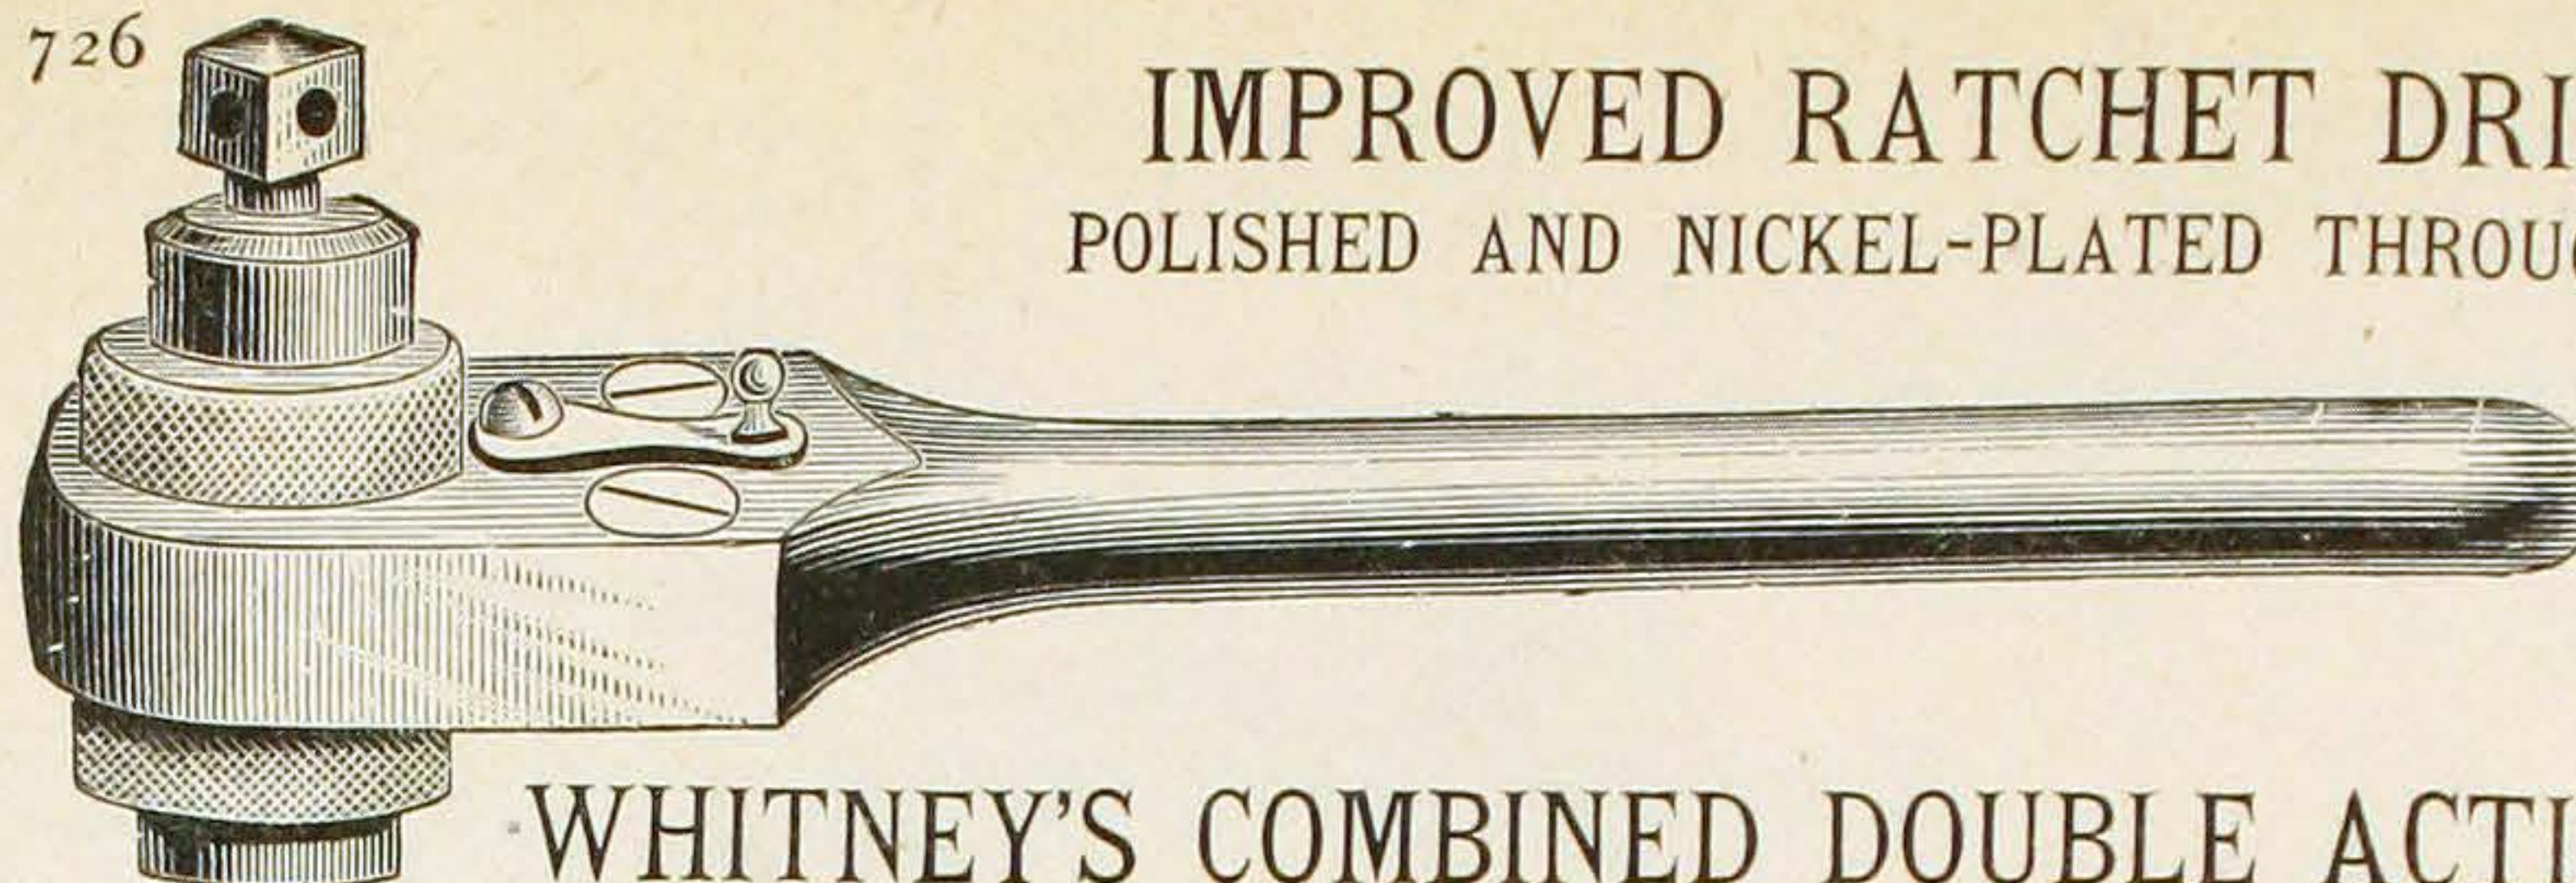

6 inches is the regular size for posts to drive; 8 and 9 inches are the regular sizes for posts to fill in.

The great advantage of the above Augers is the fact that by means of the Hollow Tube the air is admitted under the Auger when withdrawn, and thus the suction is done away with.

Nickel-plated Frame, made of Forged Spring Steel, with Rosewood Handle. Will hold Saws from 1 to 6 inches.

Per dozen, \$9.00

BRACKET SETS

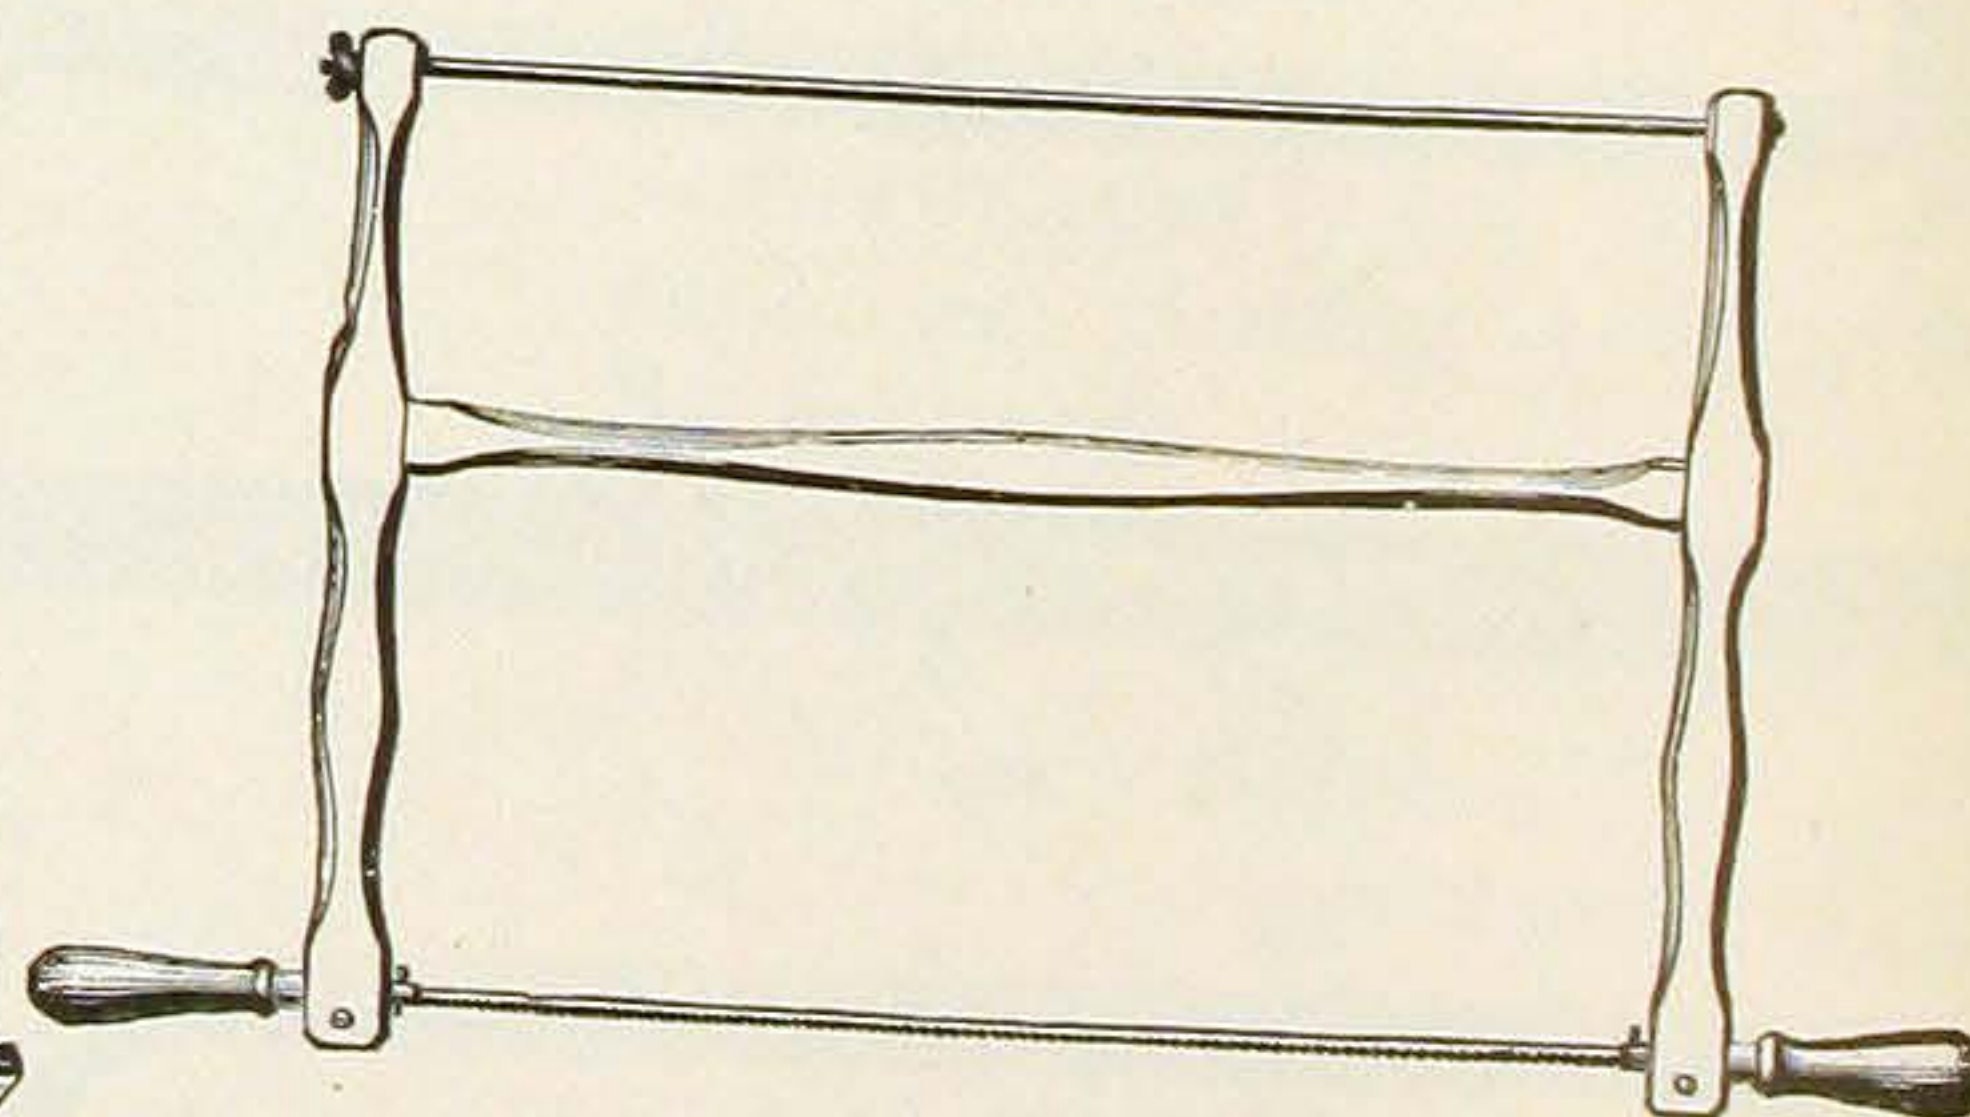

No. 2

These sets are packed in paper boxes, and embrace a Spring Steel Saw Frame, polished and nickel-plated, 5x12 inches, having patent designs, embracing a great variety of fancy and useful articles; 12 Saw Blades, 1 Awl, 1 sheet of Impression Paper, and full directions for using the Saw.

No. 2 Bracket Set, per dozen, \$15.00
 No. 1 Pleasure and Profit Set, frame Rough Nickered, with Japanned Handle, box same size and same contents as No. 2, per dozen, 10.00

MILLER'S FALLS TURNING WEBS, FRAMED

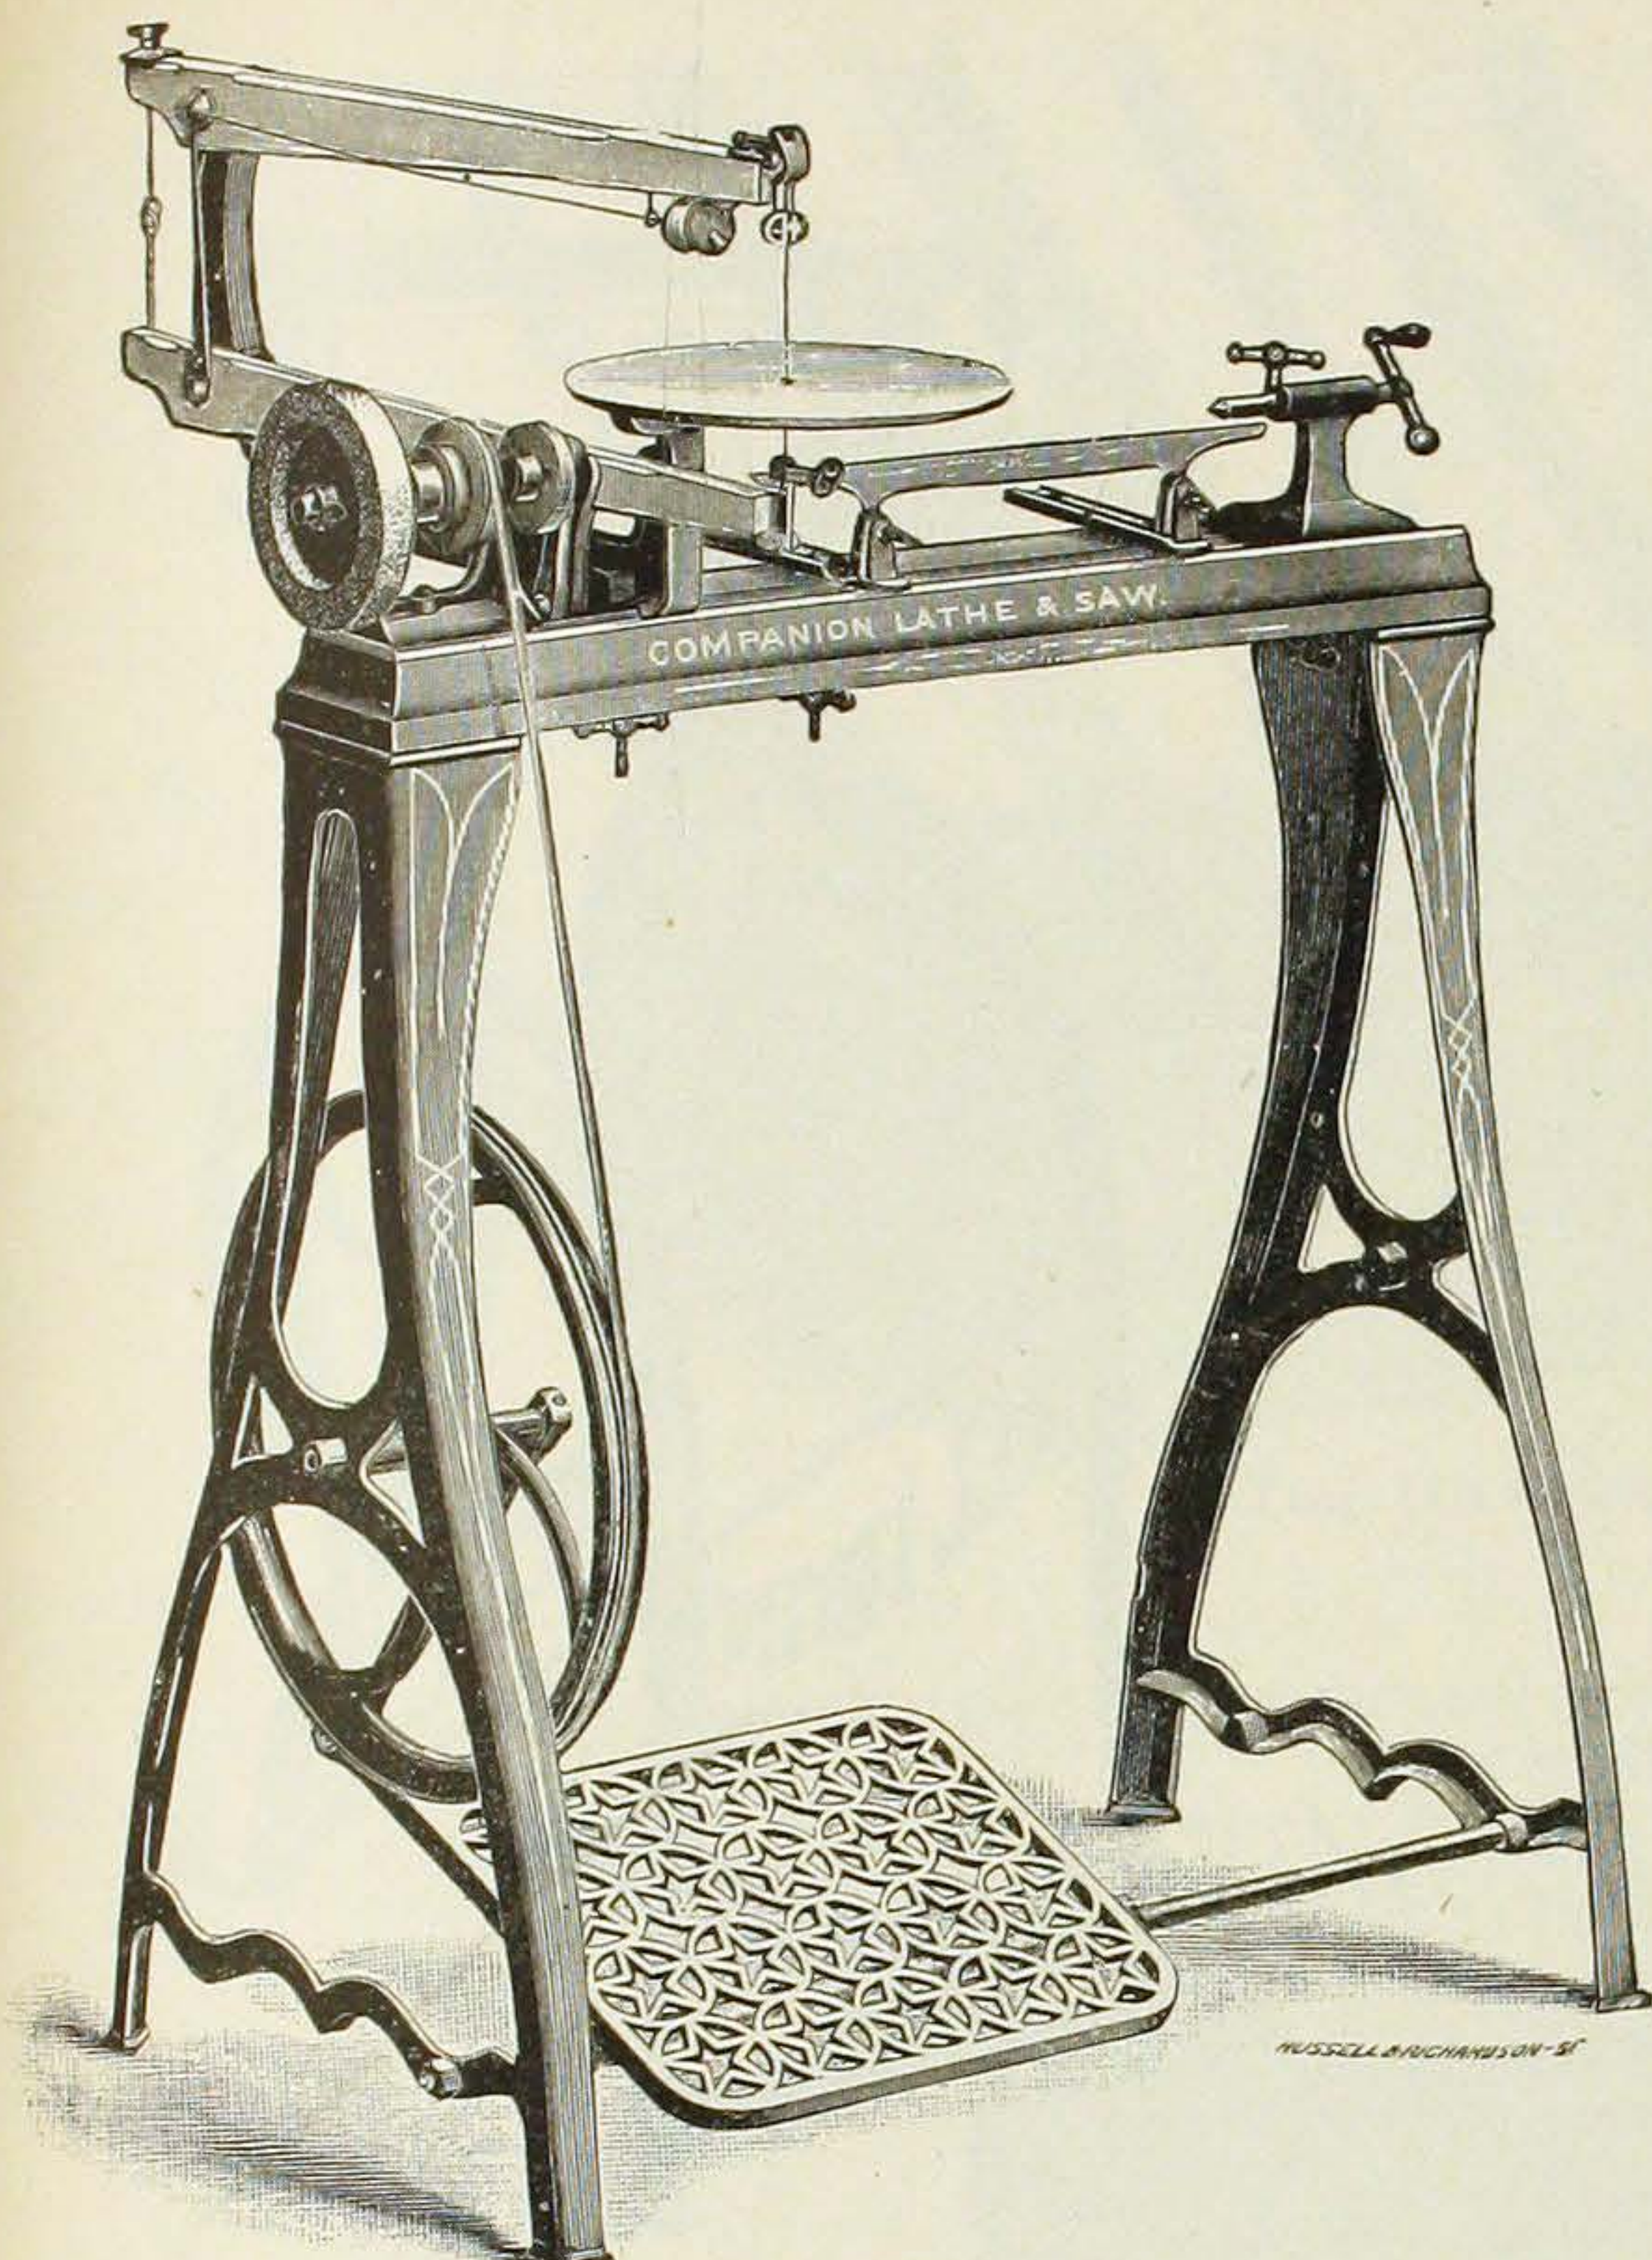

This frame is made of birch wood, with ebonized handles. There is an index on each handle to show the operator just how far to turn each. The friction is regulated by screws. It is quite superior to most other kinds in market.

18 inch Frame, with one Blade, Each, \$1.00
 18 inch Blades, Per dozen, \$2.00

COMPANION LATHE AND SAW ATTACHMENTS

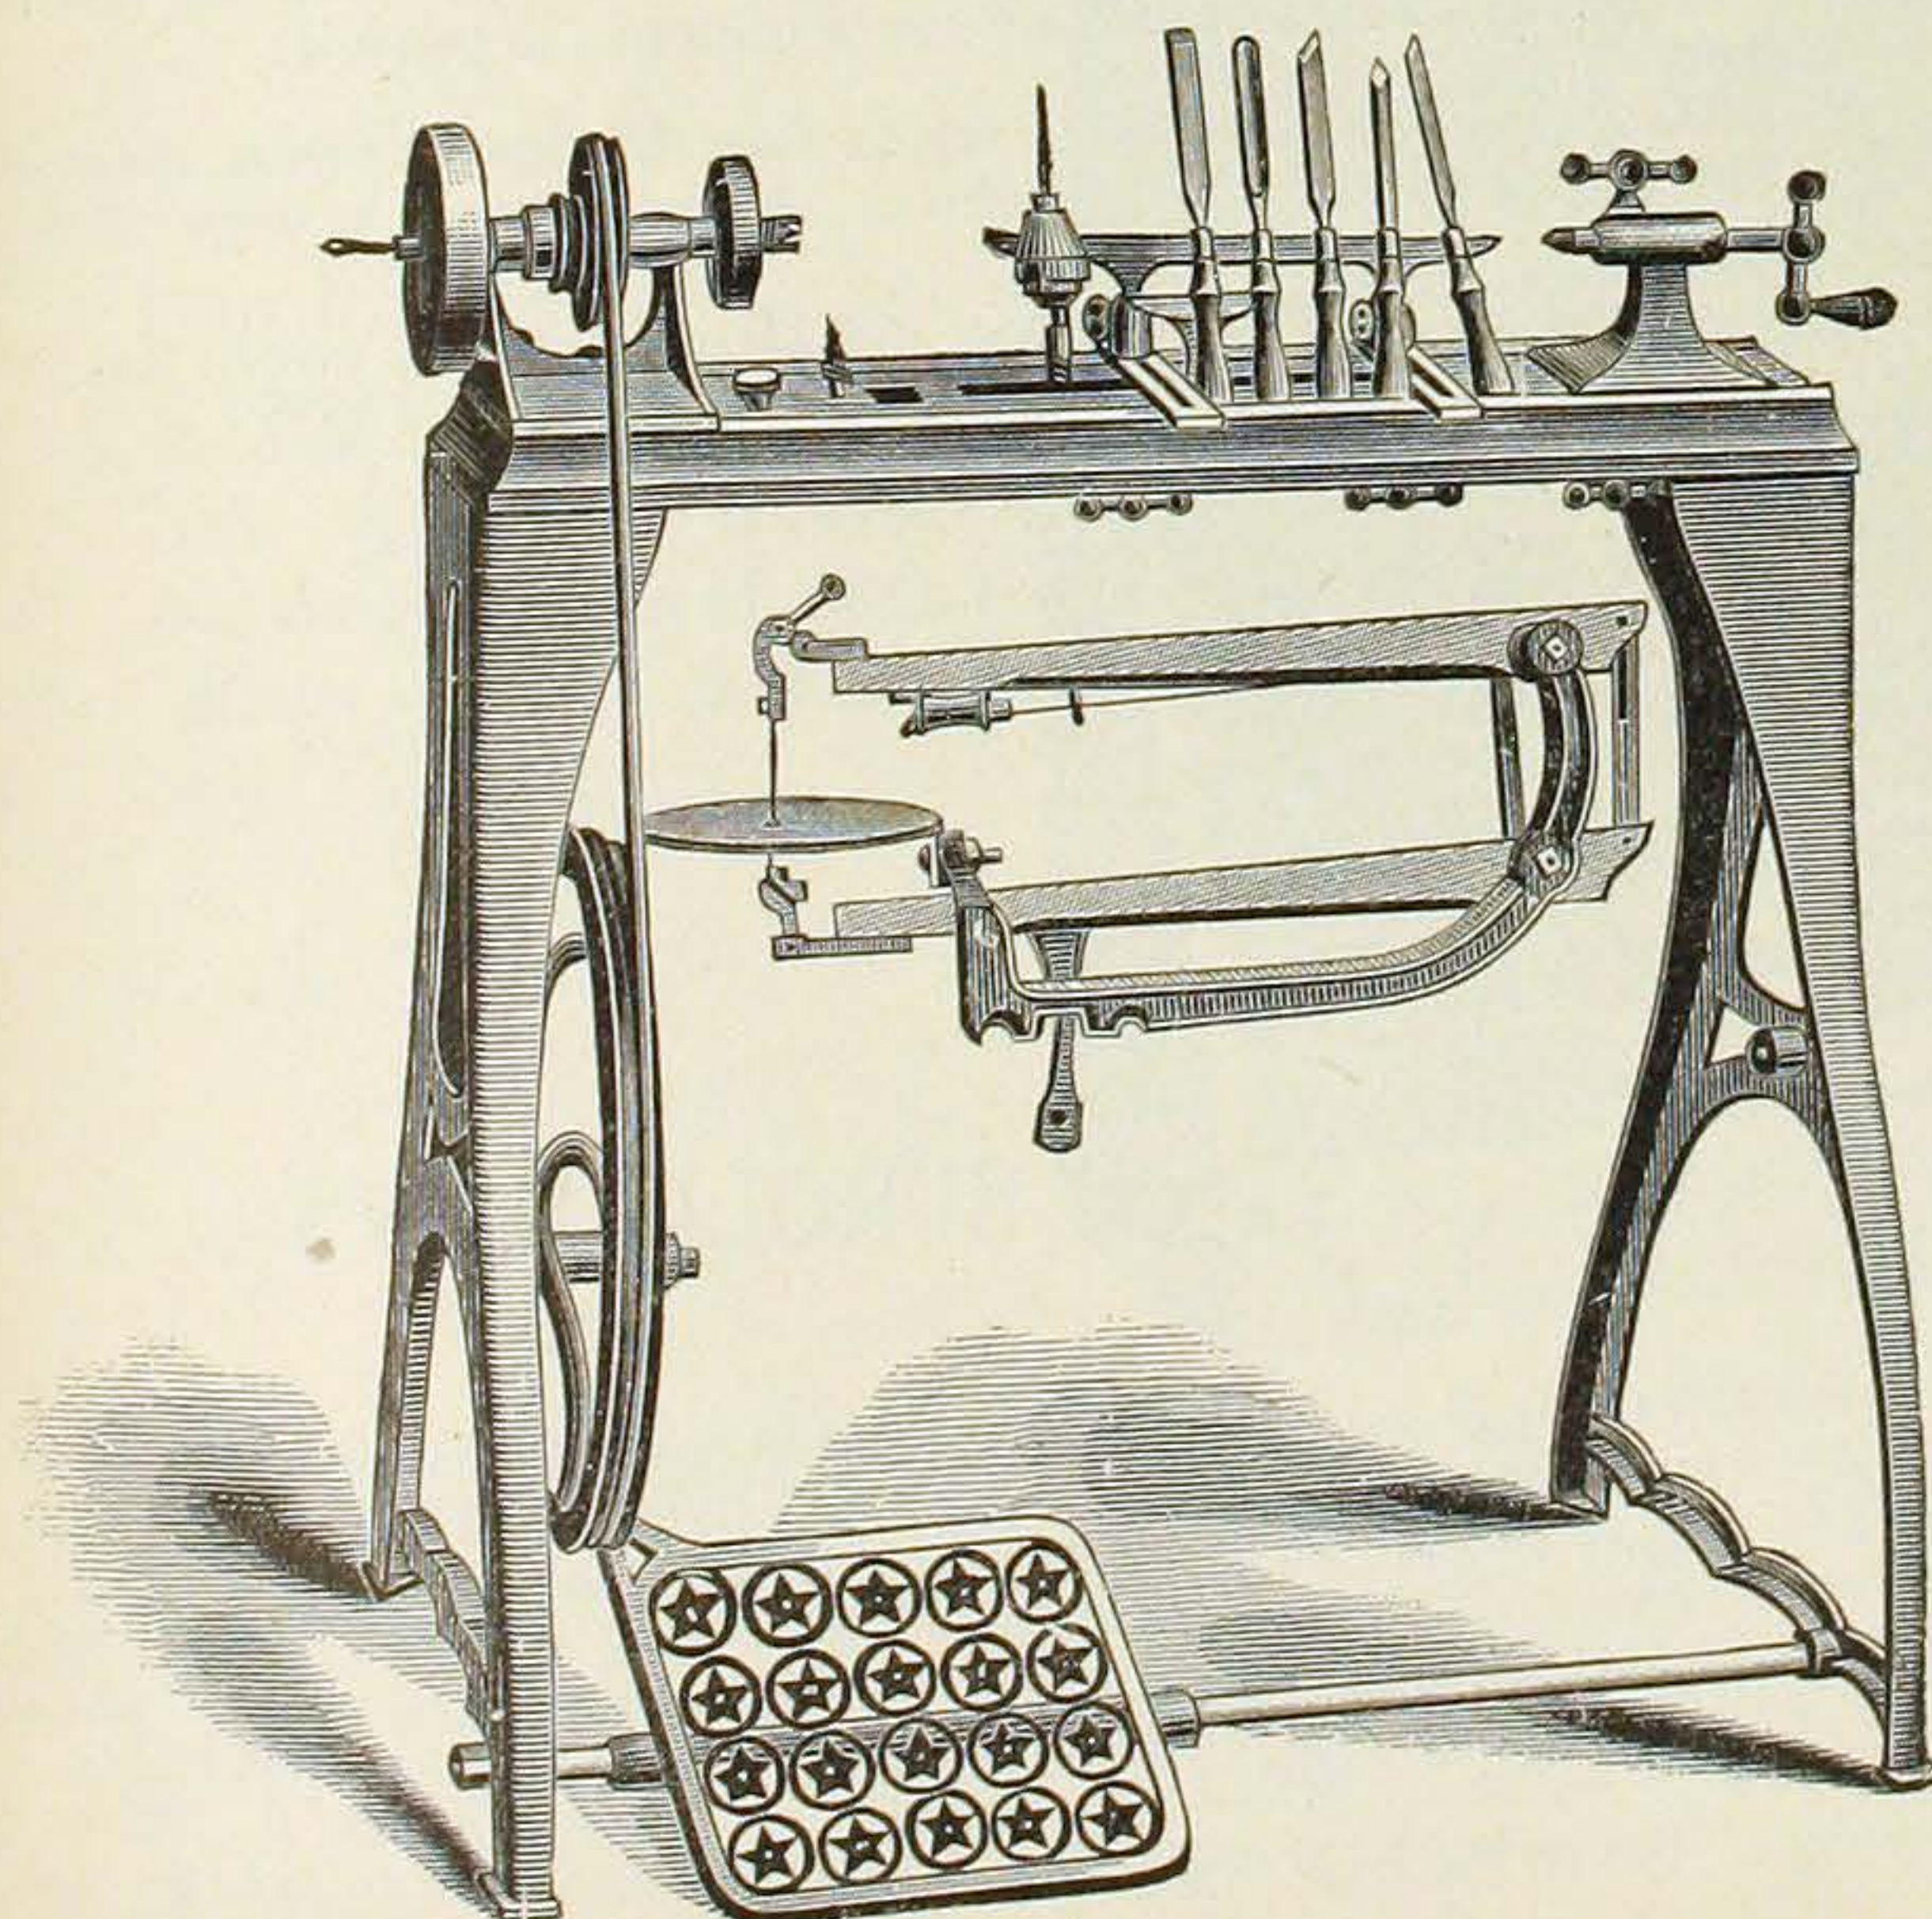

The Lathe Bed is 24 inches long, $13\frac{1}{2}$ inches between centers, and 5 inches swing. The Scroll Saw can be taken off by loosening one bolt.

State in ordering if either or both of the attachments are wanted.

Lathe and Tools,	each, \$7.00
Scroll Saw Attachment,	" 1.50
Circular Saw, "	" 1.00

GOODELL LATHE

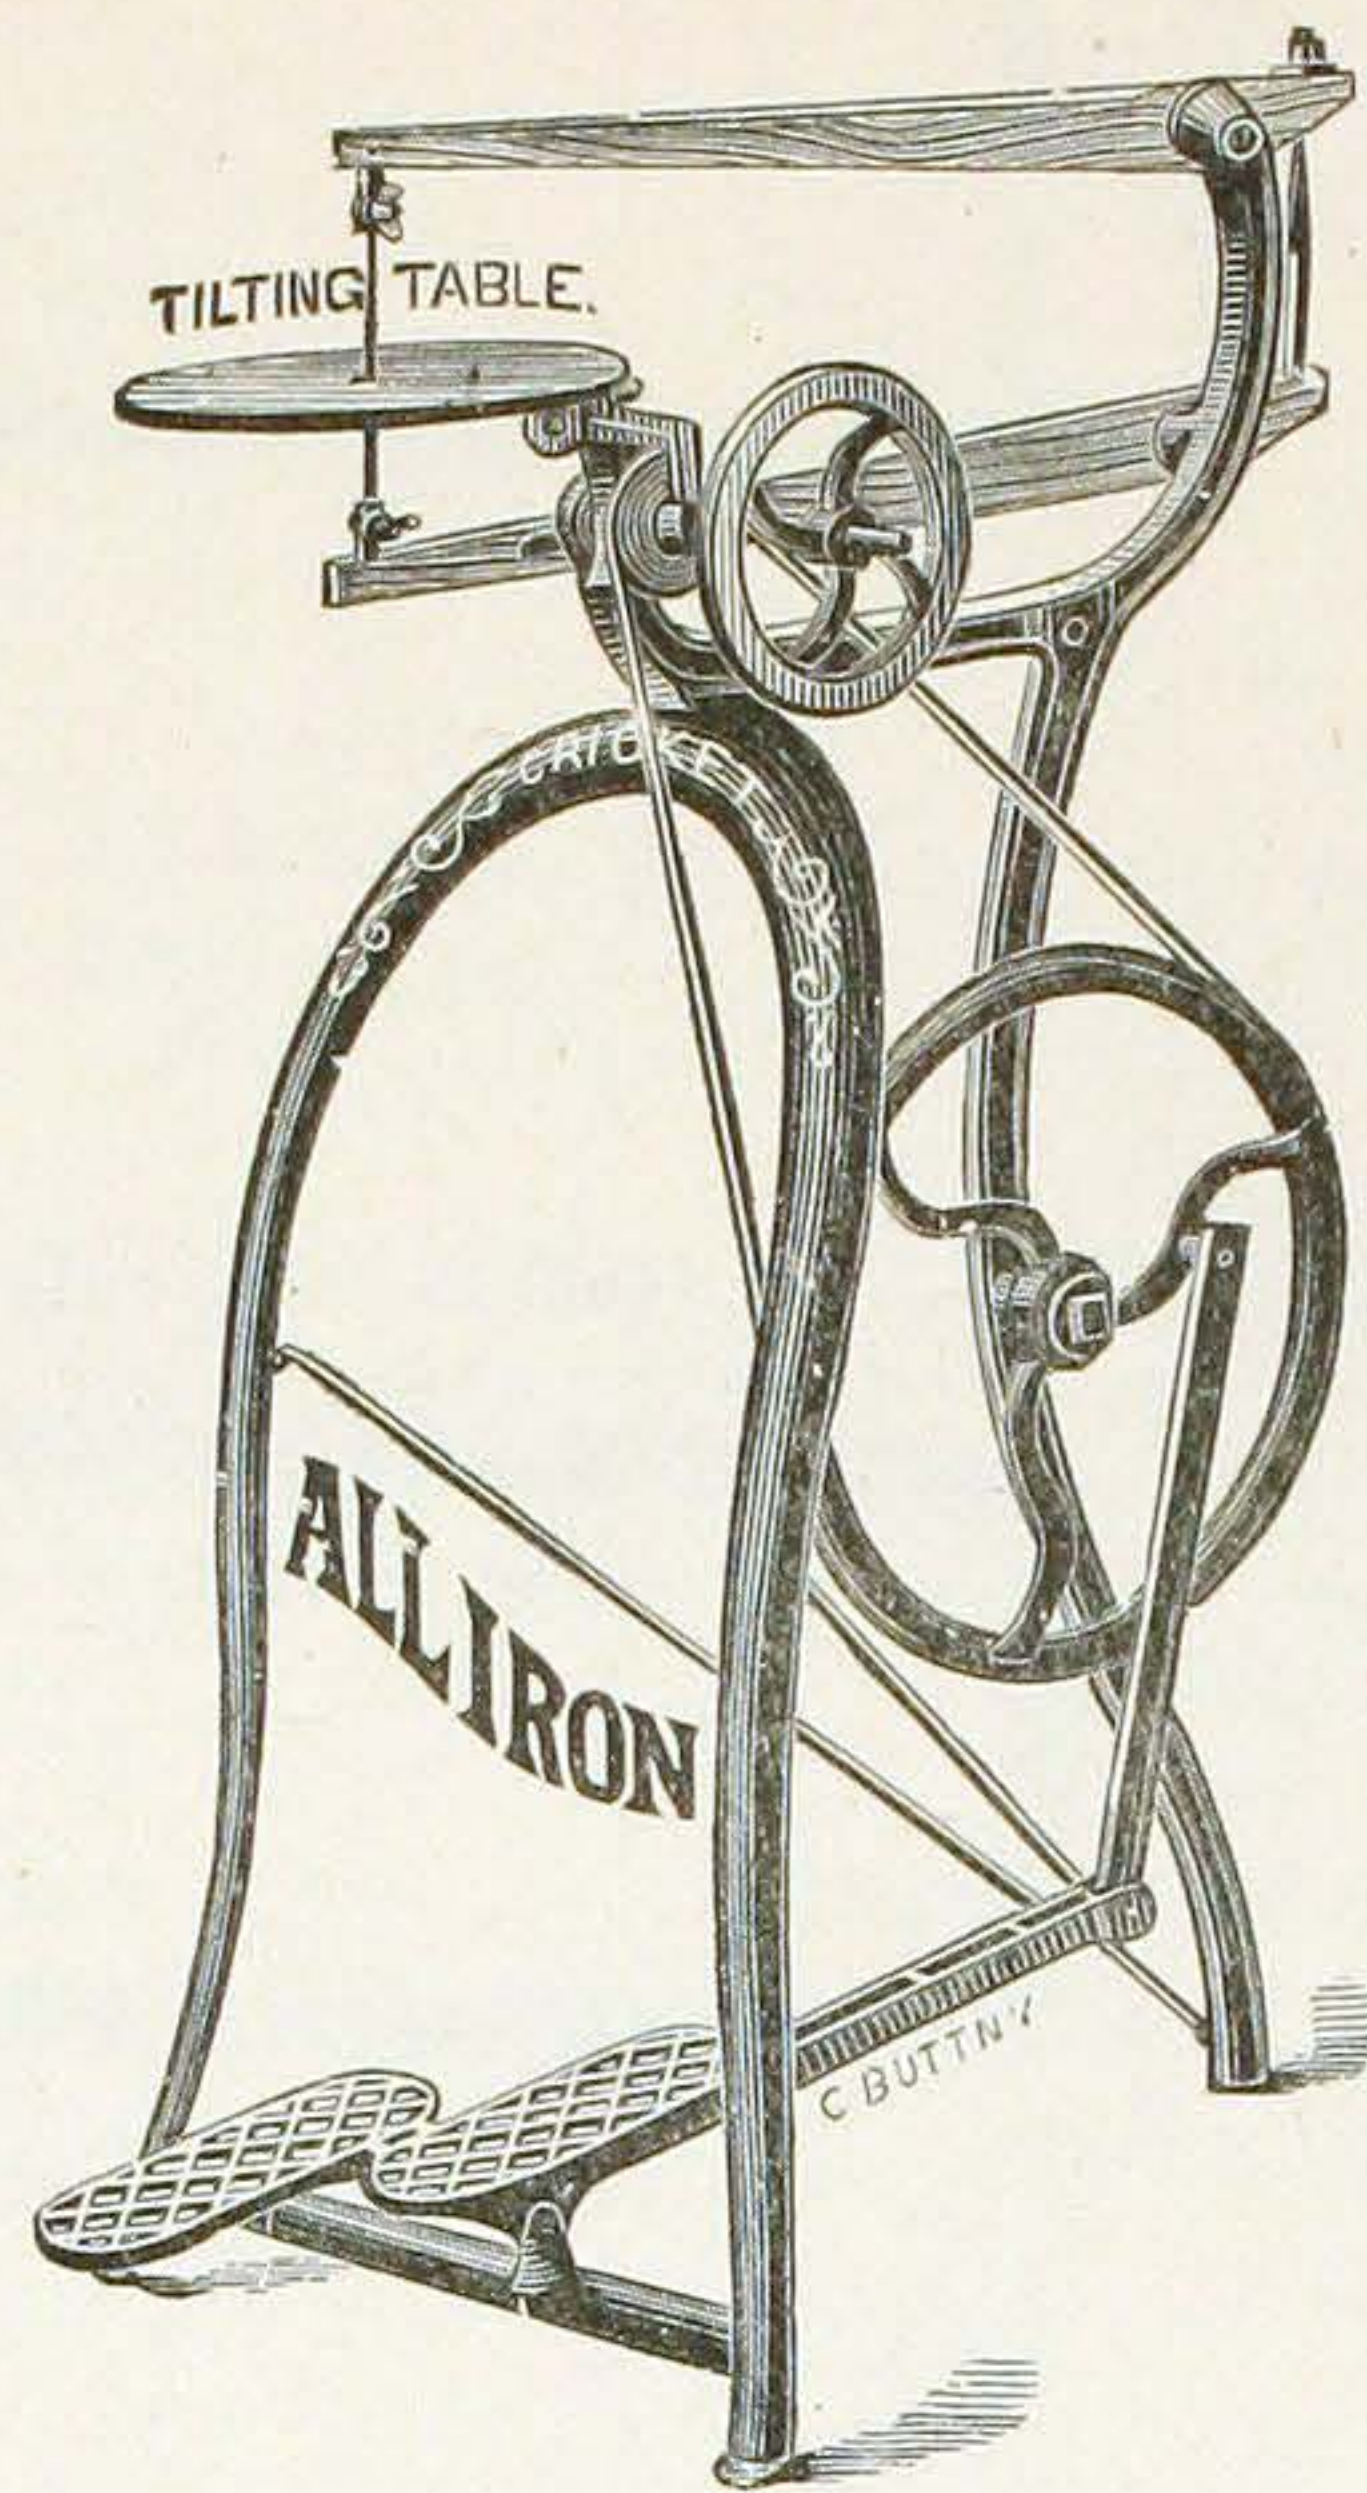

Length of Bed, 24 inches; Swing of Lathe, 5 inches; Distance between centers, $15\frac{1}{2}$ inches.

The lathe head has a 2 inch face plate, a spur center, a screw center, and a drill chuck to hold from $\frac{1}{8}$ to $\frac{1}{4}$ inch round twist drills; on the outer side of the pulley is placed a solid emery wheel $4\frac{1}{2} \times 7\frac{7}{8}$ inches and a drill spindle with set screw to hold drill points. It has a long and short tool rest, 5 turning tools, wrench, drill points, etc. This lathe is thoroughly built and finished; the planed and polished parts are nickel-plated. The scroll sawing attachment is secured to the lathe bed with a bolt, and can be readily put on or taken off.

Lathe and Lathe Tools,	each, \$10.00
" " " " with	
Scroll Saw attachment,	each, 12.00

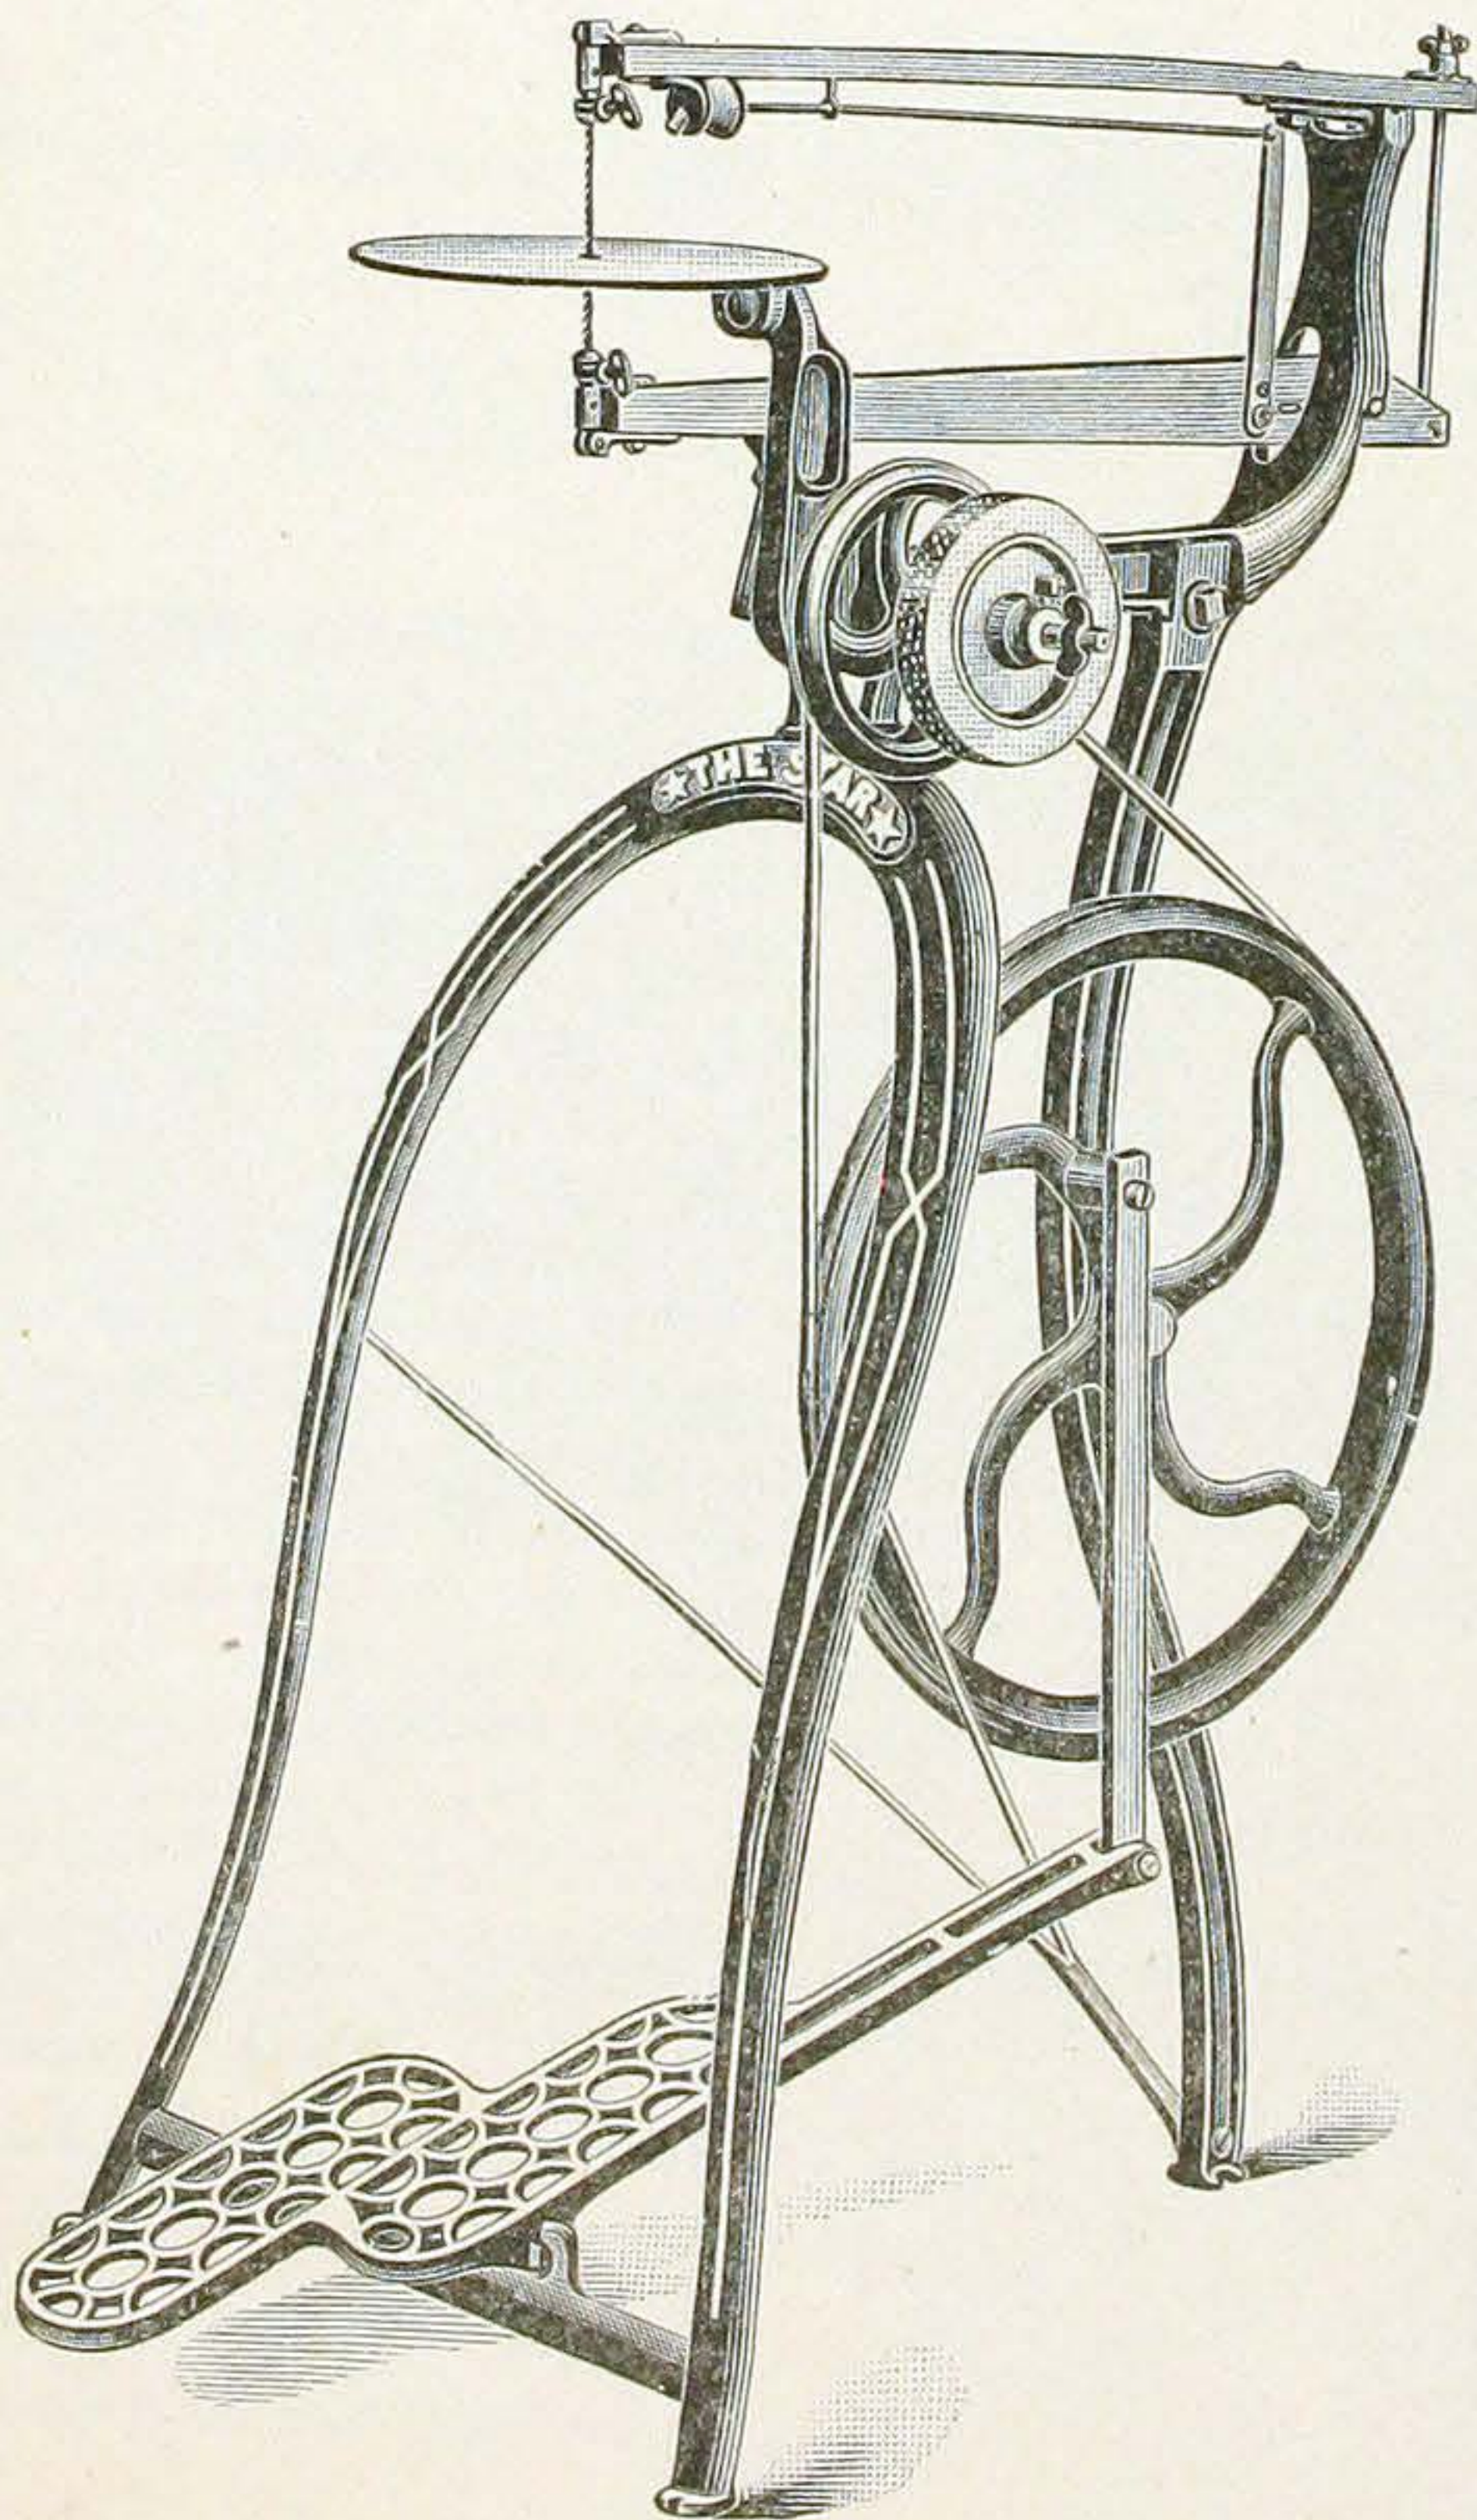

CRICKET SCROLL SAWS

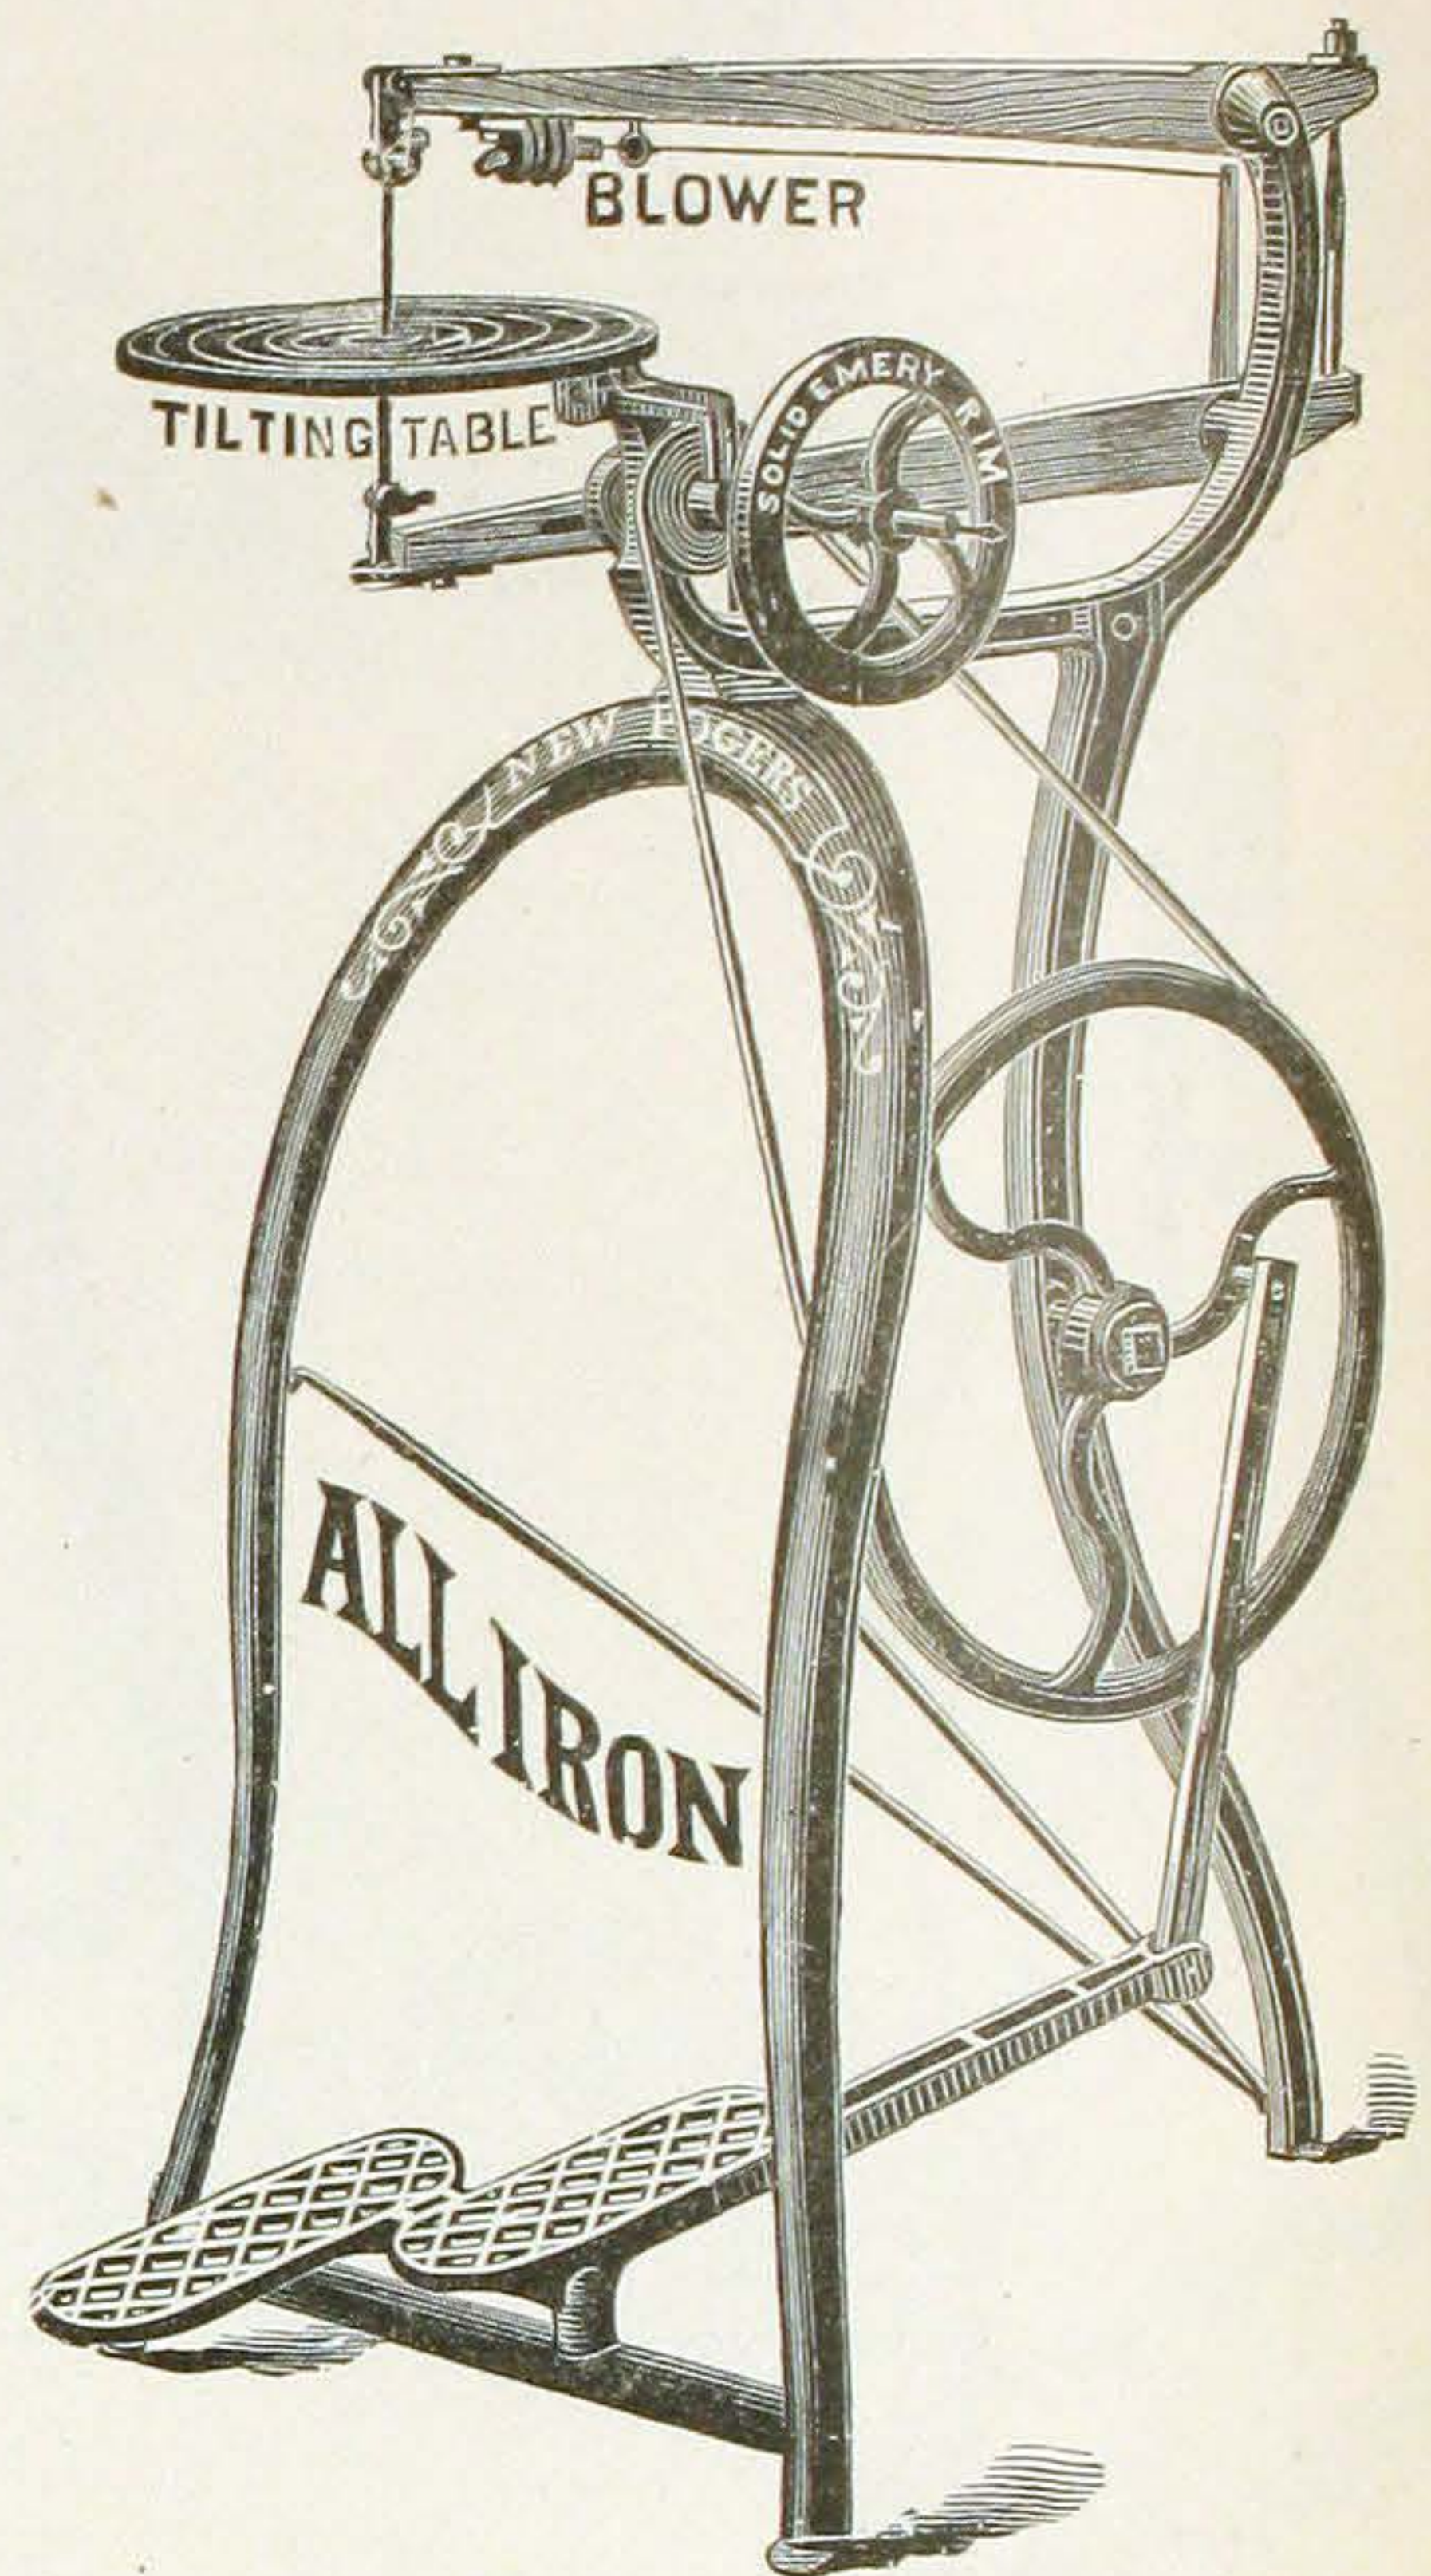

An all-iron, good and cheap foot-power Saw. Weight of Saw, packed for shipment, 35 pounds.

Cricket Scroll Saw, each, \$2.50

THE NEW ROGERS' SCROLL SAWS

Entire framework made of iron, painted and japanned black, and ornamented with red and gilt stripes. Diameter of Balance Wheel, $4\frac{1}{2}$ inches, with rim of solid emery. Weight of Saw, packed for shipment, 42 pounds.

With each machine are 12 Saw Blades, Wrench, sheet of Designs, and 3 Drill Points. All parts made to interchange.

No. 2 Rogers' Saw, as Illustration, each, \$4.00

No. 1 Rogers' Saw, with Balance Wheel of Iron instead of Emery, and Tilting Table Japanned instead of Nickel-plated, each, 3.50

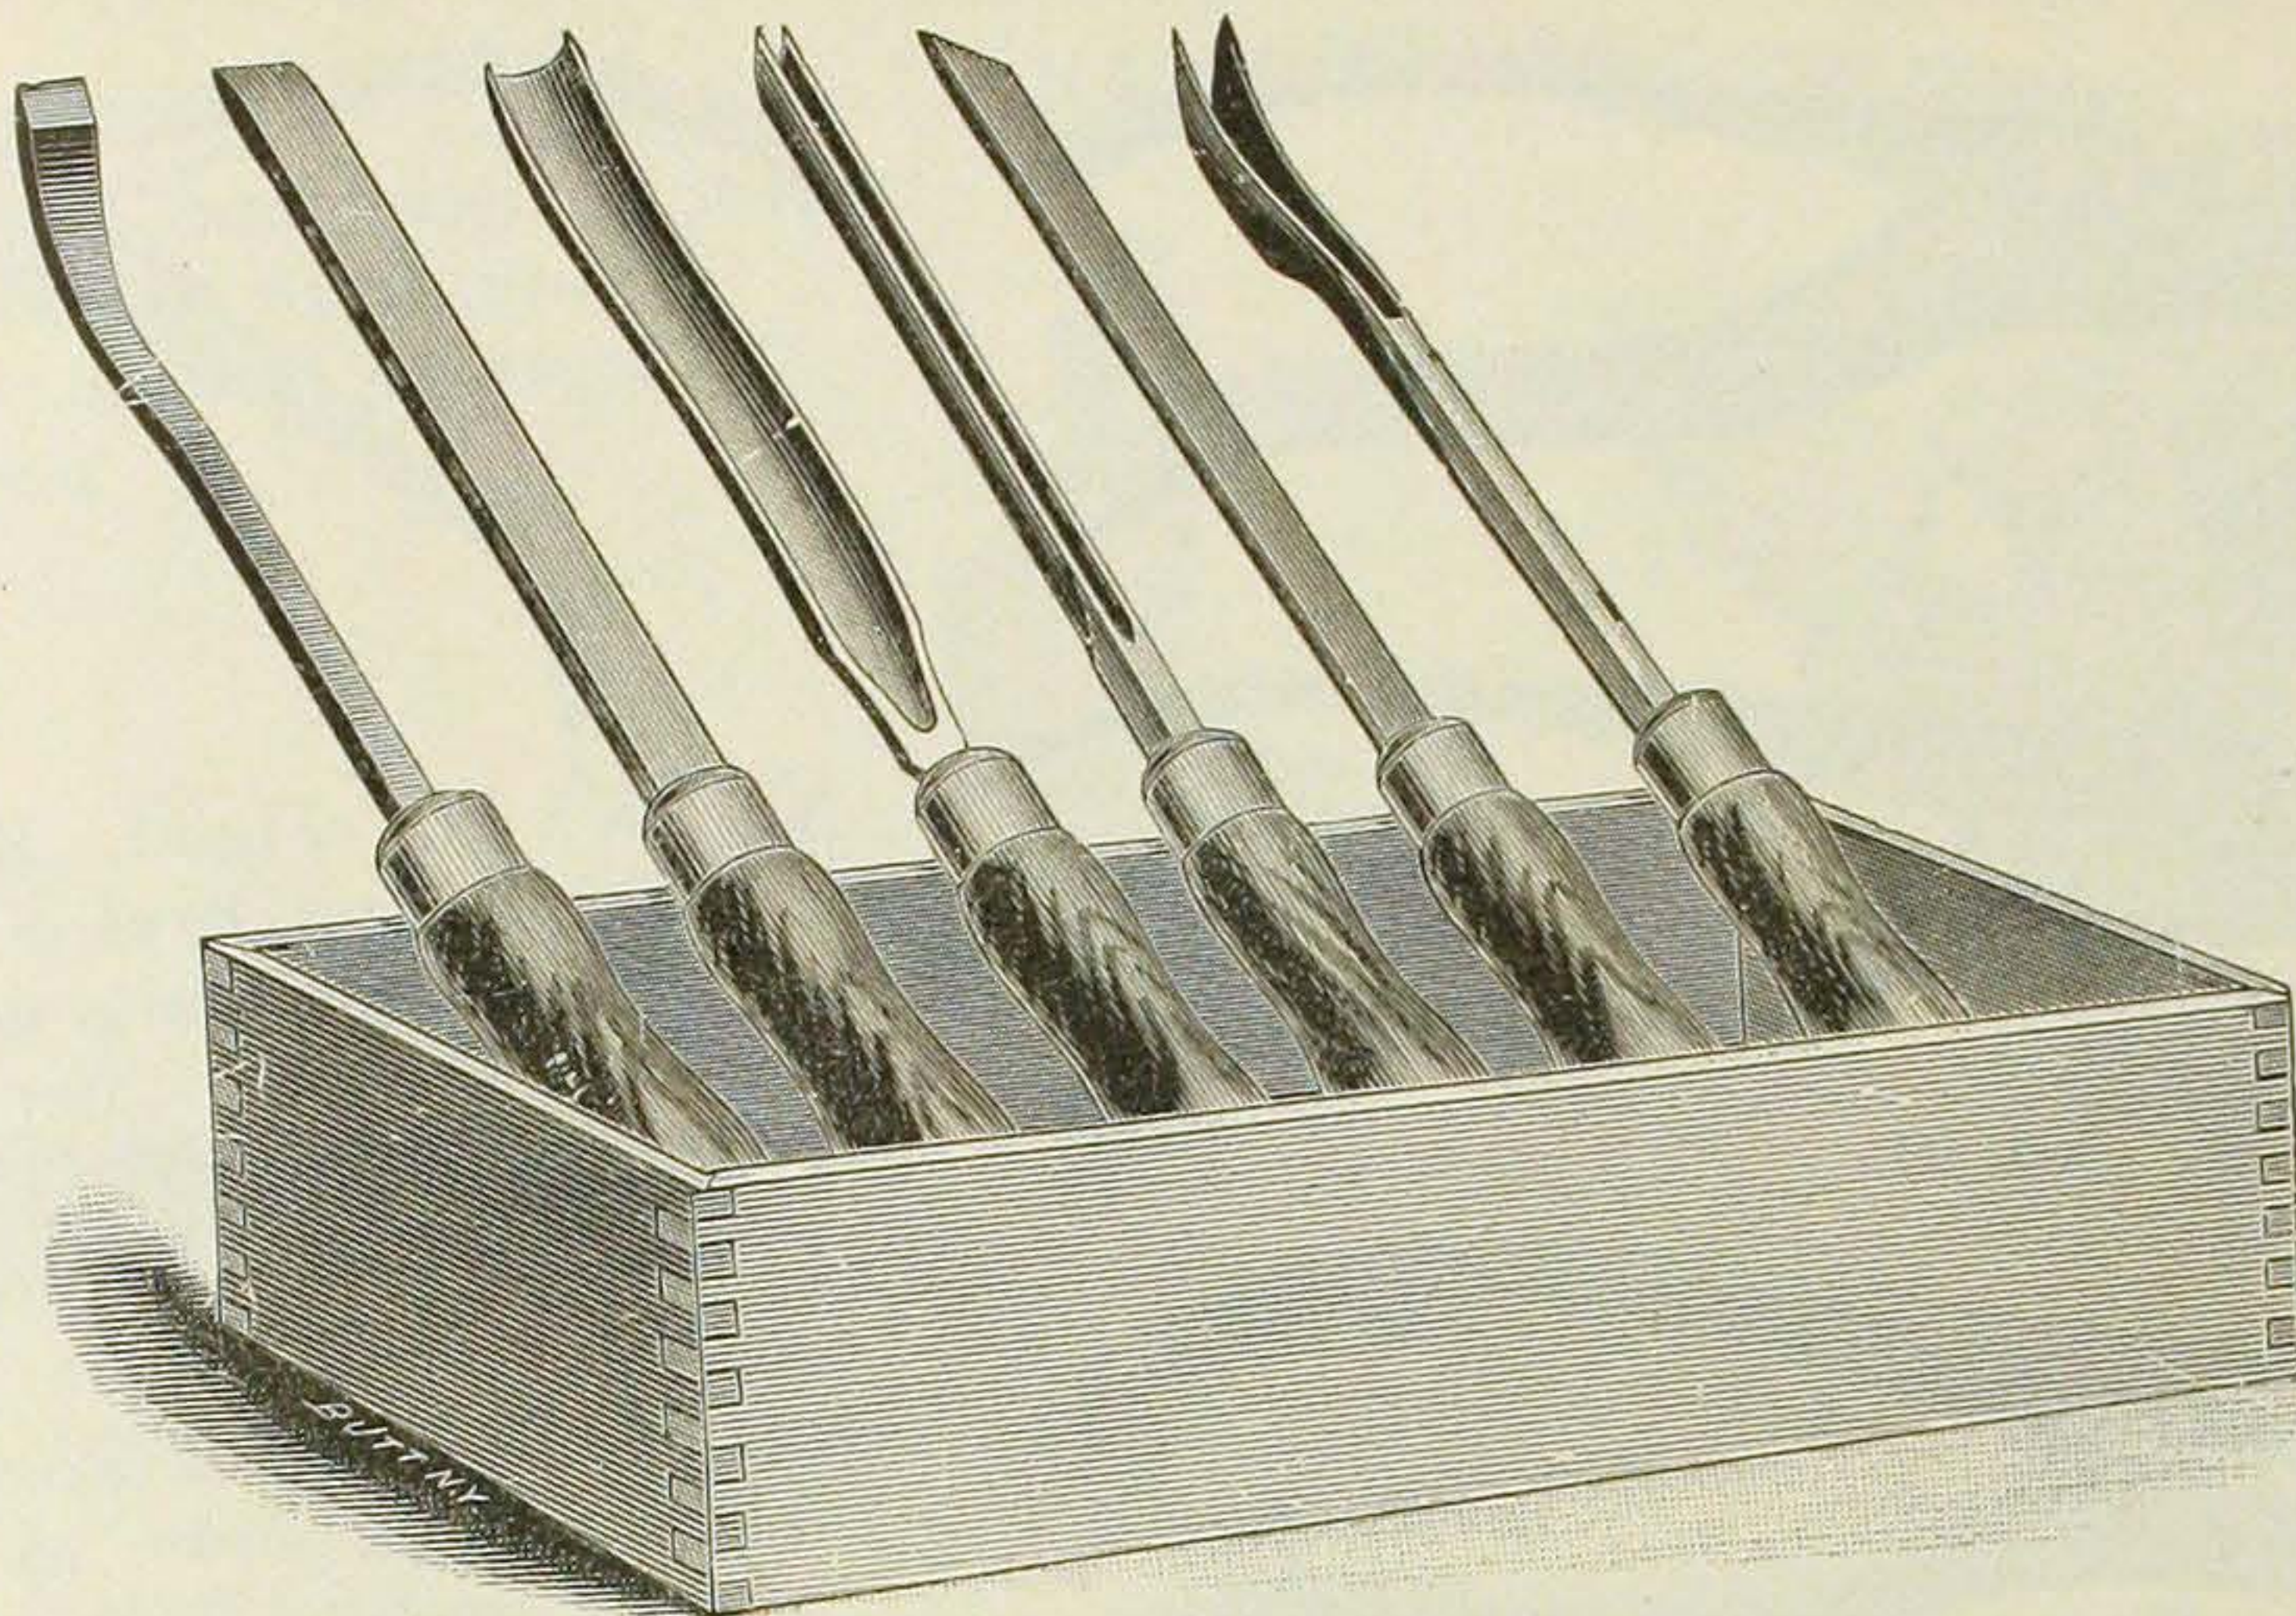

STAR SCROLL SAWS

This machine is of the same general character as the New Rogers' but heavier, having two Balance Wheels, one each iron and emery, thus increasing steadiness of motion, also a chuck for holding drills. The table is nicked, and the general finish of the Saw the same as other machines of its class. Weight of Saw, packed for shipment, 55 pounds.

Star Scroll Saw, each, \$5.00

CARVING TOOLS

Six Tools in a Wooden Box.

No. 1

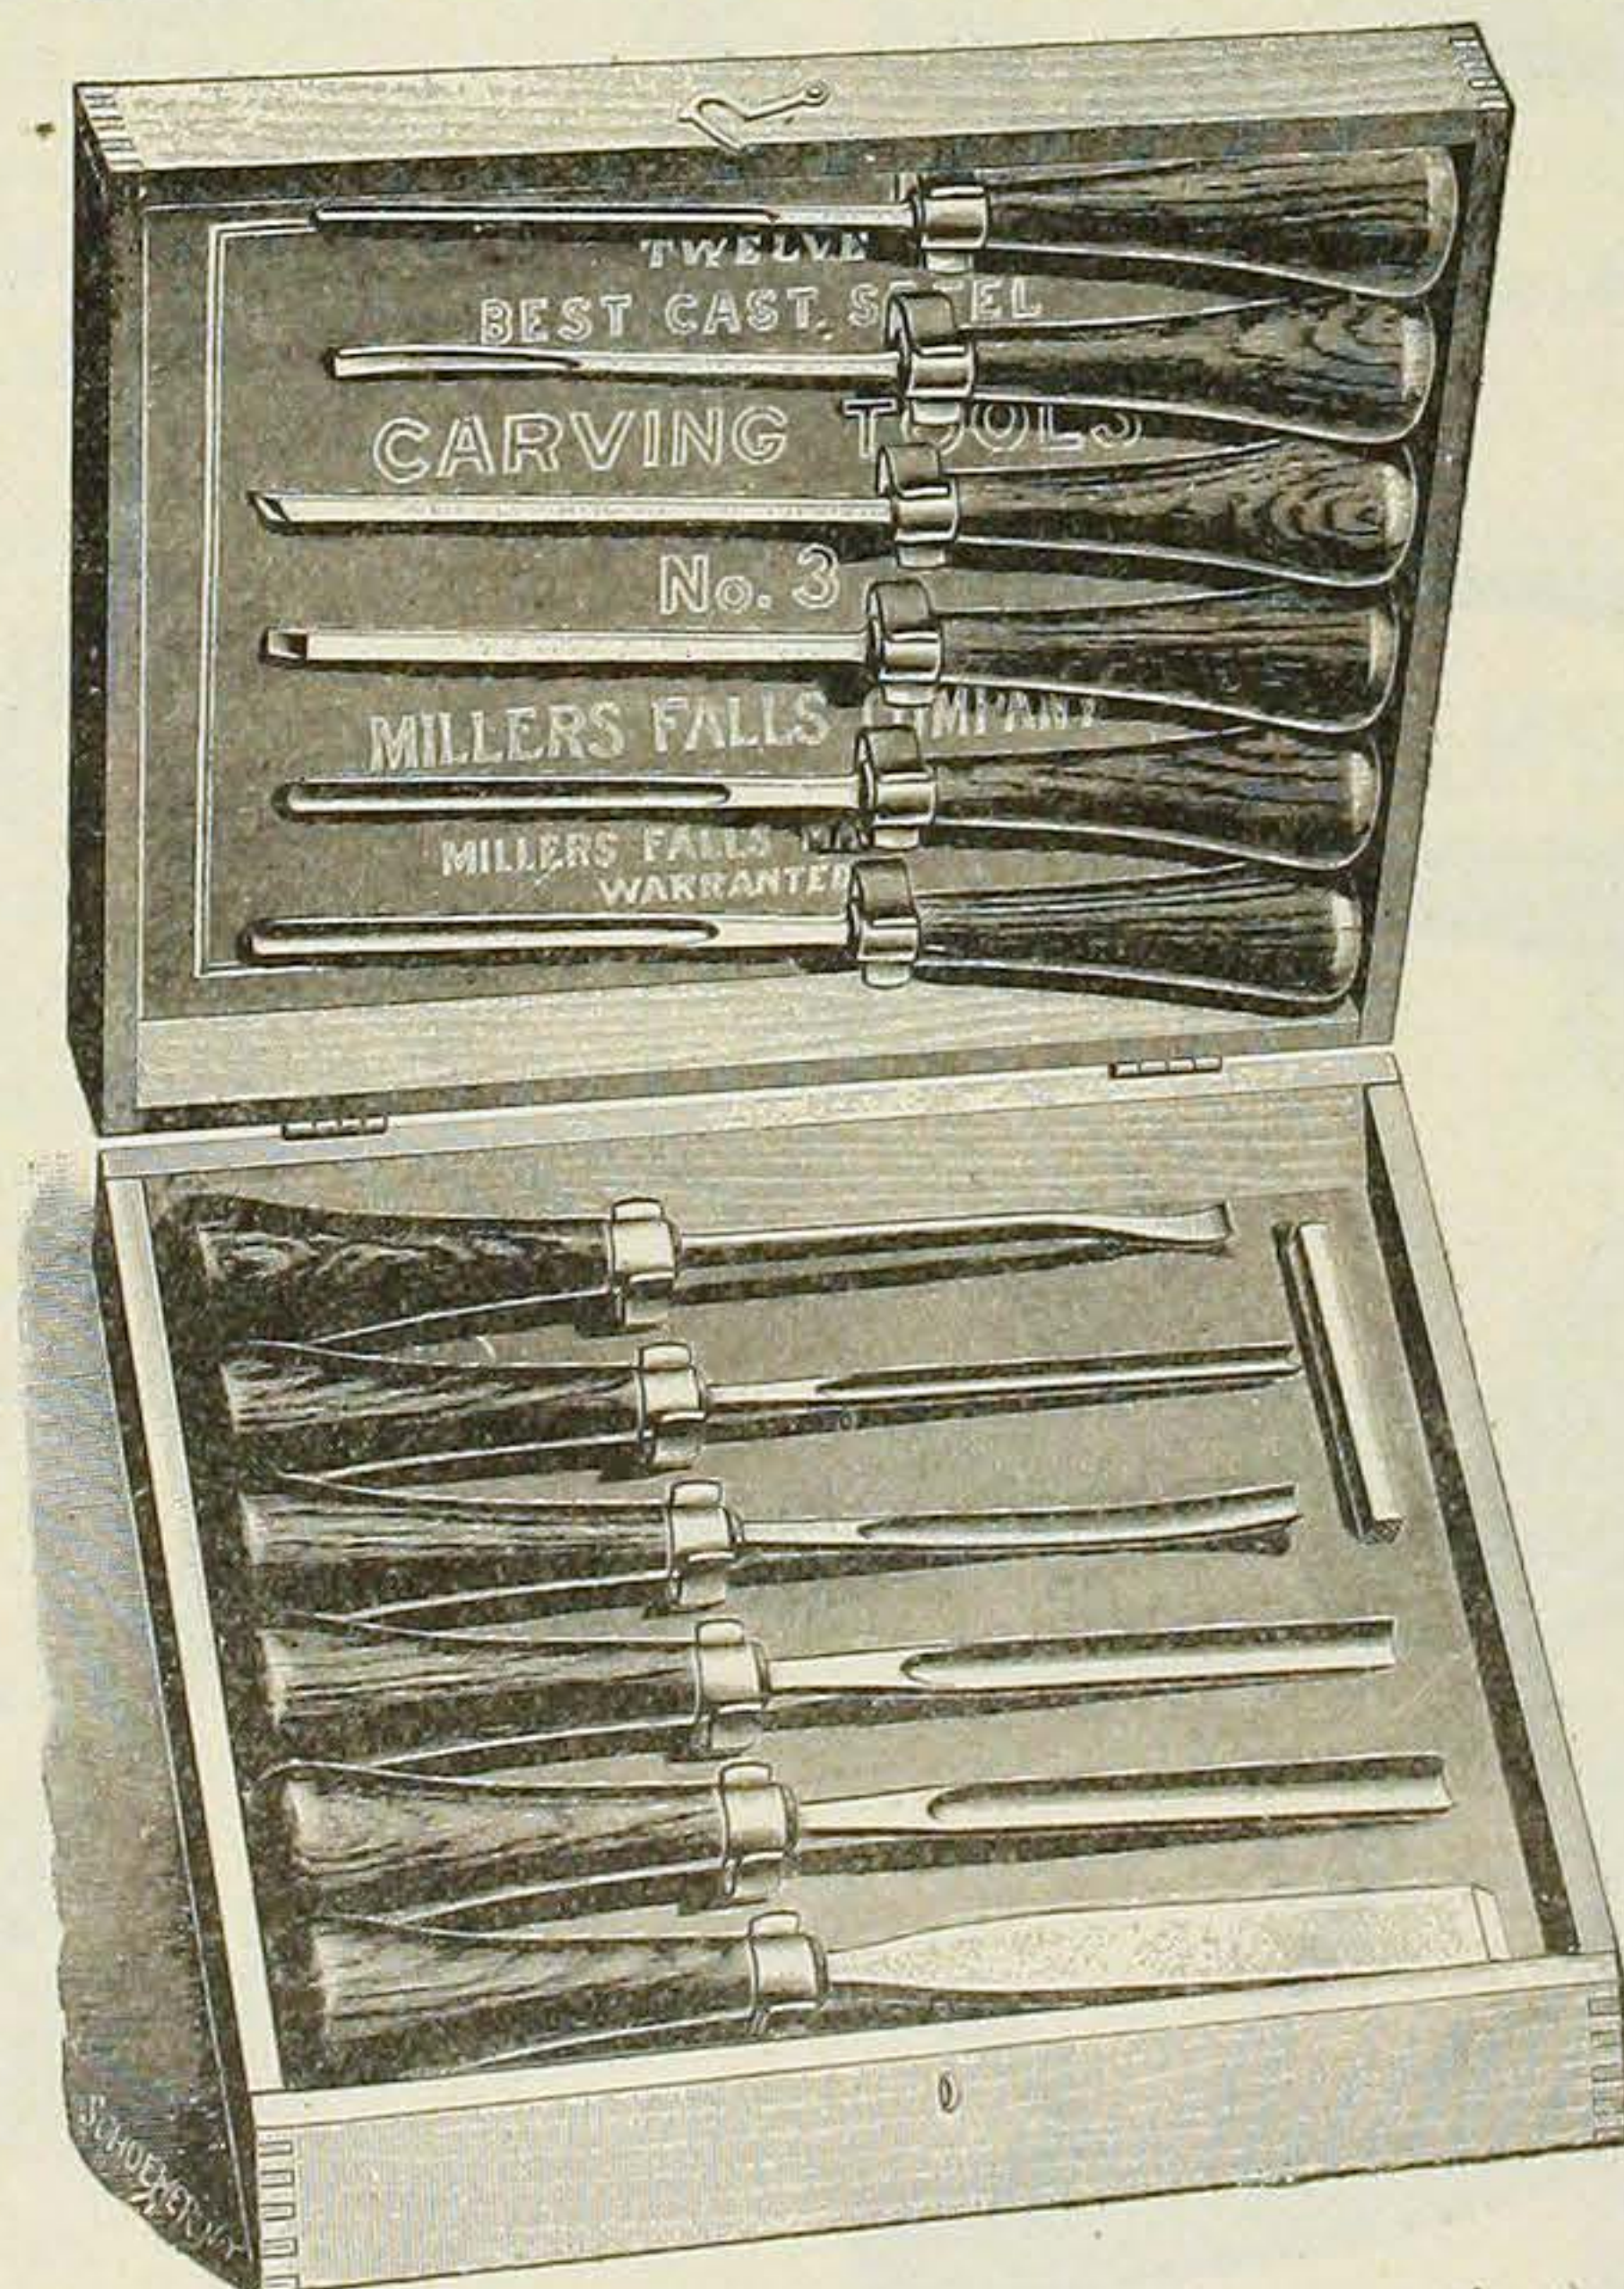

per dozen sets, \$12.00

No. 2

" " " 18.00

These Tools are forged from the best quality of steel, and are fully warranted. They have Rosewood Handles and are sharpened ready for use.

CARVING SET NO. 3

This cut represents a new Carving Set of 13 tools (12 carving and one matting), gotten up for use in Manual Training Schools, and by amateurs generally, though we assume there will also be a demand for them from artisans. In making up the assortment of tools, we have endeavored to ascertain just the shapes and sizes best suited for the work, and think they will be approved of by those who use them. The Blades are made from the best steel we are able to procure for the purpose. They are carefully tempered and finished, and are sent out sharpened for use. The handles are made from Cocobolo wood, and of the most approved shapes. The cases, $9\frac{3}{4} \times 8\frac{1}{4}$ inches in size, are nicely finished, and compare favorably with the tools. A clamp is provided to hold each tool in its place in the case.

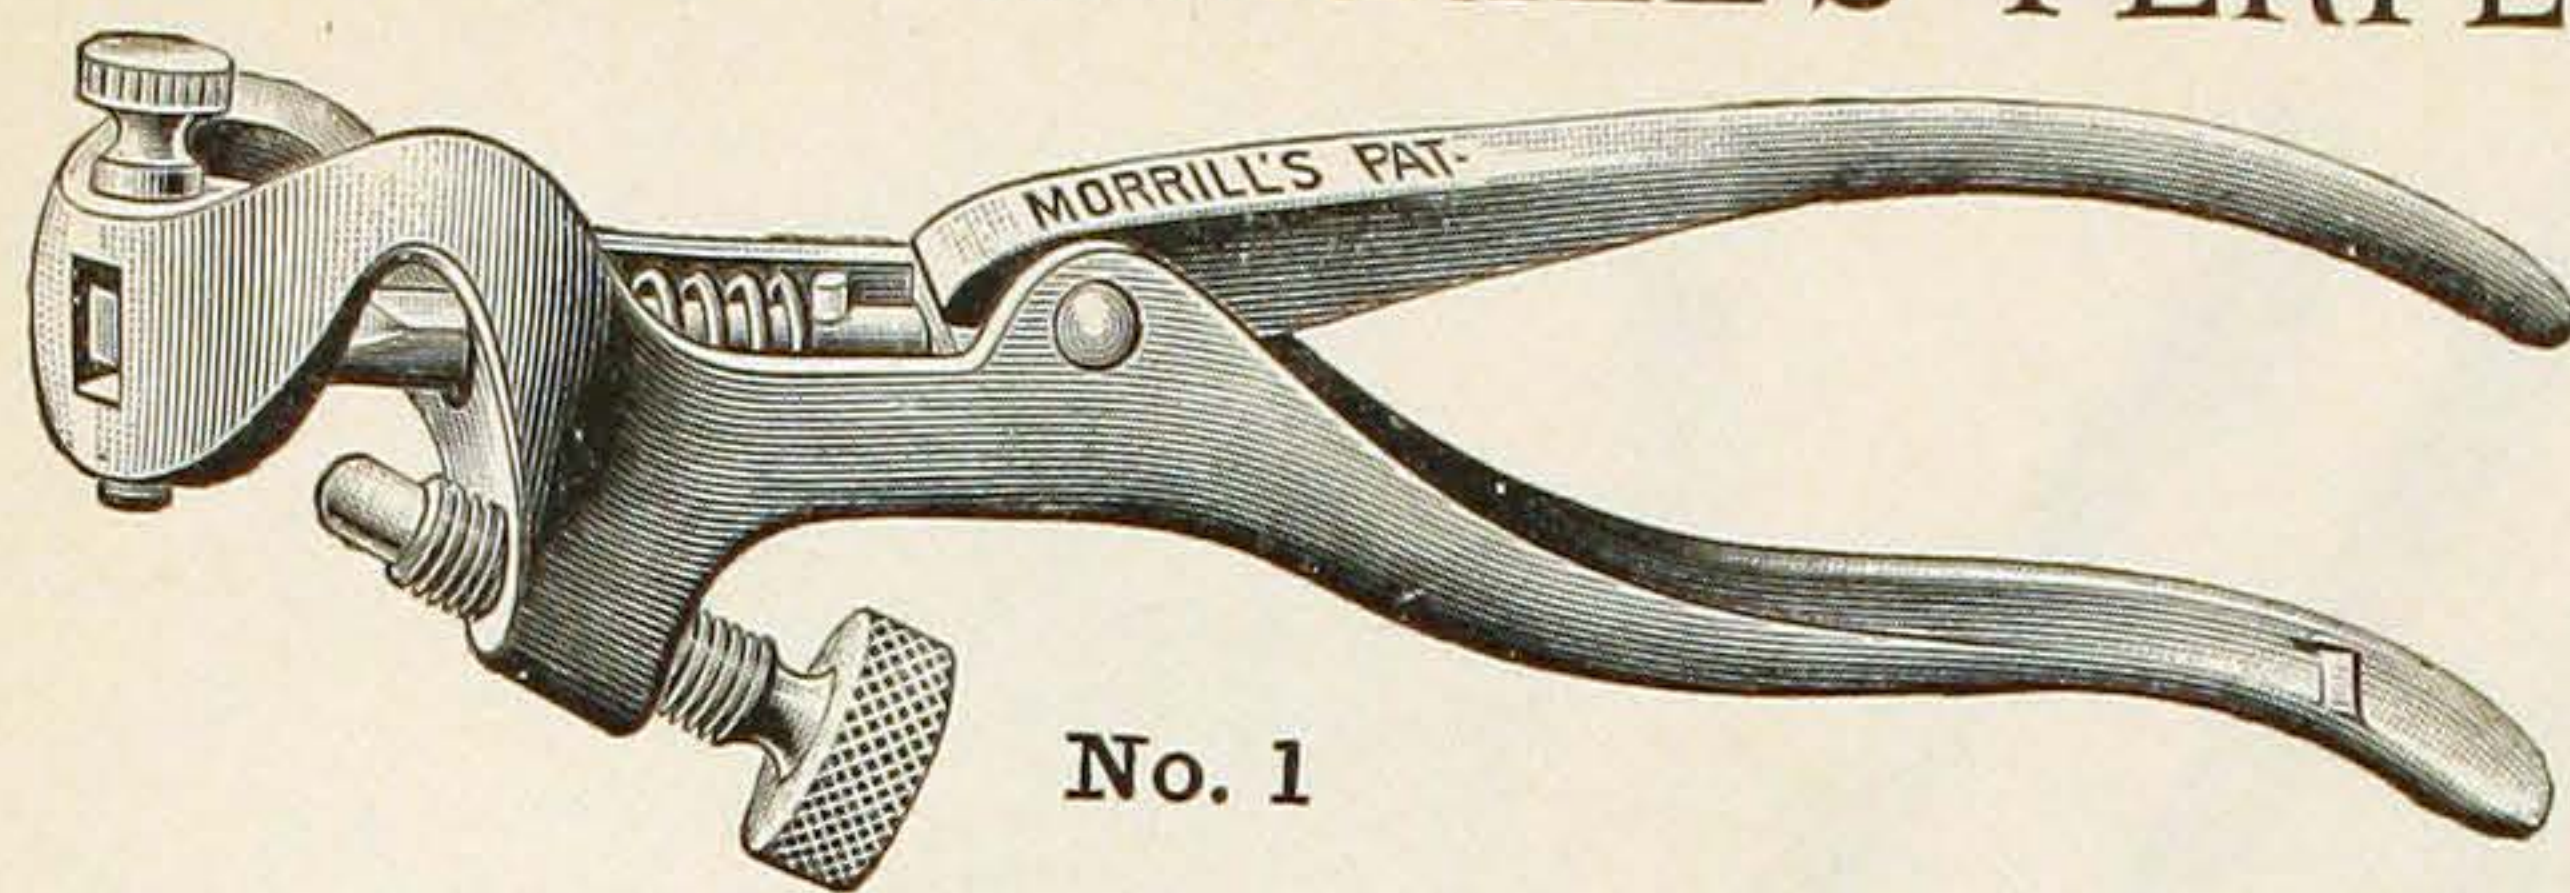

Take the set altogether, it is, in the words of a dealer of such goods, "a thing of beauty."

Per set,

\$5.00

Including Bits ($\frac{3}{8}$, $\frac{1}{2}$, $\frac{5}{8}$, $\frac{7}{8}$, and $1\frac{1}{4}$ in.) and a Slitting Tool.

No. 47 Nickel-plated Stock and Fence, each, \$4.00

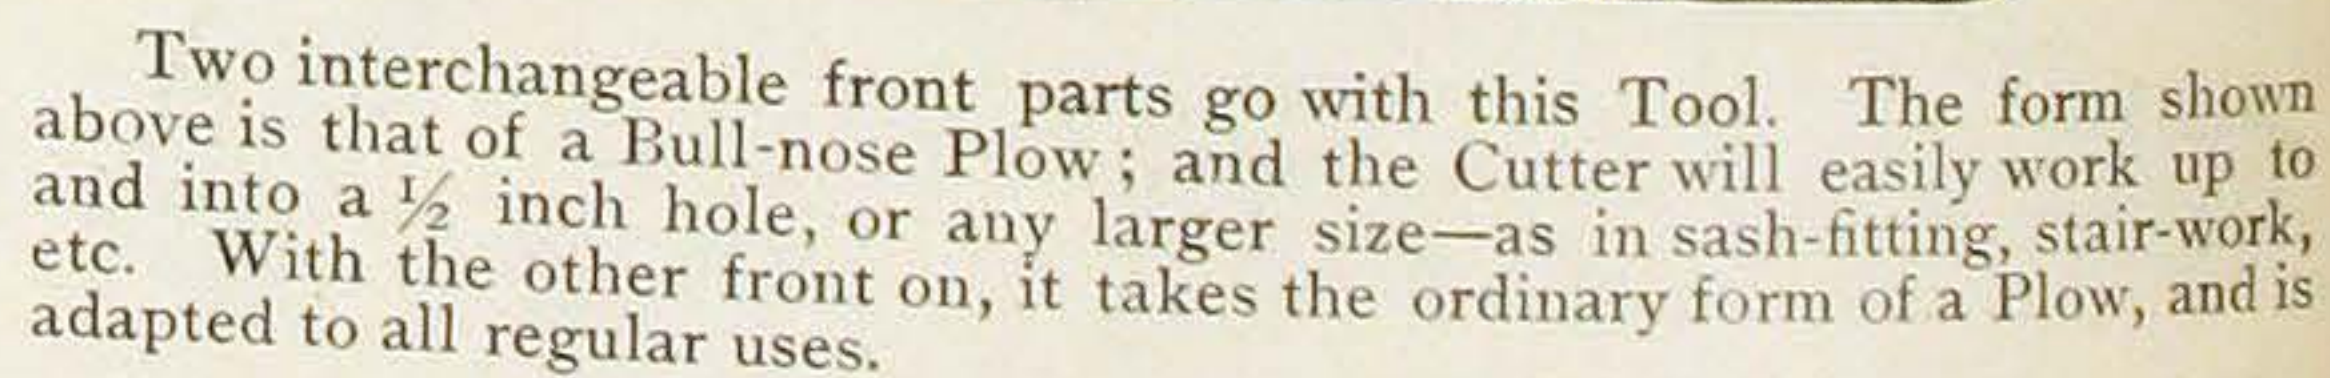

PATENT ADJUSTABLE BEADING PLANES

Including Bits ($\frac{1}{8}$, $\frac{3}{16}$, $\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$, and $\frac{1}{2}$ inch).

No. 50 Nickel-plated, Iron Stock and Fence, each, \$4.00

BULL-NOSE PLOW AND MATCHING PLANES

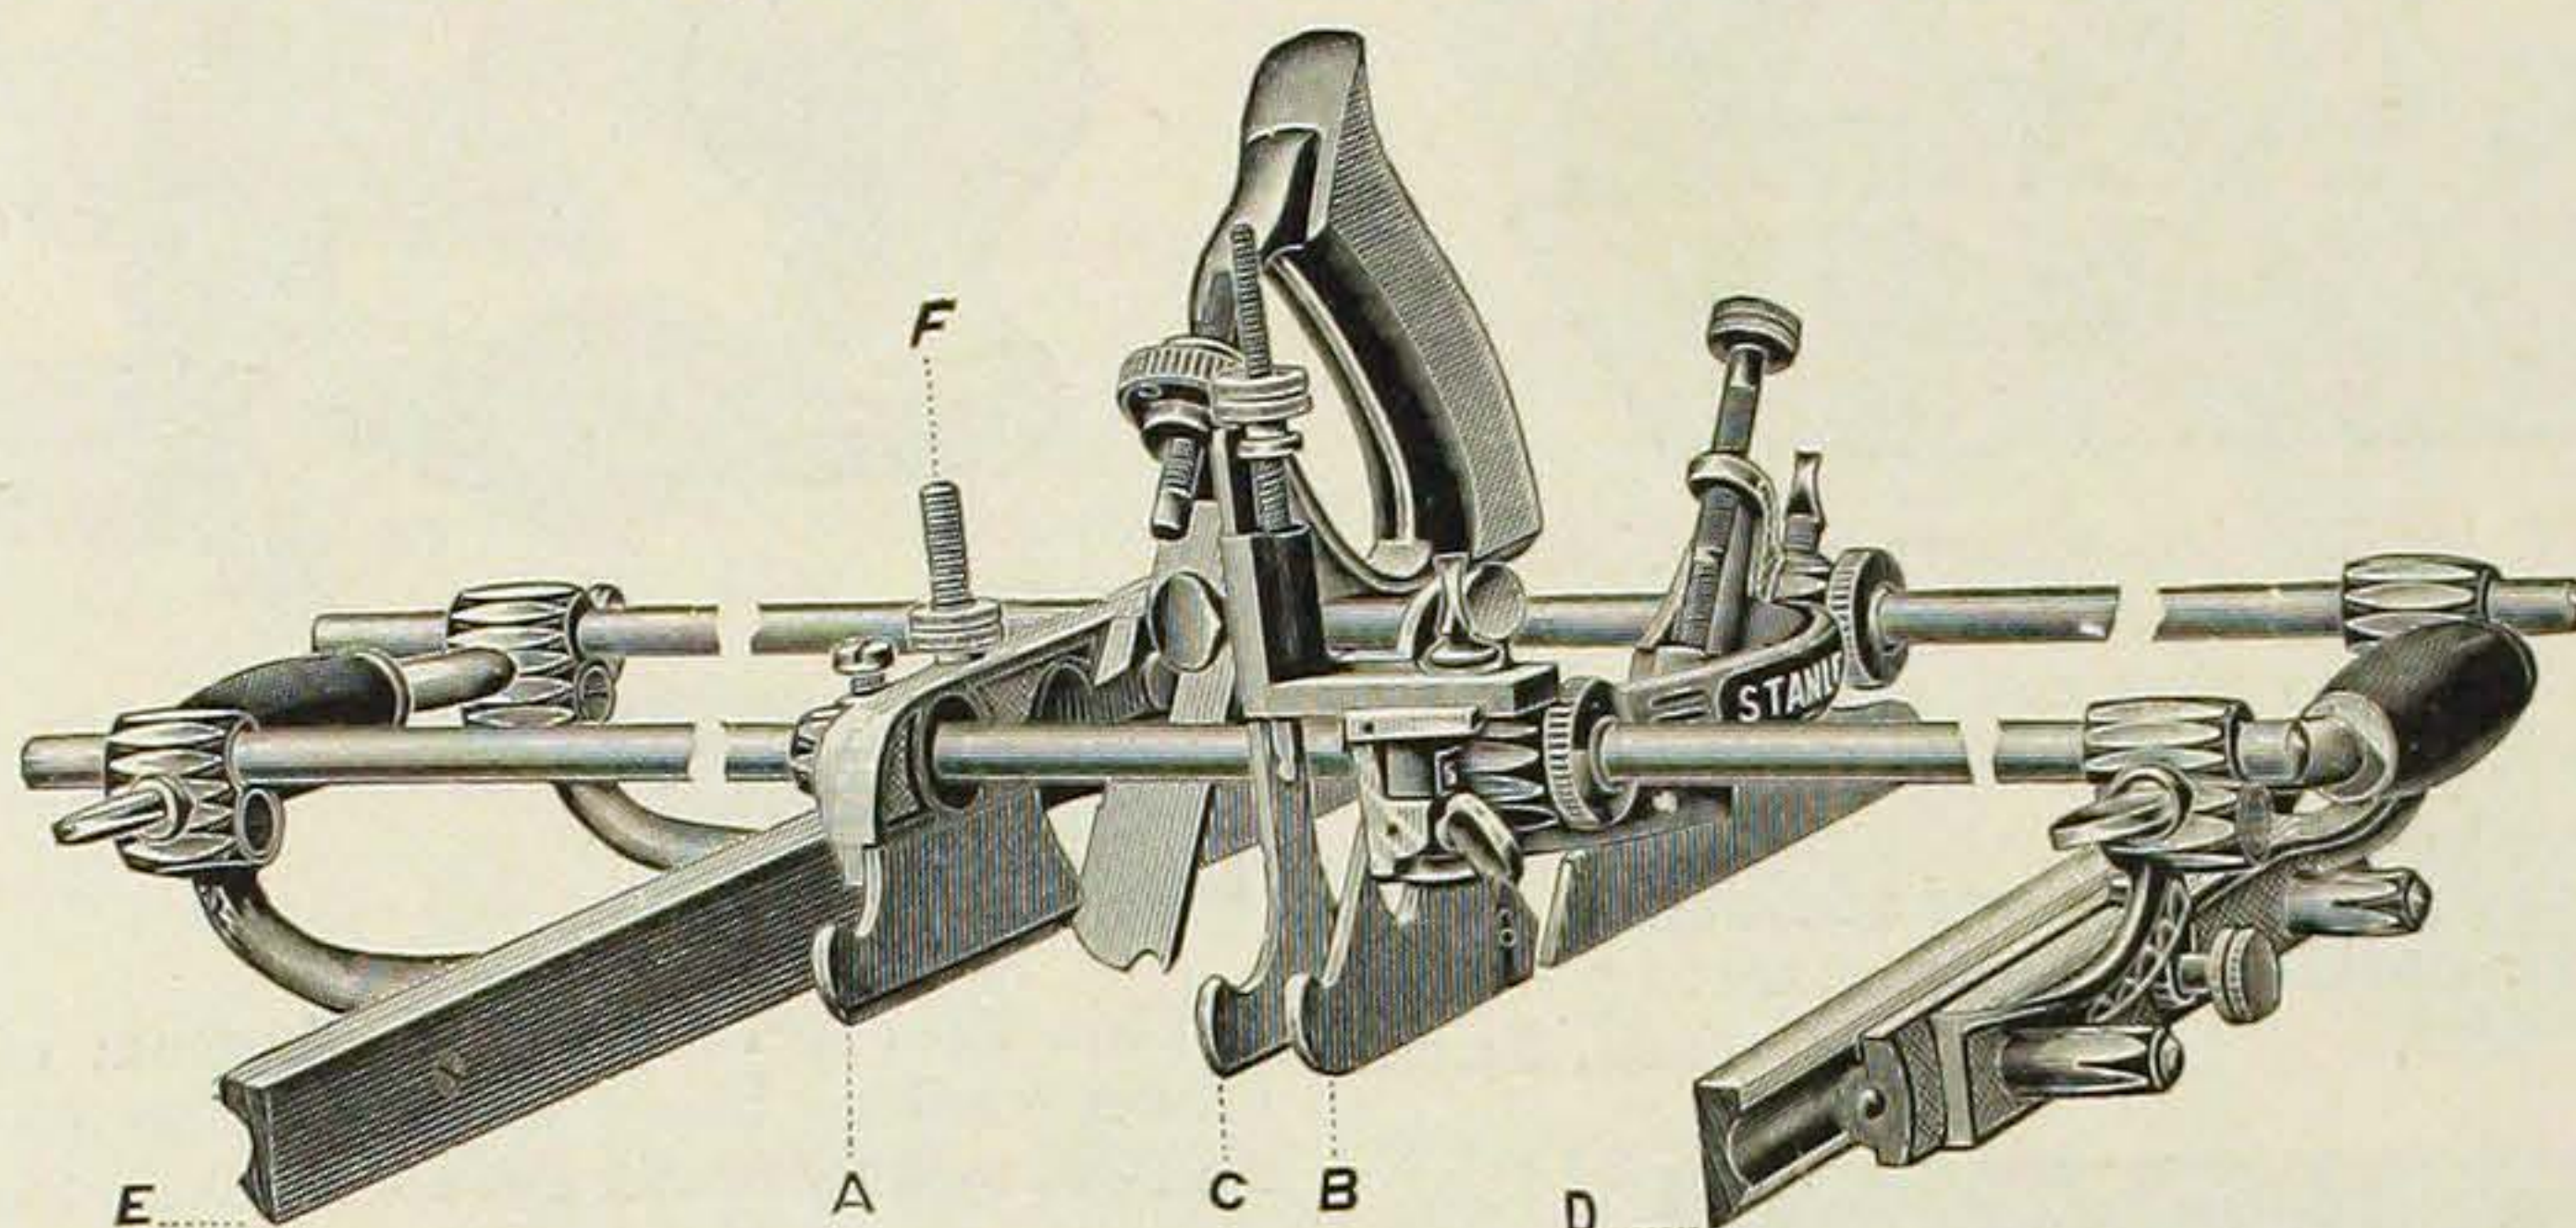

With each Tool, eight Plow Bits ($\frac{1}{8}$, $\frac{3}{16}$, $\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$, $\frac{1}{2}$, and $\frac{5}{8}$ inch), and a Slitting Blade are furnished; also a Tonguing Tool ($\frac{1}{4}$ inch).

No.		Each.
143	Nickel-plated, with Ten Tools, Bits, etc.,	\$5.00
141	“ “ “ “ “ and a Fillister,	7.00

STANLEY'S PATENT UNIVERSAL PLANE

A MATCH, SASH, BEADING, REEDING, FLUTING, HOLLOW, ROUND, PLOW, RABBET AND FILLISTER, MOULDING, DADO, SLITTING, AND CHAMFER PLANE

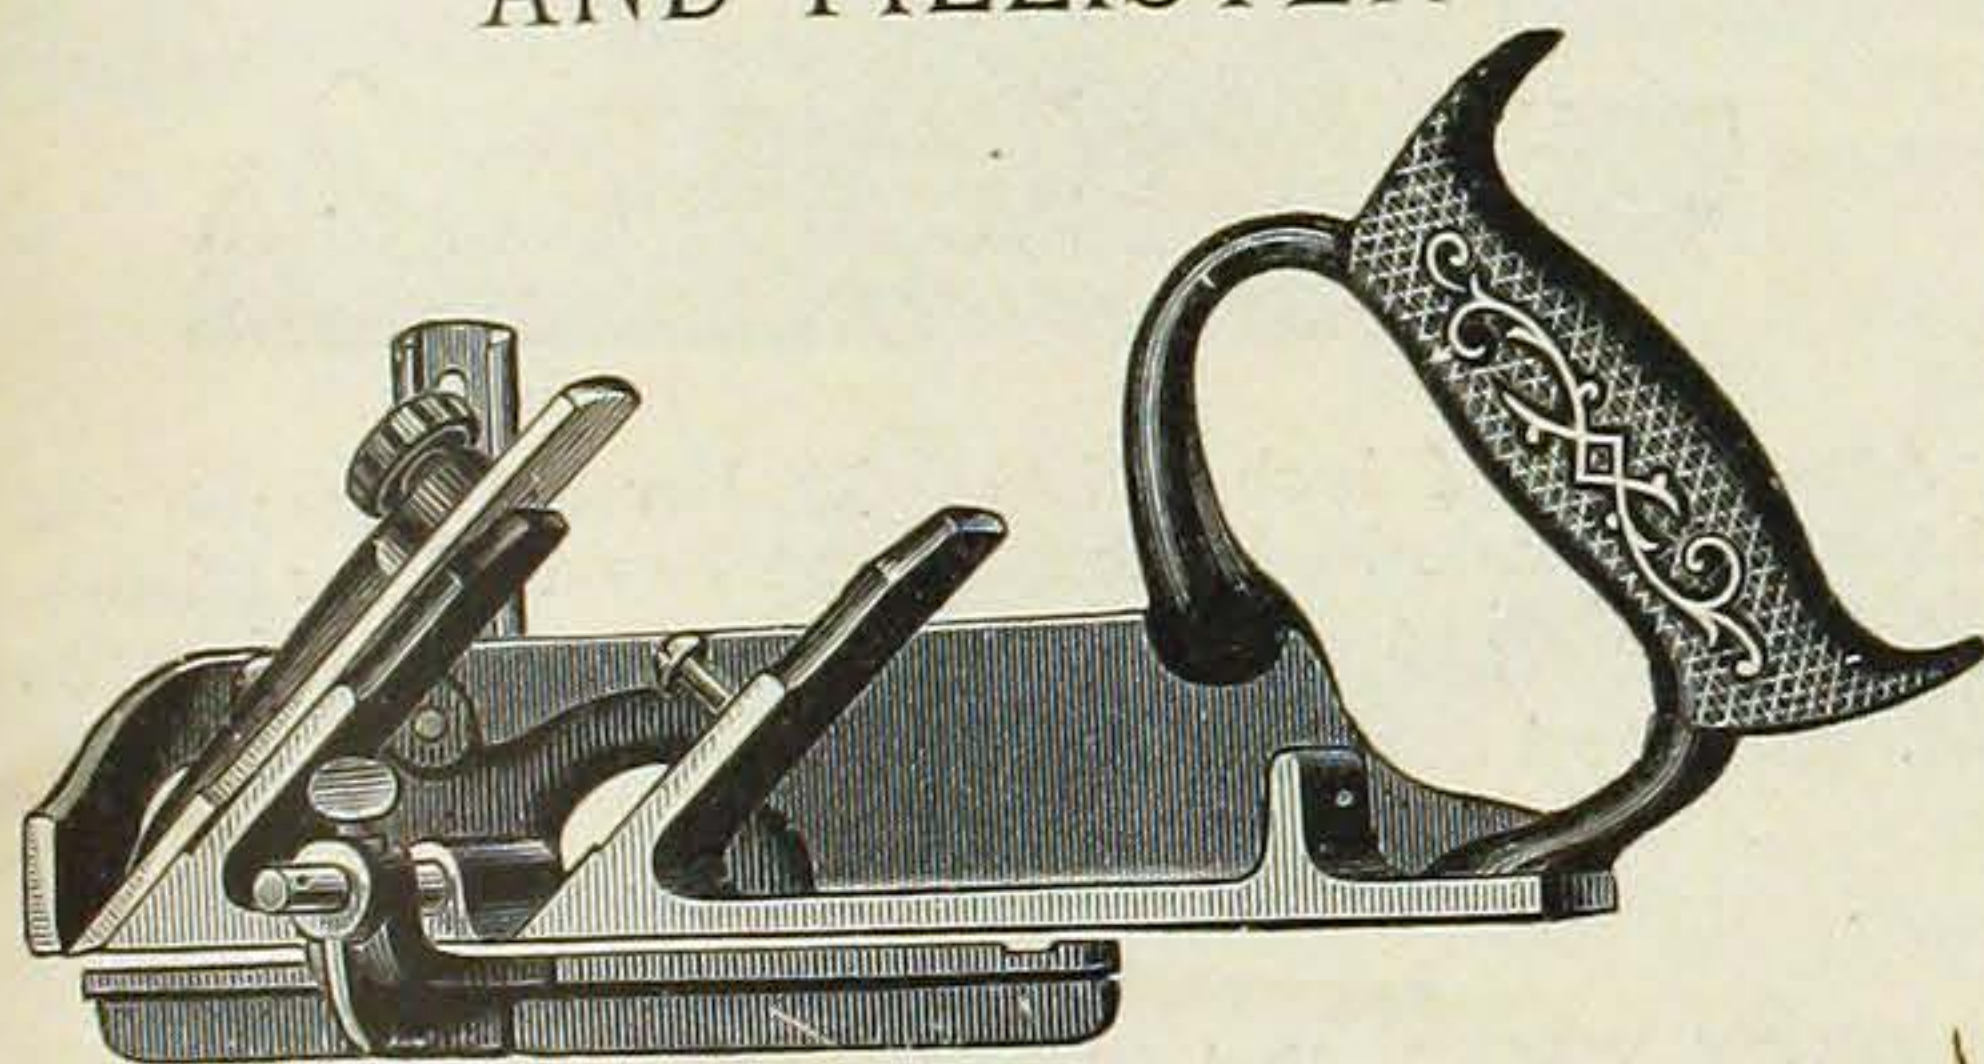

This Tool, in the hands of an ordinary carpenter, can be used for all lines of work covered by a full assortment of so-called Fancy Planes. A Main Stock (A) with transverse sliding arms; a depth gauge (F) adjusted by a screw; and a Slitting Cutter with stop. A Sliding Section (B) with a vertically adjustable bottom. The Auxiliary Center Bottom (C) is to be placed in front of the Cutter, as an extra support, or stop, when needed. Fence D has a lateral adjustment by means of a screw, for extra fine work. The Fences can be used on either side of the Plane, and the rosewood guides can be tilted to any desired angle, up to 45°, by loosening screws on face. Fence E can be reversed for Center Beading wide boards, when necessary.

No. 55 Stanley's Universal Plane, with 52 Tools, Bits, etc.,

each, \$16.00

The Plane is Nickel-plated; the 52 Cutters are arranged in four separate cases; and the entire outfit is packed in a neat wooden box. Catalogue of Extra Cutters for No. 55 Plane furnished on application.

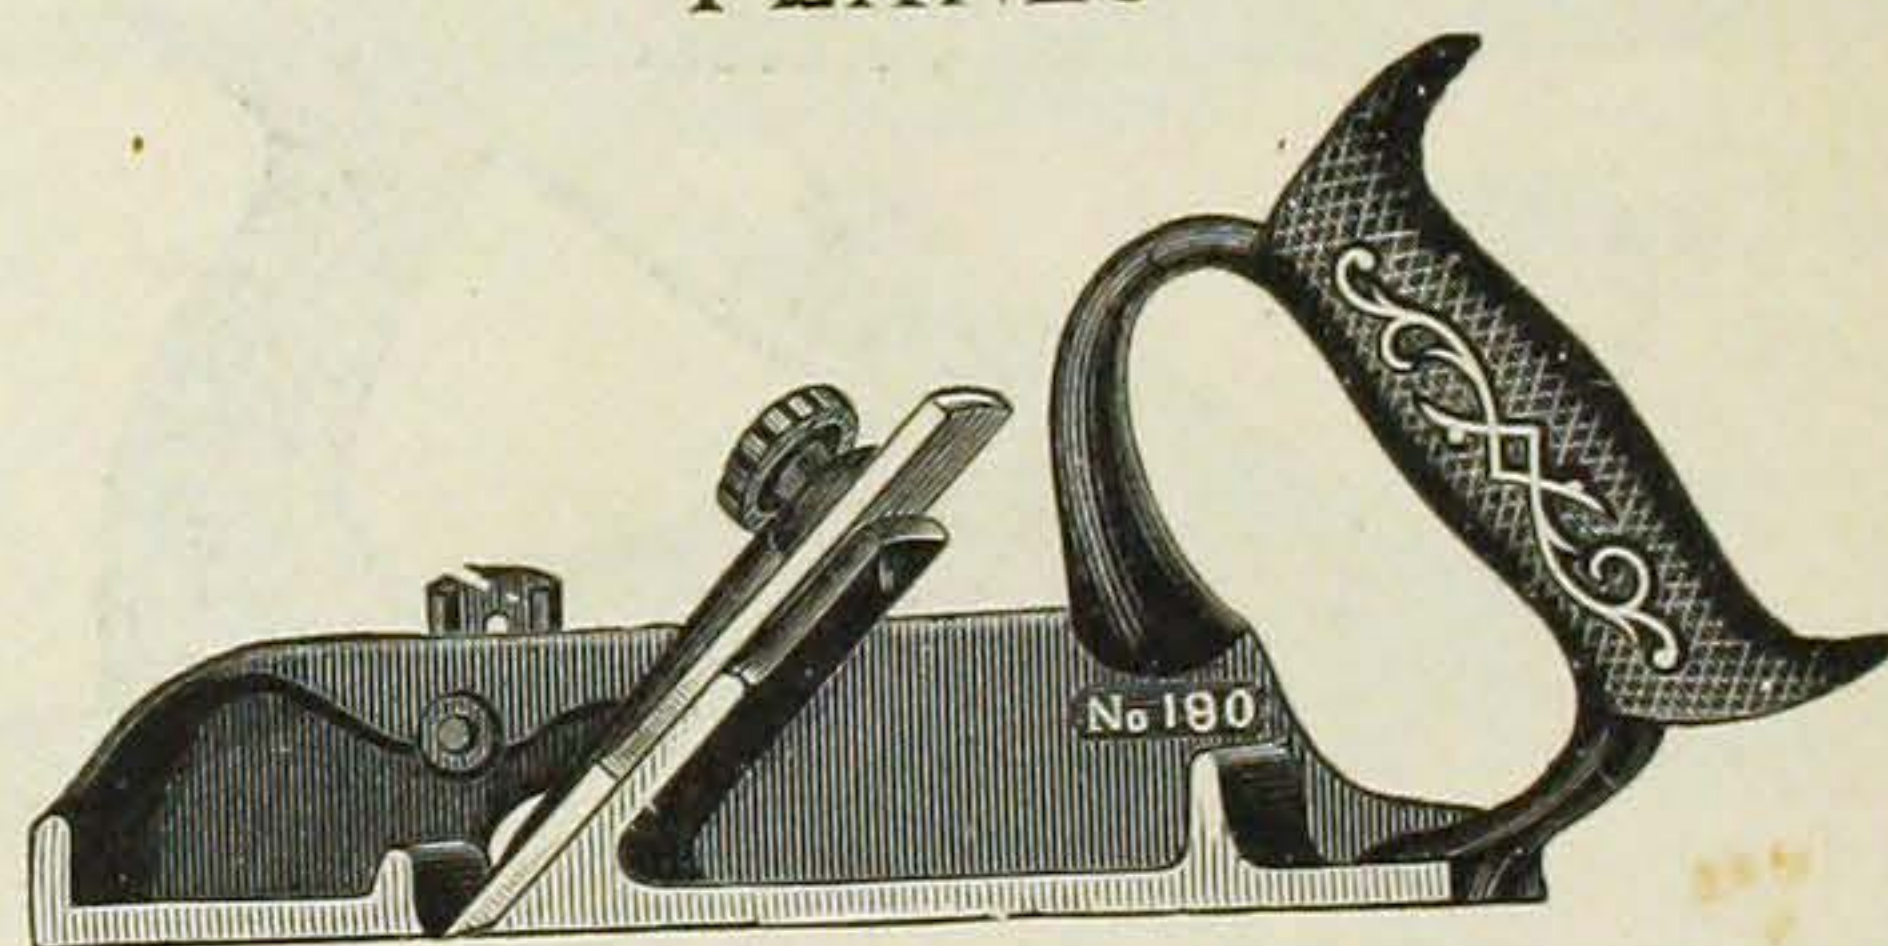

PATENT DUPLEX RABBET PLANE AND FILLISTER

The arm to which the fence is secured can be screwed into either side of the stock, thus making a superior right or left hand Fillister, with adjustable spur and depth gauge.

No. 78 Iron Stock and Fence, 8½ inches in Length, 1½ inch Cutter, each, \$1.50

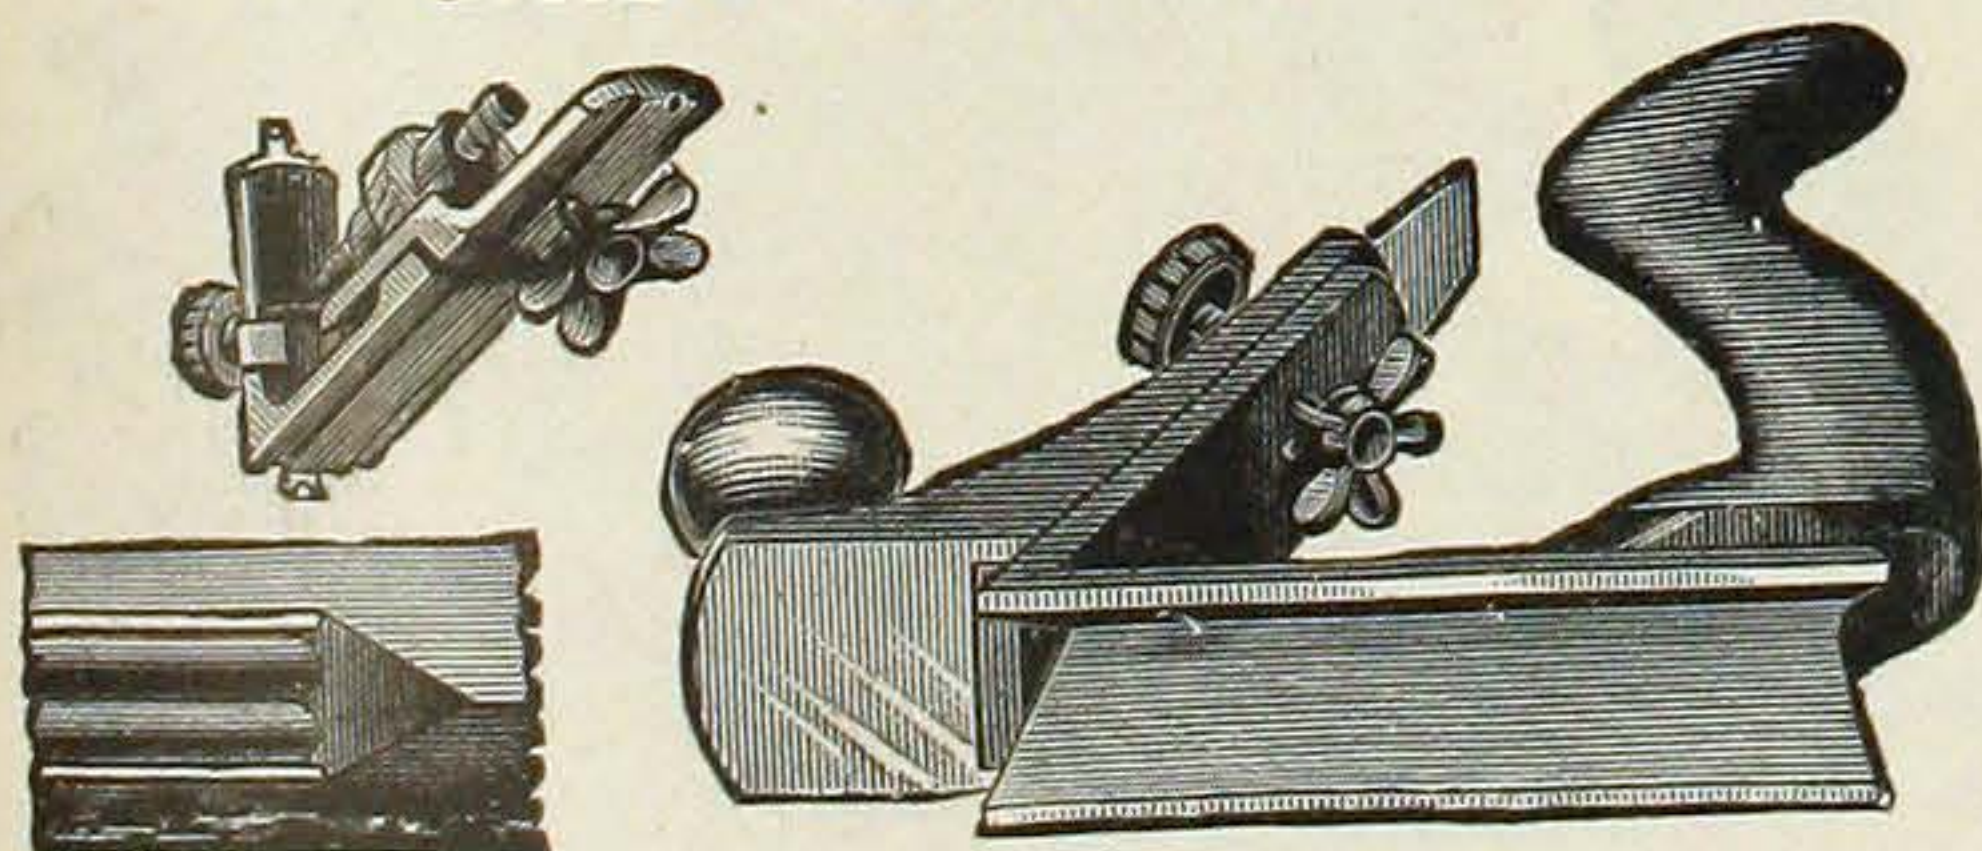

PATENT IMPROVED RABBET PLANES

This Plane will lie perfectly flat on either side, and can be used with right or left hand equally well, while planing into corners or up against perpendicular surfaces.

No.	Each.

STANLEY'S ADJUSTABLE CHAMFER PLANES

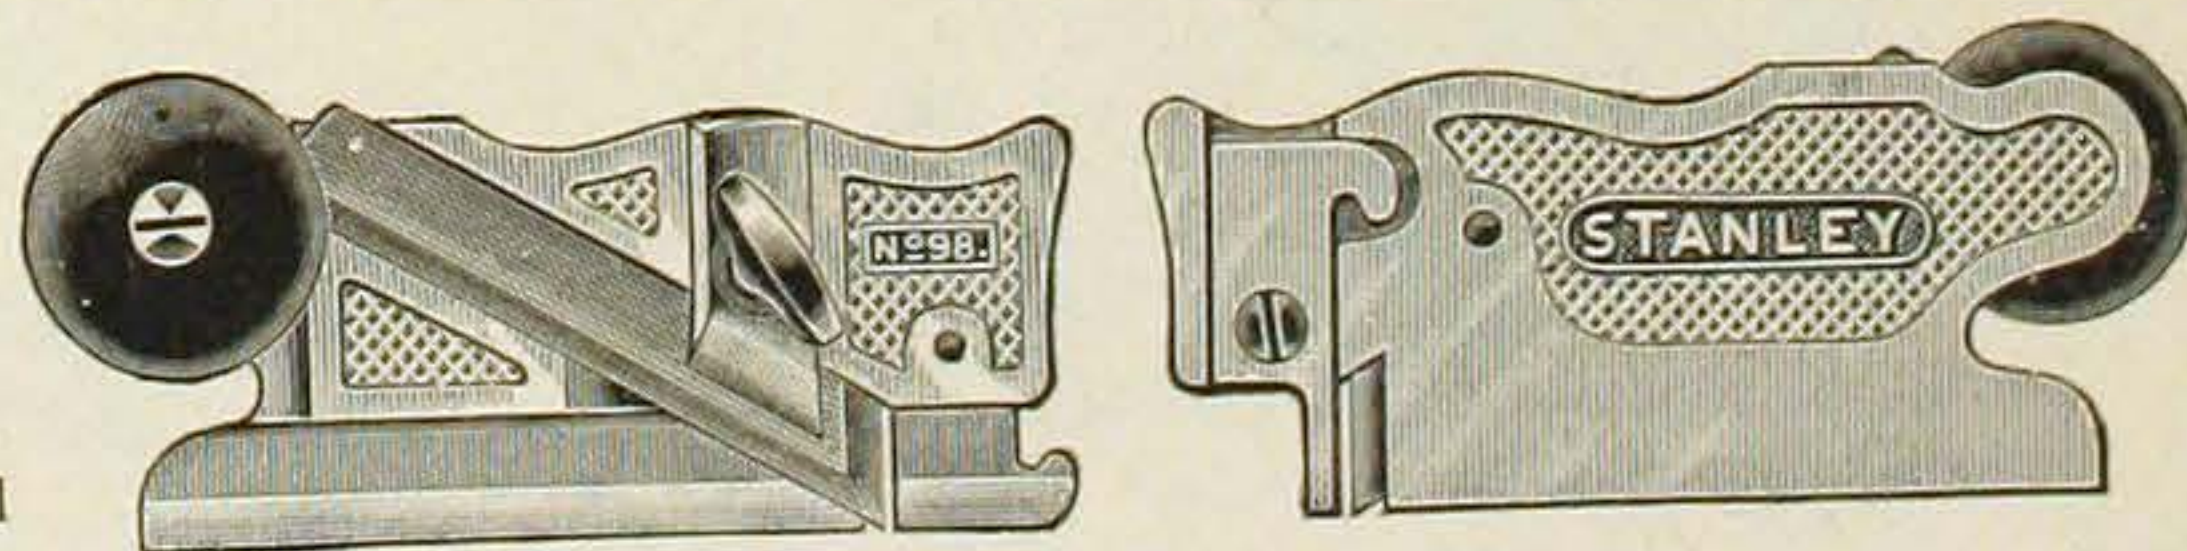

This Plane will do perfect chamfer, or stop chamfer work, of all ordinary widths.

For Beading, Reeding, or Moulding a chamfer an additional attachment is furnished (price \$1.00) with six Cutters, sharpened at both ends, including a large variety of ornamental forms.

No. 72 Chamfer Plane, 9 inches in Length, 1½ inch Cutter, each, \$2.00
No. 72½ Chamfer Plane, with Beading and Moulding Attachment, each, 3.00

STANLEY'S SIDE RABBET PLANES

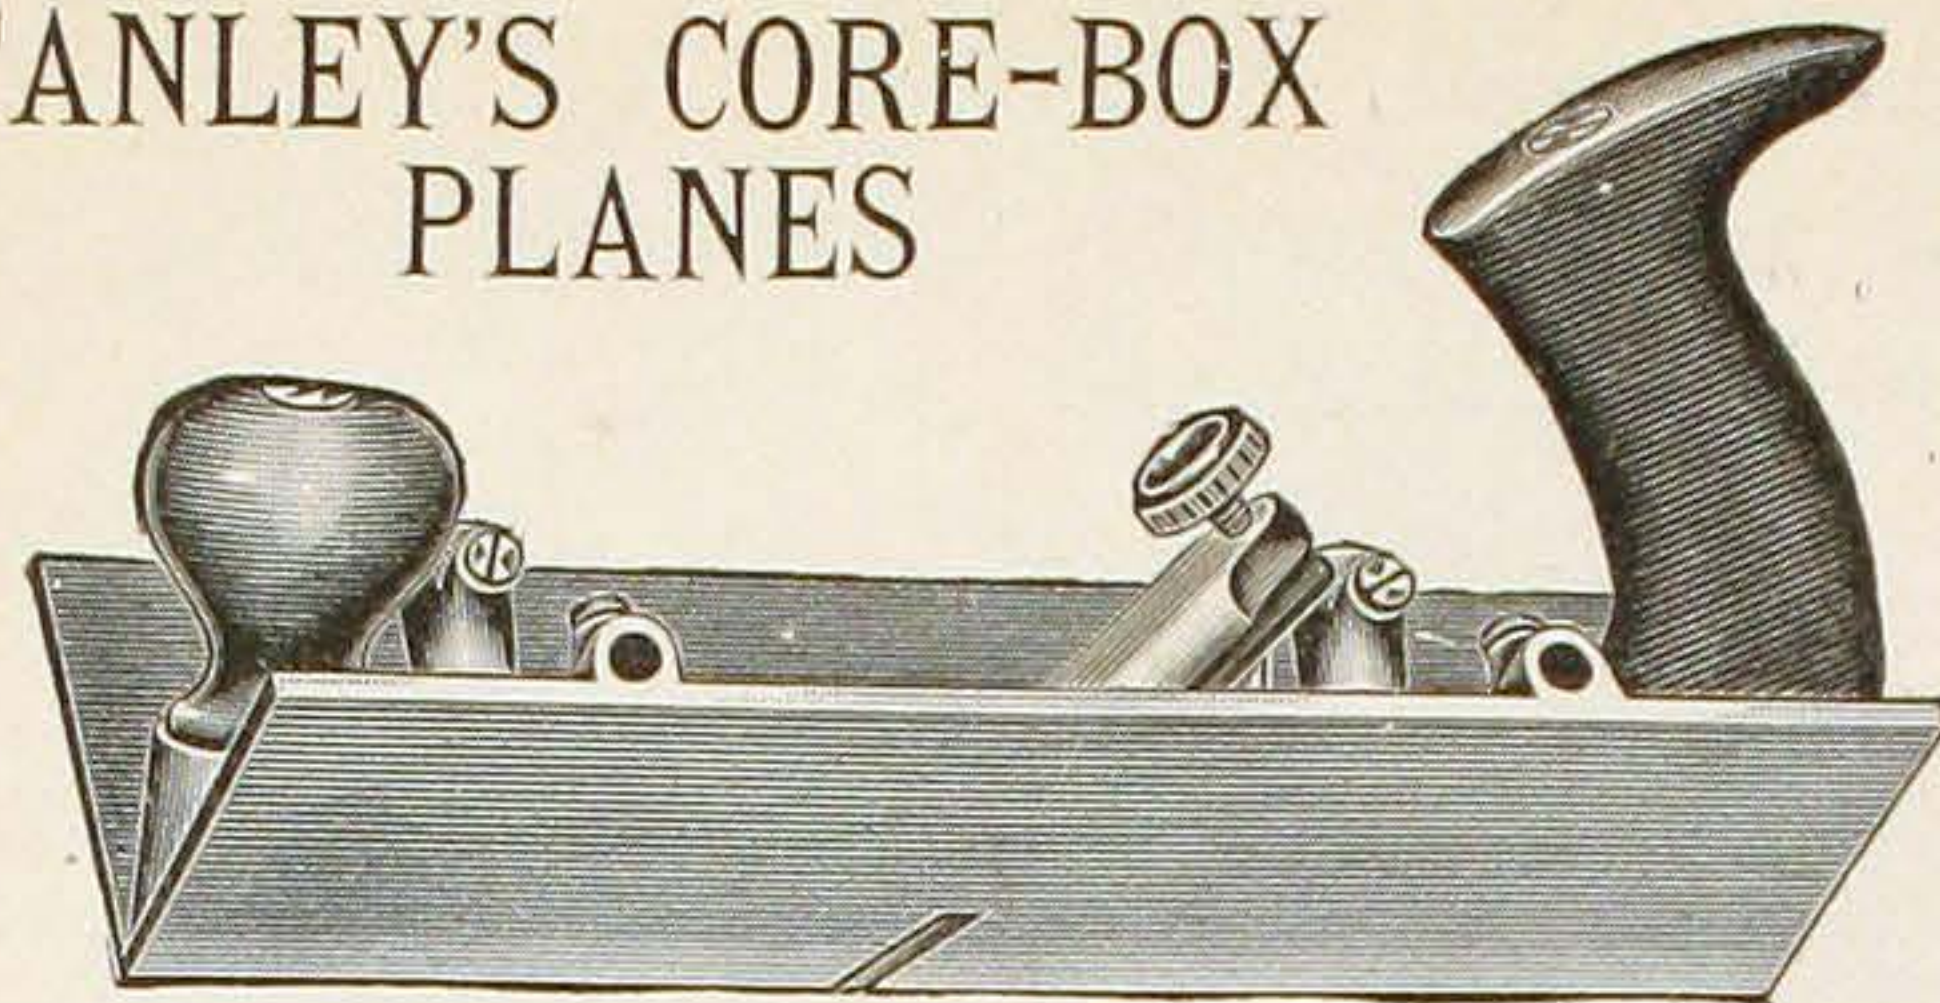

A convenient tool for side-rabbeting and trimming dados, mouldings, and grooves of all sorts. A reversible nose-piece will give the tool a form by which it will work close up into corners when required.

No.	Each.
98	Side Rabbet Plane, 4 inches, Right Hand, \$0.90
99	" " " 4 " Left " .90

STANLEY'S CORE-BOX PLANES

A Tool much needed by Pattern-Makers, Wheelwrights, and others, for planing out semi-circles.

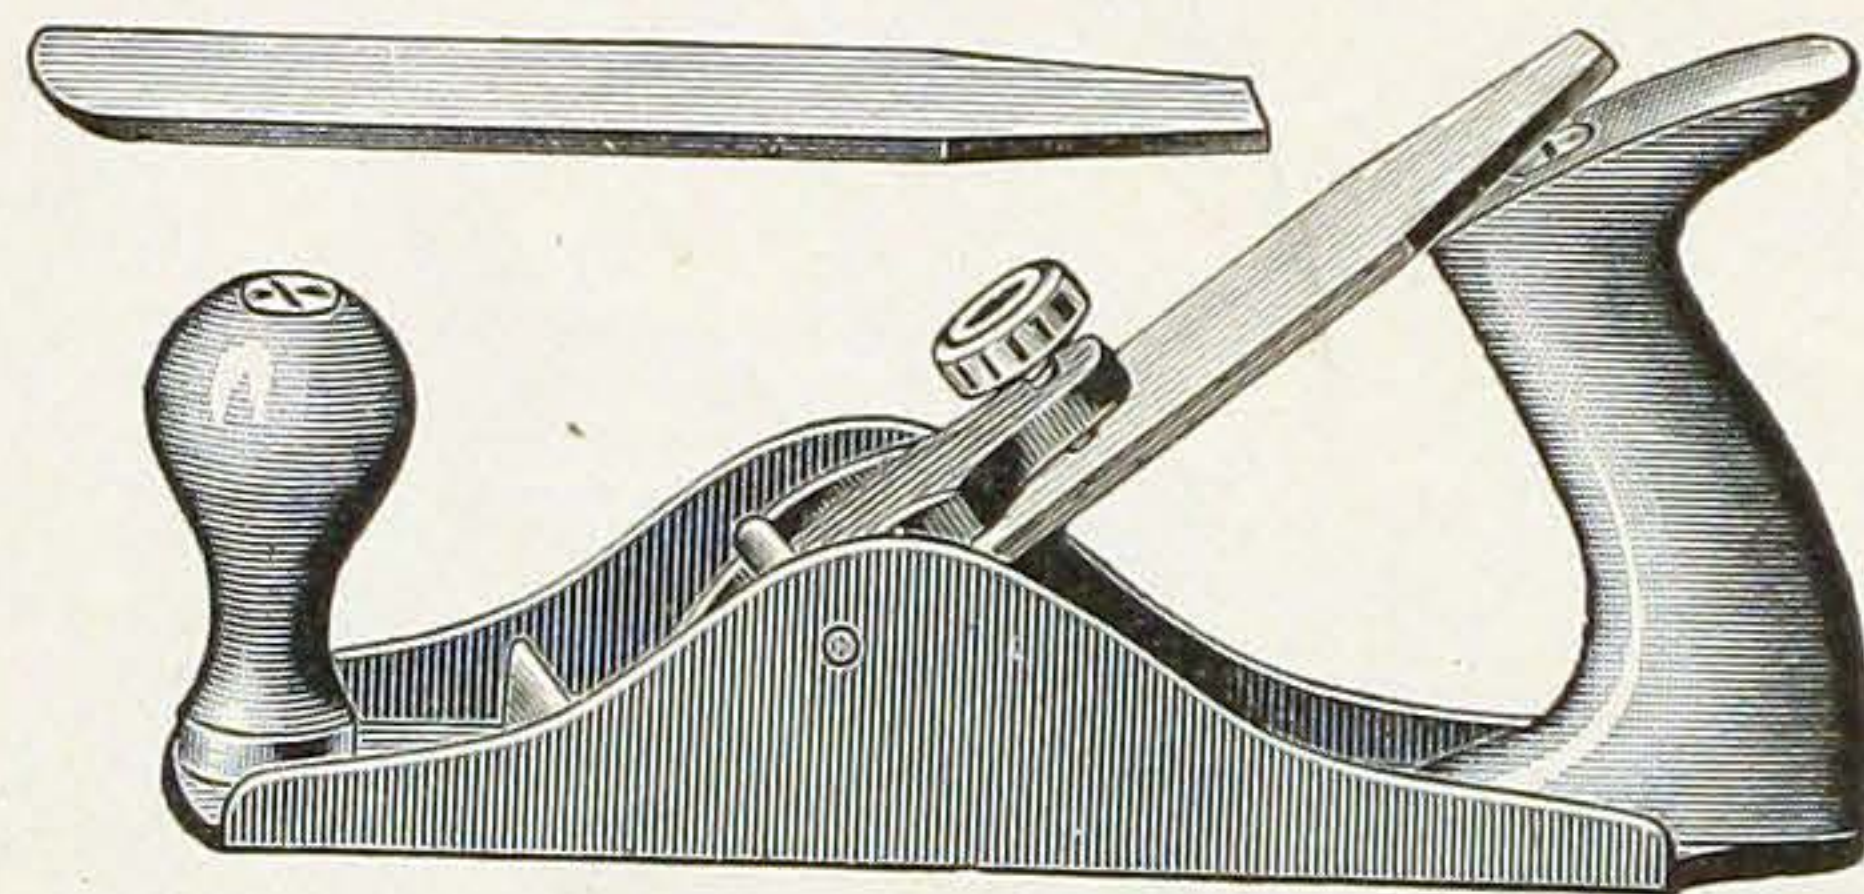

This Plane is constructed so that the sides can be extended by additional sections, $2\frac{1}{2}$ inches wide, until a diameter of 10 inches can be worked, if desired.

No. 57 Core-Box Plane (with one pair of additional sections), for working semi-circles, up to 5 inches diameter, each, \$4.00

For extra additional Sections, for working larger diameters. Per pair, \$1.00

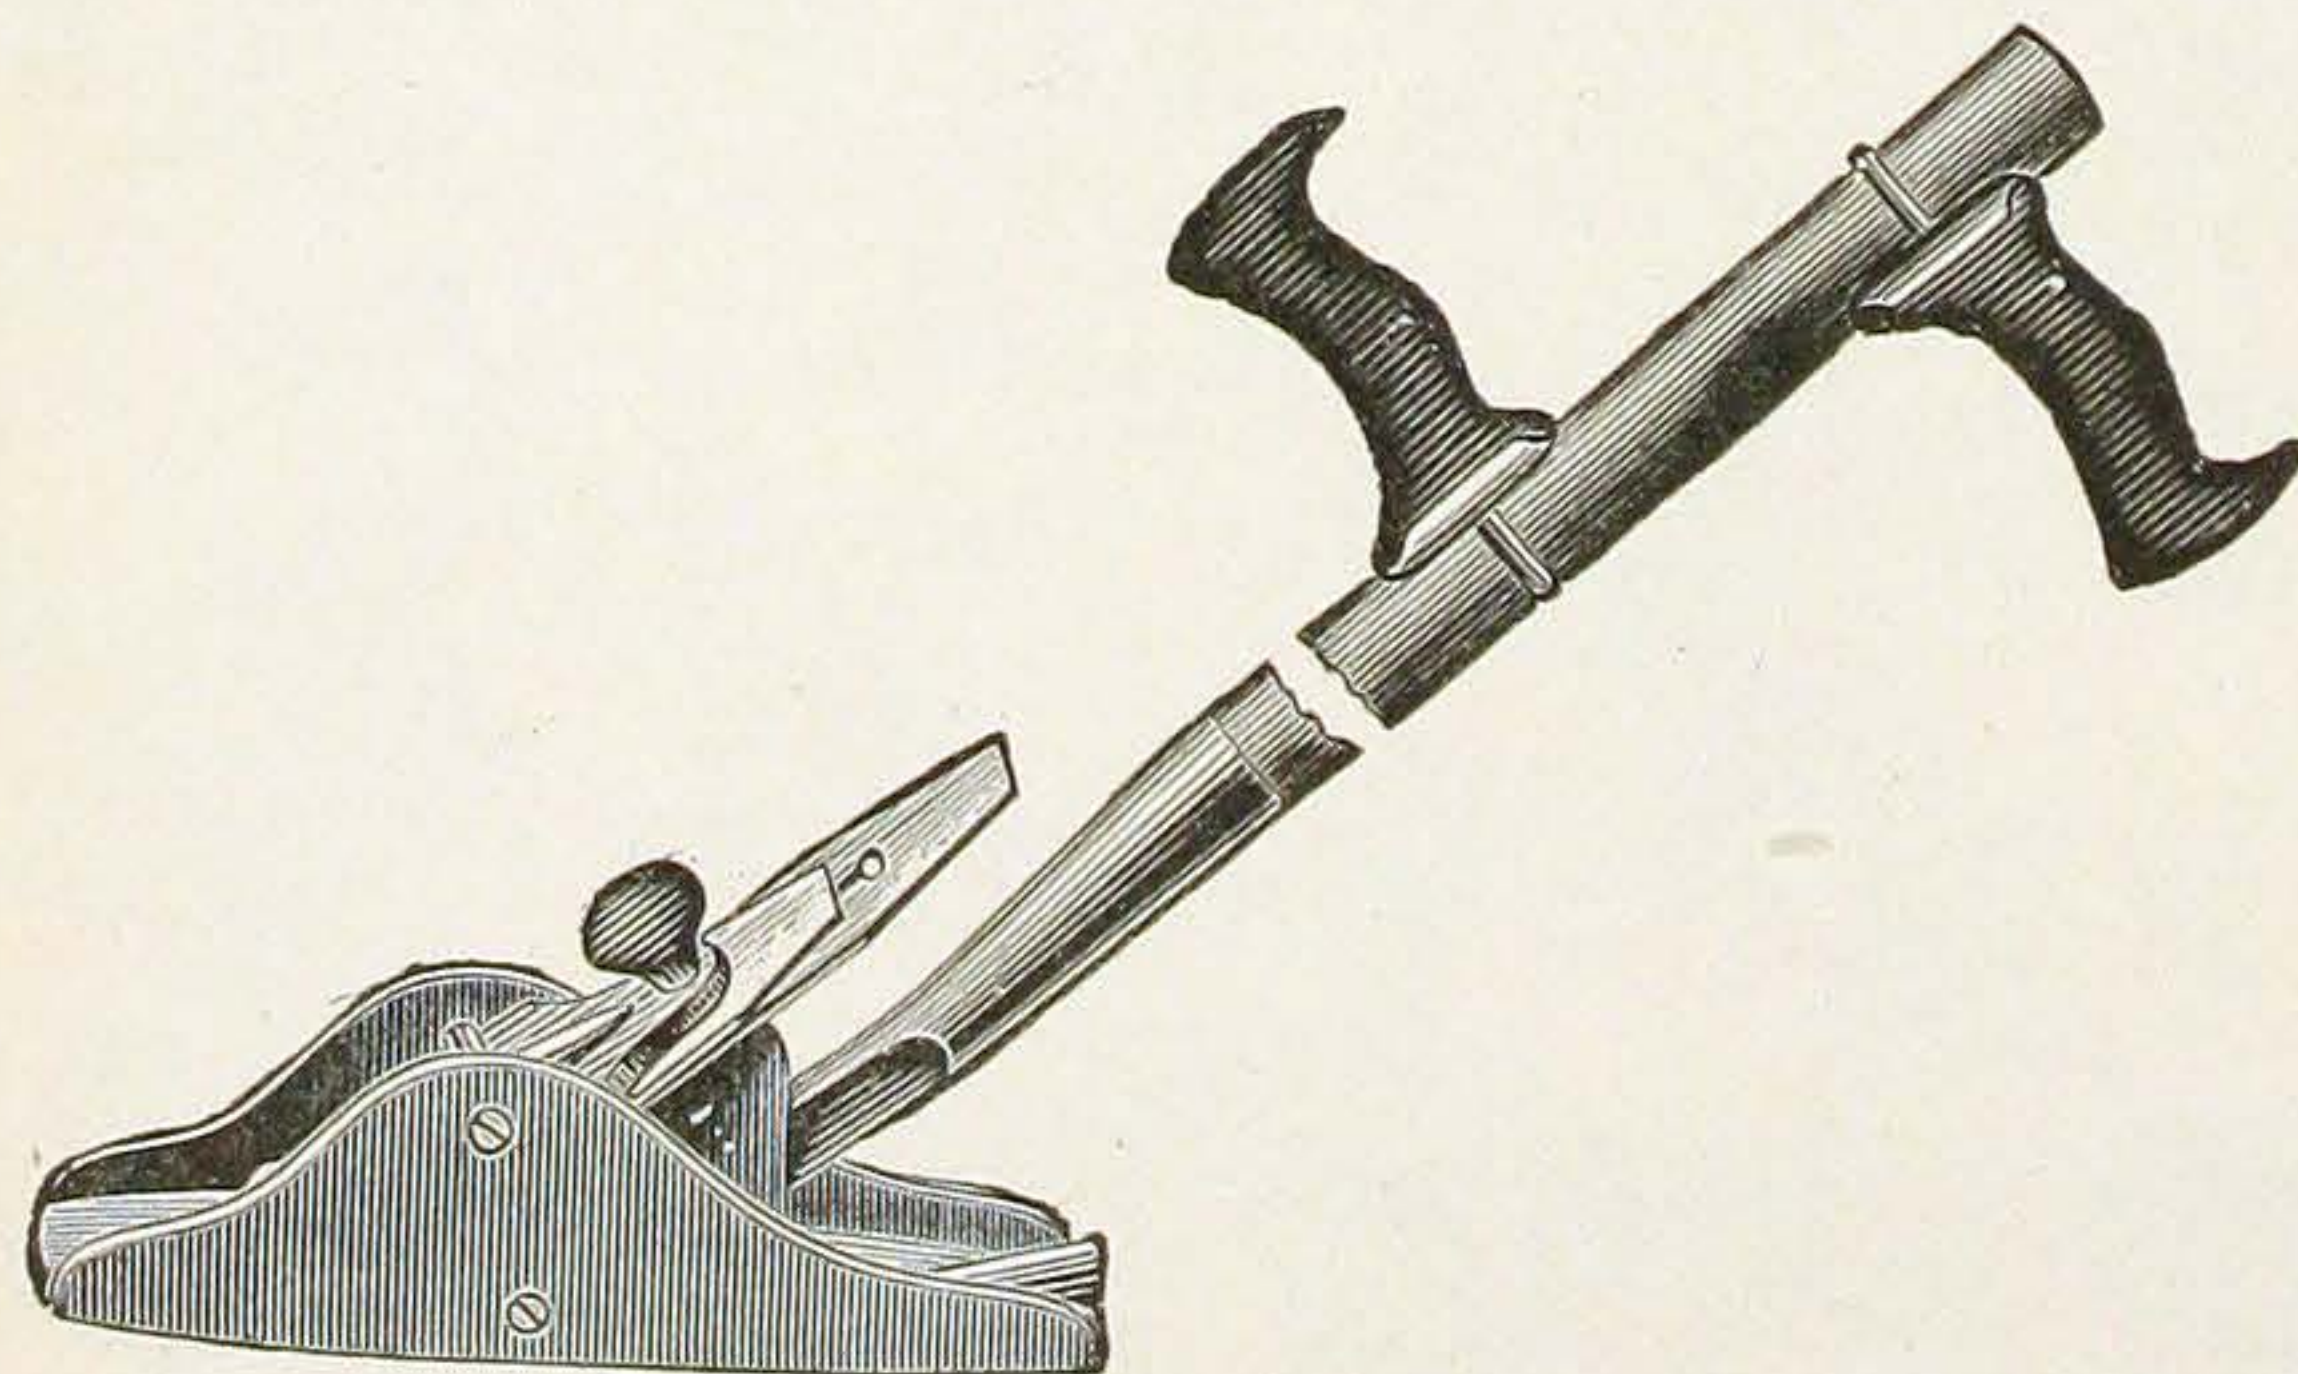

STANLEY'S IMPROVED SCRUB PLANES

This Tool has a single Iron, with the cutting edge rounded; and is particularly adapted for roughing down work before using a Jack or other Plane.

No. 40 Iron Stock, $9\frac{1}{2}$ inches in Length, $1\frac{3}{4}$ inch Cutter, each, \$1.00

STANLEY'S FLOOR PLANES

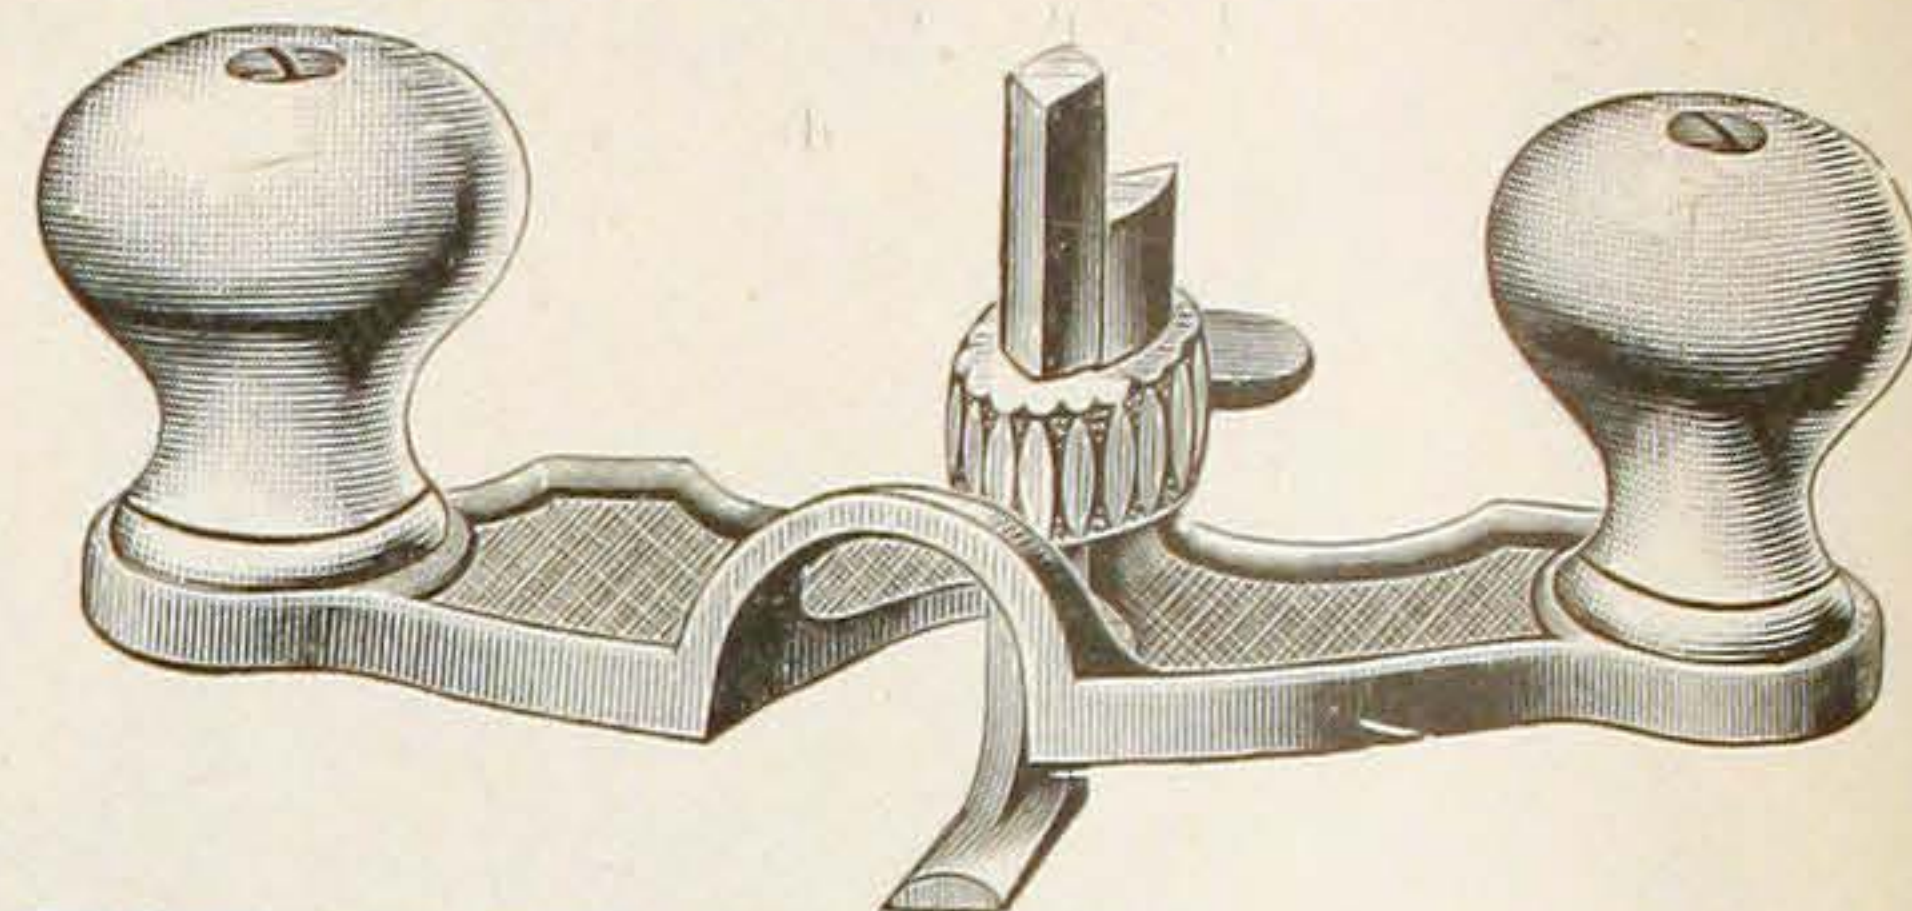

This Tool will be found useful for planing Floors, Bowling Alleys, Skating Rinks, Decks of Vessels, etc. The construction of the Plane will enable the owner to do more work, and with less outlay of strength, than can be done with any other tool.

The weight of the Plane is about 10 pounds, and the full length of the handle, 45 inches.

No. 74 Floor Plane, $10\frac{1}{2}$ inches in Length, $2\frac{5}{8}$ inch Cutter, each, \$4.50

WOODWORKERS' HANDY ROUTER PLANES

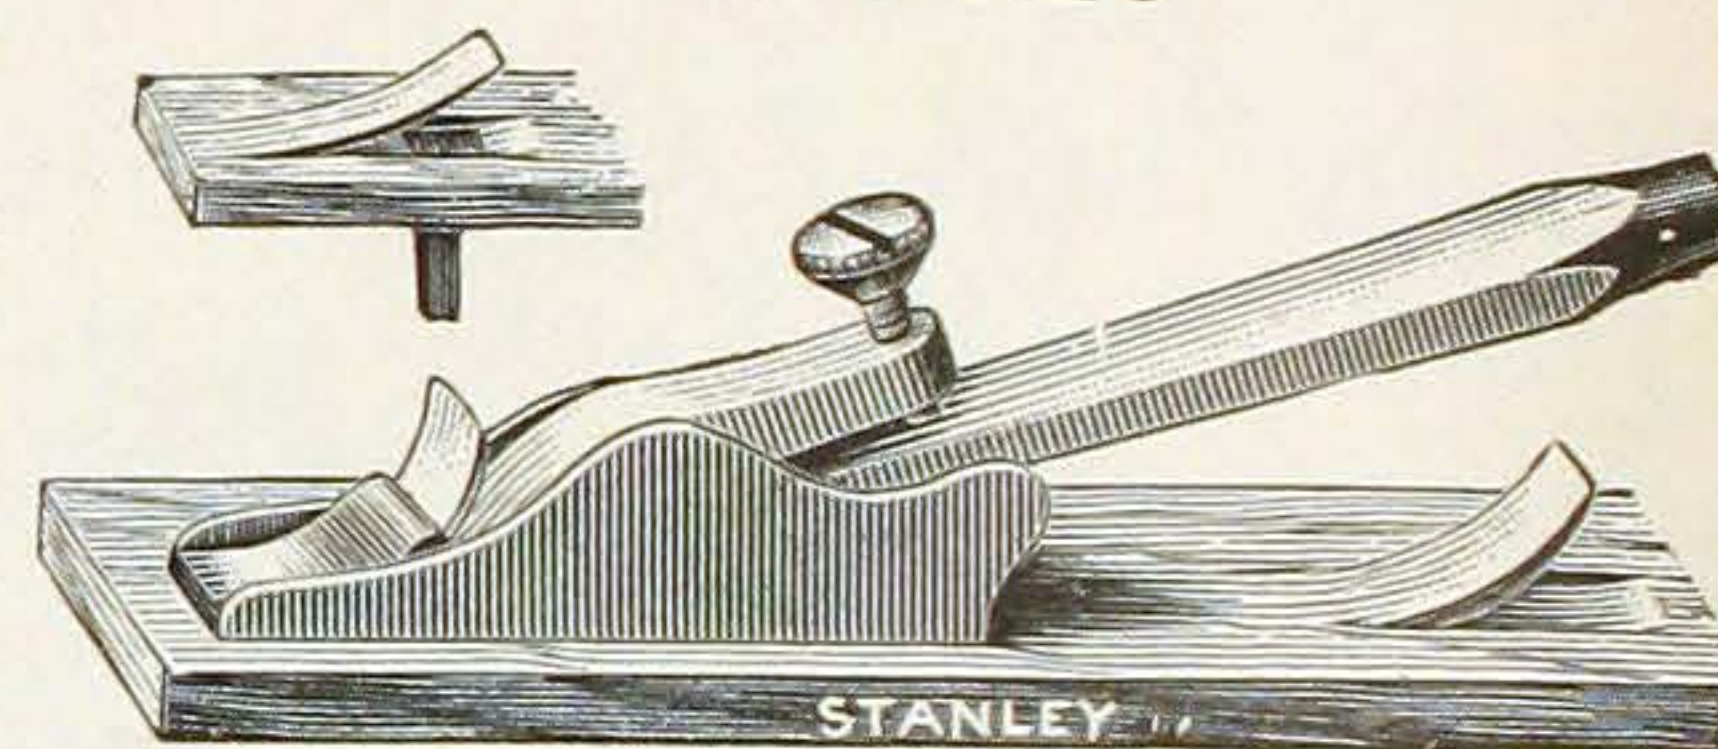

This Tool will smooth the bottom of grooves, panels, or all depressions below the general surface of any woodwork; and will rapidly router out mortises for Sash-frame Pulleys, etc.

No. 71 Nickel-plated, with Steel Bits ($\frac{1}{4}$ and $\frac{1}{2}$ inch), each, \$1.50

No. 71½ Nickel-plated, Closed Throat, with Steel Bits ($\frac{1}{4}$ and $\frac{1}{2}$ inch), 1.25

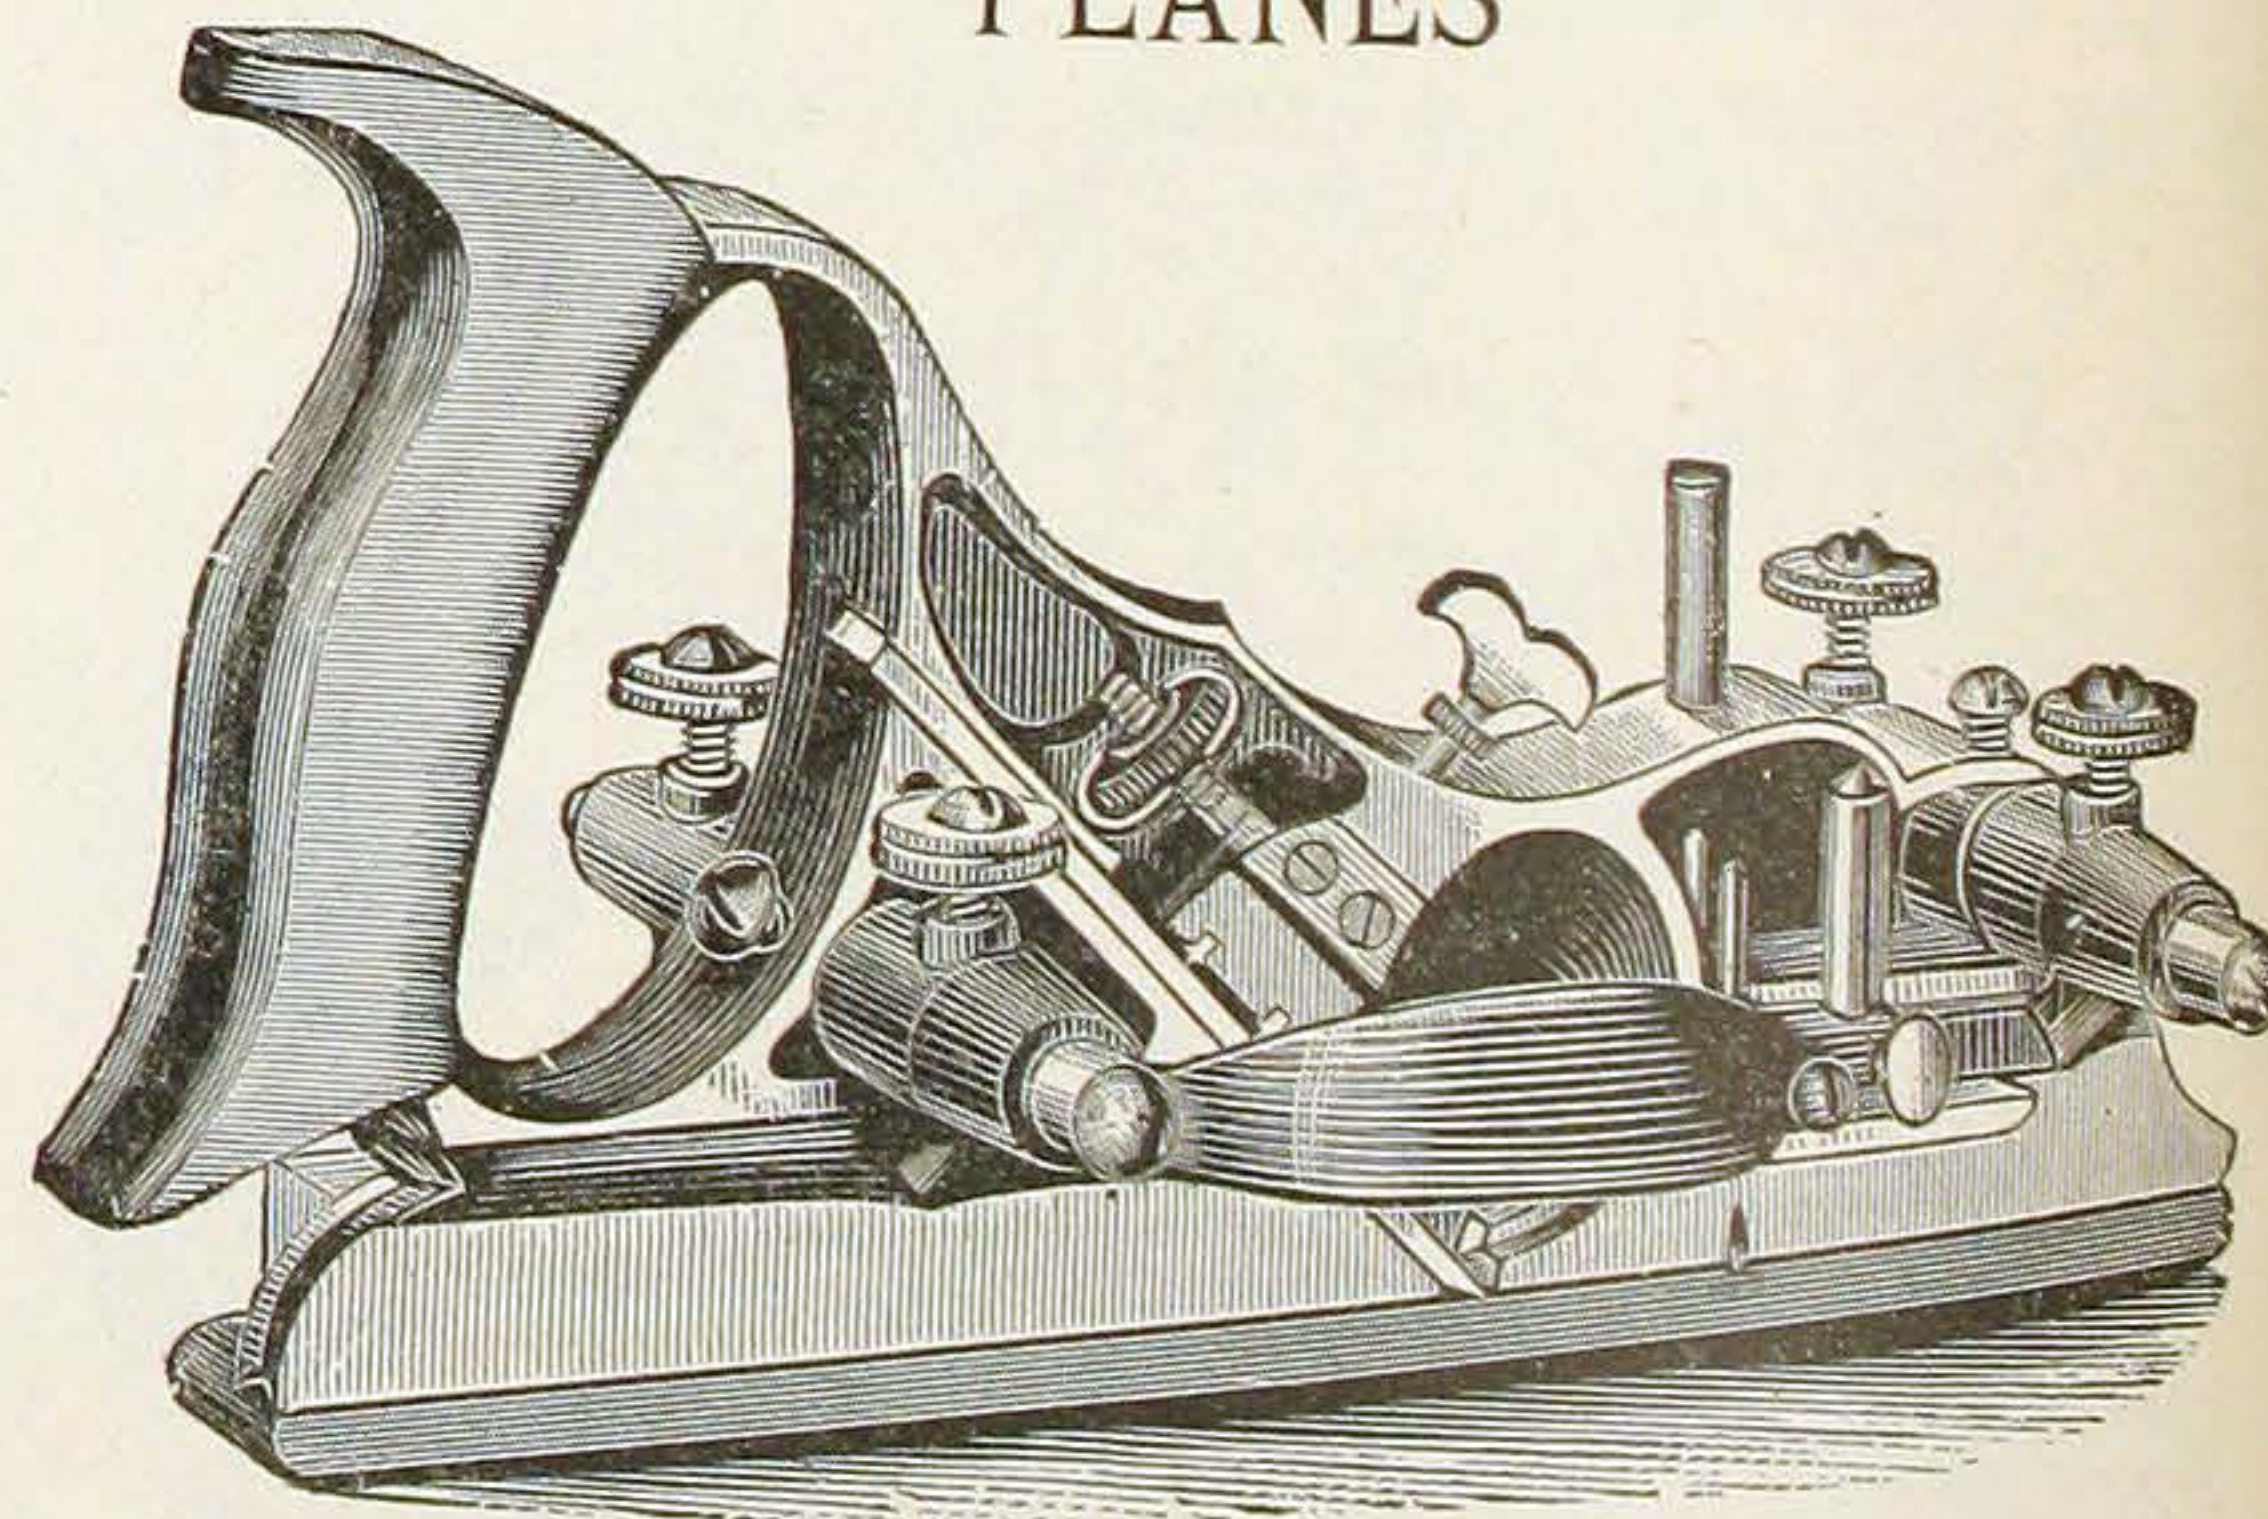

STANLEY'S ADJUSTABLE CHISEL GAUGES

Attach to a $\frac{1}{4}$ inch Chisel (with beveled edge up) and a shaving of any desired thickness can be raised, for blind-nailing or for inlaying wood strips in ornamental surface work.

No. 96 Steel Stock, per dozen, \$2.40
Half dozen in a box.

SIEGLEY'S PATENT ADJUSTABLE PLANES

This Tool is a combination of a common Carpenter's Plow, Dado, Side, and Center Bead Plane.

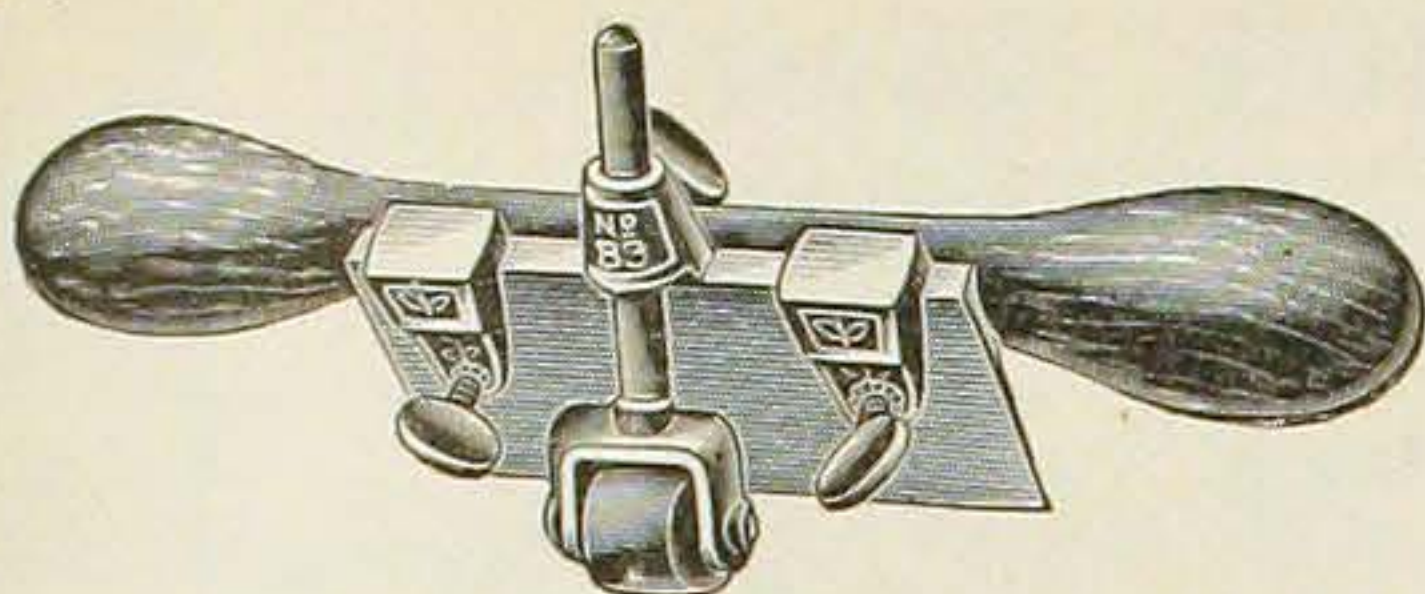

Nickel-plated, and including the following sizes Bits: $\frac{3}{16}$, $\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$, $\frac{1}{2}$, $\frac{5}{8}$, $\frac{3}{4}$, $\frac{7}{8}$ Match Bits.

Also including the following sizes Bead Plane Bits: $\frac{3}{16}$, $\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$, $\frac{1}{2}$, each, \$8.00

Single Bits, 25 cents each. Cluster Bead Bits, 2 Cluster, 30 cents; 3 Cluster, 35 cents; 4 Cluster, 40 cents; Sash Moulding Cutter, working from $1\frac{1}{4}$ to $1\frac{1}{2}$ inches, 50 cents.

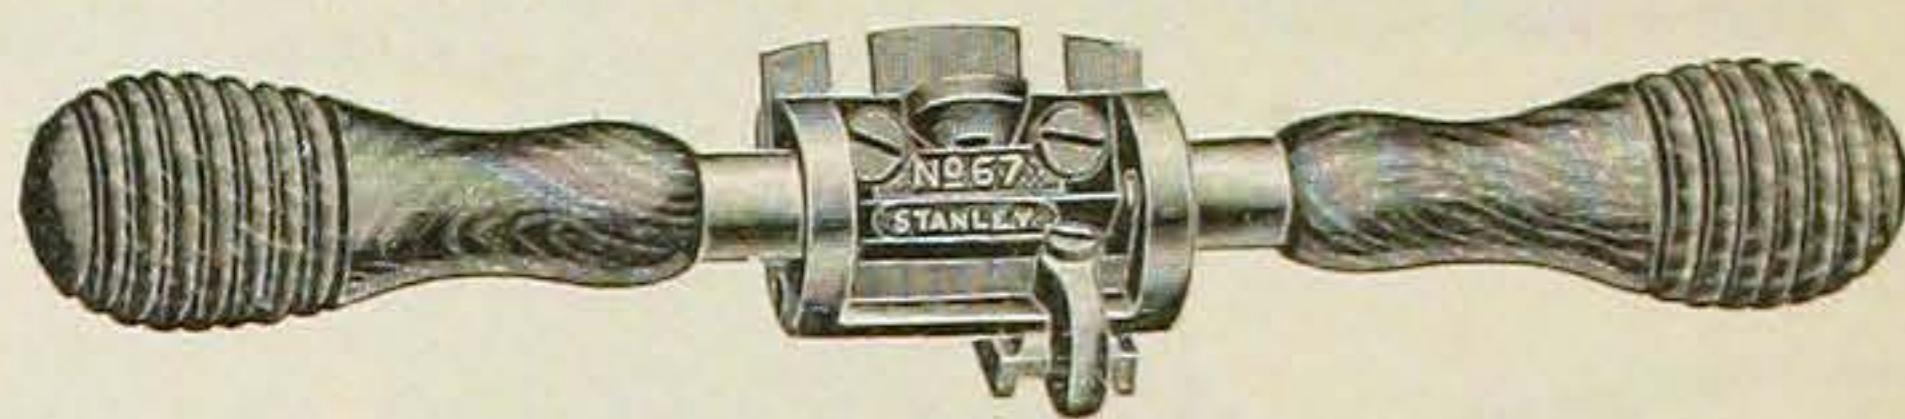

IMPROVED WOOD SCRAPERS

This Scraper can be adjusted to any desired pitch; and may be worked toward or from the person using it. The Roller acts as a support to relieve the strain on the wrist and hands of the workmen. The Handle can be detached for working into corners.

- No. 83 Wood Scraper, with Handles and Roller,
3 inch Blade,
Cast Steel Cutters, each, \$1.00
per dozen, 2.40

STANLEY'S UNIVERSAL SPOKE SHAVES

Both Handles are detachable, and either of them can be screwed into a socket on top of the stock, thus enabling the owner to work into corners, or panels, as no other spoke shave can do.

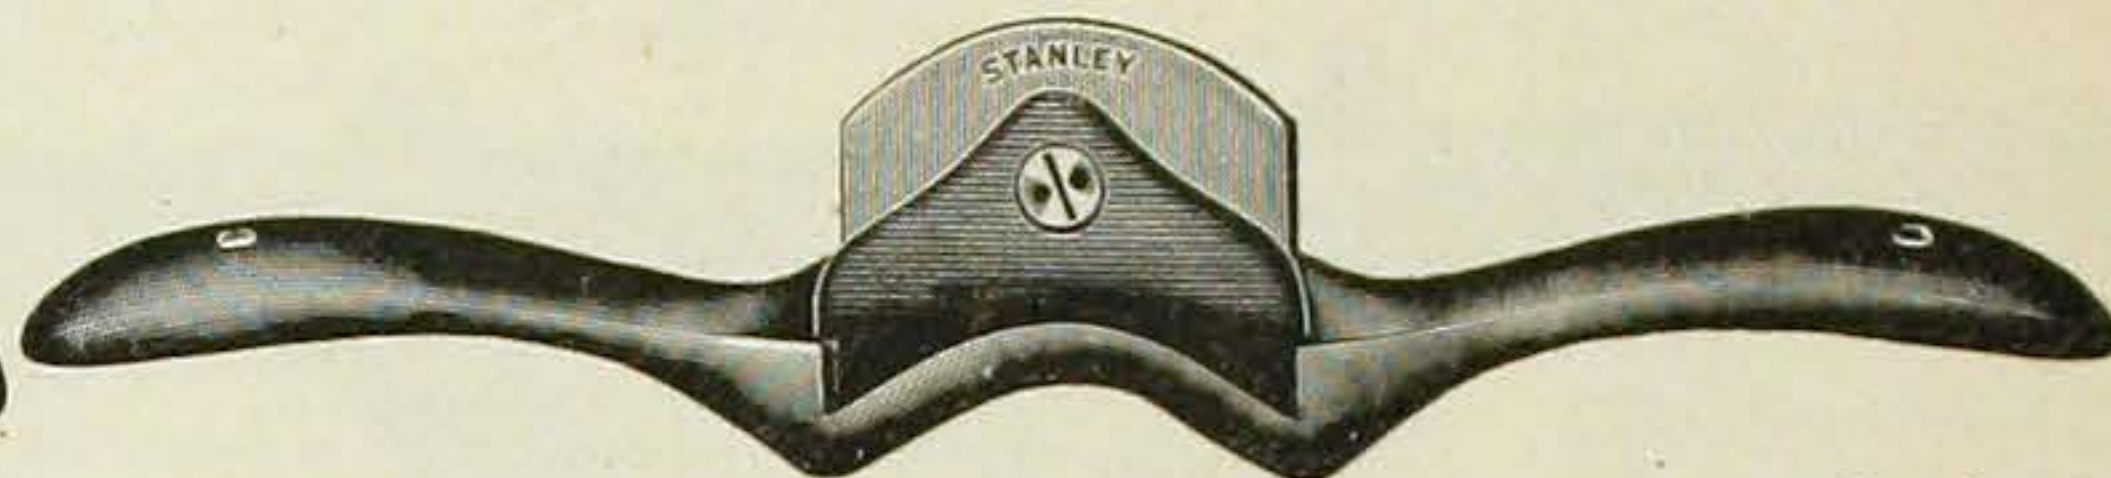

This Spoke Shave has two detachable bottoms, adapting it equally well to circular work or straight; and, by means of a movable width gauge, the tool can be used in rabbeting.

- No. 67 Universal Spoke Shave, Each, \$1.50

BAILEY'S IRON SPOKE SHAVES

- No. 51 Double Iron, Raised Handle, 10 inches, Cutter, 2 1/8 inches, Per dozen, \$3.50

OLMSTED'S IMPROVED MITRE BOXES

CUT OF No. 1 & 2.

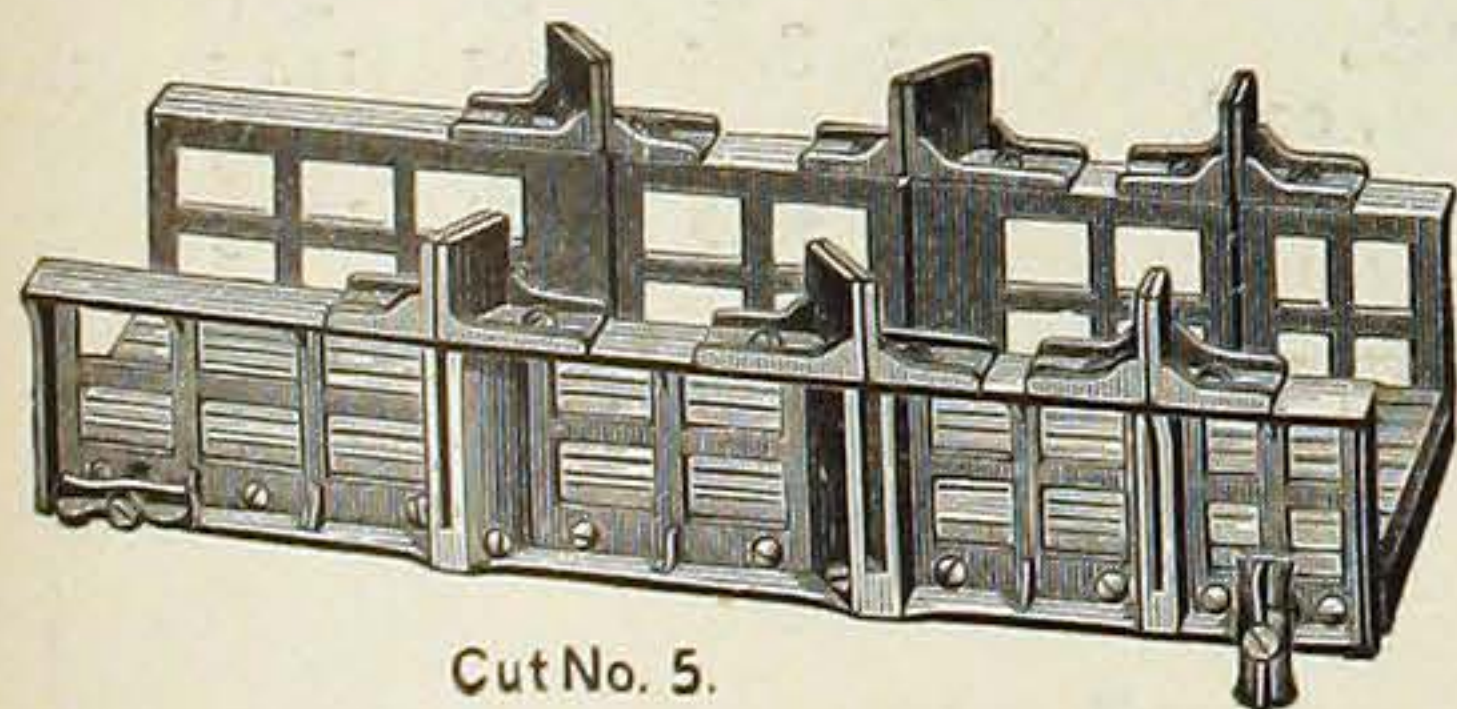

The frame is made of hard wood of the best quality selected for the purpose, and made from boards one inch thick, and consists of two upright pieces which are fastened rigidly to the edges of a bottom board. Has adjustable iron saw guides for any thickness of saw blade. The saw cannot cut the frame away. An ordinary cross-cut saw can be used as well as a back saw.

No. 1	Will take work $1\frac{1}{2} \times 3$ inches,	per dozen, \$12.00
No. 2	" " " $2\frac{1}{2} \times 4$ "	" " 18.00

Cut of No. 3 and 4.

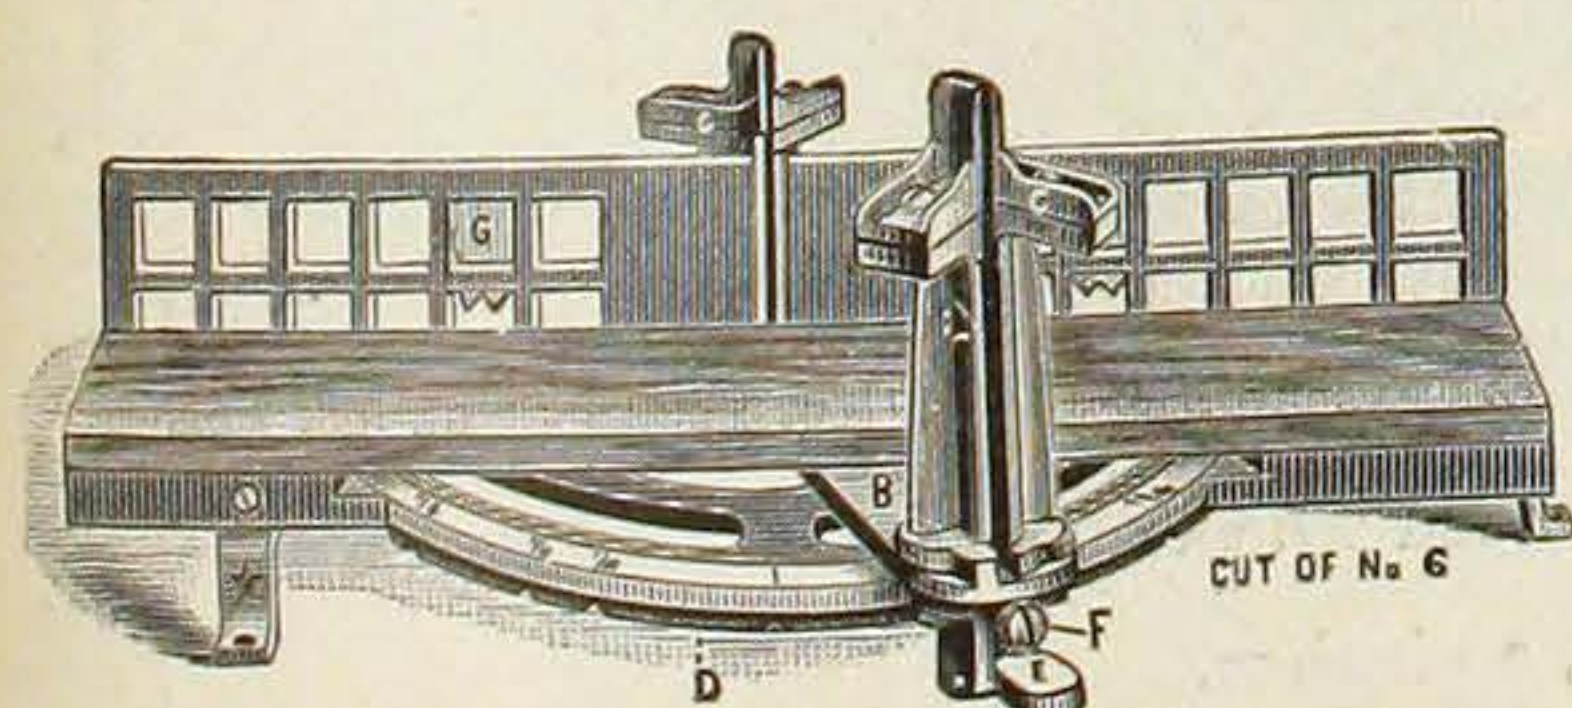

No. 3	Will take work $1\frac{1}{2} \times 3$ inches,	per dozen, \$15.00
No. 4	" " " $2\frac{1}{2} \times 4$ "	" " 21.00

Cut No. 5.

The frame of this Box is made entirely of iron. A board is secured to the bottom of the inside. When a back saw is used with a blade 4 inches wide, the back will serve as a stop by its striking the top of the adjustable iron saw guides. The iron saw guides prevent the saw from coming in contact with the sides of the slots.

No. 5	Will take work $2\frac{1}{2} \times 4$ inches,	per dozen, \$45.00
-------	--	--------------------

CUT OF No. 6

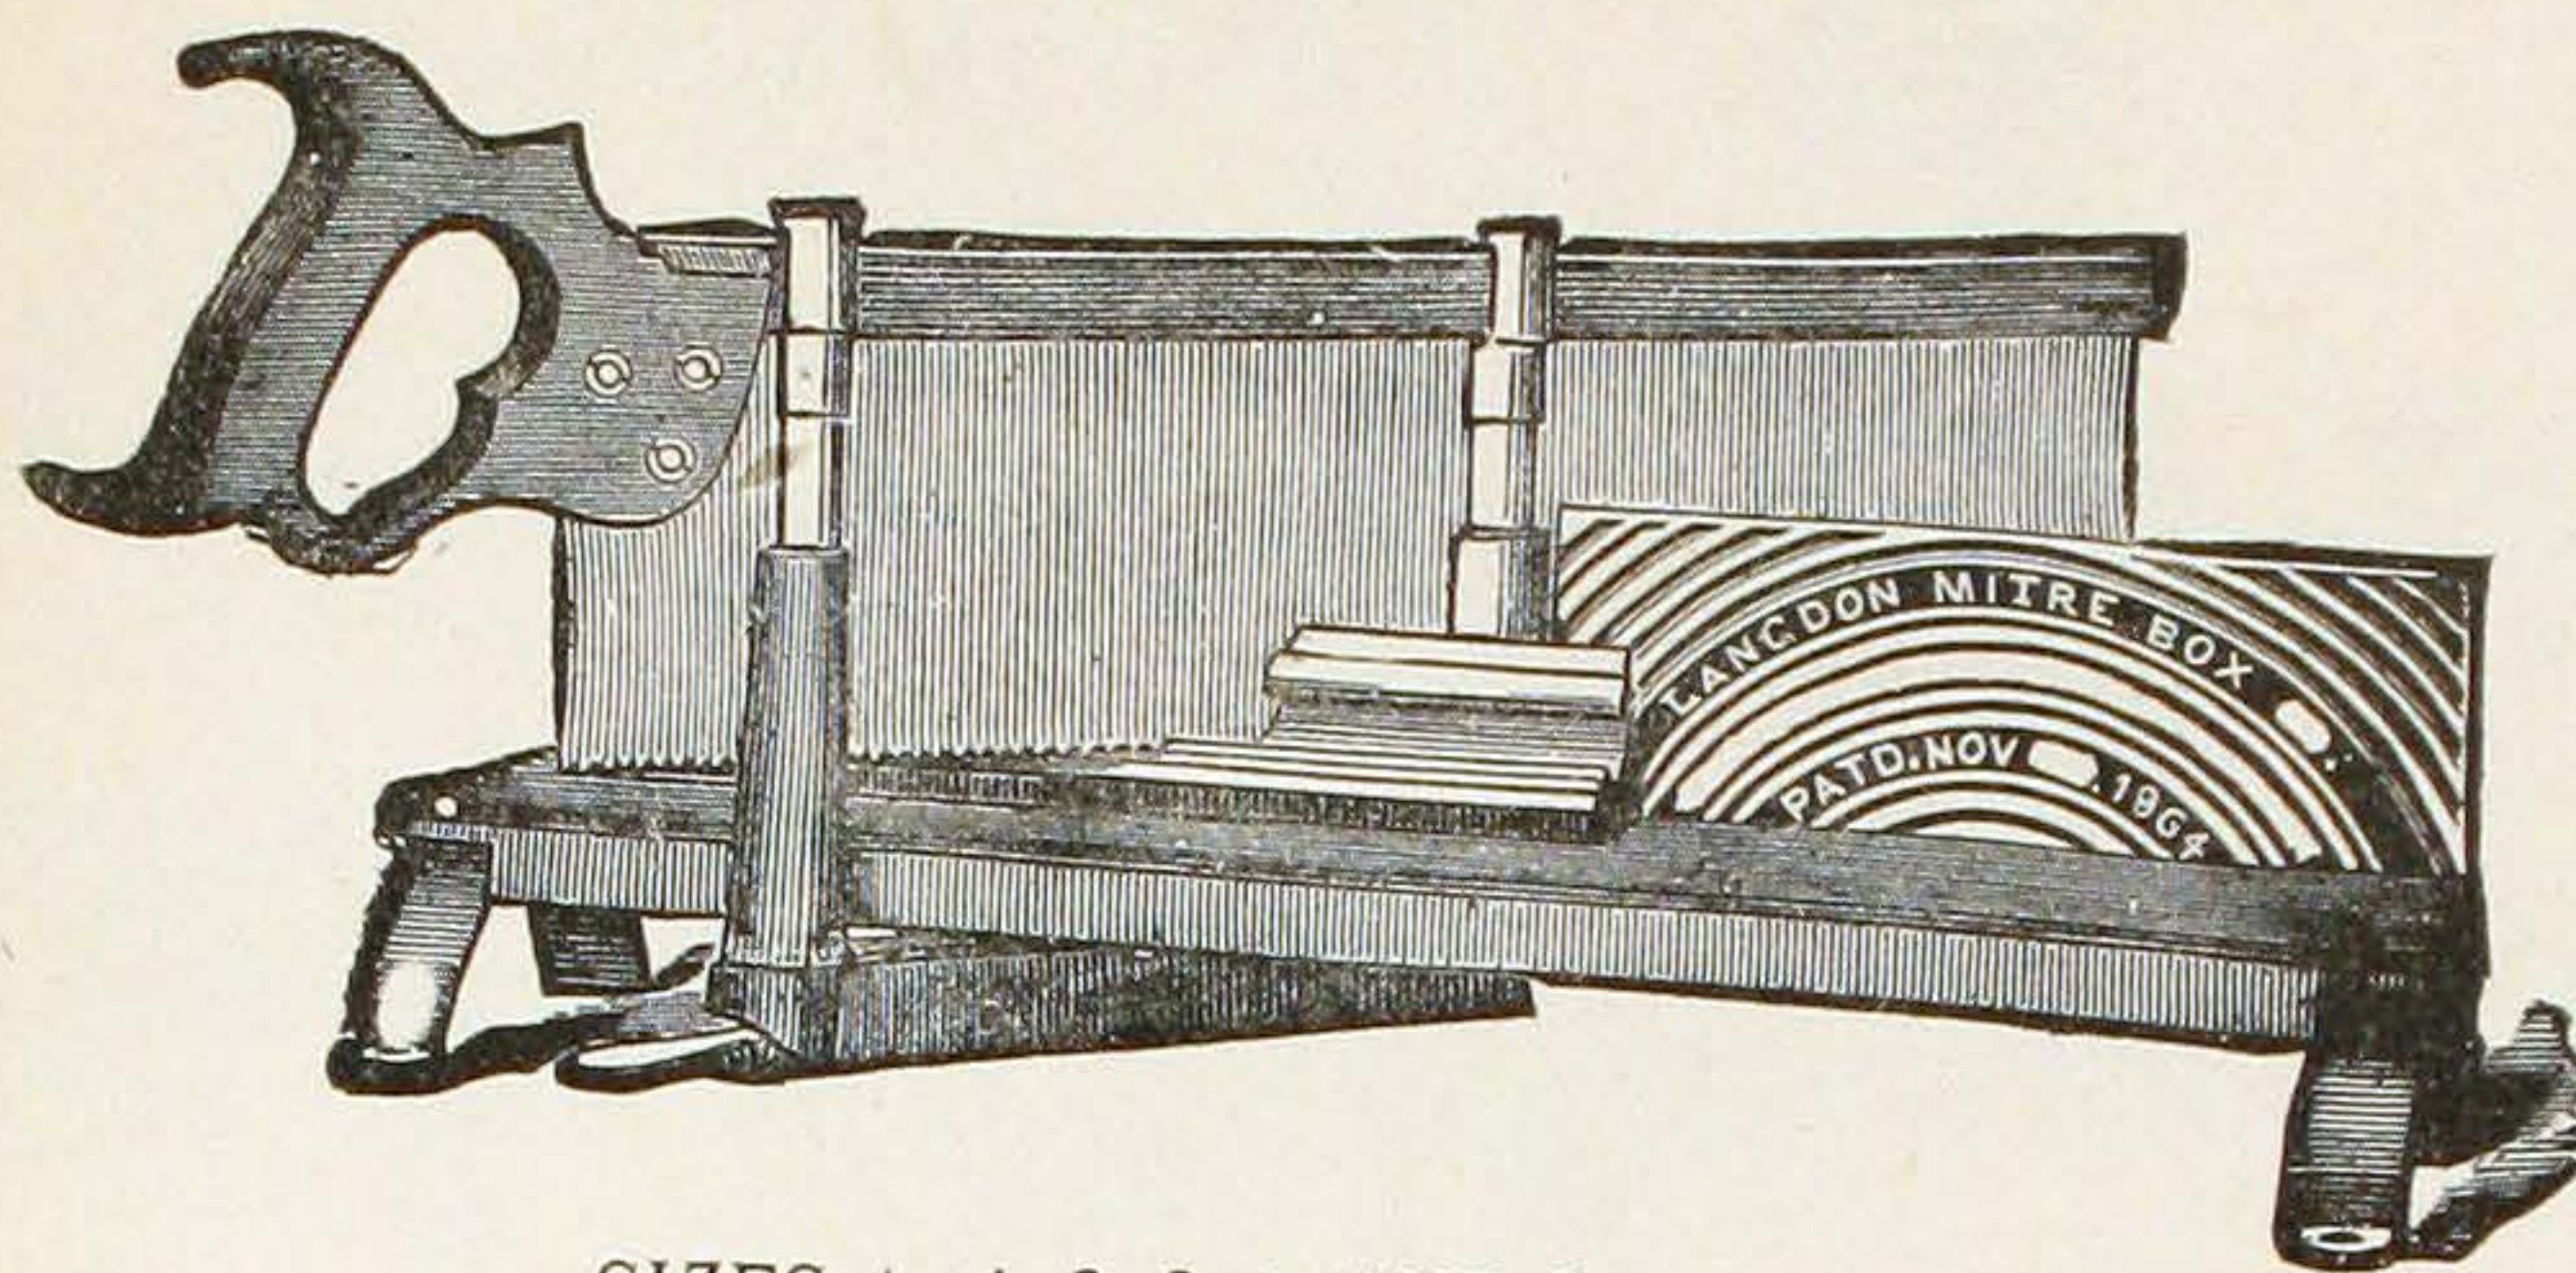

This Box is made entirely of steel and iron; a board is fastened to the bottom. The swinging bar B can be placed at any angle desired, by pressing on the lever E it can be moved to any of the fixed notches, which are right angle, $\frac{1}{8}$, $\frac{1}{6}$, $\frac{1}{4}$; it can be held at any point between the notches by tightening the screw D. The pointed steel springs G, on the back, are used to press into the work to hold it fast while sawing. Any saw can be used.

No. 6	Will take work 4 inches wide at mitre and 6 inches wide at right angle,	per dozen, \$60.00

STANLEY'S PATENT DUPLEX PLUMBS AND LEVELS

All are now made with the "HAND-Y" Feature.

No. 25

These Levels have the ordinary form of leveling glass, set in the top surface of the Stock. For any uses where an observation of the glass, sidewise, may be found convenient, an additional leveling glass is set in the side, at the opposite end from the plumb. Both glasses are protected by Brass Discs, can be seen from either side, and are inserted in the Level with the least possible removal of wood from the Stock.

No.	Description	Per dozen.

STANLEY'S
IMPROVED
TRAMMEL POINTSBRONZE METAL, STEEL
POINTSA Pencil Socket which
accompanies each pair can
be firmly clamped on either
point.

No.		Per pair.
1	Small,	\$1.00
2	Medium,	1.25
3	Large,	1.75

One pair in a box.

STANLEY'S IMPROVED LEVEL SIGHTS

By the use of these ingenious devices, which can be attached to any Level, the owner has a convenient and accurate means for leveling from one given point to another at a long distance away. When not in use, the Level Sights are easily detached, and can be packed away in a small space for future use.

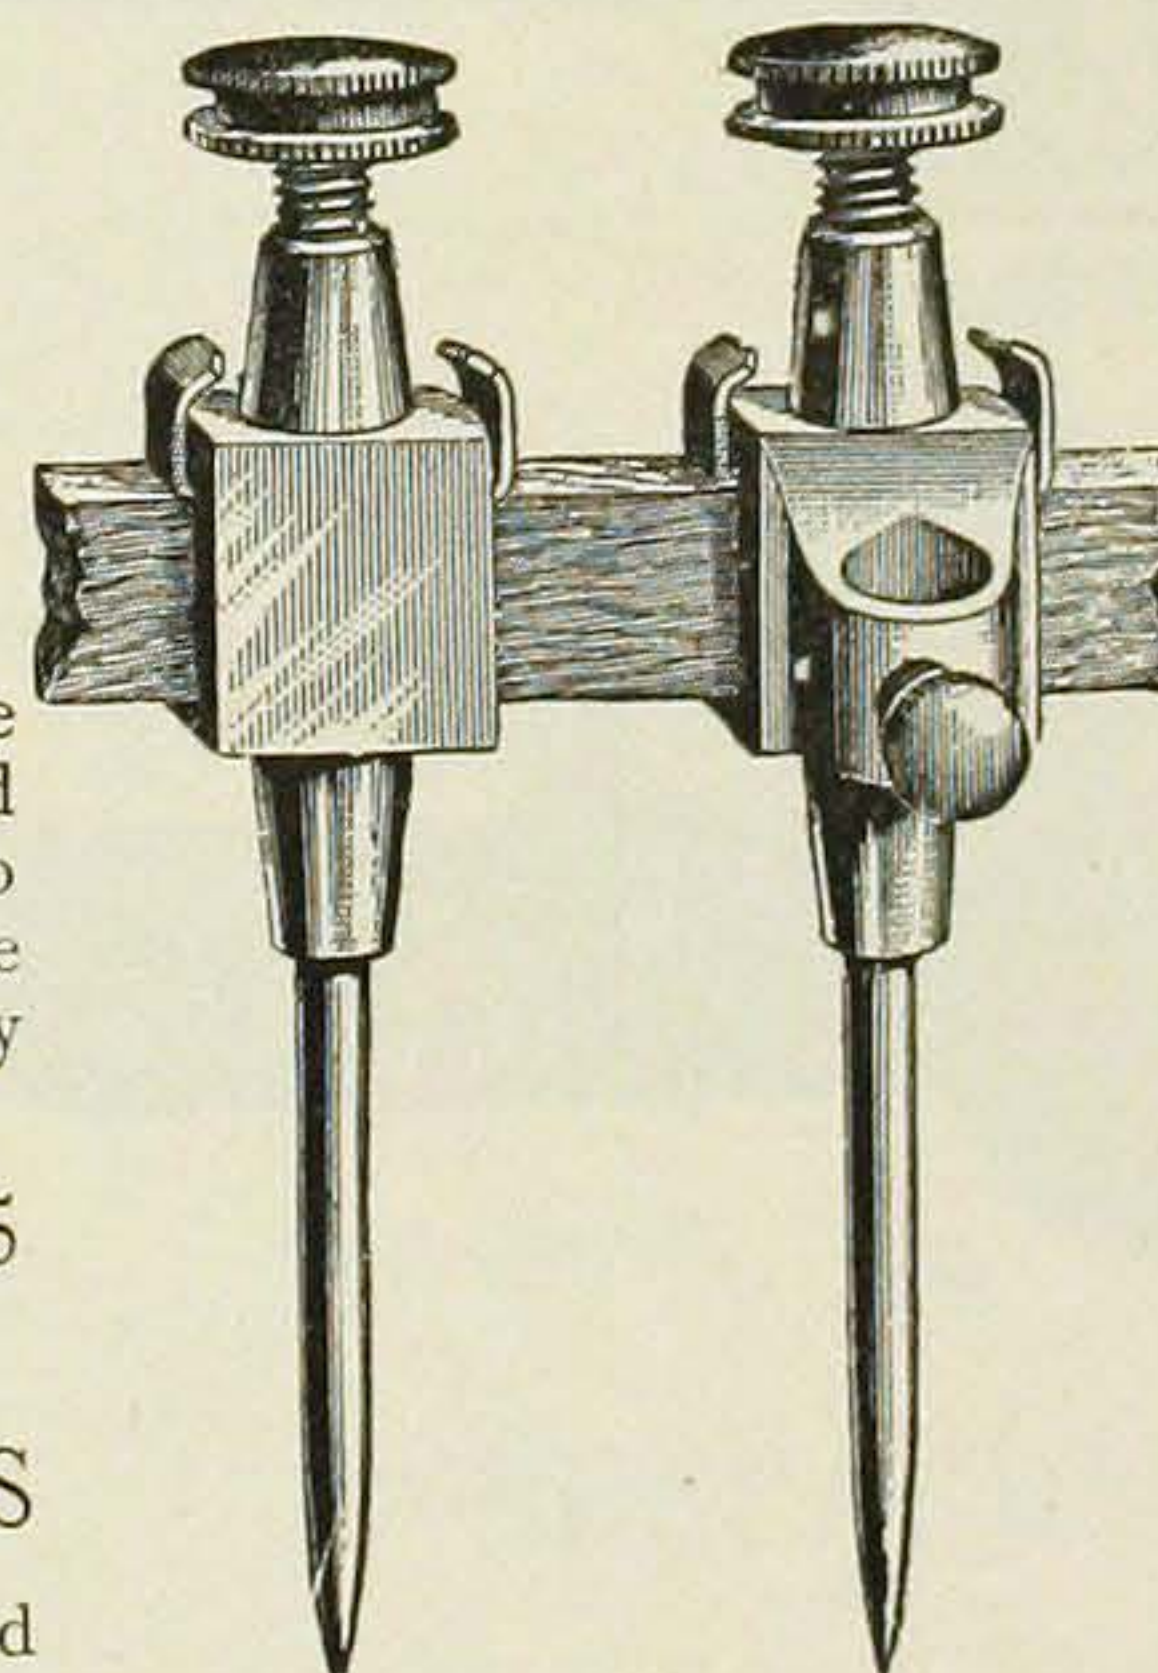

No. 1, per pair, \$0.75
One pair in a box.

ADJUSTABLE PLUMB BOBS

These Plumb Bobs are constructed with a Reel at the upper end, upon which the line may be kept, and by dropping the Bob with a slight jerk, while the Ring is held in the hand, any desired length of line may be reeled off. A Spring which has its bearing on the Reel, will check and hold the Bob firmly at any point on the line. A suitable length of line comes already reeled on each Plumb Bob.

No.		Each.
1	Bronze Metal, with Steel Point, small,	\$1.50
2	Bronze Metal, with Steel Point, large,	1.75
5	Iron, with Steel Point, large,	1.00

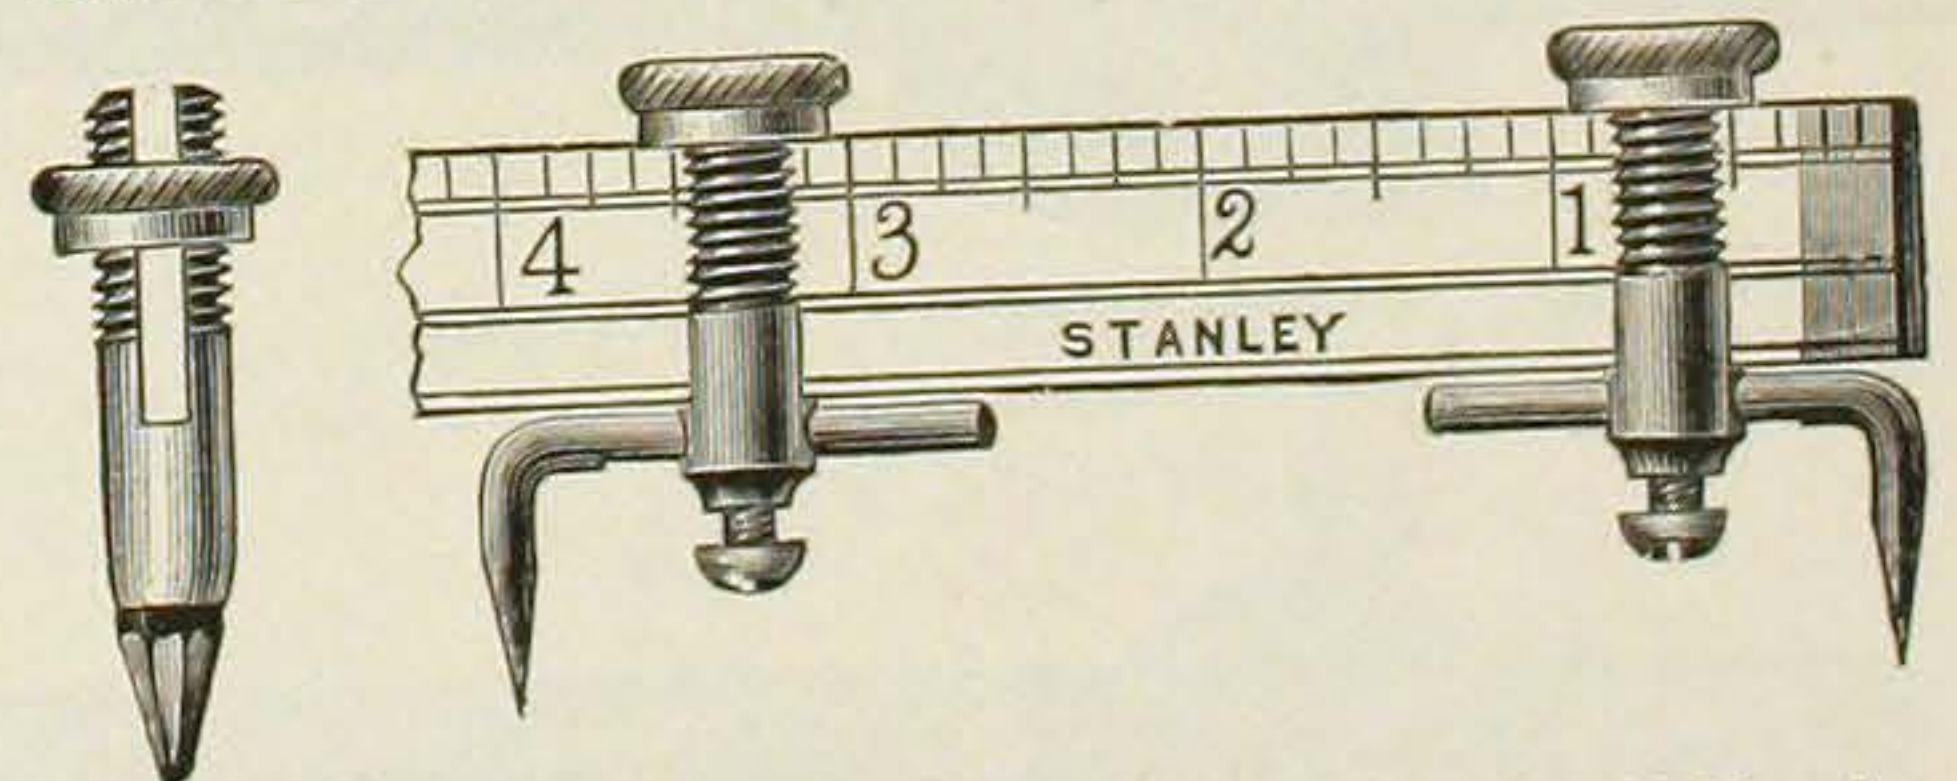

One in a box.

STANLEY'S IMPROVED GAUGES

The Brass Face, with two ribs attached to one side of the Gauge-head (see engraving) will enable the owner to run a gauge-line with perfect steadiness and accuracy around curves of any degree, and either concave or convex. The Gauge-head is reversible, and the flat side can be used for all ordinary work.

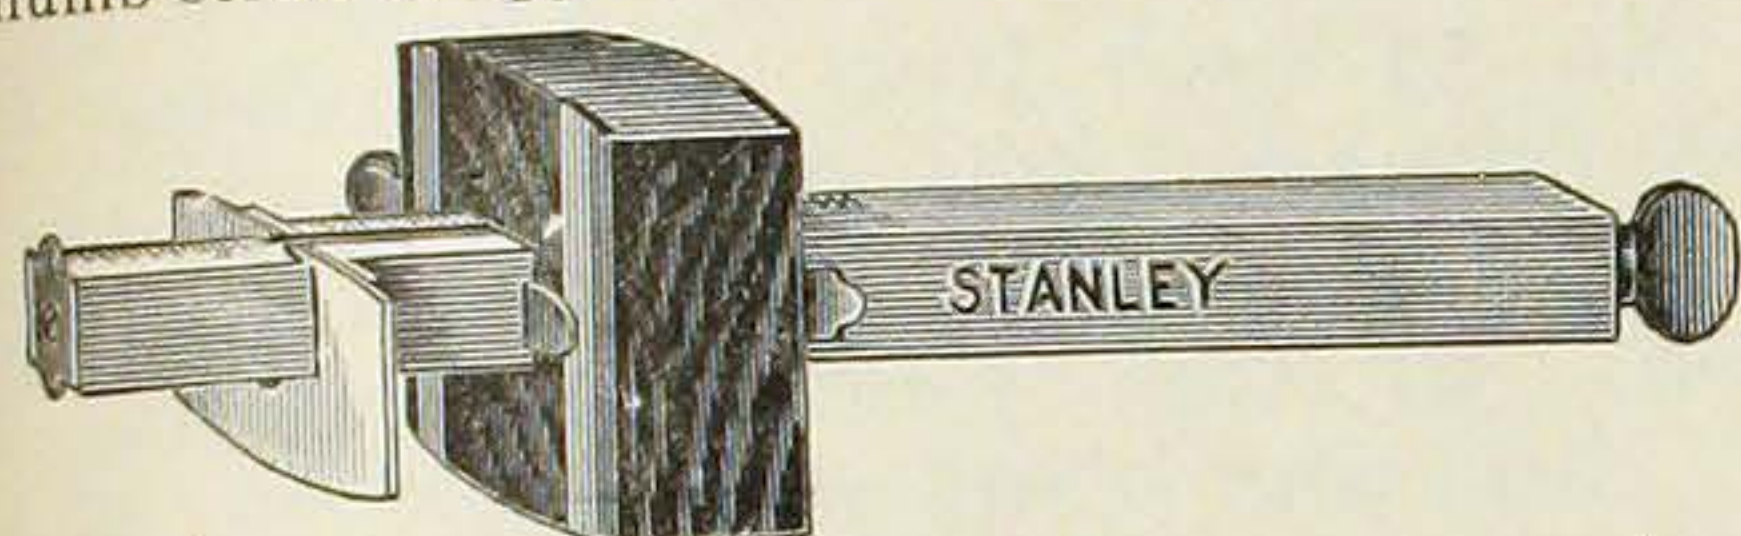

Any style of Gauge—with this valuable improvement included—may be ordered as Nos. 161, 162, etc., instead of Nos. 61, 62, etc. Add \$1.00 per dozen to the price given on the corresponding Gauge—without the improvement—in our regular List of Gauges.

STANLEY'S BUTT AND RABBET GAUGE

FOR HANGING DOORS, MORTISING, MARKING, ETC.

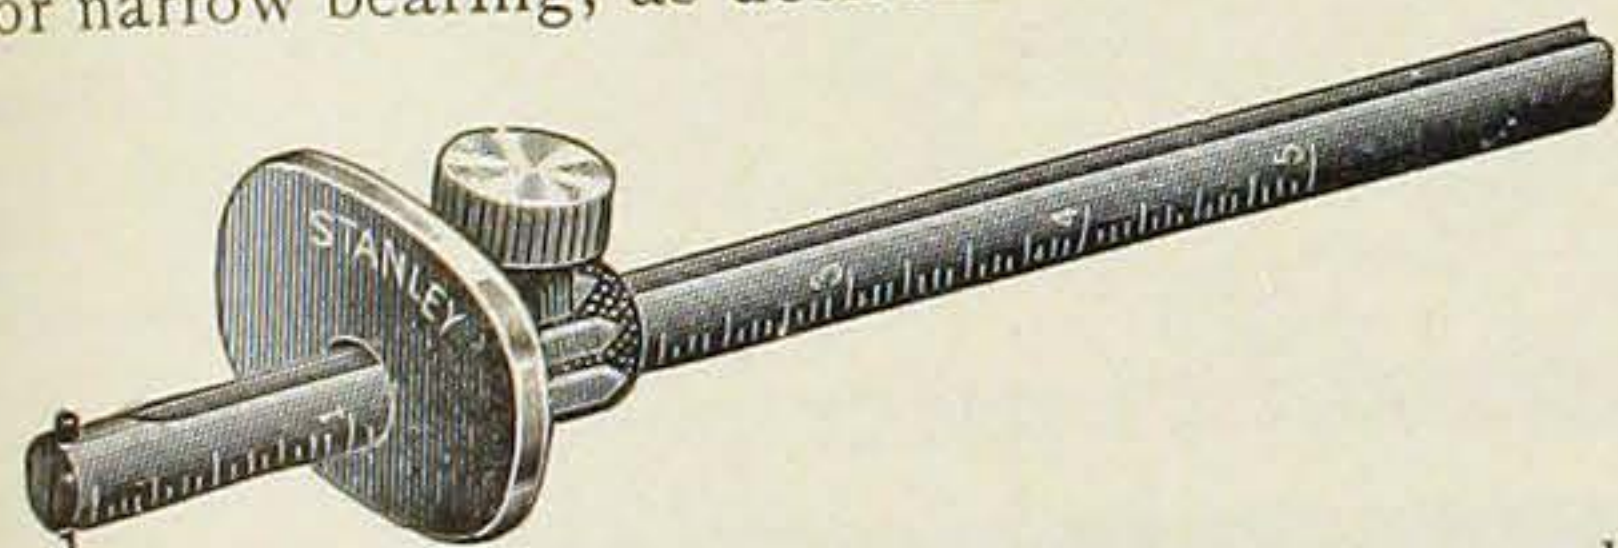

This Gauge has two bars, both of brass, one movable within the other. The two steel blades or markers at the extreme end of the inner bar can be moved to any position by means of Thumb-screw at opposite end of Gauge.

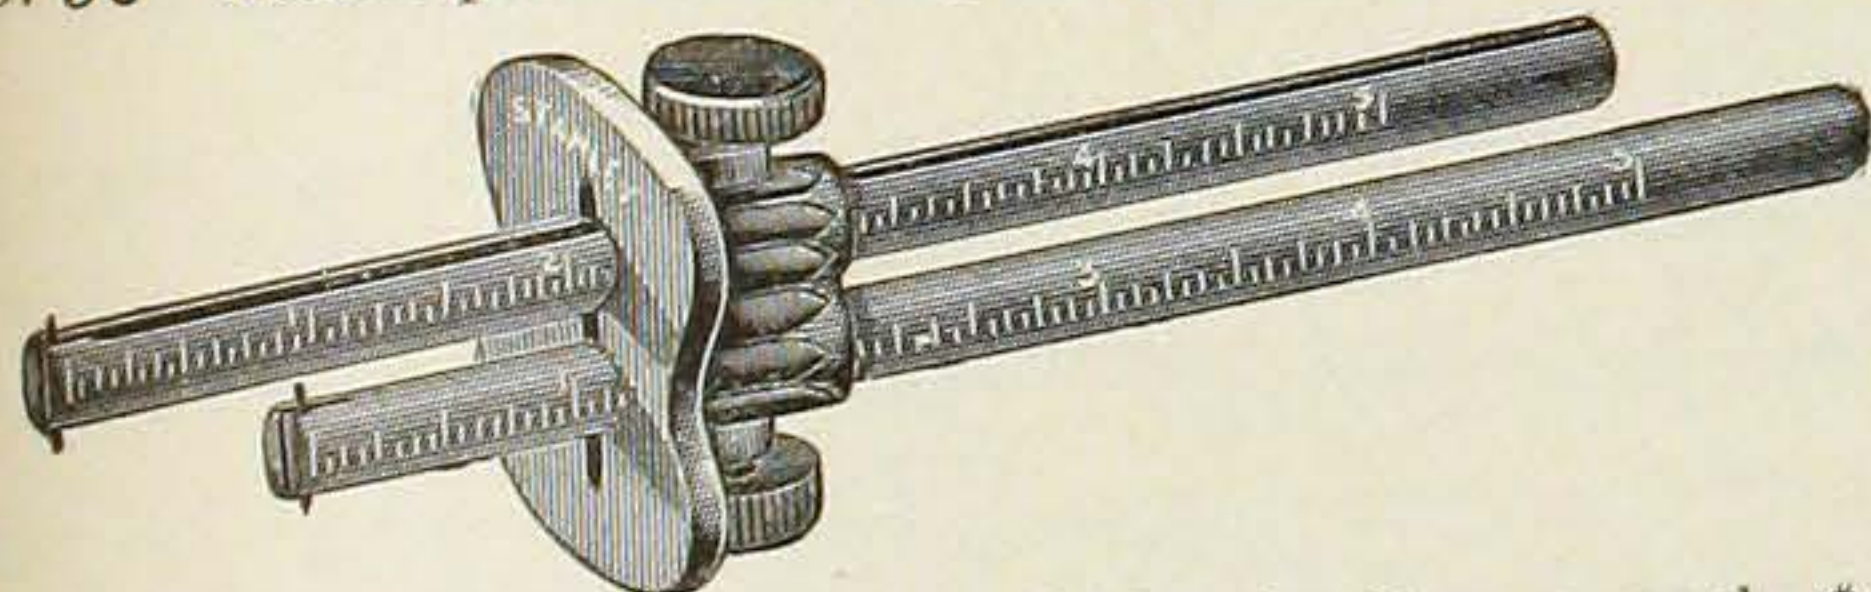

No. 92 Improved Butt and Rabbet Gauge, each, \$1.25
One in a box.

IMPROVED MARKING AND MORTISE GAUGES

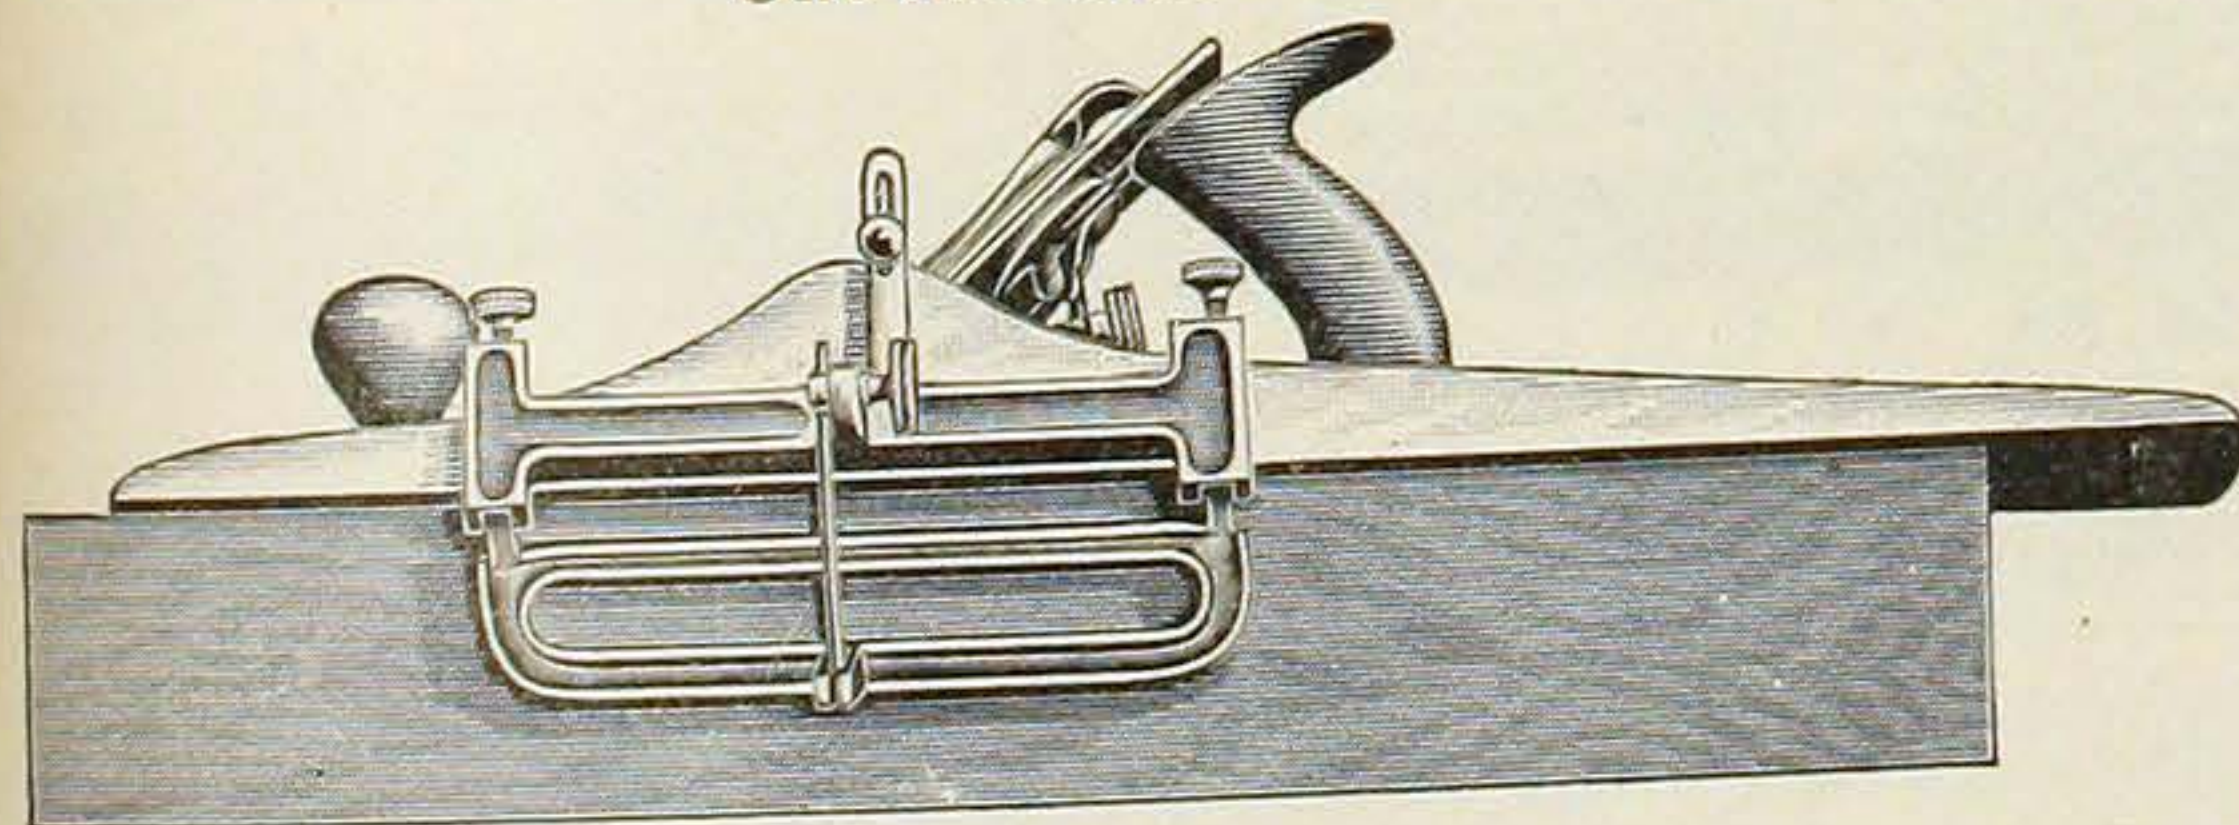

The steel points are attached very near the ends of the bars, to admit of being used close up into a rabbet or corner. The head of the Marking Gauge can be turned over, for a broad or narrow bearing, as desired.

No. 90 Nickel-plated Marking Gauge, each, \$0.35

No. 91 Nickel-plated Marking and Mortise Gauge, each, \$0.65
One in a box.

Per dozen,

\$18.00

SHEPARDSON'S IRON PLANE GAUGES

Can be attached to any Iron Plane for Planing Bevels or Joint Boards. Nickel-plated.

No. 333

per dozen, \$24.00

One in a box.

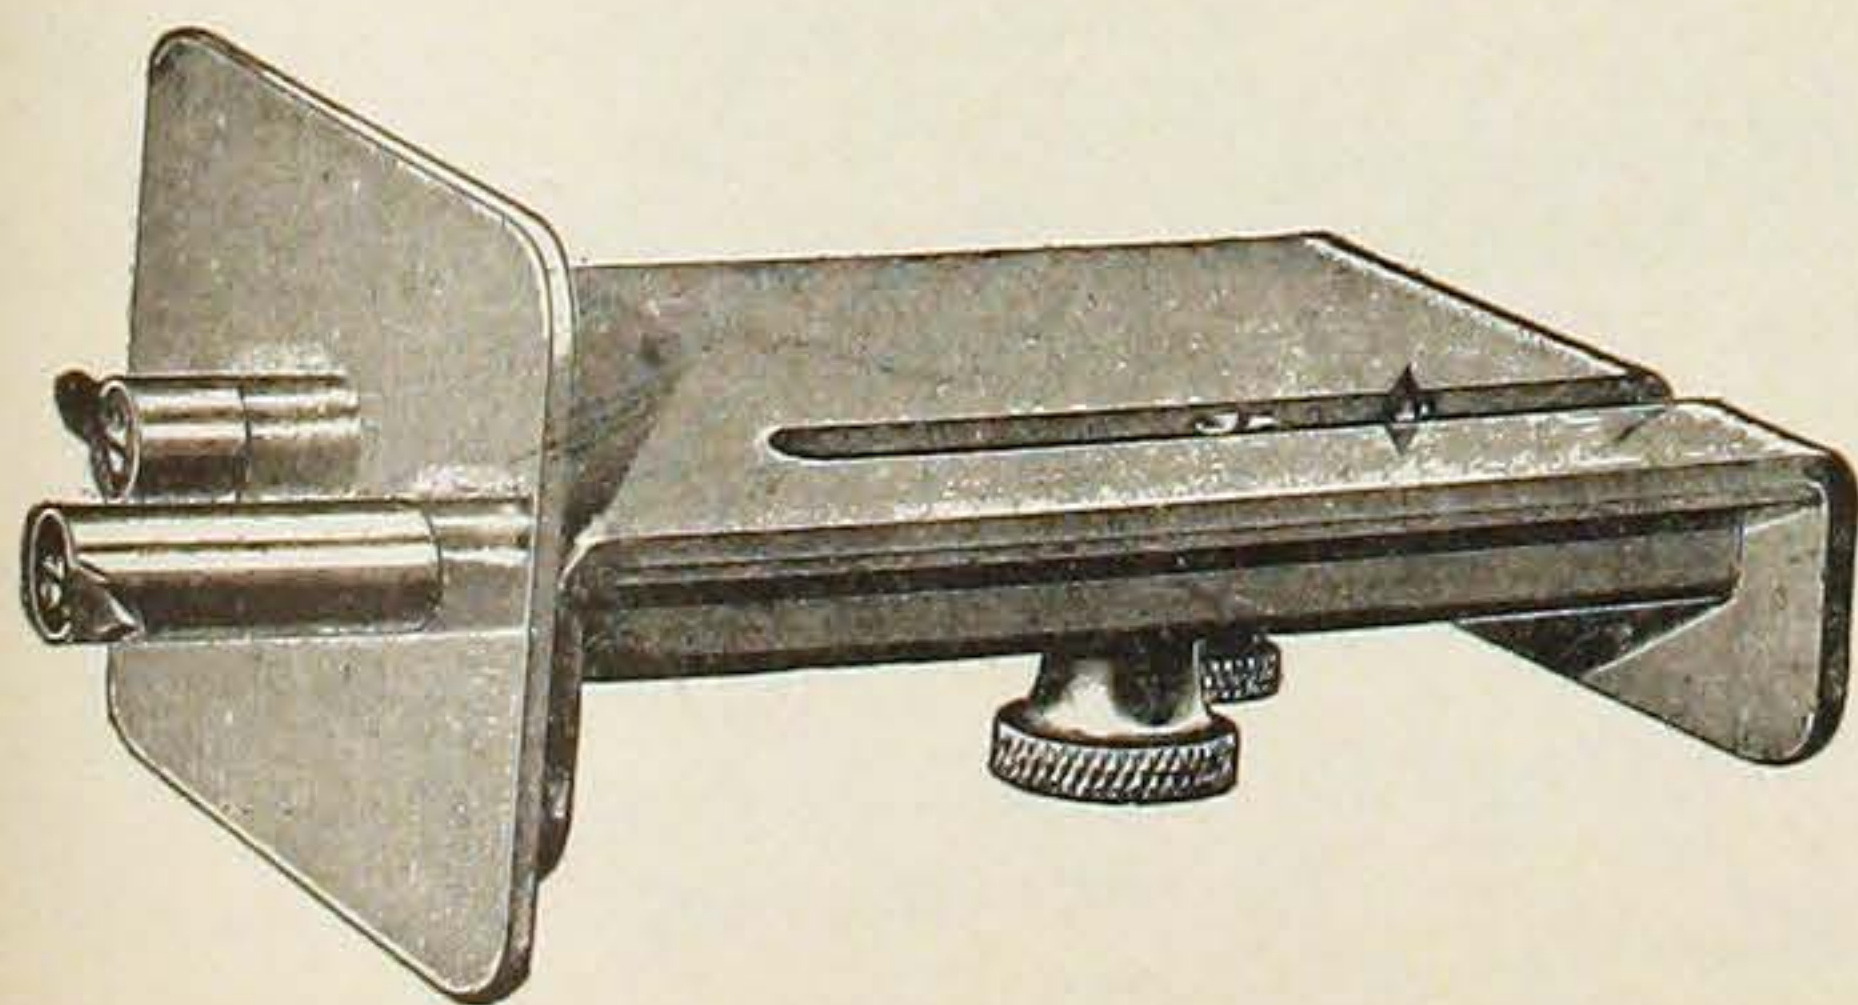

GOODELL'S COMBINED GAUGE AND SQUARE

Especially designed for door hanging and all kinds of mortise work. In this it takes the place of three ordinary gauges and a try-square, thus insuring more uniform and perfect work with a great saving of time and labor. Every part is made of steel, insuring durability and lightness. The tool is fully Nickel-plated.

Per dozen,

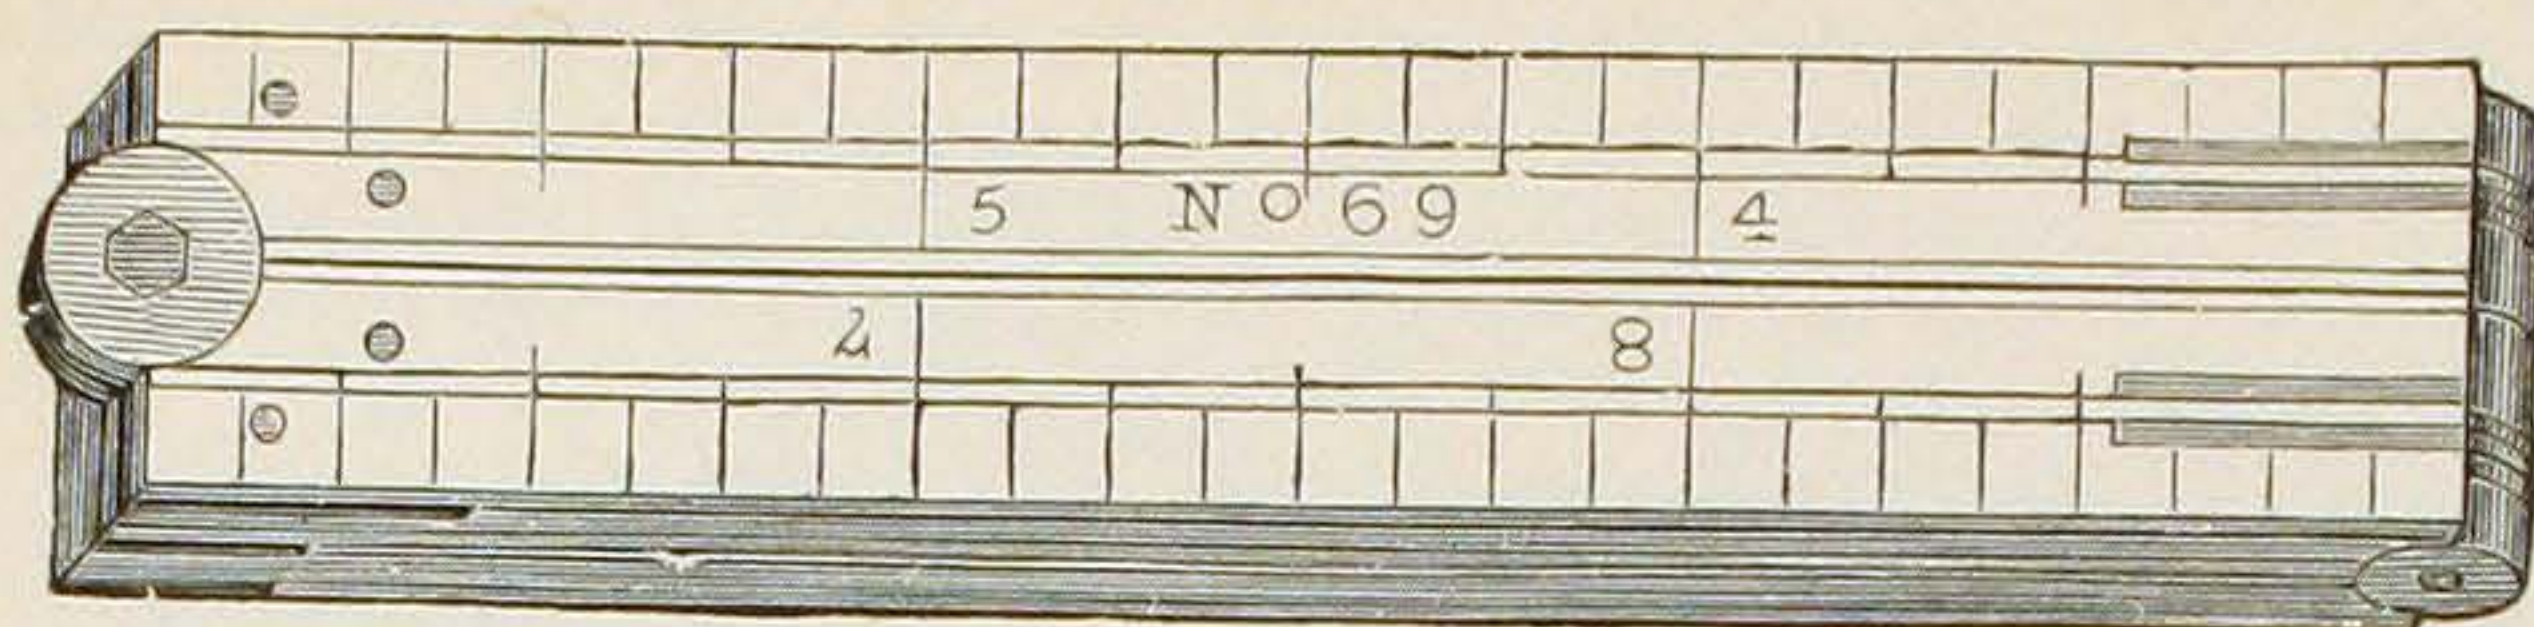

\$12.00

One in a box.

FISHER & NORRIS' EAGLE ANVILS

Horseshoers'

The EAGLE ANVIL body is made of gun-metal—crystallized iron—which neither settles nor breaks. The face is in one piece of BEST TOOL CAST STEEL, welded on so perfectly by the process of its original and only inventor, the late Mr. MARK FISHER, that it is warranted never to come off. It is planed to a true surface, tempered with uniform hardness, and it always remains so. The steel horn is tough and unhardened, and will not break or bend. The complaint of deafness, so often occasioned by the "ringing" of the Anvil, is avoided by using the EAGLE ANVIL, which is warranted NOT TO RING.

N. B.—All EAGLE Anvils are now made with the latest Fisher Patent DOUBLE-THICK STEEL on both edges of the face, whole length.

* NOTE.—No. 2 Leg unnecessary, therefore omitted.

The Jaws are of best Tool Cast Steel, welded on, file cut and properly hardened. The Screws are forged of the best Refined Iron, and work in solid cut thread boxes. The lower screw maintains the parallel position of the two jaws, by having exact motion with the upper working screw, through the connecting chain which regulates it. The chain is very accurately made of steeled links and rivets, and, having no strain of the work upon it, is therefore as durable as all the other parts.

 In Barrels of about 600 lbs., or Half Barrels of about 300 lbs.

CROSBY'S RUBBER BUCKETS FOR CHAIN PUMPS

Crosby

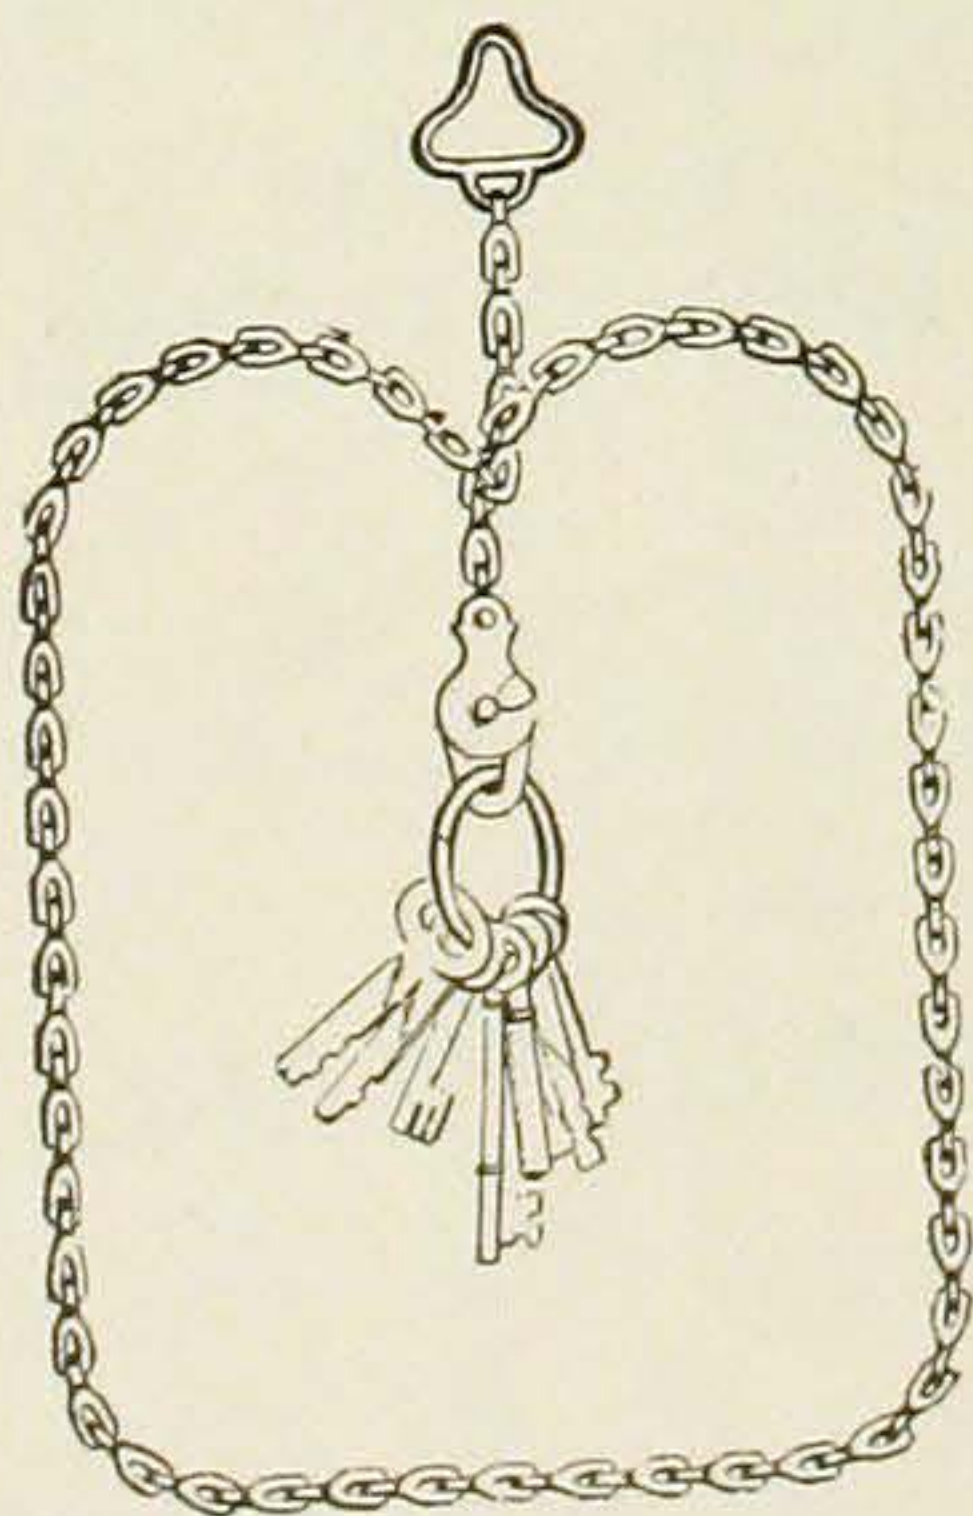

Swivel Link

This is the most durable Bucket made. It never freezes; it does not require priming. It is self-expansive, the base of the Bucket being $\frac{1}{8}$ inch larger at the bottom than the bore in the tubes, which allows it to expand, and the groove in the side to contract.

1 $\frac{1}{4}$ in., for Deep Wells, per set of 3, \$0.30
 1 $\frac{1}{2}$ " Regular size, " " " 3, .30

50 in a box.

AXLE WASHER RACKS

Each Rack contains 500 Washers.

Assorted, from $\frac{3}{4}$ to $1\frac{1}{4}$ inches, each, \$4.00

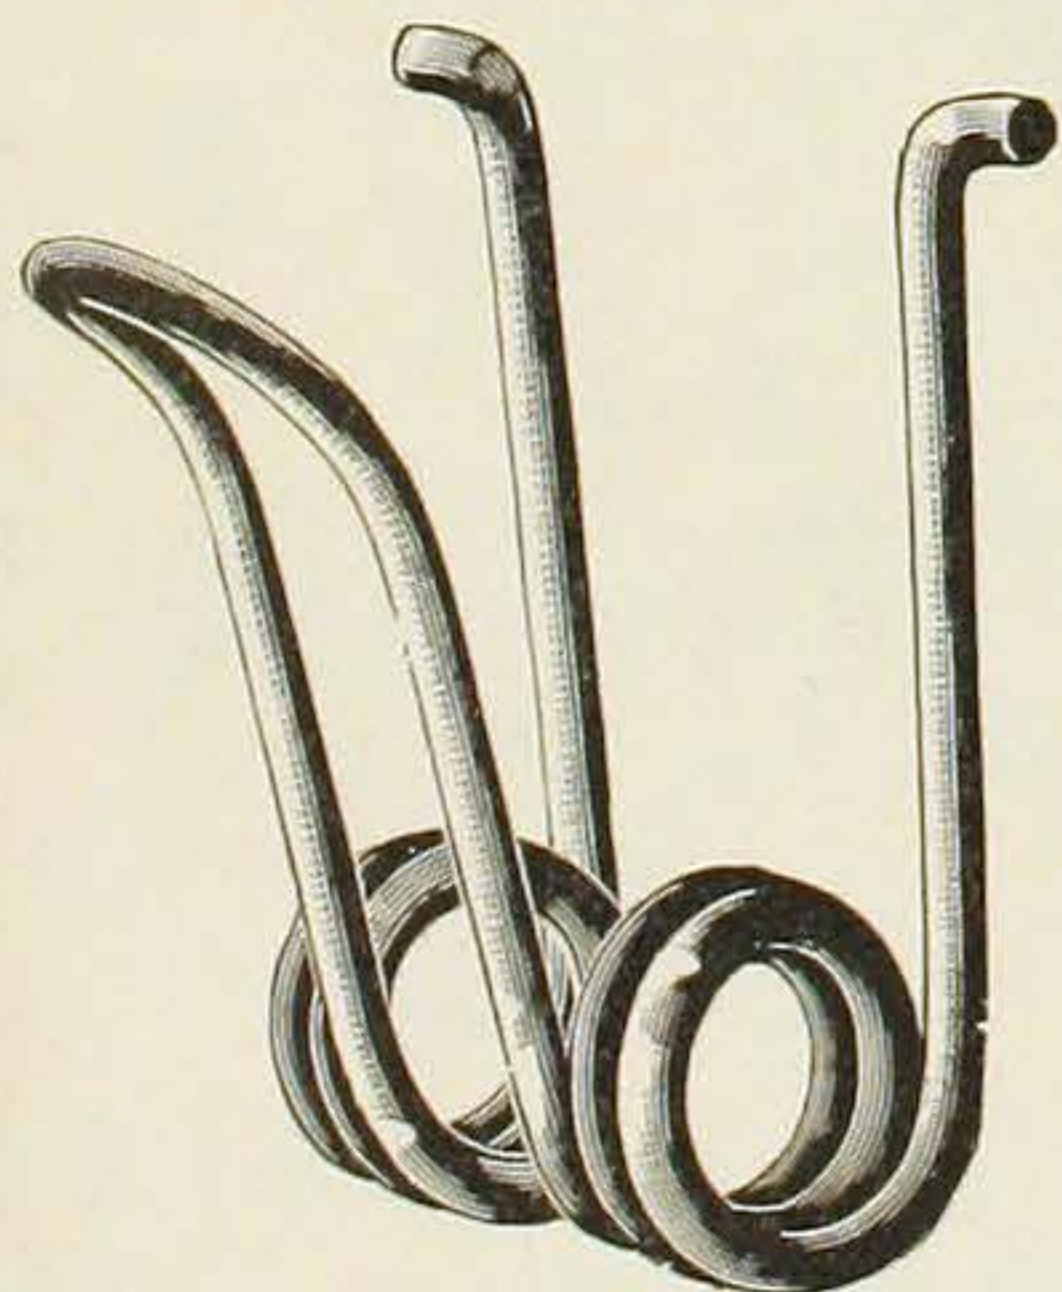

PATENT ADJUSTABLE COIL AXLE WASHERS

Size, inches,	$\frac{7}{8}$	1	$1\frac{1}{8}$	$1\frac{1}{4}$
Per 100,	\$0.90	1.00	1.10	1.20

100 in a box, in 5 coils.

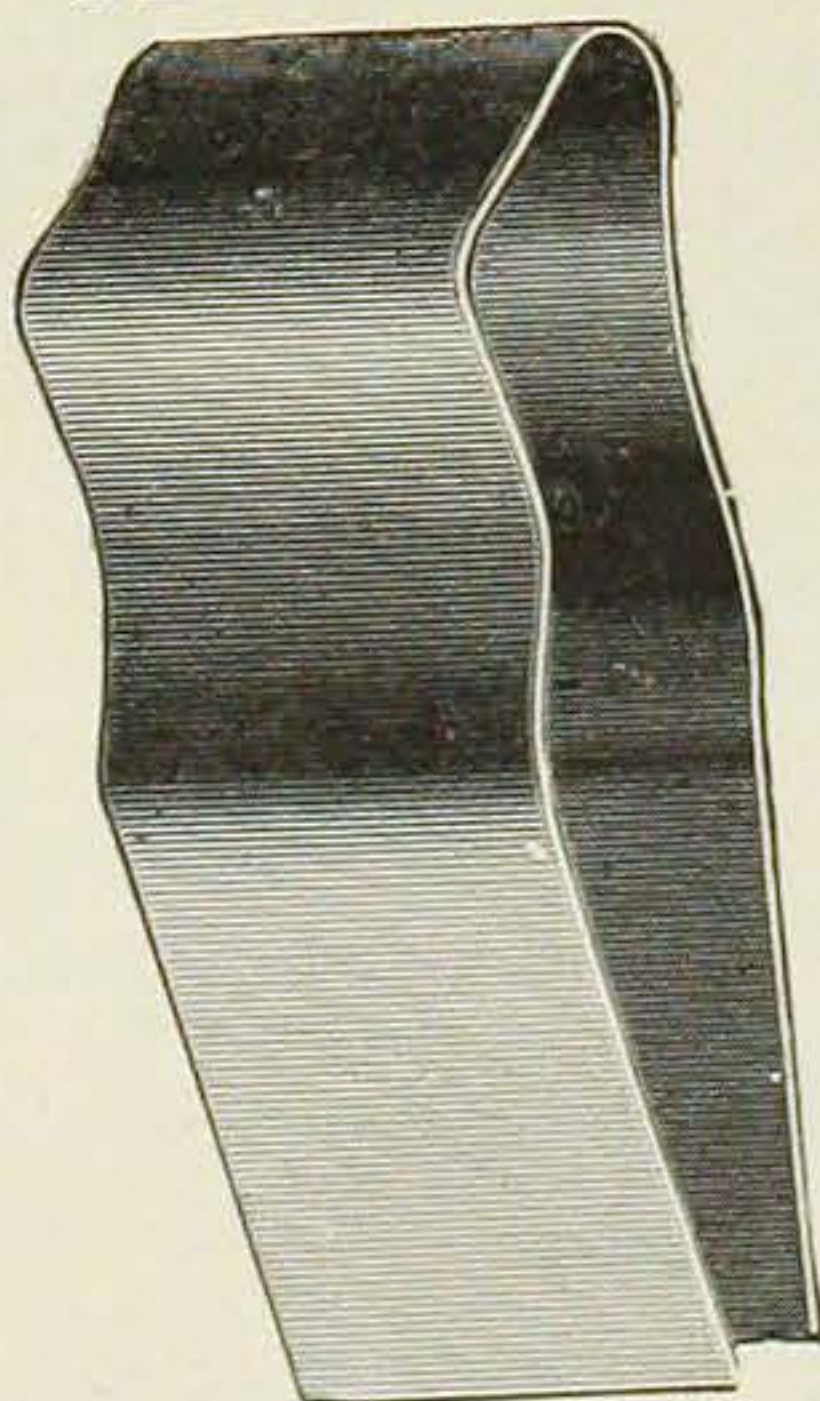

GEM WIRE ANTI-RATTLERS

SPRING STEEL WIRE

Per gross, pairs, \$6.00
One dozen pairs in a box.

STEEL DRIVE ANTI-RATTLERS

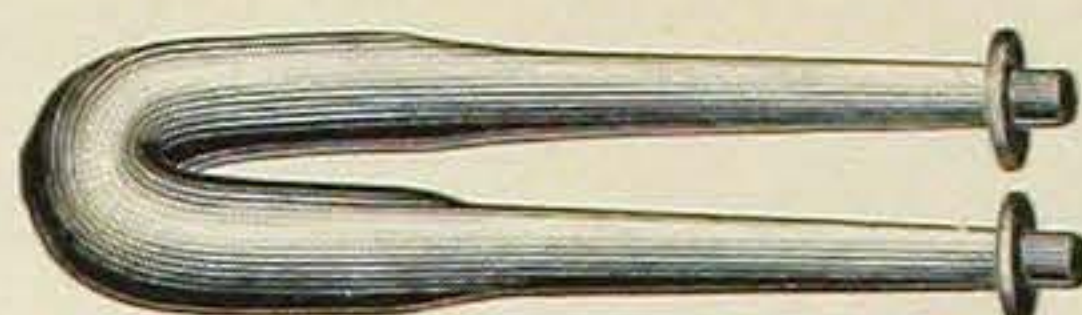

SPRING STEEL

When in place, the points press together, thus getting the elasticity from both the bend and the points.

Per gross, pairs, \$8.00
One dozen pairs in a box.

HAME STAPLES

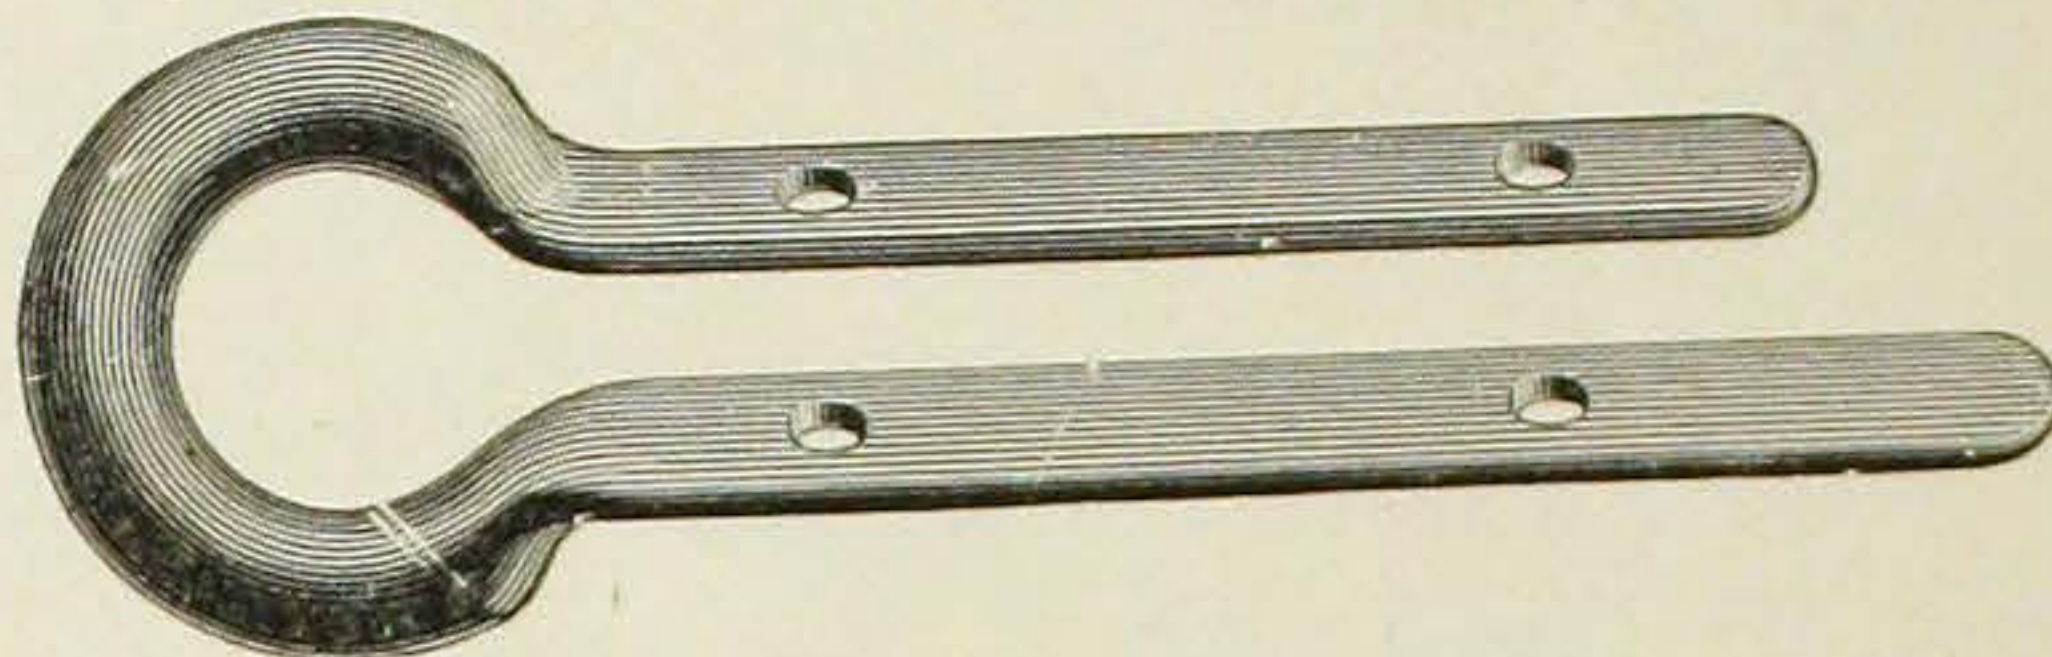

903

WITH BURS

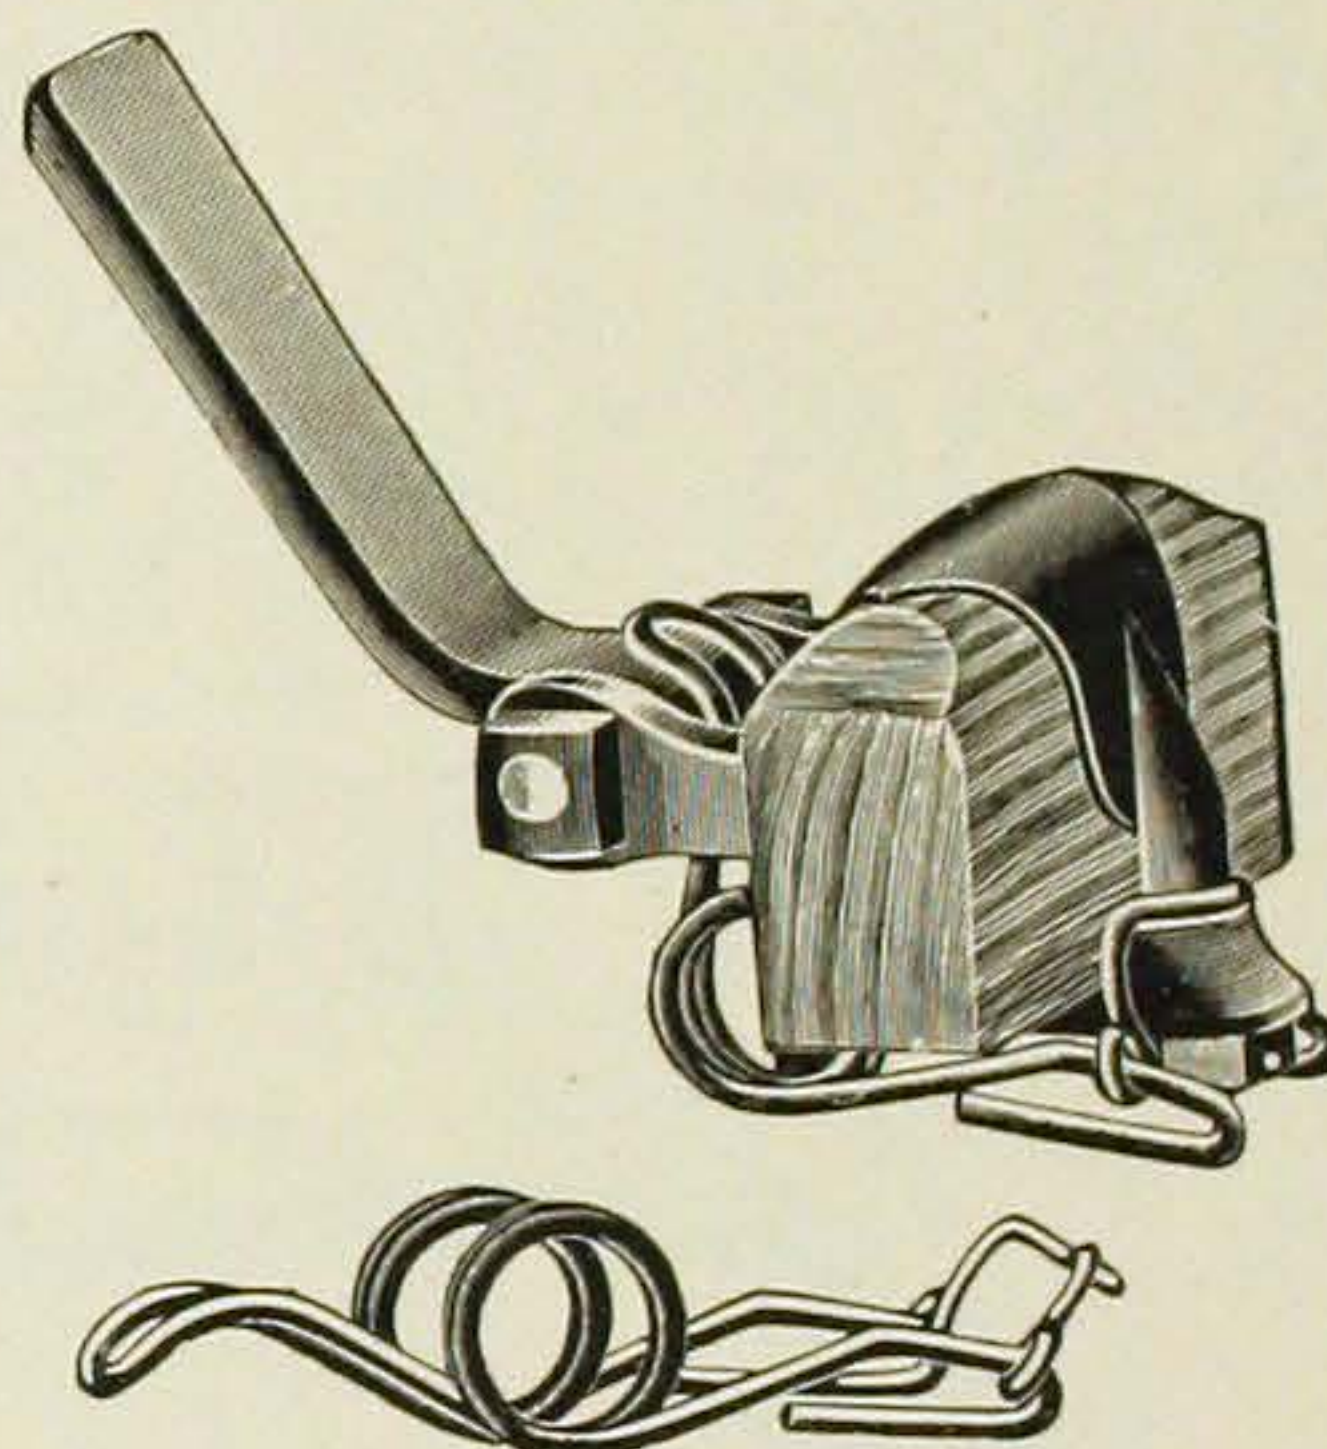

No. 960 $\frac{3}{8}$ inch, Polished, per dozen, \$0.20
Three dozen in a box.

WROUGHT IRON HAME CLIPS

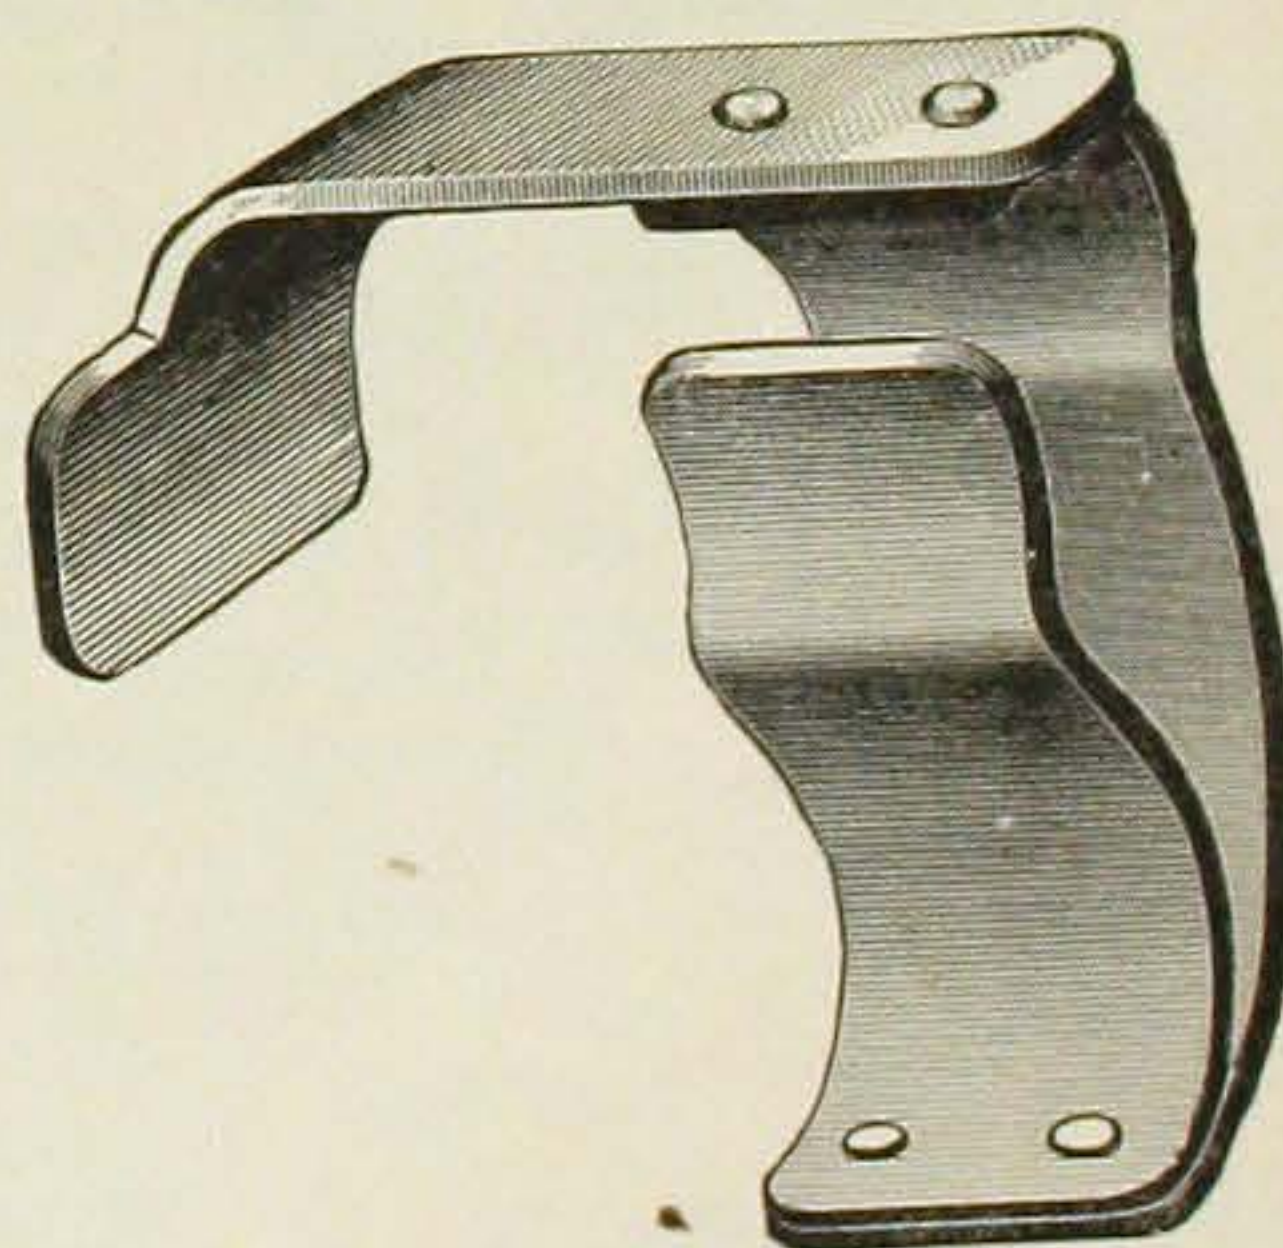

No. 982 $\frac{3}{8}$ inch, Polished, per dozen, \$0.24
Two dozen in a box.

FERNALD ANTI-RATTLERS

Per gross, pairs, \$15.00
One dozen pairs in a box.

BURTON'S ANTI-RATTLERS

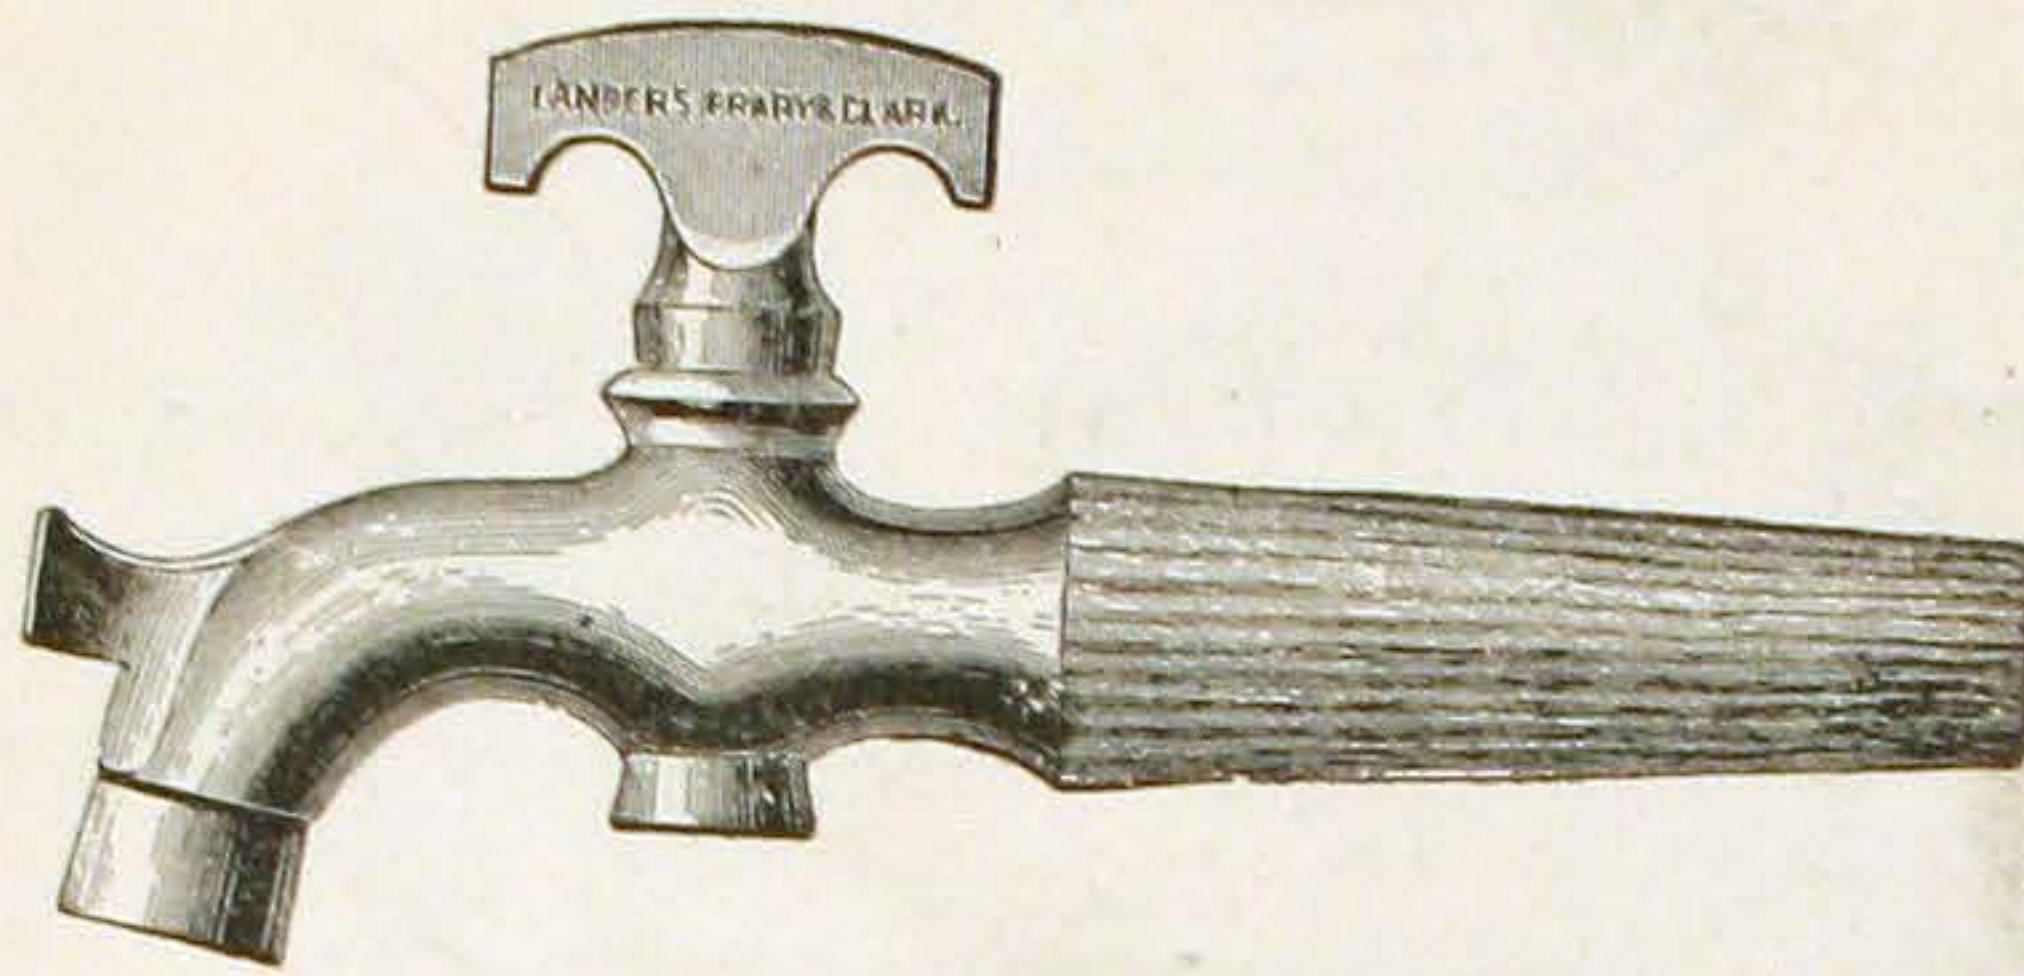

They are quickly and easily inserted or removed, by placing in position and driving in or out with a hammer, it not being necessary to remove the bolt or shaft.

Per gross, pairs.

No. 1 Anti-Rattler and Bolt Holder, \$22.00
No. 2 Anti-Rattler, 18.00
One dozen pairs in a box.

UNIVERSAL FOOD CHOPPERS

945

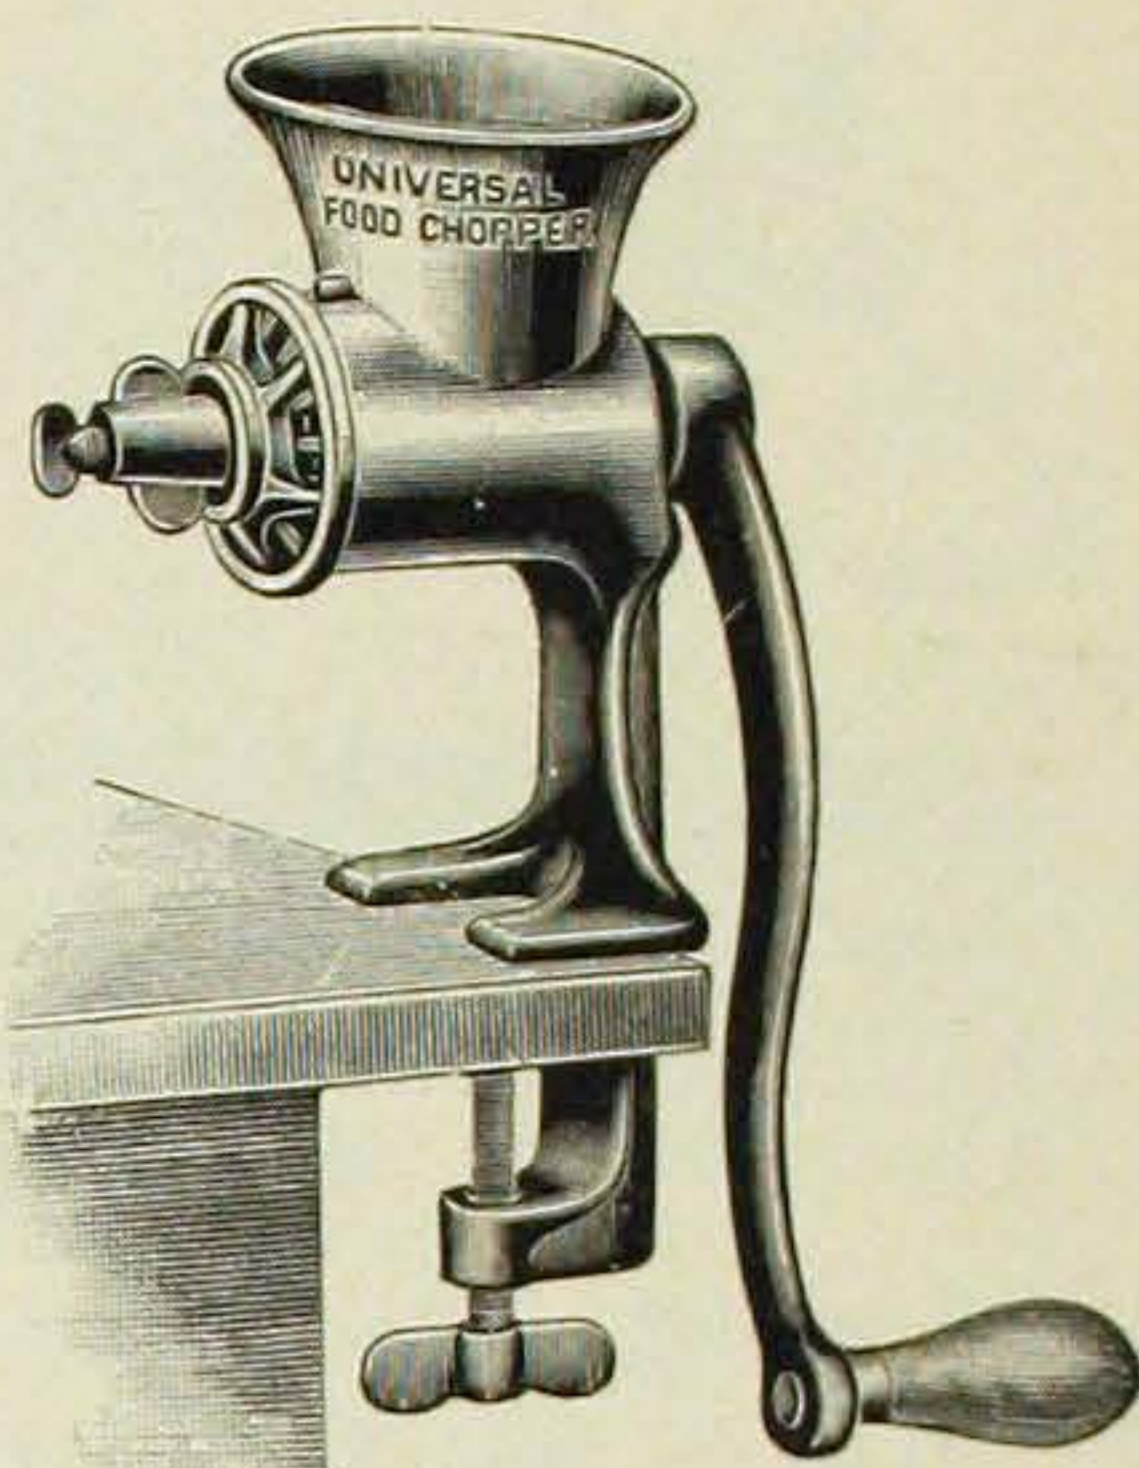

The Universal Food Choppers will chop all kinds of meat, raw or cooked, and all kinds of vegetables and fruit into clean-cut uniform pieces, as fine or coarse as wanted, and with great rapidity.

No. 1

No. 2

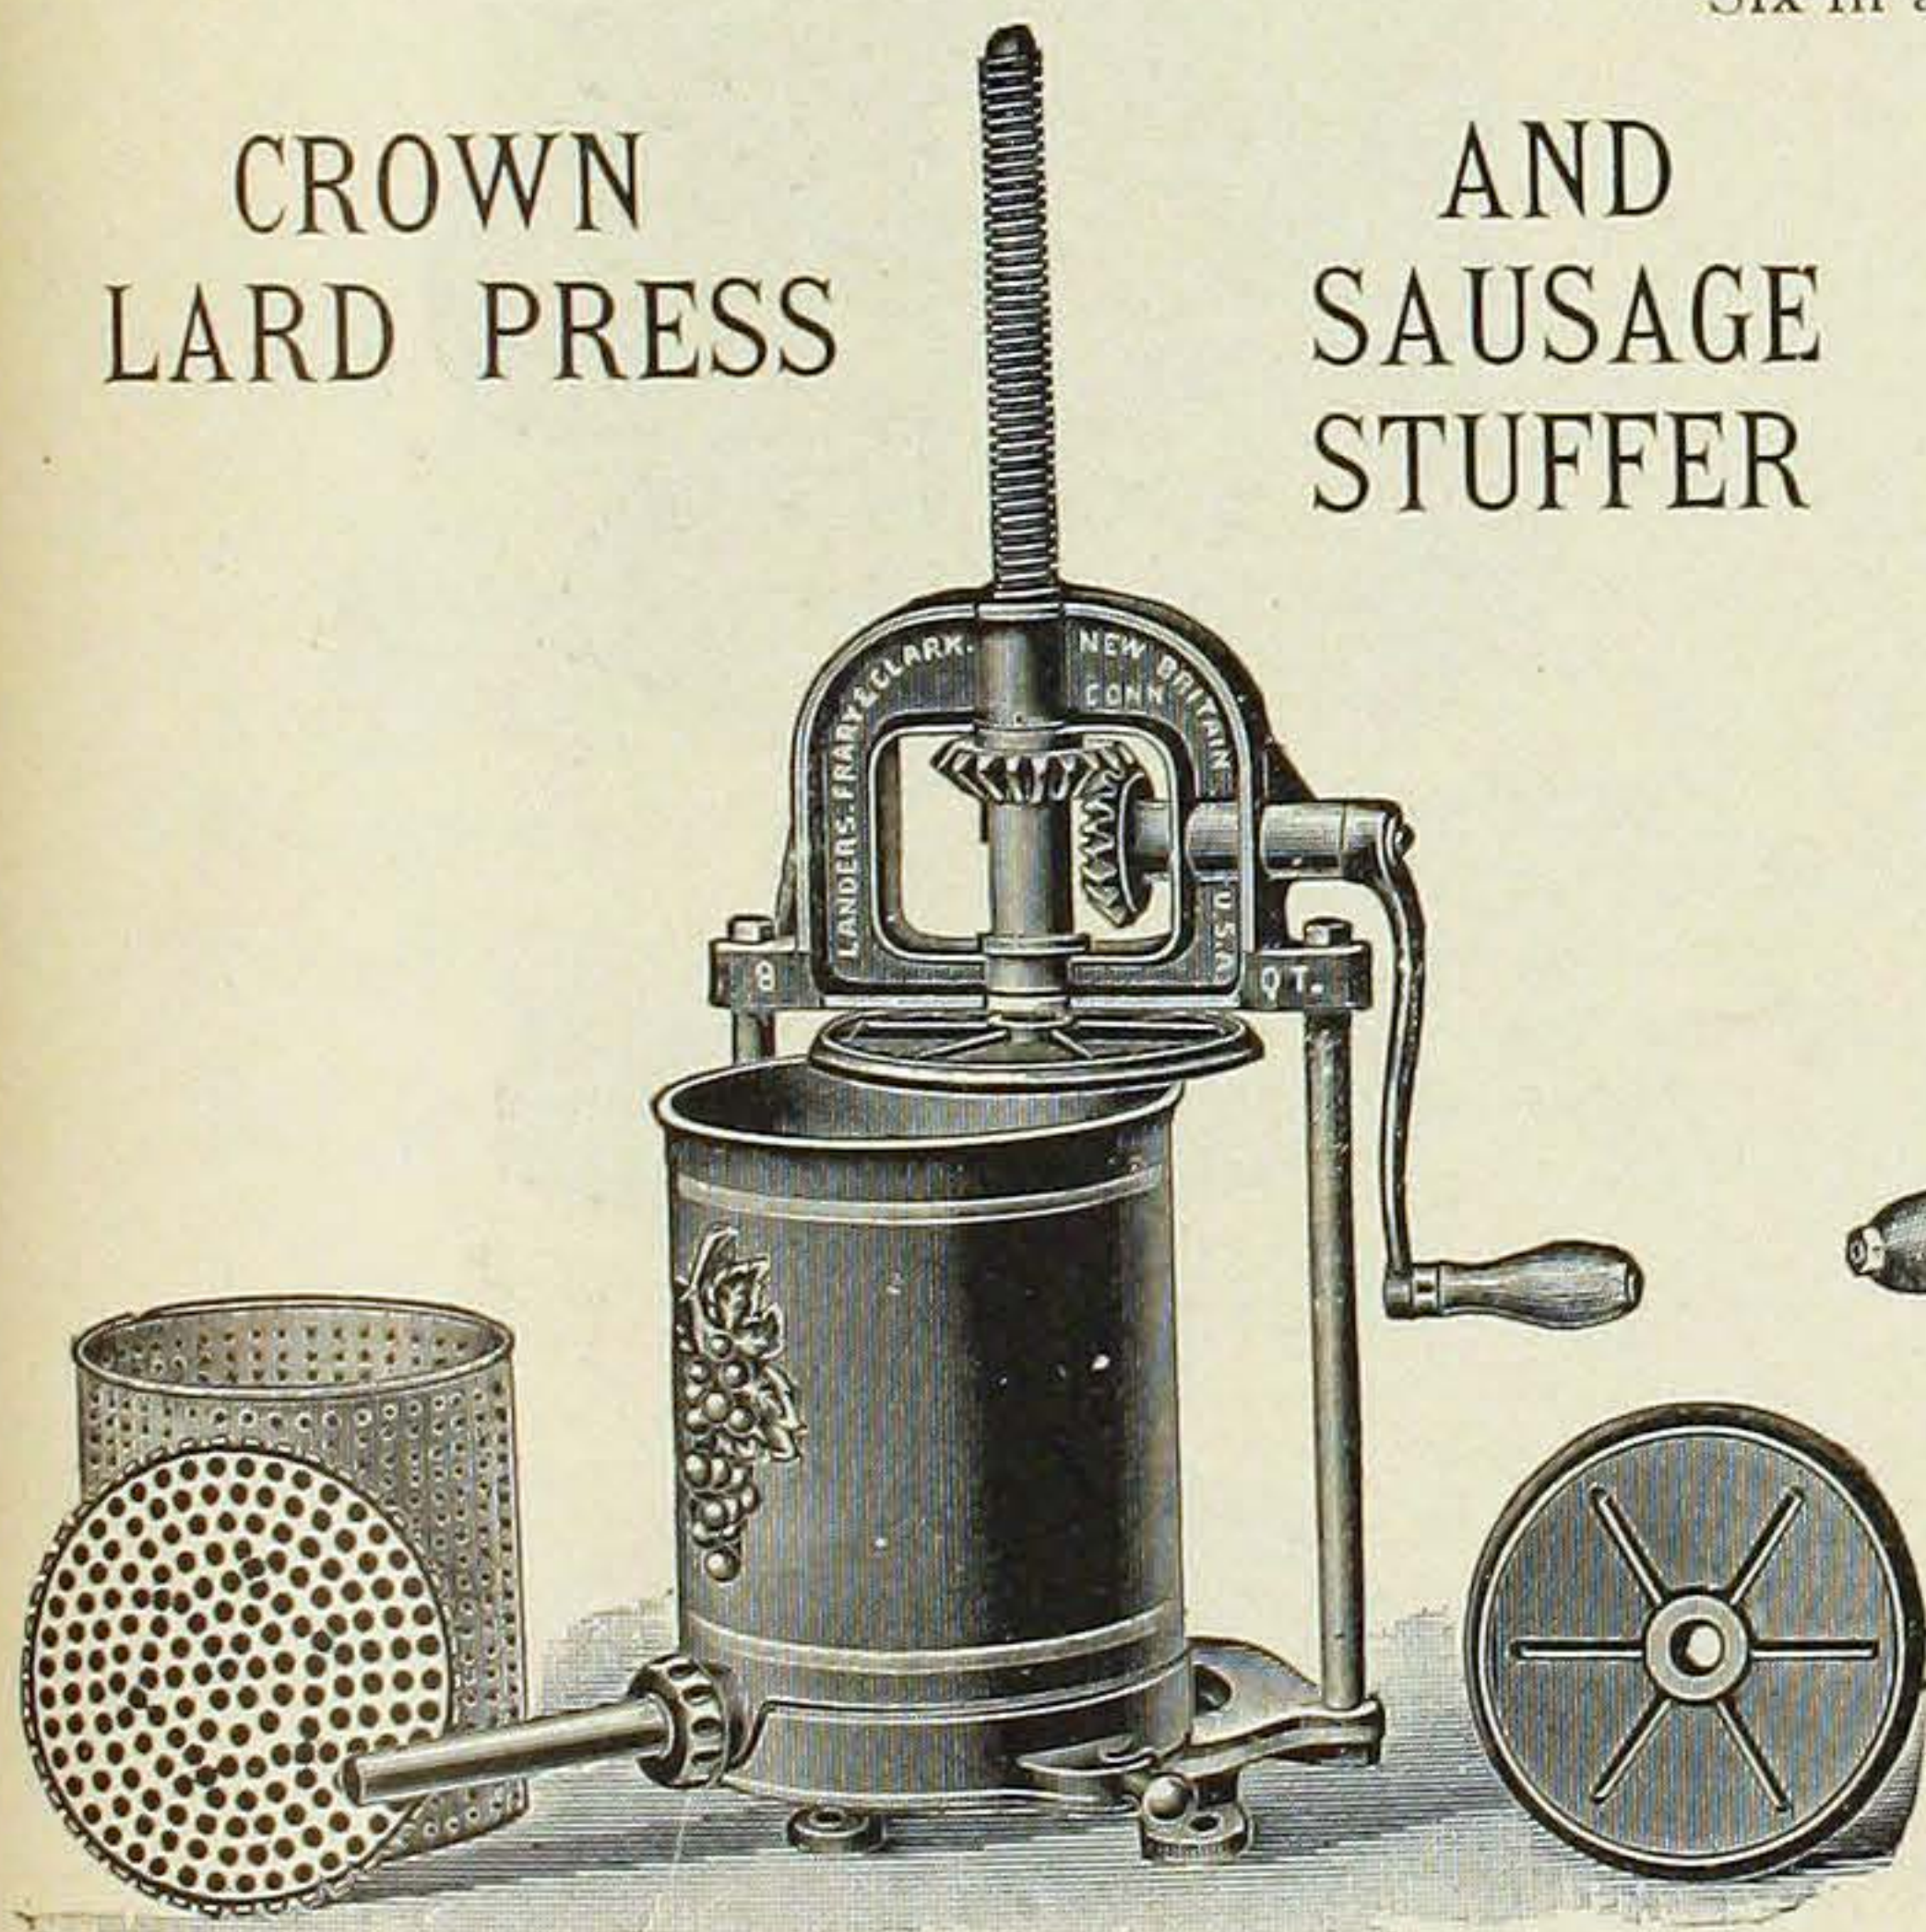

No. 3

- No. 1 Small; chops 2 pounds per minute; diameter of Hopper, $3 \times 2\frac{1}{2}$ inches; diameter of Barrel, 2 inches; weight, 4 pounds, each, \$2.00
- No. 2 Medium; chops $2\frac{1}{2}$ pounds per minute; diameter of Hopper 4×3 inches; diameter of Barrel, 2 inches; weight, $4\frac{3}{4}$ pounds, each, 2.25
- No. 3 Large; chops 3 pounds per minute; diameter of Hopper, 5×4 inches; diameter of Barrel, $2\frac{3}{8}$ inches; weight, 8 pounds, each, 3.00

Nos. 1 and 2 furnished with three Cutters each, Coarse, Medium, and Fine. No. 3 has four Cutters. Six in a case.

CROWN LARD PRESS

AND SAUSAGE STUFFER

The iron cylinder is removable and reversible. The hinged base on which the iron cylinder rests, shown partly swung open in the cut, can be swung open so that it is entirely clear of the upper plate. The great advantage of this in filling or refilling the press without having to handle the cylinder will be apparent.

JAPPANED AND ORNAMENTED

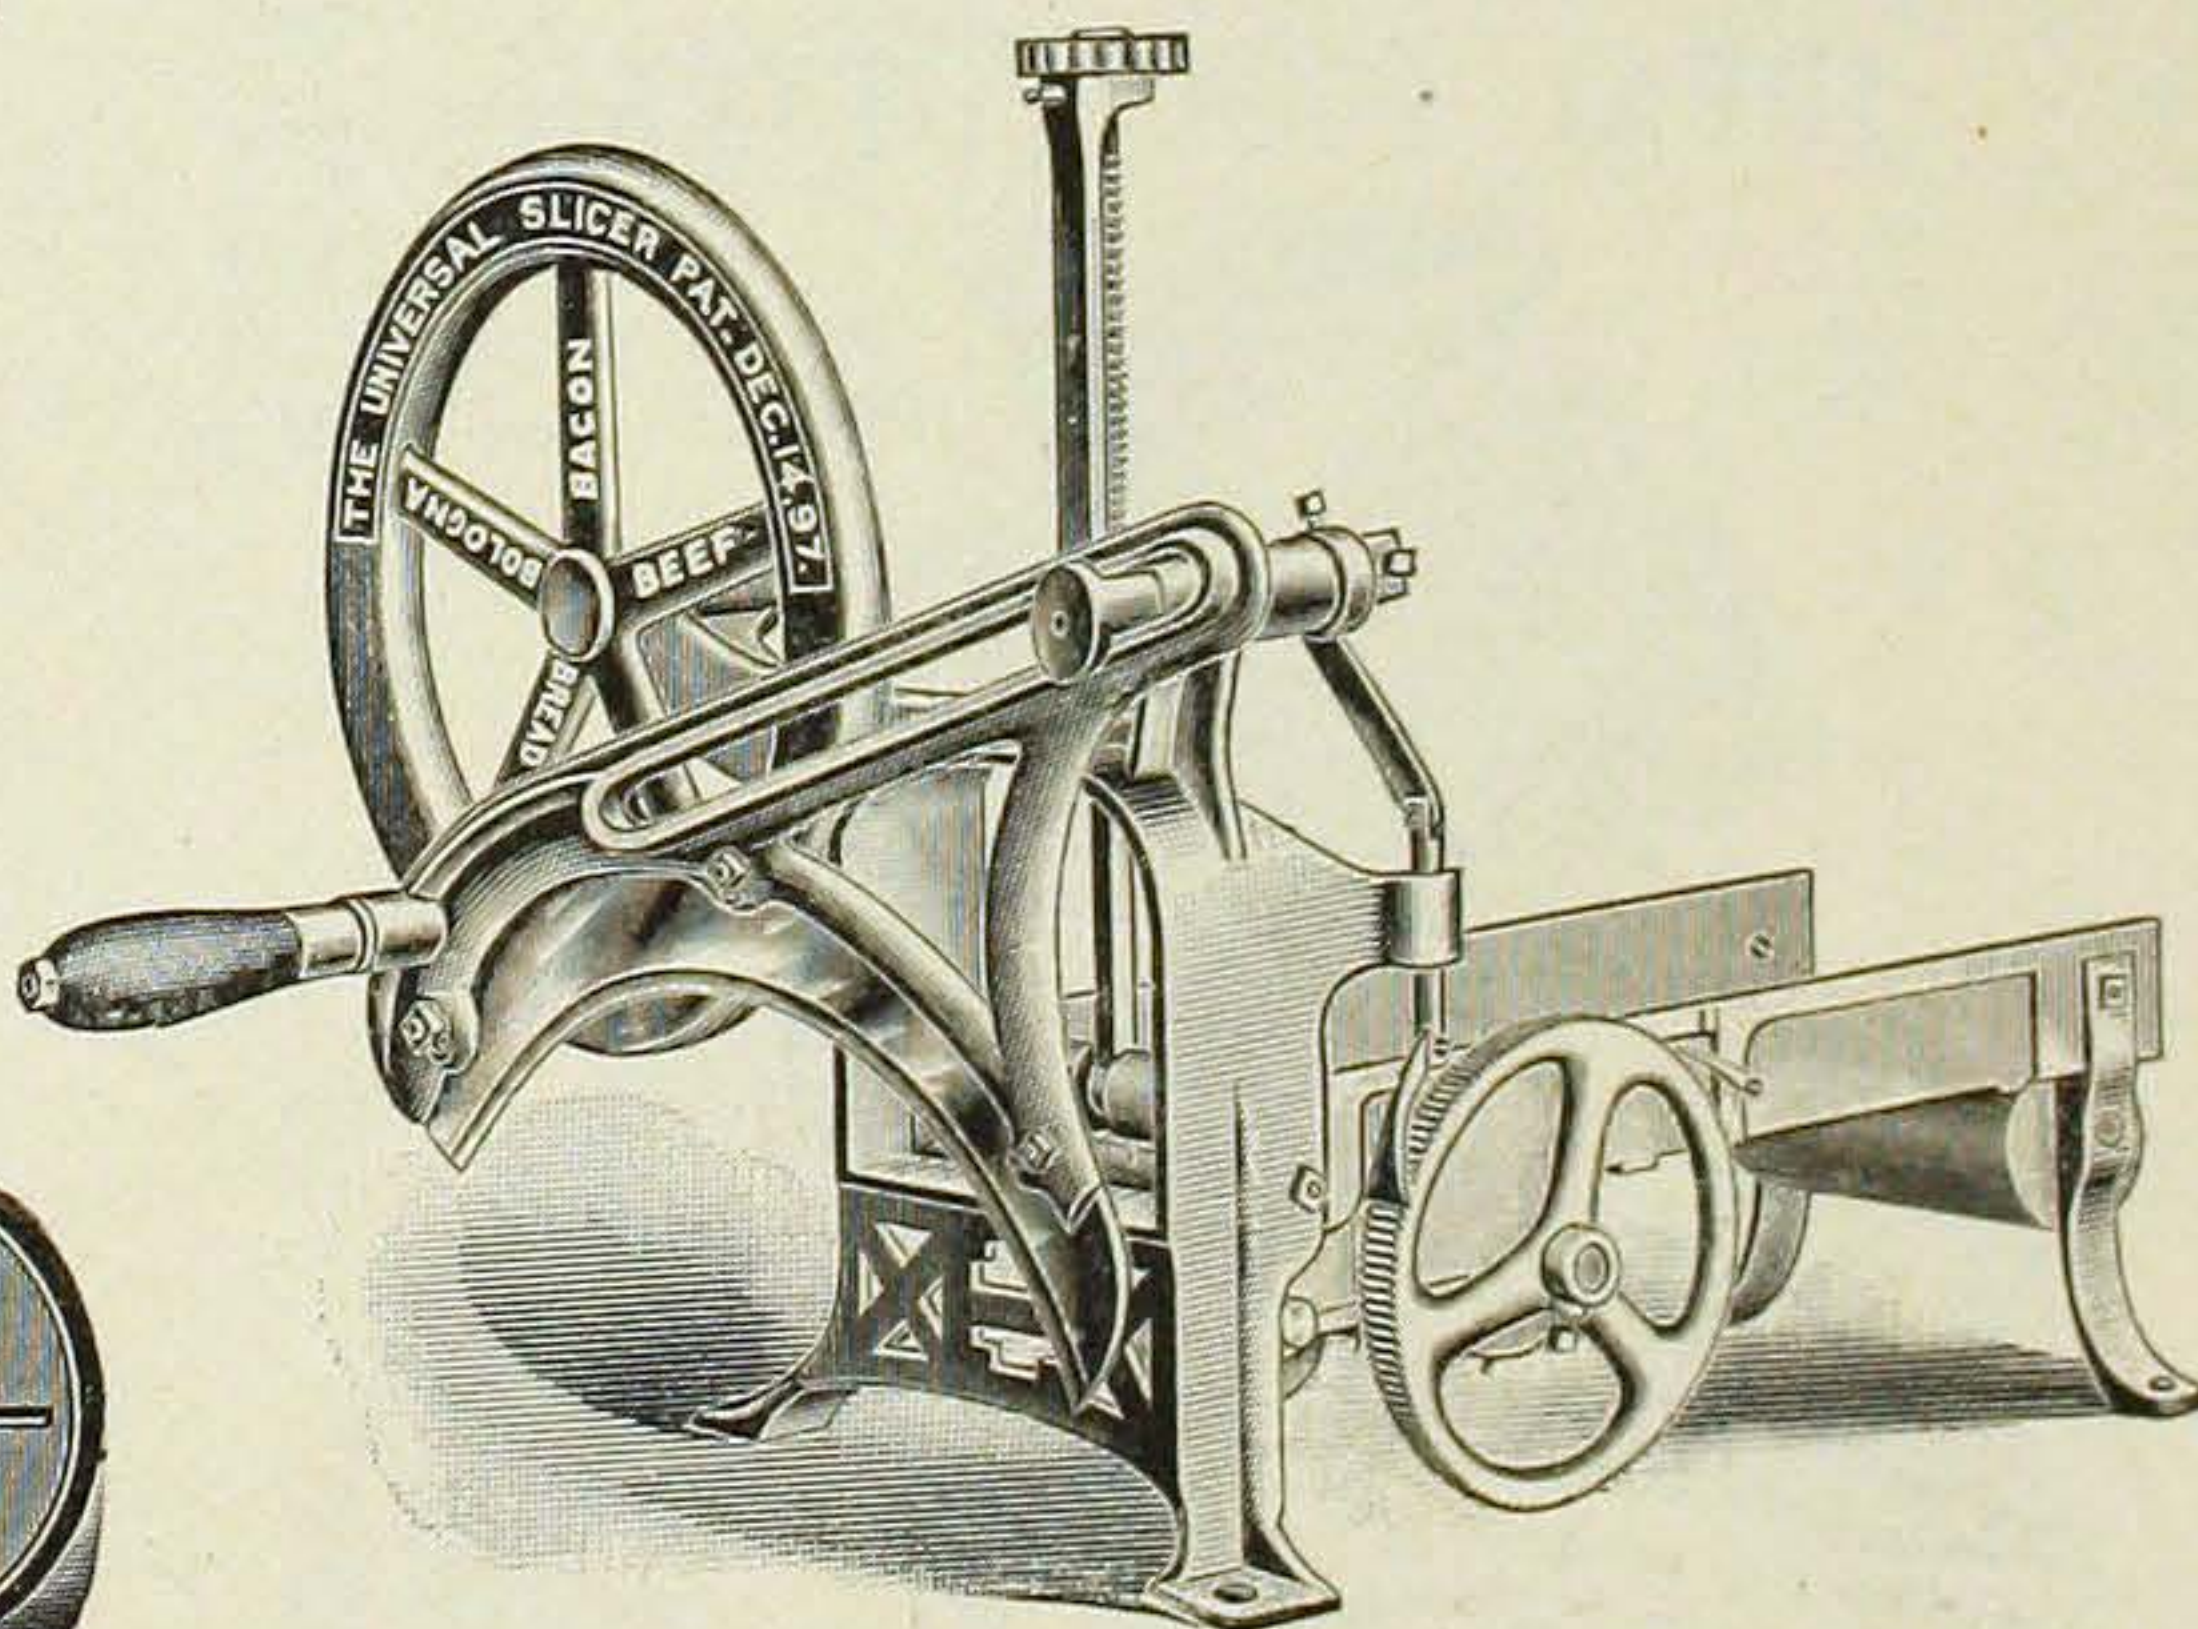

- No. 4 Four Quarts, each, \$5.00
No. 8 Eight Quarts, " 6.50

No. 610 " clamp, " "	3	36.00
No. 622 " feet, large size, "	4	48.00

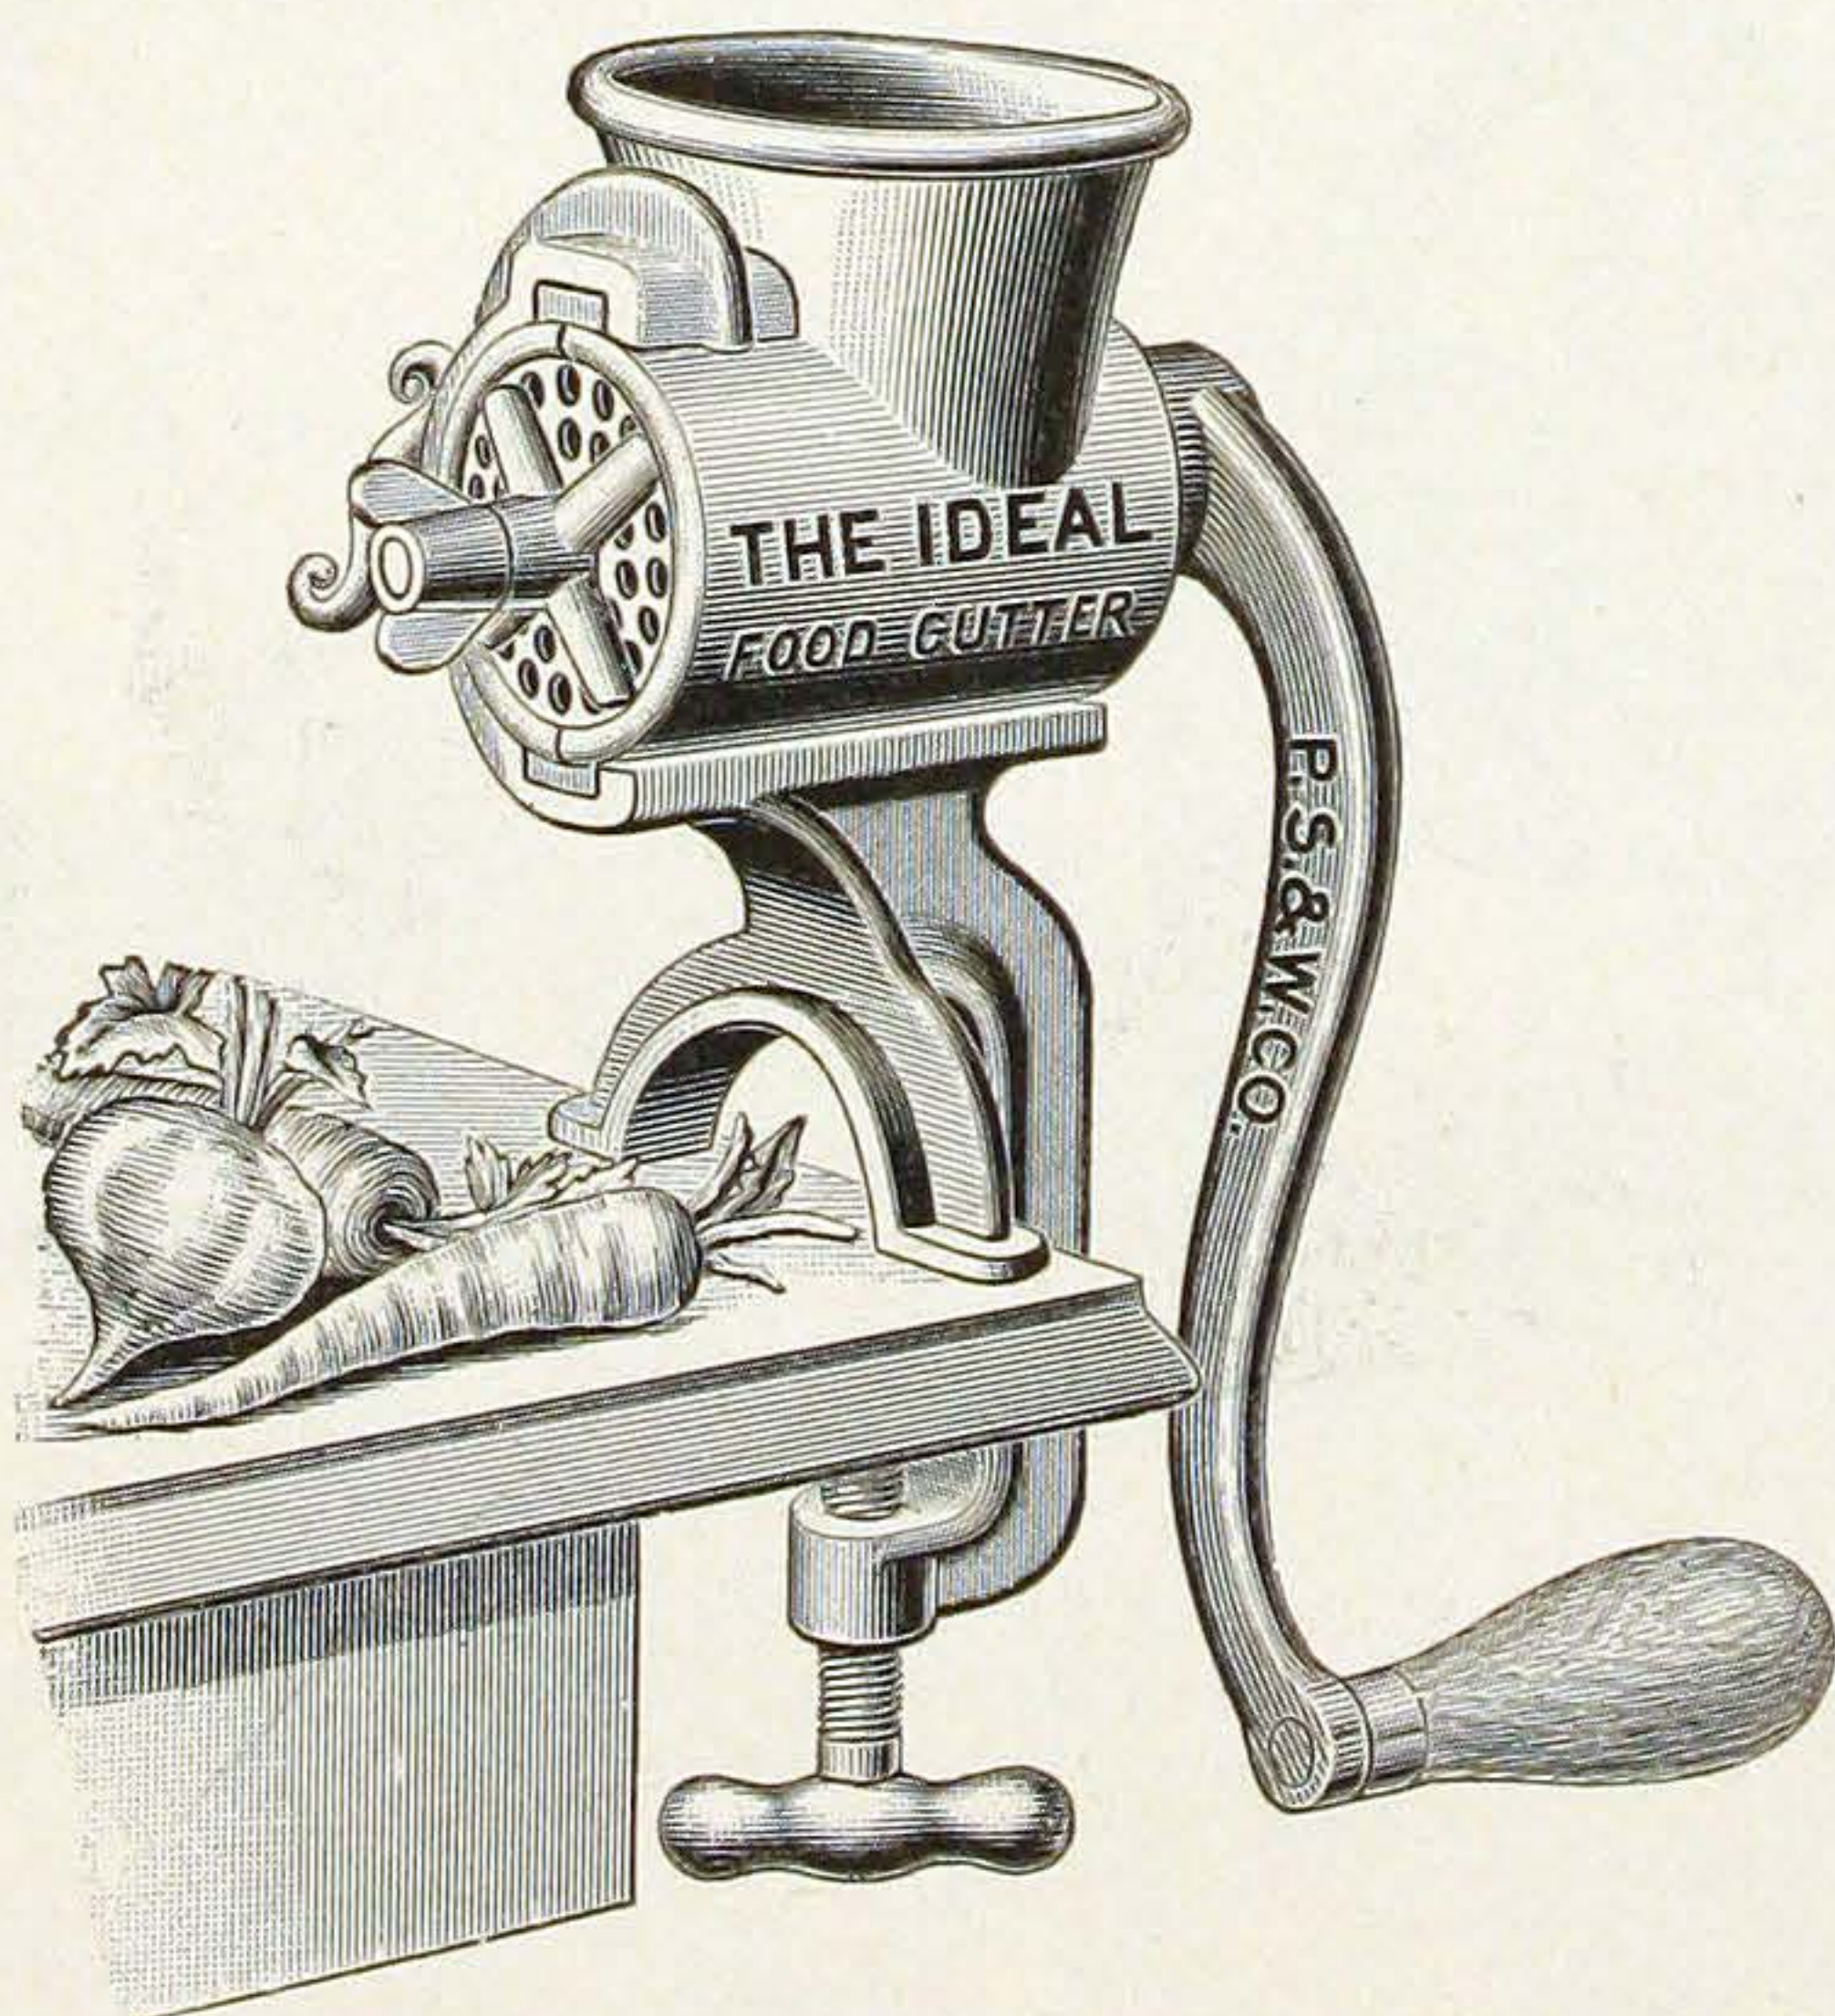

Half dozen in a case.

SIZE OF HOLES IN PLATES

The Standard or No. 1 size hole is best for most purposes. This size is always sent unless otherwise ordered. Those who wish to chop hash, prefer No. 3. For cabbage and other vegetables and for salads, No. 4 is preferred. For potted ham and for reducing any meat to a pulp, No. 0 is necessary. Other sizes than No. 1, if wanted, must be specially ordered.

IDEAL FOOD CUTTERS

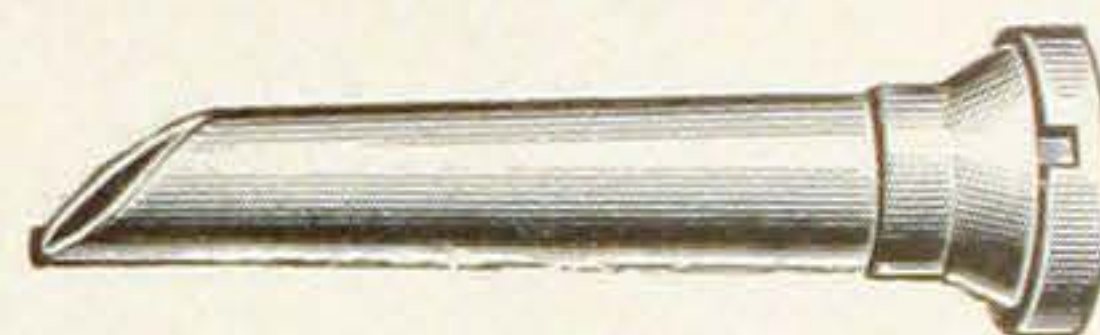

CUTS MEAT, FRUIT, VEGETABLES, CRACKERS, AND CHEESE, COARSE OR FINE

Cutting Parts Steel. All parts tinned. It works easily and rapidly.

No.	Cuts 2 pounds meat per minute,	Per dozen.

BARNEY & BERRY'S SKATES

NO. A

It is as light as consistent with strength, and the quality of material used in its construction insures the greatest durability. Upper parts are of crucible steel. Blades of cast steel, polished, and of same thickness and rock as higher grade skates.

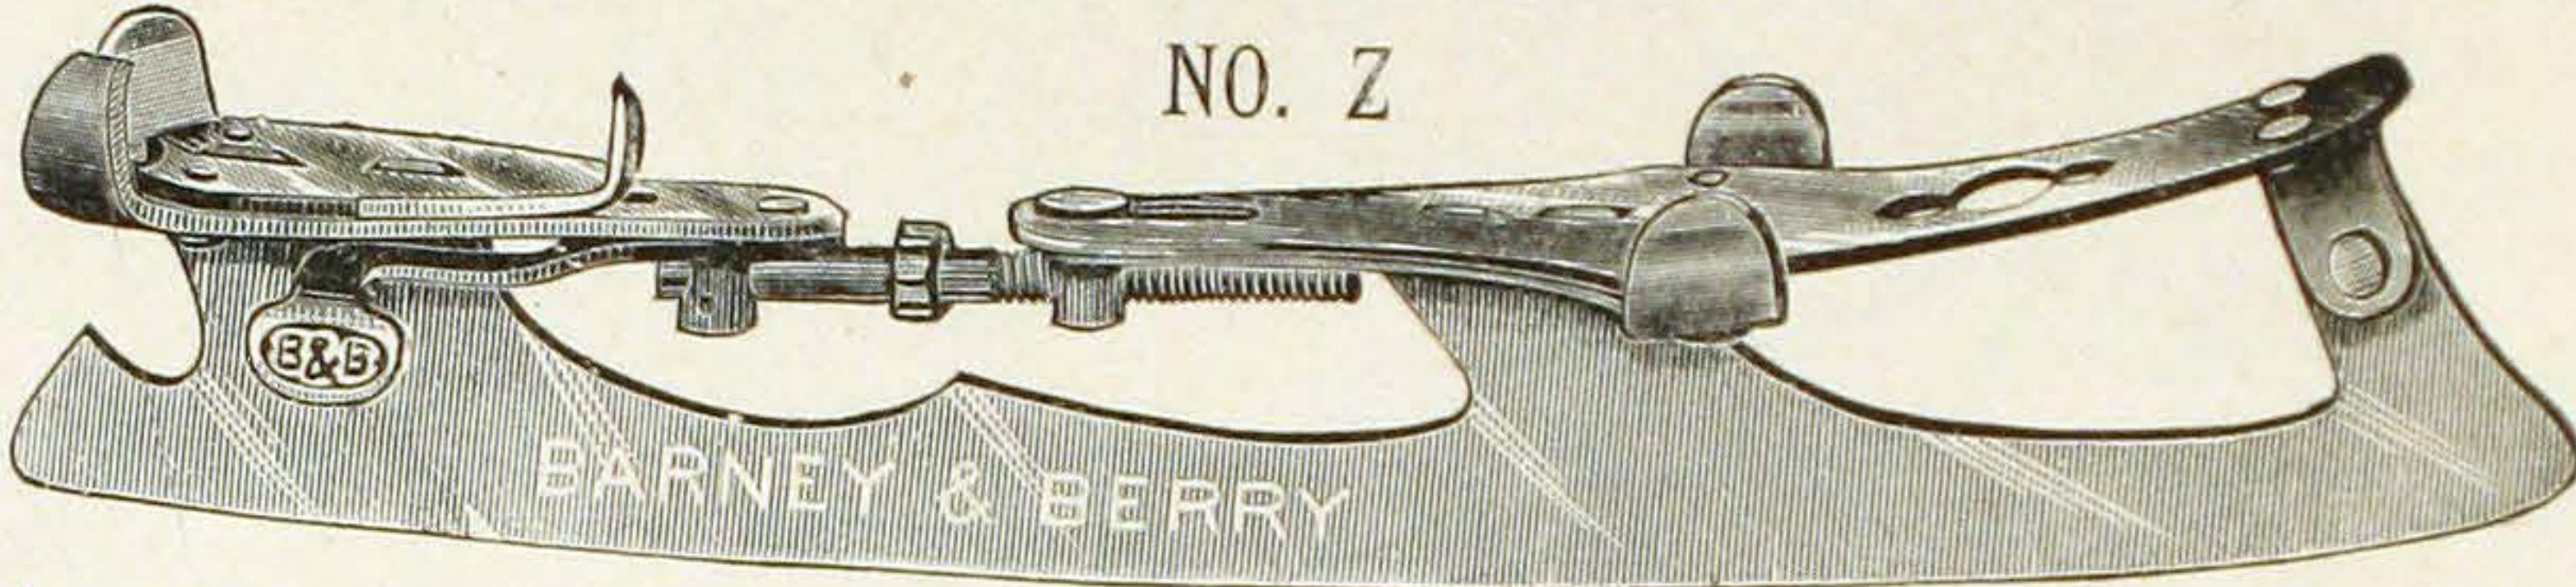

SIZES, 8, 8½, 9, 9½, 10, 10½, 11, 11½, AND 12 INCHES
per pair, \$0.60

Grade 0, Bright,

Grade 2, Nickeled,

per pair, \$1.00

NO. Z

This Skate is thoroughly made, and durable. Adjusted by single threaded screw. Foot plates, heel plates, clamps, and brackets of crucible steel. Blades of solid steel, hardened.

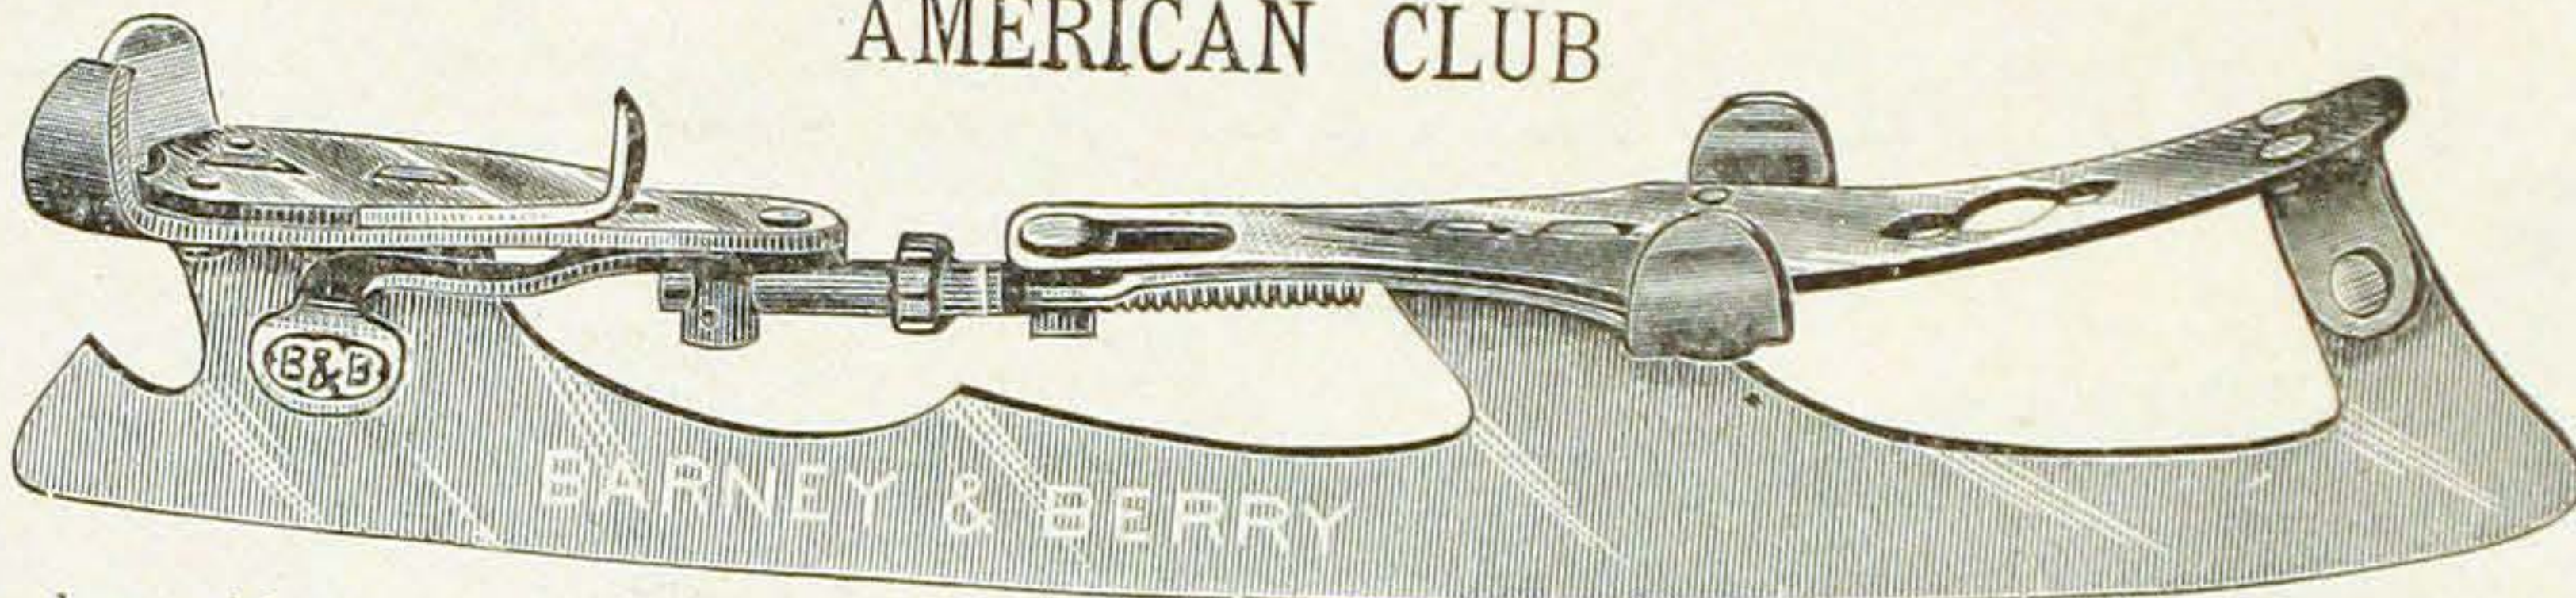

SIZES, 8, 8½, 9, 9½, 10, 10½, 11, 11½, AND 12 INCHES
per pair, \$1.50

Grade 0, Bright,

Grade 2, Nickeled,

per pair, \$2.00

AMERICAN CLUB

This very complete side lever Skate, which for many years has been constantly increasing in popularity, has been greatly improved of late.

SIZES, 8, 8½, 9, 9½, 10, 10½, 11, 11½, AND 12 INCHES
per pair, \$2.50

Grade 2, Nickeled,

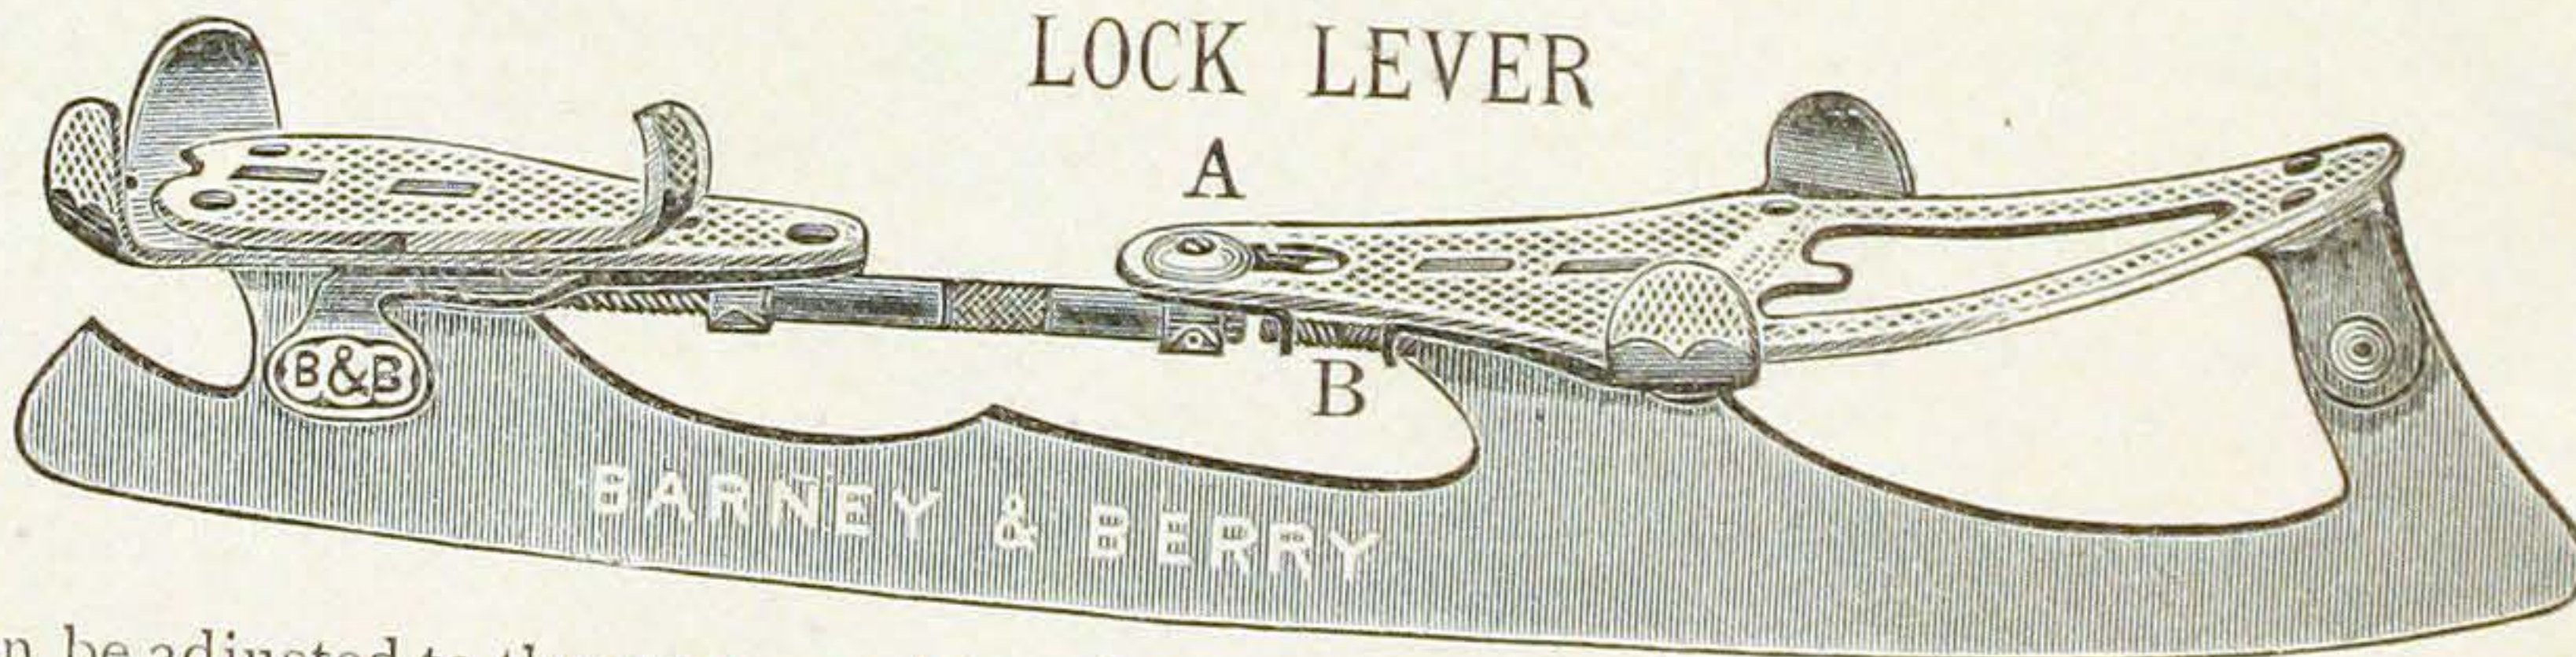

“ 3, Polished and Nickeled,

Grade 5, Polished and Nickeled, with Diamond Toe,

per pair, \$5.00

Grades 3 and 5 furnished with extra wide blades, at \$1.00 additional, per pair.

LOCK LEVER

This skate can be adjusted to the proper position sideways upon the shoe, whatever the style or shape, by means of inside toe-clamp, which is made in two parts, connected by right and left threaded screw, “B,” which shortens or lengthens clamp.

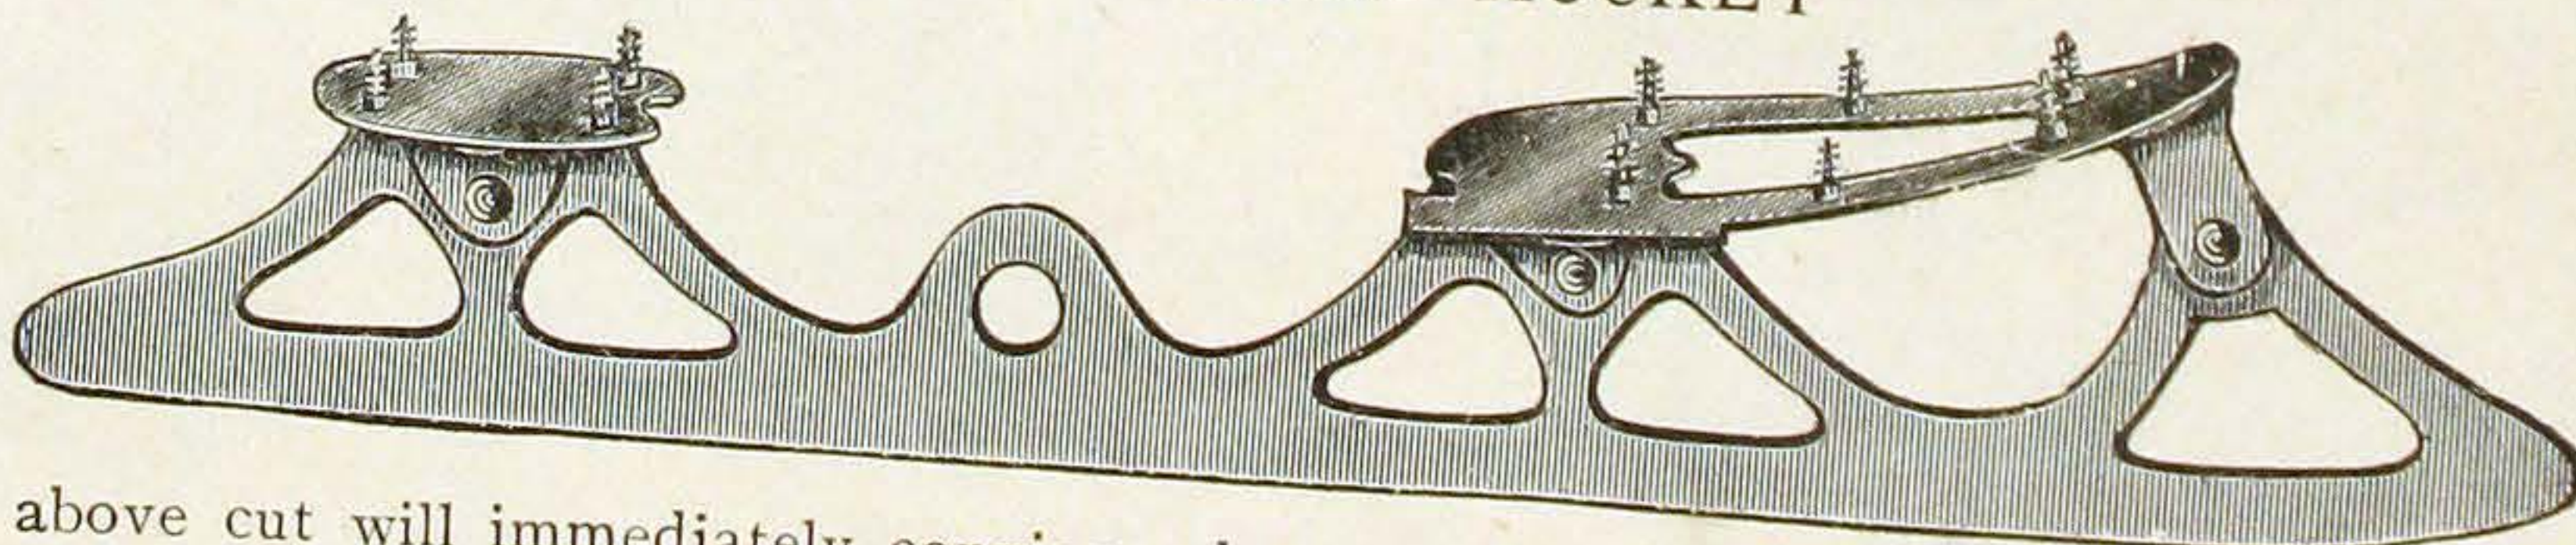

SIZES, 8, 8½, 9, 9½, 10, 10½, 11, 11½, AND 12 INCHES

Grade 3, Polished and Nickeled, per pair, \$5.00

Grade 5, Polished and Nickeled, with Diamond Toe, per pair, \$6.00

Furnished with extra wide blades (5/16 inch), at \$1.00 additional, per pair.

SAFETY EDGE HOCKEY

A glance at above cut will immediately convince skaters of the superiority of design of this skate. All Hockey skates heretofore in general use have a very wide open space between stanchions, in which Hockey sticks catch, tripping the player, and through which the puck passes when he attempts to stop it with skate, and blade between stanchions is very narrow and thin without reinforcement, which prevents high temper without extreme tendency to break. In the construction of these Hockey blades all these difficulties are avoided by several braces, which strengthen without adding weight; the blades are of high temper.

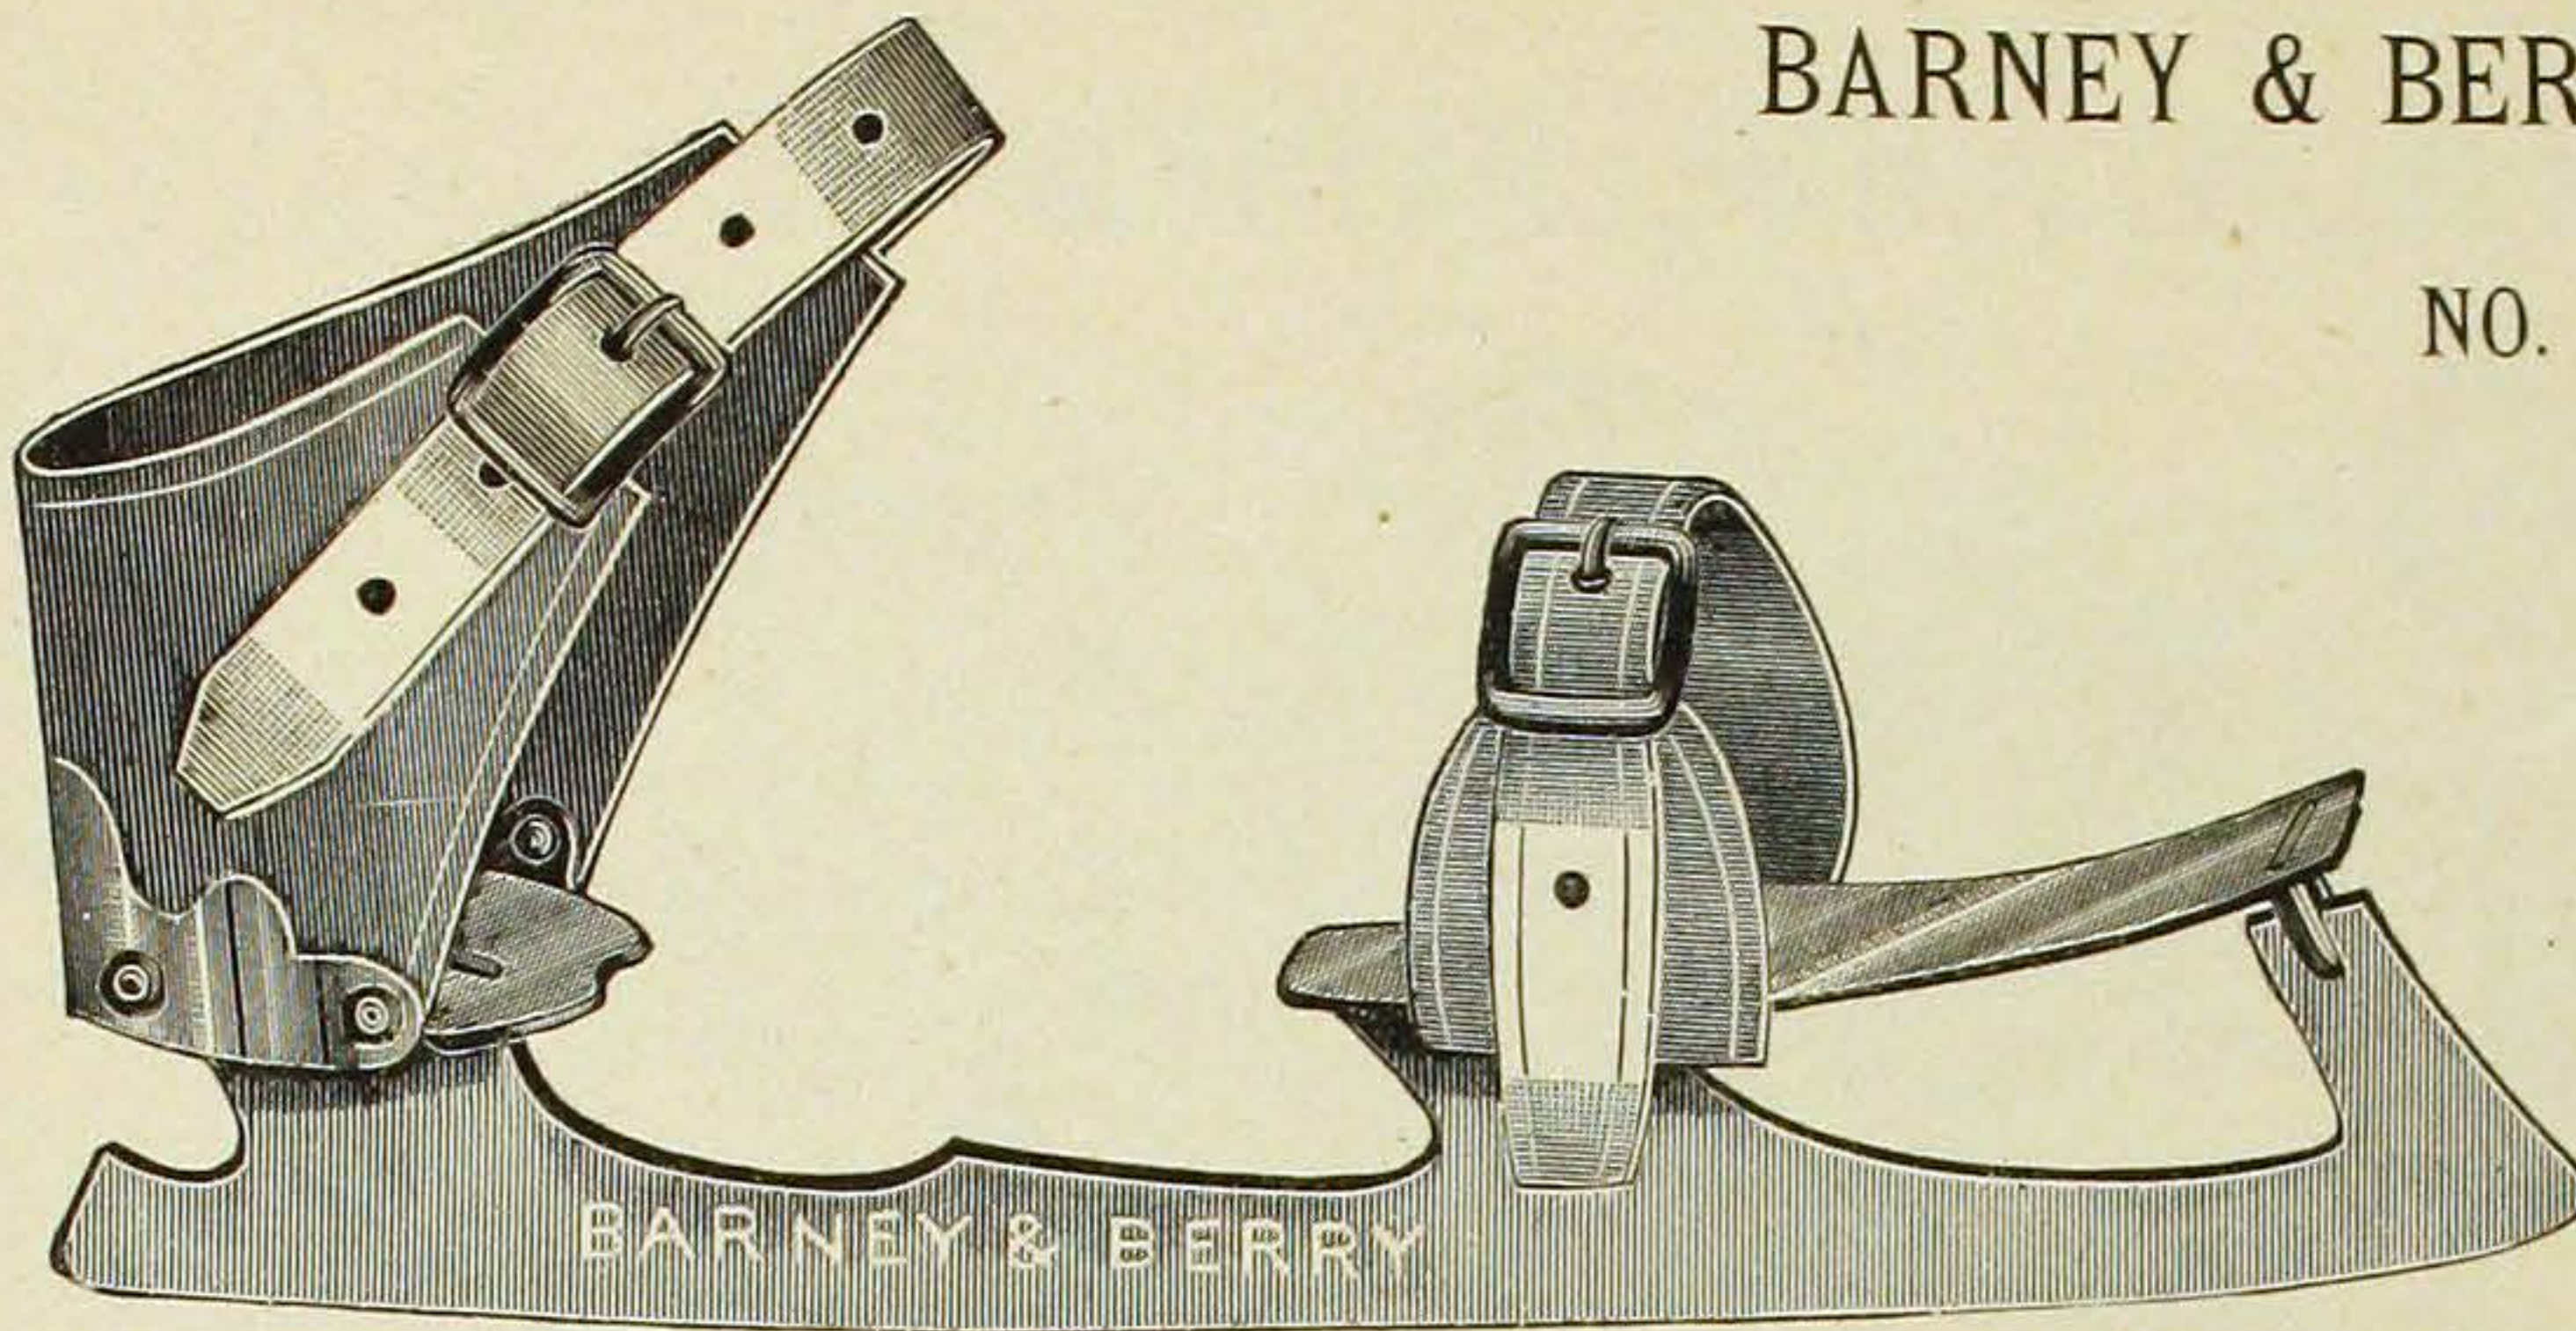

SIZES, 9, 9½, 10, 10½, 11, 11½, AND 12 INCHES

Grade 3, Polished and Nickeled,

per pair, \$5.00

NO. 2L

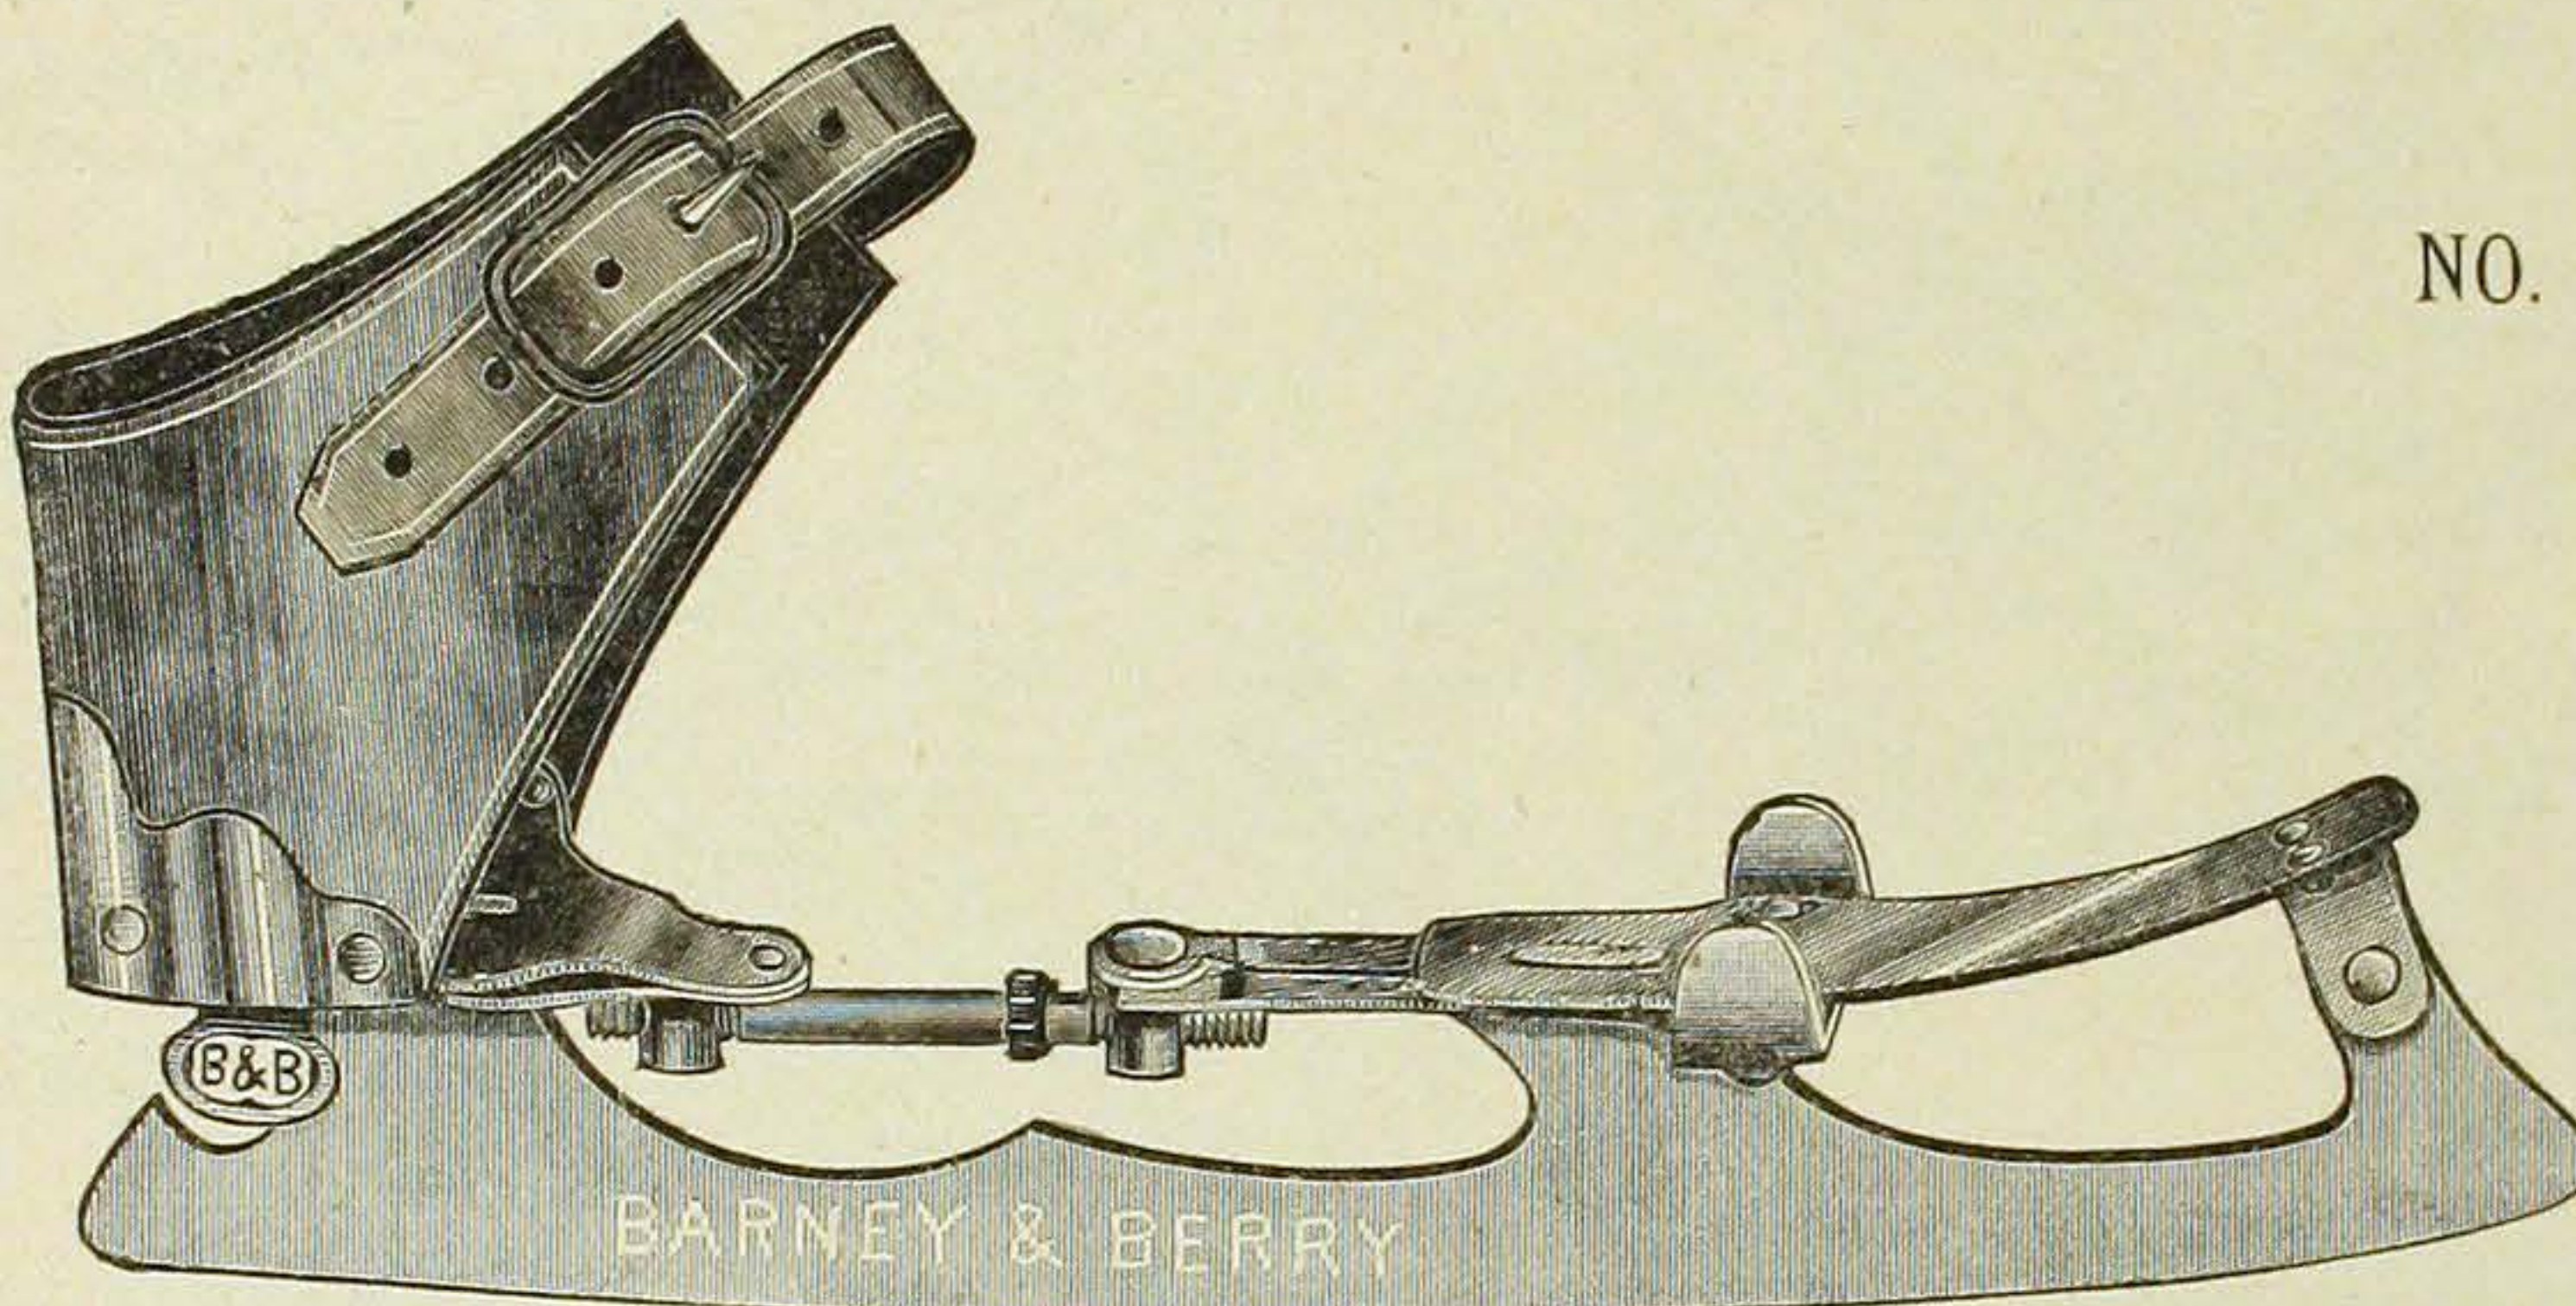

Foot Plates of crucible Steel, bright finish. Blades of cast steel, polished. Russet leather and toe straps.

SIZES, 7, 7½, 8, 8½, 9, 9½, 10, AND 10½ INCHES

Per pair, \$1.00

NO. LA

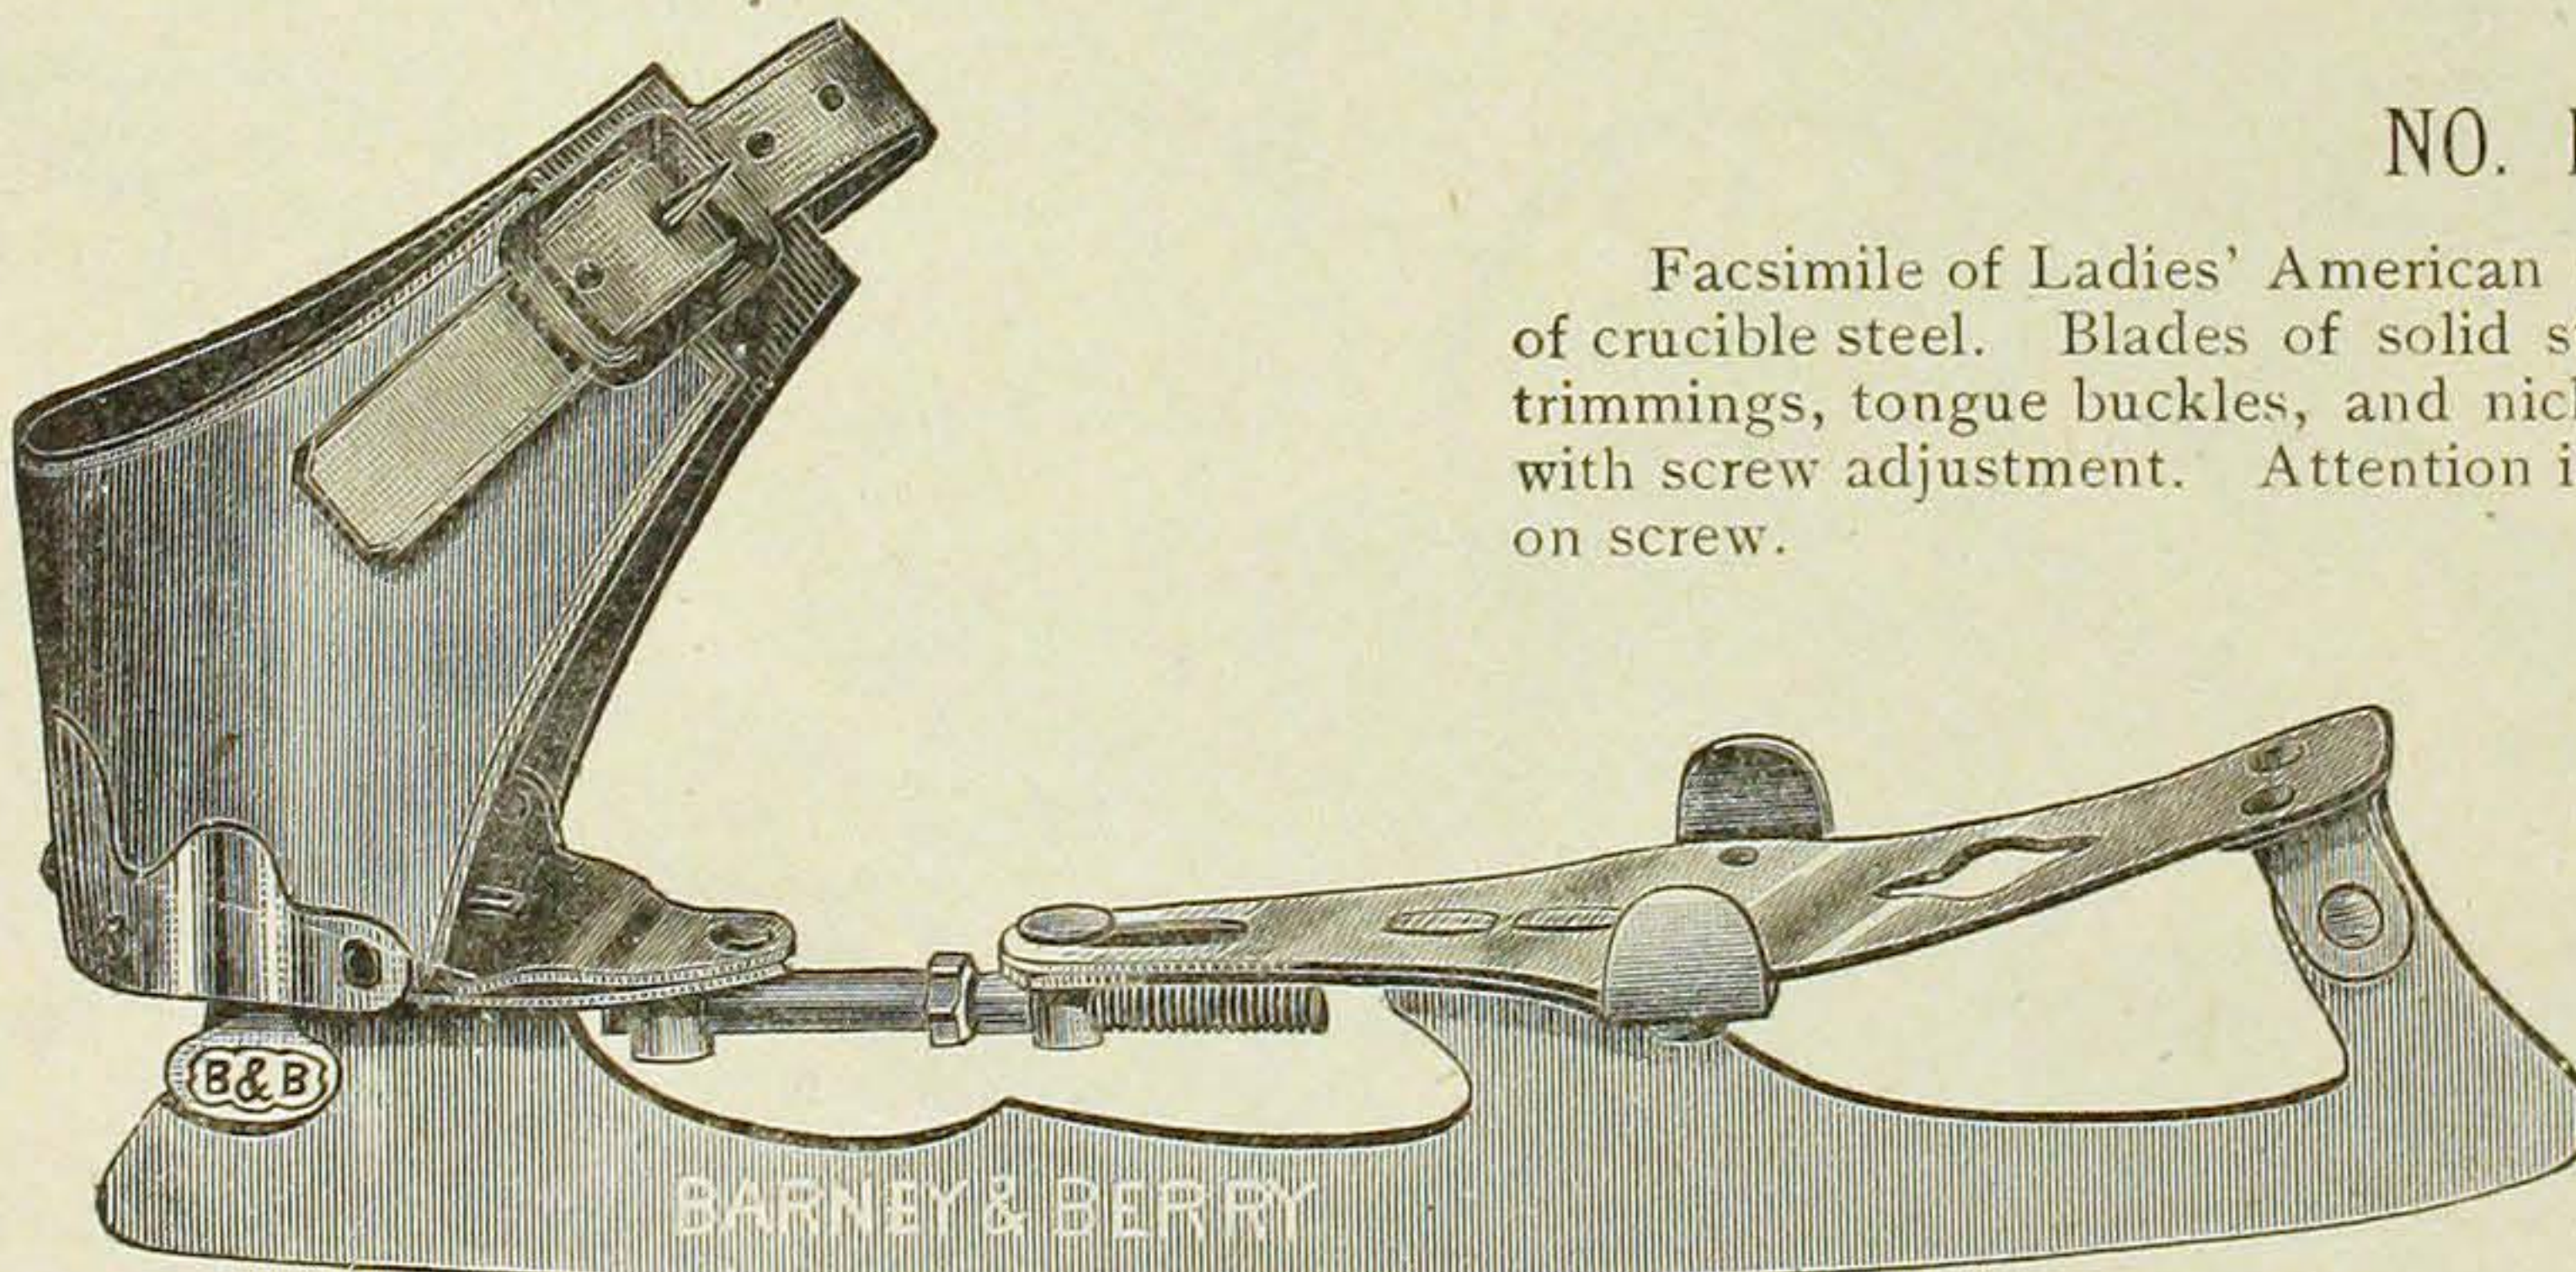

Is the same as No. A shown and described on page 990 except that it has a russet grain leather strap with nickel-plated band at heel.

SIZES 8, 8½, 9, 9½, 10, 10½, AND 11 INCHES

Grade 0, Bright, per pair, \$1.25

Grade 2, Nickeled, per pair, 1.65

NO. LZ

Facsimile of Ladies' American Club. All the upper parts are made of crucible steel. Blades of solid steel, hardened. Russet grain leather trimmings, tongue buckles, and nickeled heel bands. Operated by lever with screw adjustment. Attention is called to the very perfect knurl used on screw.

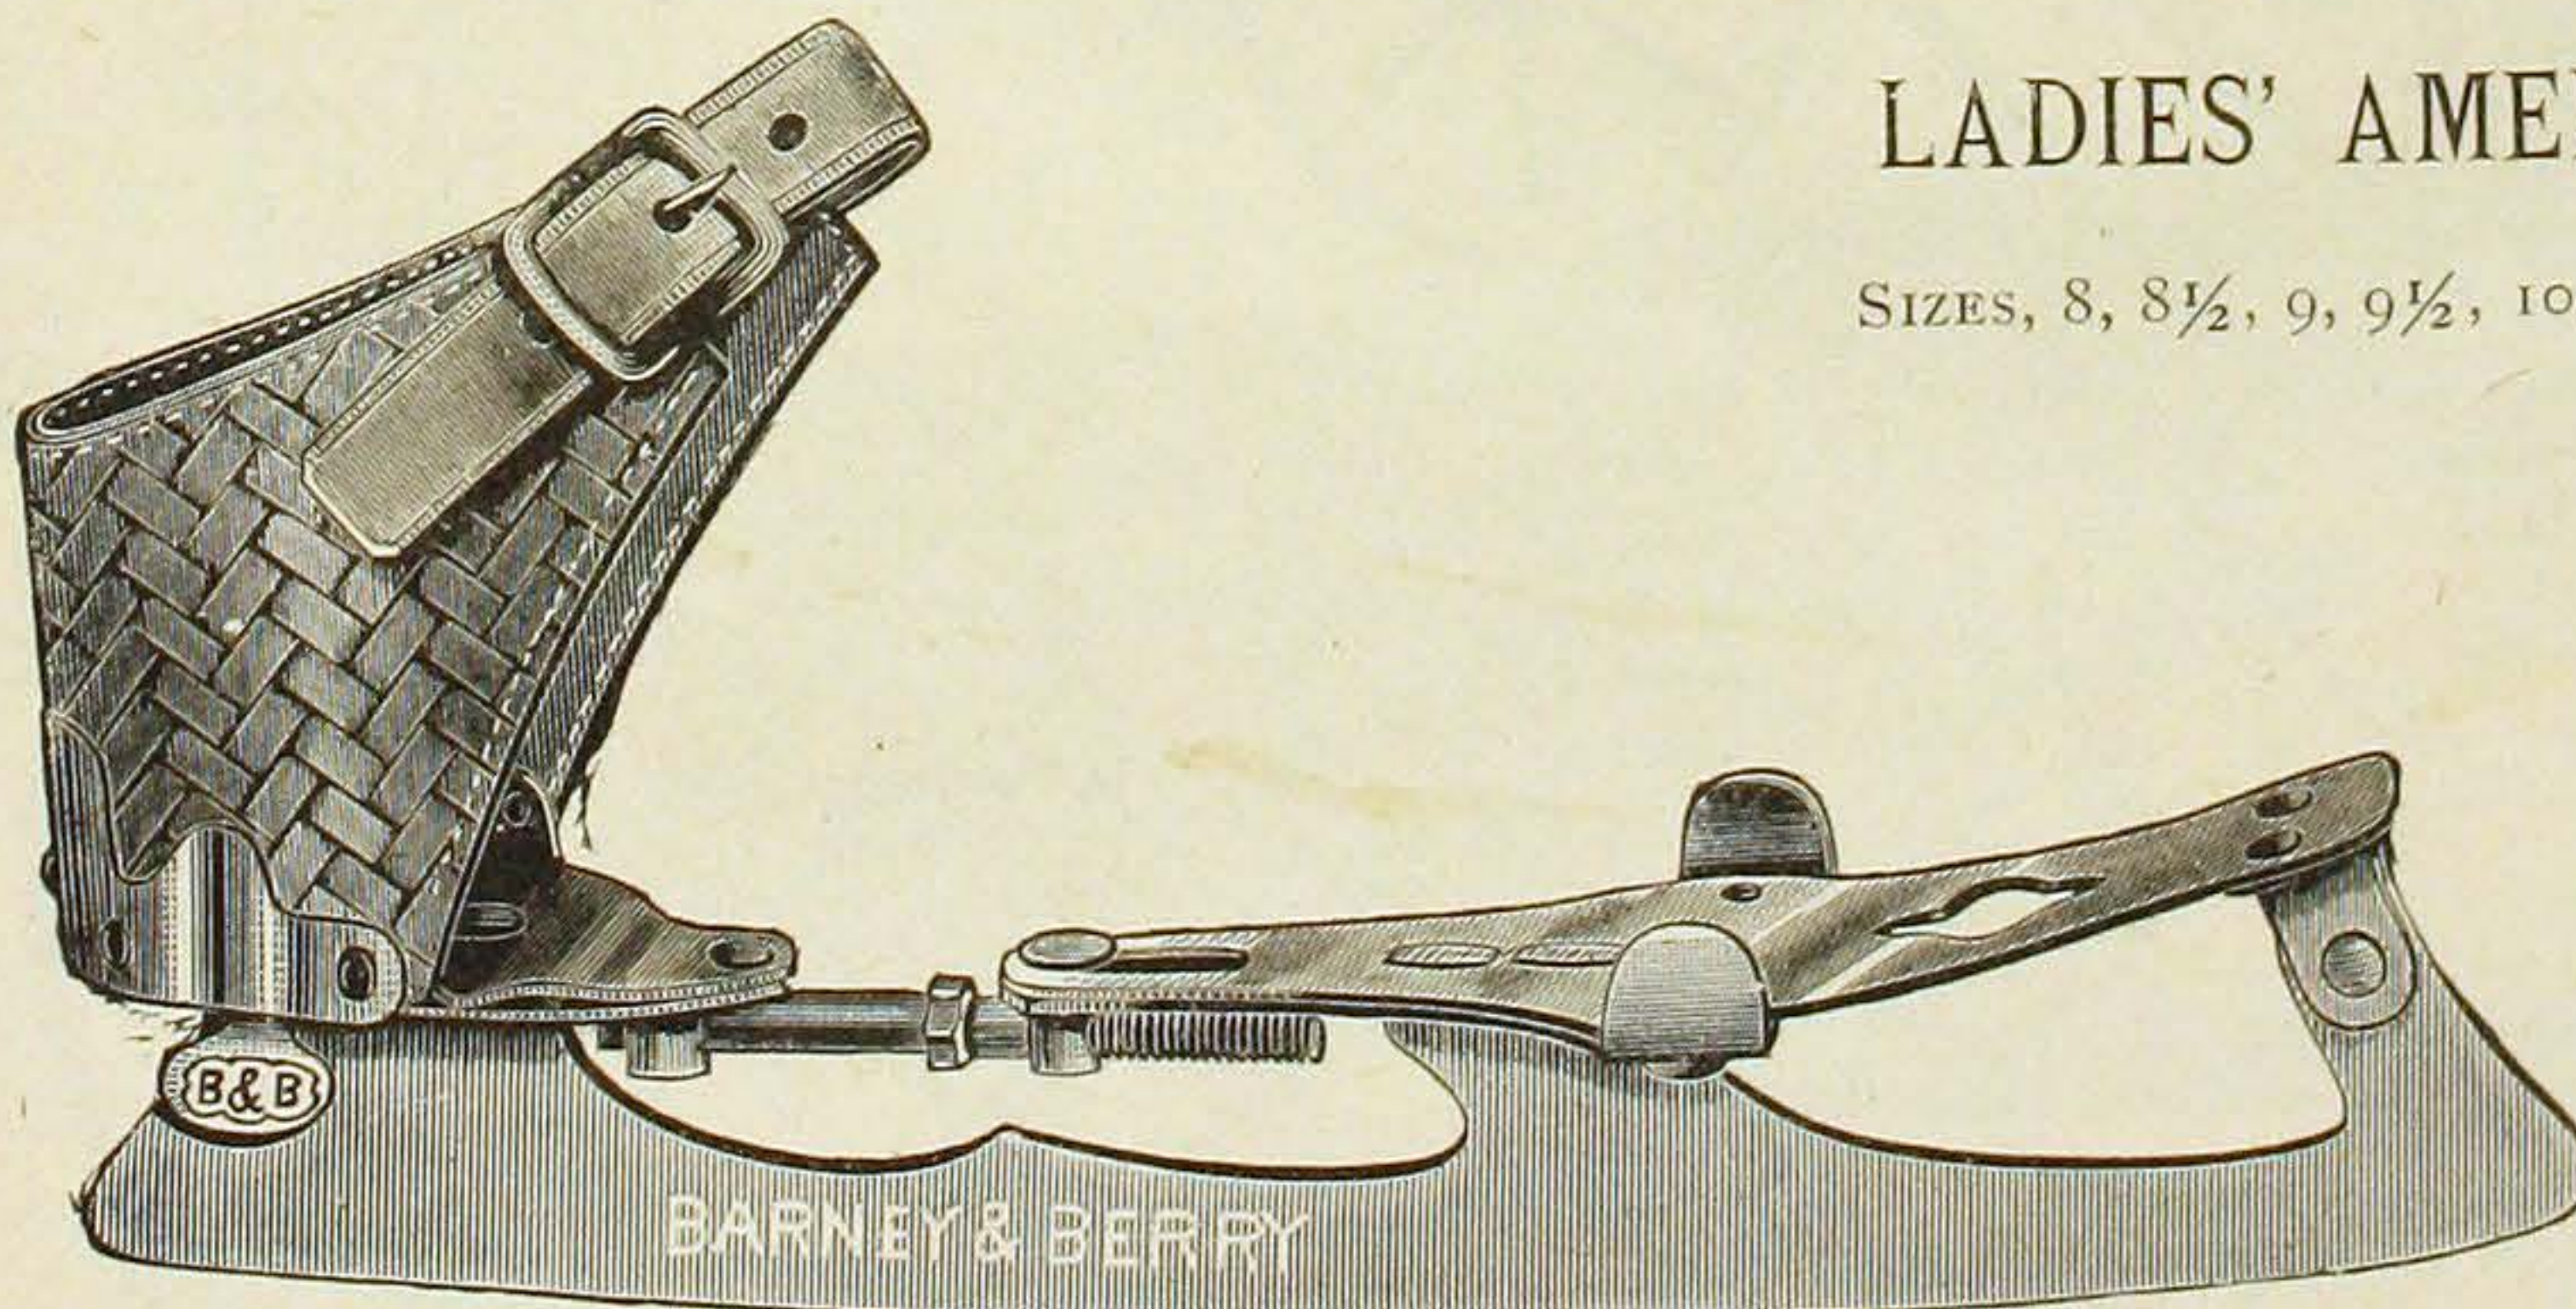

SIZES, 8, 8½, 9, 9½, 10, 10½, AND 11 INCHES

Grade 0, Bright, per dozen, \$2.50

Grade 2, Nickeled, per dozen, \$3.25

LADIES' AMERICAN CLUB

SIZES, 8, 8½, 9, 9½, 10, 10½, AND 11 INCHES

Grade 2, Nickeled, per pair, \$3.75

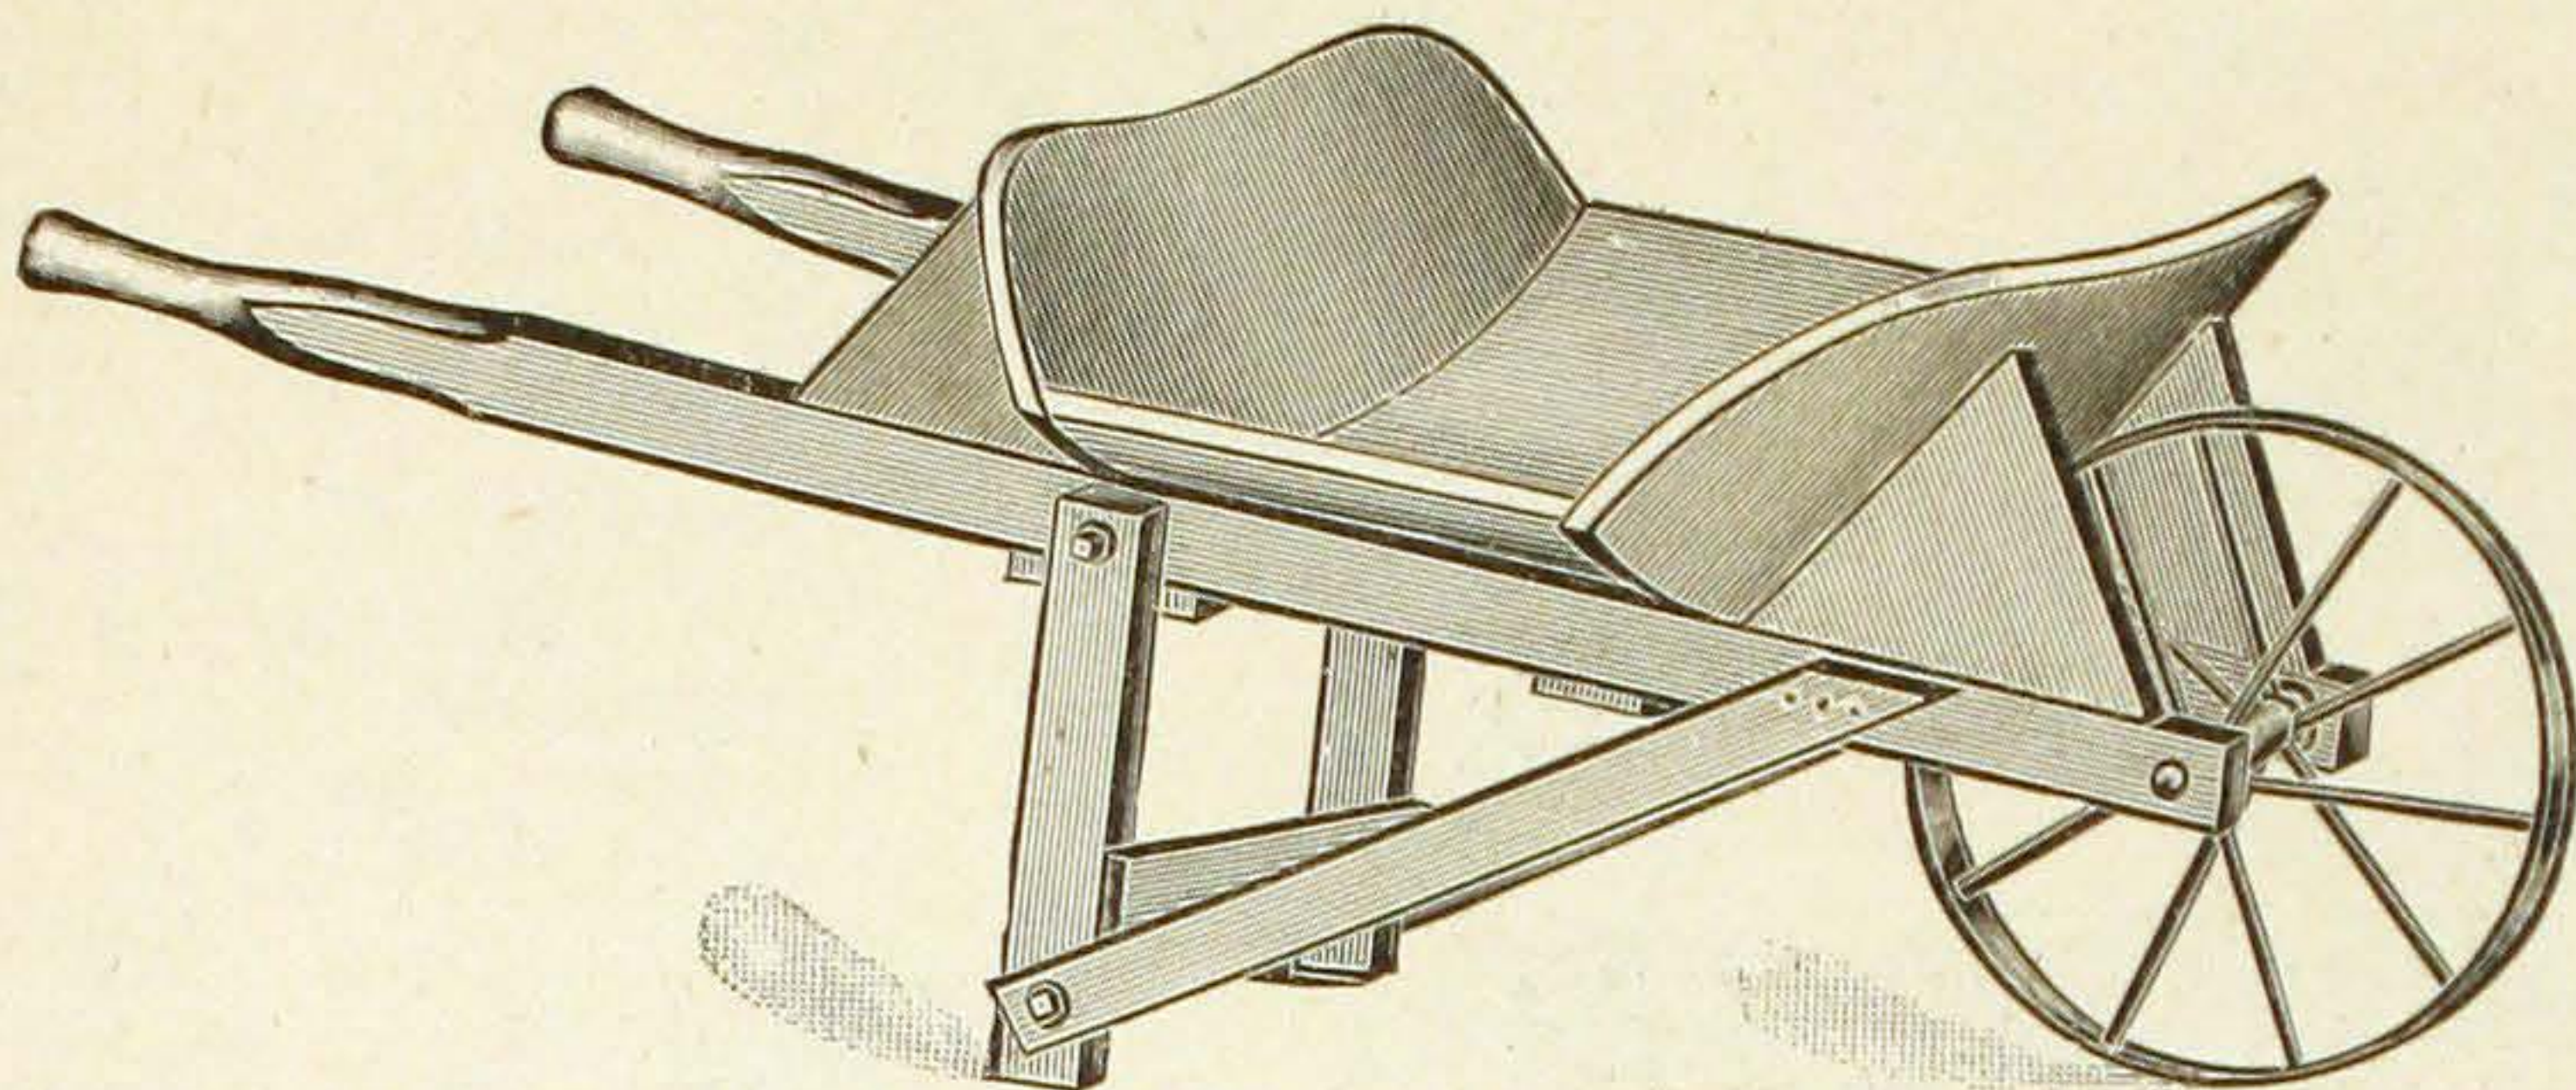

Grade 3, Polished and Nickeled, per pair, 4.50

Grade 5, Polished and Nickeled, with Diamond Toe, per pair, 5.50

Grades 3 and 5 furnished with extra wide blades, at \$1.00 per pair additional.
